RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE BHAGULPORE DIVISION FOR THE YEAR 1889-90.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 16th September, 1890.

RESOLUTION.

READ—

The Annual General Administration Report of the Bhagulpore Division for the year 1889-90.

The divisional report is written by Mr. Quinn, who took charge of the office of Commissioner only during the last month of the year, and all the district reports, except that of Maldah, have been submitted by Collectors who were without personal experience of the facts recorded. This consideration affects specially the account given of the annual tours, which can be of much interest only when it is made by the officers who travelled. The arrangements of the Commissioner were disturbed by illness, more or less severe, and the same cause prevented the Collectors of Monghyr, Bhagulpore, and Purneah from devoting to inspection duty the full period prescribed. In Purneah the tour was insufficient owing to changes of officers during the year. The Lieutenant-Governor notices with satisfaction that the tours of the Sub-divisional Officers were in every instance complete.

Tour.

2. The outturn of the harvest of 1888-89 was seriously deficient, being on the divisional average 10½ annas for rice and 10 annas for wheat, while in the Bhagulpore district

Crops, prices, and condition of the people.

the rice harvest was 8 annas only. In the natural sequence prices were high during 1889-90, common rice averaging 15¼ seers a rupee against 17⅝ seers in the previous year. In the Soopol sub-division of Bhagulpore there was a tract classified as distressed where relief operations were undertaken in accordance with the Famine Code. Mr. Wace, Collector of Bhagulpore, observes—

"In those tracts which suffered from the drought of 1888, there was great cause for anxiety in the early part of the year in respect of both the small cultivators and the labourers. The latter were helped by the relief works which were started at various points, but things never got bad enough to drive those classes which are ordinarily above labour on to the works. All through April and May these classes were much pinched in the north-east of Soopol, the north-east and centre of Banka, and in the south-west of the Sudder sub-division. The village mahajun's heart remained as hard as the ground till the rains fell, and ryots seemed to think that Government would repeat the lavish operations of 1874. Advances were, however, kept for the tracts specified above. In Naradigur our work was well supplemented by the Maharaja of Durbhunga. As usual the mahajun came forward when the rain fell at last, and an increase in the registration returns under mortgages and sales shows that he was used more freely than usual, and I fear the year closes with the small cultivators more indebted than ever. They have, however, benefited by getting better prices for the surplus of the harvest just over than they could have expected considering its abundance. The Managers of the Durbhunga Raj and of the Srinagore estate each reports that the advances they made are being rapidly paid up."

The crop of 1889-90 was distinctly better, averaging 14⅘ annas for rice, 11⅕ annas for wheat; but prices have been even higher, perhaps because stocks had been depleted, and the harvest, though tolerable, was not sufficient to replenish them. In Maldah wages of unskilled labour are reported to have risen during the last two years with the price of food, being 3 to 4 annas a day against 2 to 3 annas in 1887-88, and a similar tendency is observed in the district of Purneah. In Monghyr, Bhagulpore, and the Sonthal Pergunnahs no change has been observed in the former rate of two annas a day, as to which the Commissioner, moreover, observes that he does not believe the ordinary agricultural labourers are so highly paid in the interior of the district. Mr. Quinn states that "it may safely be said that the general condition of the people affords no ground for despondency, and that they were distinctly better off at the close than at the beginning of the year. The picture of the Sonthal Pergunnahs, as drawn by the Deputy Commissioner, is decidedly cheerful." It is probable that the ryots have derived advantage from the high price of rice during the year, their harvests not being deficient, though some portion of the surplus must have gone to replenish stocks and pay debts contracted during the bad season of 1888-89. The labourers north of the Ganges have received full compensation for the enhancement in the cost of living by a rise in wages, and the fact is one of the most assuring observed in recent years. South of the Ganges, in so far as they are paid in money, the working classes must have suffered.

Public health.

3. In the districts south of the Ganges there was a considerable increase in the number of registered deaths, which were 63,308 in Monghyr against 53,213 in the previous year, 52,214 in Bhagulpore against 48,239, and 28,530 in the Sonthal Pergunnahs against 21,140. The cause of the variation is not explained, but it seems that the year 1888-89 had been unusually healthy, and the high price of provisions must have affected unfavourably the condition of the poorest class in 1889-90. In the districts north of the Ganges, where there is less poverty, the death-rate did not increase. Of Purneah the Commissioner writes—

"The chief feature as regards the health of this district was the great epidemic of cholera which, spreading from the Karagola fair in February 1889, in which month only 125 deaths were recorded, caused 6,198 deaths in March and reached its maximum in the appalling total of 10,232 deaths in April, the first month of the official year under report. The epidemic came to an end in May, in which month 625 deaths were recorded. Two special Civil Hospital Assistants were deputed to the Arrareah sub-division, and cholera medicines were given away freely by the District Board. The total number of deaths from cholera registered during the official year was 12,690 against 883 in the previous year. Deaths from fever amounted to 36,231 against 40,609 in the preceding year. There was practically no small-pox, a result attributed by the Civil Surgeon to the efficiency of the Vaccination Department. The total number of deaths registered in the district during the year was 49,418 against 41,661 in the preceding year. Speaking generally, the health of the district was, except for the cholera epidemic, better than usual. The heavy rain and floods appear to have lessened the tendency to malarious fever."

The Lieutenant Governor notices with pleasure the statement that vaccination has been fairly maintained throughout the Division, and there was no serious outbreak of small-pox, though in some districts the deaths from this cause were more numerous than in the preceding year.

Manufacture and trade.

4. The statistics of manufactures appended to the report are valuable as a beginning, but cannot be relied upon in every case. It is, for instance, impossible to believe that the value of indigo produced in Bhagulpore, returned at over eleven lakhs in 1888-89, had declined to little more than half a lakh in 1889-90. In regard to trade, the increased importation of food and the diminished importation of piece-goods are explained by the failure in the crops of the previous year. There was a marked falling off in the export of piece-goods to Nepal, attributed to the existence of an accumulated stock in that country. The Commissioner observes—

"The opening of the part of the Purneah Section of the Assam-Behar State Railway from Kusba to Forbesgunge during the year has considerably changed the trade routes of the western and northern parts of the Arrareah and Sudder sub-divisions. Produce is now brought from Nepal to Forbesgunge, and thence taken to the Manihari Ghât, where it is shipped and carried westwards by river to Revilgunge. The Kusi boat trade is being abandoned in favour of the railway."

In Purneah the Collector mentions as a new feature in the trade of the district that in Kishengunge the people are beginning to form joint stock companies, and are gradually superseding the Bengali merchants who used to monopolise the trade at that place.

Justice and Police.

5. The Commissioner reports favourably of the working of the magistracy, and in particular of the Honorary Magistrates and Benches. Progress was made in securing the regular payment of chowkidars and their attendance at the police-stations. On the other hand the police are said to have done well only in the district of Maldah, and there was an increase in crime, the total number of cognizable cases being 15,864 against 14,507 in the previous year; of non-cognizable complaints 11,395 against 10,905. This is but partly explained by the large number of prosecutions under Municipal and special Acts.

Land and land revenue administration.

6. The collections on the large Government estate of Damin-i-Koh in the Sonthal Pergunnahs were satisfactory, as with a rent roll of Rs. 1,69,497 there were no remissions and a balance uncollected of only Rs. 832. But in the division generally the arrears at the end of the year were large, amounting to 6·2 per cent. of the land revenue demand, and it is remarkable that even on permanently-settled estates the outstandings were considerable, being 5 per cent of the demand. More than a tenth of the estates defaulted during the year, and 152 were actually sold. In the face of these results, it is not understood how the Commissioner comes to consider that the present system of working the Sale Laws in Bhagulpore Division, which apparently consists in treating the day of auction as the last day for payment, has secured the revenue without hardship to individuals. It is not, however, desirable to make any great change by executive orders at present, as the law on the subject will probably be recast at no distant date. The report does not state what progress has been made in the large settlements of private estates by public authority which have been in progress during the year in Bhagulpore, Monghyr, Purneah, and the Sonthal Pergunnahs, though they constituted the most novel and not least important of the proceedings taken by Government in connexion with agrarian matters.

Education.

7. The Lieutenant-Governor notices with satisfaction an increase in the number of schools from 4,785 to 5,293, and of pupils from 88,473 to 93,947. This extends to institutions of all classes except those entered as "middle vernacular." It is specially observed that primary education has been a distinct advance both among boys and girls, and that candidates from the Division did well at the Entrance examination of the Calcutta University.

Local Self-Government institutions.

8. The Commissioner reports that local bodies appear to have on the whole worked fairly well during the year, though the record is not entirely satisfactory. The Lieutenant-Governor was very favourably impressed by the readiness with which the Bhagulpore District Board co-operated in the work of relieving distress.

Zemindary dák.

9. The rate at which this contribution is levied was changed during the year in all districts, being lowered in two and raised in three. Zemindars have recently objected to such annual alterations as making the incidence of the change uncertain, and changes should be avoided when this can be conveniently arranged. The Lieutenant-Governor would indeed be glad to meet a wish, once expressed by the head of the Postal Department, to commute this fluctuating impost for a fixed demand, settled in perpetuity, and a proposal for commutation has also been put forward on the part of the zemindars, though on pecuniary terms, which are not admissible.

Conduct of zemindars.

10. Favourable mention is made of the Maharajah of Durbhanga, whose estates extend into Bhagulpore, of Maharajah Taruk Nath Ghose, and of Mr. Grant, in the Sonthal Pergunnahs, for liberal management of their property.

Conduct of Public officers.

11. The thanks of the Lieutenant-Governor are given to Mr. Stevens for efficient management of the division during the greater portion of the year. His successor, Mr. Quinn, has also given indications of administrative ability. The report bears witness to the many excellent qualities of the late Mr. Coxhead, whose premature death Sir Steuart Bayley has had to deplore since the close of the year. Mr. Wace's excellent work in connexion with the scarcity in his district attracted the special notice of the Lieutenant-Governor, and Mr. W. C. Macpherson is stated to have thrown himself with great effect into the task of improving the administration of his district. Among junior members of the Civil Service, Mr. Luson is noticed for the thoroughness with which he dealt with important business connected with Wards' estates, Mr. Monahan and Mr. Streatfeild for general efficiency. Several Deputy Collectors have been favourably mentioned, among whom may be noted Baboo Soorjo Coomar Sen.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE GOVERNMENT CINCHONA PLANTATION AND CINCHONA FACTORY IN BENGAL FOR THE YEAR 1889-90.

FINANCIAL DEPARTMENT—MISCELLANEOUS.

Dated Calcutta, the 7th September 1890.

RESOLUTION.

READ—

The Annual Report of the Government Cinchona Plantation and Cinchona Factory in Bengal for the year 1889-90.

At the close of the year the plantation consisted of 4,682,401 trees of various ages and of a nursery stock containing 264,000 seedlings. The crop collected amounted to 304,705 pounds against 373,100 pounds in 1888-89. It was composed of 140,310 pounds of red or *succirubra* bark, 131,055 of Ledger's *calisaya*, 5,310 of *calisaya verde* and *morada*, and 28,030 of hybrid bark.

2. The outturn of the factory, which is regulated by the demand, was 1,833 pounds of sulphate of quinine and 6,578 pounds of febrifuge. The entire quantity of the quinine and a greater portion of the febrifuge were manufactured by the new fusel oil process which has now entirely taken the place of the old acid and alkali method of manufacture. The quinine is of excellent appearance, and in purity compares favourably with most of the brands of European

manufacture. The issues from the factory rose from 7,489 pounds in 1888-89 to 7,680 pounds in 1889-90, as will be seen from the following table :—

	1889-90.		1888-89.	
	lb	oz.	lb	oz.
To Medical Depôt, Calcutta ...	2,197	0	2,140	0
Ditto, Bombay ...	2,224	0	1,250	0
Ditto, Madras ...	.....		1,300	0
To Inspector-General of Civil Hospitals, Bengal	352	8	425	0
To Inspector-General of Jails ...	149	9	121	12
Sold to Government officers and to the public	2,756	0	2,251	4
Given as samples	1	0	1	4
Total ...	7,680	1	7,489	4

3. The revenue derived from the sale of sulphate of quinine, cinchona and crystalline febrifuge, cinchona bark and other products of the plantation amounted to Rs. 1,13,693-12-6 in 1889-90, against Rs. 1,29,160-3 in the previous year, as shown below—

	1889-90.			1888-89.		
	Rs.	A.	P.	Rs.	A.	P.
By sale of febrifuge, sulphate of quinine and bark to the public	43,112	13	0	37,706	0	0
By credit from the Medical Depôts	63,374	11	6	82,322	3	0
By credit from the Inspector-General of Civil Hospitals, Bengal ...	5,056	2	0	7,059	0	0
By credit from the Inspector-General of Jails, Bengal ...	2,150	2	0	2,073	0	0
Total ...	1,13,693	12	6	1,29,160	3	0

The net profit on the working of the cinchona estate amounted to Rs. 18,967-9-10 in 1889-90 against Rs. 27,844 in 1888-89, and is not unsatisfactory when the depressed condition of the cinchona industry is taken into consideration. It is understood that the exportation from Ceylon has at last begun to fall off, and in this case quinine will probably soon rise in price, and the demand for cinchona febrifuge will also increase.

4. Dr. King gives a favourable report of the good work done by the subordinate officers of the plantation and factory, and the Lieutenant-Governor is glad to again acknowledge the efficient services of Dr. King and of Mr. Gammie in their administration of the Department.

ORDER.—Ordered that a copy of this Resolution and of the Report referred to be forwarded to the Government of India in the Home Department, to the Political (Medical) Department of this Government, to the Superintendent of the Government Cinchona Plantation, to the Government of Madras, and to the Inspector-General of Civil Hospitals, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Secretary to the Govt. of Bengal.

ANNUAL REPORT ON THE GOVERNMENT CINCHONA PLANTATION AND FACTORY IN BENGAL FOR THE YEAR 1889-90.

No. 360, dated Royal Botanic Garden, Seebpore, near Calcutta, the 14th July 1890.

From—Brigade-Surgeon George King, M.B., Superintendent, Royal Botanic Garden, Calcutta, and Cinchona Cultivation in Bengal, and Officiating Government Quinologist,

To—The Secretary to the Government of Bengal, Financial Department.

I have the honour to submit herewith the annual report of the Cinchona Plantations and Factory for the year 1889-90.

Twenty-eighth Annual Report of the Government Cinchona Plantation and Factory in British Sikkim for the year 1889-90, *by* Brigade-Surgeon G. King, M.B., LL.D., F.R.S., C.I.E., *Superintendent of the Royal Botanic Garden, Calcutta, and of Cinchona Cultivation in Bengal, and Officiating Government Quinologist.*

1. The weather during the year presented no unusual features. The plantation suffered neither from excessive rain nor from drought, nor was any great mischief done by hail or landslips; and the growth of the plants both in the nurseries and in the open was on the whole favourable.

2. *Changes in the Plantation.*—The total number of trees uprooted for their bark during the year, or which died from natural causes, was 373,690. Of this total, 270,000 were red barks, the rest being either yellow barks or hybrids. Many of the red barks were small stunted trees which yielded very little bark. On the other hand, 245,860 new trees—exclusively yellow barks and hybrids—were planted. The renewals were thus less numerous than the losses, a circumstance which is due to the enormous destruction of nursery stock by the violent hailstorm which passed over the plantation in March 1889, and which was alluded to in my last annual report. A reference to the table which forms Appendix C of this report shows that at the end of the year under review the plantation consisted of 4,682,401 trees of various ages, and of a nursery stock amounting to 264,000 seedlings. Of the trees in the open, there are now only 1,612,000 red barks, and amongst the nursery stock there are none of this sort. the intention being gradually to convert the plantation into one exclusively of quinine-yielding species.

3. *The year's crop.*—The crop collected during the year amounted to 304,705 pounds. This total is composed of 140,310 pounds of red or succirubra bark, 131,055 of Ledger's calisaya, 5,310 of calisaya verde and morada, and 28,030 of hybrid bark. The proportion contributed by the plantations is as follows: the old plantation (Rungbee and Mungpoo) yielded 222,025 pounds, Sittong 50,180 pounds, and the young plantation at Rungjung in the Bhootan Hills 32,500 pounds. With the exception of 310 pounds sold and issued on indents to jails, the whole crop was as usual made over to the factory.

4. *Expenditure on the plantation for the year.*—The total budget allotment for the plantation was originally Rs. 85,795; but as the year advanced it was found necessary to apply for a transfer of Rs. 10,000 from the plantation to the factory budget. On the grant, thus reduced to Rs. 75,795, there was a saving of Rs. 6,598-6, the net expenditure for the year having amounted to only Rs. 69,196-10. The details of the expenditure are as follows:—

	Rs.	A.	P.
European establishment (including all salaries except that of Dr. King, Superintendent of the Botanic Garden, Calcutta), cooly labour and office establishment ...	62,363	8	8
Keep of animals for plantations	900	0	0
Contingencies, &c., including service postage stamps ...	4,635	5	0
Travelling allowance	458	12	0
Stores from England	839	0	4
Total ...	69,196	10	0

Against this expenditure there is to be put the crop of 304,705 pounds of dry bark, the net cost of each pound of which was therefore 3 annas 7·602 pies.

5. *Factory.*—The original budget allotment for the factory was Rs. 32,515, which sum was subsequently increased by a transfer from the plantation budget to Rs. 42,515. The expenditure, however, exceeded this amount by Rs. 571-13. A large part of the factory expenditure was on machinery for working the new

fusel oil process, and this ought really to be debited to capital. But the factory has no capital account, all charges connected with it having hitherto been debited to current working expenses. And I have not thought it necessary on the present occasion to deviate from this practice, especially as such heavy expenditure on plant is not likely to be necessary for some time. To the cash expenditure of Rs. 43,086-13 there has to be added the cost of the bark used and of stores received from England. These items are as follows:—

	Rs.	A.	P.
Factory expenditure on chemicals, oil, labour and machinery	38,845	6	11
Stores from England	4,241	6	1
Cost of bark used, 137,898 pounds of crop of 1888-89 at 3 annas 1·333 pies per pound ...	26,813	4	3
100,022 pounds of crop of 1889-90 at 3 annas 7·602 pies per pound	22.714	5	9
Total ...	92,614	7	0

The products manufactured for this sum consisted of 1,833⅛ pounds of sulphate of quinine at a net cost of Rs. 11-14-3·026 per pound, and of 6,578 pounds of febrifuge at a net cost of Rs. 10-12-3·026 per pound. In short the quinine cost Rs. 11⅞ and the febrifuge Rs. 10¾ per pound.

6. *The fusel oil process of manufacture.*—The whole of the quinine and the greater part of the febrifuge were manufactured by the new fusel oil process; and, as the arrangements for working this process were quite completed during the year, the old acid and alkali method of manufacture has now been definitively abandoned. An additional year's experience of the fusel oil process confirms my previously expressed opinion of its complete success. The quinine turned out by it is of excellent appearance and great purity, in the latter respect comparing favourably with most of the brands of the drug of European manufacture.

7. *Sales of febrifuge and quinine during the year.*—The total issues for the year were 6,393¾ pounds of febrifuge, 1,252 pounds of quinine, and 34 pounds of crystalline febrifuge. These were distributed as follows:—

Details of the distribution of Cinchona Febrifuge, Crystalline Febrifuge, and Sulphate of Quinine during the financial year 1889-90.

	lbs.	oz.
To Medical Depôt, Calcutta—		
Cinchona febrifuge	1,997	0
Sulphate of quinine	200	0
To Medical Depôt, Bombay—		
Cinchona febrifuge	1,750	0
Sulphate of quinine	474	0
To Inspector-General of Civil Hospitals, Bengal (for district medical officers of Bengal)—		
Cinchona febrifuge	333	12
Crystalline „	18	12
To Inspector-General of Jails, Bengal (for jails and lock-ups in Bengal)—		
Cinchona febrifuge	141	12
Crystalline „	7	12
Sulphate of quinine	0	1
Sold to Government officers and to the general public—		
Cinchona febrifuge	2,170	4
Crystalline „	7	8
Sold to Government officers—		
Sulphate of quinine	578	4
Given as samples—		
Cinchona febrifuge	1	0
Total ...	7,680	1

This is better by 191 pounds than the issues of the previous year, which amounted to only 7,489¼ pounds.

8. *Stock account.*—The bark in stock at the end of the year amounted to 426,275 pounds. Part of this bark (221,892 pounds) is of the crop of 1888-89, which cost 3 annas 1·333 pies per pound, and the remainder (204,383 pounds) is of the crop of 1889-90, which cost 3 annas 7·602 pies per pound. To save trouble in future calculations, I have taken the whole at its average cost, viz.

3 annas 4·338 pies per pound. The manufactured products have been taken at their actual cost, and the chemicals and other stores rather below their estimated value. As compared with that of 1888-89, the stock of last year stands thus:—

Stock on 31st March 1889.

	Rs.	A.	P.
Chemicals and stores ...	10,000	0	0
Cinchona febrifuge, 1,375 pounds, at Rs. 12-10-8·08 per pound ...	17,417	3	10

Cinchona febrifuge, 1,559½ pounds, at Rs. 10-12-3·026 per pound ...	16,786	13	2
Crystalline febrifuge, 20 pounds, at Rs. 16-6-2 per pound ...	327	11	4
Sulphate of quinine, 1,562 pounds 13 ounces, at Rs. 11-14-3·026 per pound	18,583	0	5
Bark, 426,275 pounds, at an average of 3 annas 4·338 pies per pound	89,559	6	1
Total ...	1,28,256	15	0

There has thus been a considerable increase in the value of the stock. In other words the off-take of our manufacture has not kept pace with our production, nor has it increased in proportion to the reduction in the price of febrifuge from Rs. 16-8 to Rs. 14 and of quinine from Rs. 20 to Rs. 17 per pound. Although this result is to be regretted, it is not to be wondered at, since the price of all cinchona products in the open market still continues very low, and quinine is obtainable in the bazars at an unprecedentedly cheap rate, much of it, however, being of inferior quality.

9. *Financial result of the year's working.*—The figures already given afford the means of forming a balance sheet showing the exact financial result of the year's working. This is as follows:—

BALANCE SHEET.

Dr.	Rs.	A.	P.	Rs.	A.	P.	Cr.
To value of stock on 31st March 1889	1,10,699	10	8				By value of stock on 31st March 1890 ... ... 1,28,256 15 0

Cash ... 1,410 6 0							By credit from Medical Depôts for sulphate of quinine, viz.—
Increase of stock of quinine, febrifuge and bark ... 17,557 3 10							Rs. A. P.
	18,967	9	10				Calcutta ... 3,103 2 0
							Bombay ... 7,813 9 6
							10,916 11 6
							By credit from Inspector-General of Civil Hospitals, Bengal, for cinchona and crystalline febrifuge supplied to medical officers of Bengal, viz.—
							For cinchona febrifuge ... Rs. 4,680 A. 2 P. 0
							For crystalline febrifuge ... 376 0 0
							5,056 2 0
							By credit from Inspector-General of Jails, Bengal, for cinchona and crystalline febrifuge and sulphate of quinine supplied to jails and lock-ups in Bengal, viz.—
							For cinchona febrifuge ... Rs. 1,986 A. 10 P. 0
							For crystalline febrifuge ... 157 0 0
							For sulphate of quinine ... 1 8 0
							2,145 2 0
							By credit from Inspector-General of Jails, Bengal, for cinchona bark supplied to the medical officer of the Alipore Jail Hospital 5 0 0
Total ...	2,41,950	11	6				Total ... 2,41,950 11 6

This shows a balance of profit of Rs. 18,967-9-10, which, in the present depressed condition of the cinchona industry generally, may, I trust, be accepted as satisfactory. This profit, as will be observed, is composed largely of increase in the amount of the stock of quinine, febrifuge, and bark in hand at the end of the year, as compared with the value of the stock at its commencement. It would have been more satisfactory had the cash realizations been greater, but in the present depressed condition of the industry it is a matter for congratulation when a cinchona estate is worked without actual loss. As was explained in last year's annual report, the extraordinary fall in the price of quinine during the past few years has been due to excessive exportation of cinchona bark from Ceylon. Statistics, however, show that this exportation is at last beginning to fall off. Before very long it is therefore probable that quinine will rise in price and that the demand for cinchona febrifuge will again increase. It is of course only from the narrow point of view of a cinchona grower that an increase in the price of so useful a medicine can be considered as desirable. From the point of view of Government, it would be a misfortune, since it would increase to the people the price of the best medicine for fever.

10. The crop of bark for the current year will as usual be taken with reference to the requirements of the factory.

11. The sum of Rs. 2,377-9 received for grazing and land rent was paid into the Darjeeling cutchery, no credit being taken for it in the above accounts.

12. The fuel plantation was thinned for the first time this year, and a large quantity of poles, more or less useful for building as well as for fuel, was taken out. The growth of this plantation continues to be most satisfactory.

13. Mr. J. A. Gammie, the Deputy Superintendent of the plantation and factory, was absent on privilege leave for three months; but during the rest of the year he was in executive charge at Mungpoo. His services require no recommendation from me. Mr. R. Pantling, the senior assistant, went on furlough towards the end of the year, and Mr. G. Gammie was appointed to officiate for him. Messrs. Pantling, Parkes, G. Gammie and Hartless have all worked well; as also have the head writer, Baboo Gopal Chandra Datta, and the second clerk, Baboo Davendra Nath Basu.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ADMINISTRATION OF THE SALT DEPARTMENT FOR THE YEAR 1889-90.

FINANCIAL DEPARTMENT—SALT.

Calcutta, the 9th September 1890.

RESOLUTION.

READ—

The report of the Board of Revenue on the administration of the Salt Department for the year 1889-90.

The following statement shows the receipts and charges of the Department since 1884-85 :—

The results of the year under review, as compared with the previous year, show a decrease of Rs. 2,33,974 in receipts and an increase of Rs. 34,750 in charges. The decrease in the revenue from import duty is attributed to smaller clearances of duty-paying salt, while the manufacture of excise salt in Orissa has not recovered from the change of system under which the administration has been transferred from the Government of Bengal to that of Madras. On the other hand, it is to be remembered that large quantities of Ganjam salt, on which the duty is paid in Madras, are now consumed in Orissa. The increase in the receipts from "Rent of warehouses" is due to increased bonding operations, induced partly by the larger steamer traffic and partly by the reduction of the rate of rent from Rs. 5 to Rs. 3 per 1,000 maunds. The rent was reduced in April 1887, and although in the first instance it was followed by a reduction in receipts, the result in the long run has fully justified the change of policy then introduced. A further help to bonding operations will be afforded by the erection of pontoons in front of the Golahs, and the construction of a shunting line connecting them with the Howrah terminus, recently sanctioned by Government. The increase in charges is due principally to the purchase of Mr. Kilby's patent scales for weighing salt and to larger refunds of customs duty.

2. The total quantity of salt in stock at the commencement of the year was 20,46,288 maunds, comprising 18,99,649 maunds of imported salt and 1,46,639 maunds of excise salt. During the year 1,00,72,857 maunds were imported and 70,293 maunds were manufactured, against 1,04,80,285 and 2,44,512 maunds in the previous year. The falling off in imports was occasioned by smaller importations of Liverpool salt, due to the large stocks in bond, the raising of the price by the Salt Syndicate, and the growing practice of importing salt by the

Suez Canal steamers. There can be no doubt that the action of the Cheshire Salt Syndicate has acted very prejudicially to the Liverpool trade, the exports from the United Kingdom having decreased from 83 lakhs of maunds to 70 lakhs, while there has been a corresponding increase in the trade from Hamburg, amounting to 4,44,000 maunds, from the Arabian and Persian Gulfs amounting to 2,70,000 maunds, and from Aden amounting to 4,44,000 maunds. The large increase in steamer traffic is also a point deserving special consideration. Three years ago the whole of the salt imported came in sailing vessels, but during the past year 27 steamers brought 10,51,557 maunds. Mr. Armstrong, the Collector of Customs, observes that the tendency of this change in the trade is to limit the quantities imported to actual requirements.

3. The decrease in the clearances of salt from shipboard, amounting to 10,24,796 maunds in Calcutta and 1,06,748 maunds in Chittagong, has been counterbalanced by larger clearances from bond, which amounted to 32,64,318 maunds, against 23,85,541 maunds in 1888-89. The consumption in saliferous districts, other than Orissa, showed a decrease of 33,880 maunds as compared with the previous year. The decrease chiefly occurred in Midnapore, and to a lesser extent in the 24-Pergunnahs, and is attributed to the prevailing scarcity. The proportion of seizures to unsuccessful searches (1,476 to 363) was not so good as last year, but the number of seizures shows a very large increase. In the two districts of Midnapore and Backergunge the number of unsuccessful searches exceeded that of seizures. This result is far from satisfactory, and the Lieutenant-Governor is glad to see that it has attracted the careful attention of the Board. The Board have rightly understood that the orders of Government, conveyed in last year's Resolution, that "the police, instead of hunting for trivial cases of illicit manufacture, should rather direct their attention to cases of illicit manufacture for sale," were not at all intended to be read as a permission to make salt for home consumption. Any manufacture of salt without a license duly obtained is illegal. But the policy of Government in regard to salt has always been a liberal one. While, on the one hand, there can be little doubt that the salt revenue is continually defrauded by persons who carry on illicit manufacture with comparative impunity, and it is essential that the police should not relax their exertions to put a stop to systematic manufacture with a view to sale, it must be remembered that the poorer country folk have from time immemorial been in the habit of manufacturing salt, the materials of which lie at their very doors, for their own use, and that the rigorous prosecution of the law in prevention of this practice may very easily create suffering and distress among them, in comparison with which the loss of revenue incurred is but a trifling matter. The question is one of acknowledged difficulty, and much must depend on the discretion and capacity of individual officers in dealing with the penal provisions of the law.

4. The despatches of salt into the interior by the different water routes and railways, as shown in the following table, show a decrease of 2,99,263 maunds:—

Year.	Vid Balli Khall.	Vid Sankrail.	Vid Gewankhally.	Vid Kidderpore.	Vid Balliaghatta.	Total carried by water.	By the East Indian Railway.	By the Eastern Bengal and Calcutta and South-Eastern Railway or vid Chitpore.	Vid Ruthtolla Ghat.	Total carried by rail.	Grand Total.
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
1888-89	10,81,504	6,49,876	2,79,496	3,62,140	16,66,266	40,38,084	35,60,027	10,23,303	17,625	45,96,955	86,35,039
1889-90	10,26,288	5,32,651	2,45,352	2,97,220	17,00,557	38,02,068	35,42,162	9,82,780	9,666	45,34,608	83,36,976
Increase	.....	.....	.....	.....	34,291	.....	.....	.....	.....	.....	.....
Decrease	55,216	1,16,925	34,146	64,920	...	2,30,916	13,865	40,523	7,959	62,347	2,99,263

There was some discussion during the past year regarding the abolition or modification of the present rowannah system, but it has eventually been decided that no alteration in it is at present necessary.

5. The proposal to extend the Indian Salt Act to the whole of the Province, to which reference was made in last year's Resolution, has been abandoned; but the Act has been extended to the town of Calcutta, as well as the area included in a radius of two miles from its limits, and the control of the saltpetre refineries within this locality has been entrusted to the Commissioner of Northern Indian Salt Revenue.

6. Mr. Kilby's scales for the weighment of salt have now entirely superseded the old scales in the port of Calcutta, and the proposal to introduce them in the Chittagong port has recently been sanctioned by Government. The Lieutenant-Governor is glad again to observe that Mr. Kilby, the Superintendent of the Sulkea Salt Golahs, has continued to discharge his duties in a very satisfactory manner.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Secretary to the Government of Bengal.

APPOINTMENT OF A COMMITTEE TO CONSIDER THE QUESTION OF THE FOUNDATION AND FUTURE MANAGEMENT OF A NEW LEPER ASYLUM FOR CALCUTTA.

MEDICAL.

Dated the 16th September 1890.

READ—

Bengal Government Resolution, dated the 29th July 1890, regarding the foundation and future management of a new Leper Asylum for Calcutta.

Letter from the President of the District Charitable Society, No. 402, dated the 5th August 1890.

Letter from the Joint Honorary Secretaries to the Prince Albert Victor Permanent Memorial Fund, dated the 12th August 1890.

Letter from the Chairman of the Corporation of Calcutta, No. 3902, dated the 1st September 1890.

In the Resolution cited in the preamble the outline of a scheme for providing Calcutta with a new, enlarged and improved Leper Asylum was indicated, and it was proposed that the whole question should be considered by a Committee consisting of the President and two members of the District Charitable Society, the Chairman and two members of the Corporation of Calcutta, Mr. W. J. Simmons on the part of the Public Health Society, Calcutta, a representative of the Prince Albert Victor Permanent Memorial Fund, and two medical officers to be selected by Government. It was added that the Lieutenant-Governor might appoint additional members should it be found necessary to do so. The Resolution was duly communicated to the Corporation and other bodies named therein, and they were asked to nominate their representatives for appointment to the Committee. Their replies have now been received, and the Lieutenant-Governor is pleased to sanction the formation of a Committee composed of the following gentlemen :—

President :

1. The Hon'ble Justice H. T. Prinsep, President of the District Charitable Society.

Members :

2. Mr. J. Lambert, C.I.E.
3. Mr. H. Lee, C.S., Chairman of the Corporation of Calcutta.
4. Mr. W. J. Simmons, Representative of the Public Health Society, Calcutta.
5. Nawab Abdul Luteef Bahadur, C.I.E., a representative of the District Charitable Society.
6. Babu Issur Chunder Mitter, a representative of the District Charitable Society.
7. Babu Surendra Nath Banerji, a representative of the Corporation of Calcutta.
8. Mr. W. M. Osmond, a representative of the Corporation of Calcutta.
9. Babu Amrita Nath Mitter, Representative of the Subscribers to the Permanent Memorial Fund.
10. Surgeon-Major W. H. Gregg, Sanitary Commissioner for Bengal.
11. Dr. W. J. Simpson, Health Officer for the Town of Calcutta.

Secretary :

Mr. Patrick McGuire, Secretary, District Charitable Society.

The Committee are requested to take into consideration the suggestions contained in the concluding paragraph of the Government Resolution of the 29th July last, and to favour the Lieutenant-Governor with their views in connection with the establishment and management of the proposed institution.

ORDER.—Ordered that a copy of this Resolution be communicated to each of the members of the Committee.

Ordered also that the Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,

Offg. Chief Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 13th September, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.

	Uluberiah ...	0·74	
	Central Districts.		
	Presidency Divn.		
6	**24-Pergns.** Sept. 16, '90	1·55	Weather—seasonable. Floods in the Bussirhat sub-division are subsiding. Harvesting of *aus* paddy and jute still going on. Transplantation of *amun* paddy nearly finished. Some injury to standing crops in thana Baduria expected from the floods. Prices stationary. Relief in the shape of rice, dál, &c., is being given to the persons in the northern part of the Bussirhat sub-division, who have suffered from the floods and are destitute of any means.
7	**Nuddea** „ 13, '90	0·08	Weather—hot. Harvesting of *aus* almost over. State of *amun* not affected by flood is good. Rivers falling gradually. Sowing of cold-weather crops commenced.
	Kushtea ...	0·16	
	Chuadanga ...	0·13	
	Ranaghat ...	3·08	
8	**Khoolna** „ 13, '90	0·38	Weather—hot with little or no rain. *Amun* has been destroyed in thana Kalaroa and in portions of Satkhira and in low lands generally in the north of the district by the flood. Reaping of *aus* going on. Prospects of *amun* in the southern thanas very good.
	Bagirhat ...	0·15	
	Satkhira ...	Nil	
9	**Jessore** „ 13, '90	0·52	Weather—hot. Flood-water subsiding everywhere. Prospects in Magura and Narail fair. Two officers have been deputed to Bongong and one to Jhenidah to make enquiries about extent of damage to crops.
	Jhenidah ...	0·07	
	Magura ...	Nil	
	Narail ...	Nil	
	Bongong ...	1·36	
10	**Moorshedabad** „ 13, '90	0·07	A break in the rains. Flood rapidly subsiding. *Kalai* being sown. Harvesting of *aus* going on. Some transplantation of *haimanti* paddy still being made. Rain wanted for *amun* paddy. Agricultural loans and charity being distributed to those in distress. Some fodder also being supplied to cattle. Coarse rice 13½ seers per rupee.
	Rajshahye Divn.		
11	**Dinagepur** „ 13, '90	2·08	There have been showers, and the weather has been cooler than in the preceding week. Prospects of crops continue favourable. Outturn of *bhadoi* and jute may still be estimated at 18 annas. Price of rice unchanged.
	Thakurgaon ...	4·03	
12	**Rajshahye** „ 13, '90	0·46	Weather—hot and cloudy. Floods subsiding. Prospects of crops fair in Nowgong and Nattore. Damage about 4 annas in Nowgong. Sudder subdivision has suffered most, but prospects as yet not unfavourable.
	Nattore ...	2·41	
	Nowgong ...	0·79	
13	**Rungpur** „ 13, '90	1·21	Rain appears to be breaking up. Heavy thunderstorms alternate with long spells of sunshine. Transplantation of *amun* rice continues. Cutting and steeping of jute progresses rapidly. Sugarcane looks well, and prospects generally excellent.
	Gaibanda ...	0·72	
	Nilphamari ...	6·0	
	Kurigram ...	3·61	
14	**Bogra** „ 13, '90	1·53	Weather—calm. Easterly wind. Outturn of jute reported to be 16 annas. Jute and *aus* still being reaped. *Amun* still being transplanted. State of *amun* and sugarcane good and promising. Common rice selling at 19 seers per rupee.
	Sherpur ...	4·48	
15	**Pubna** „ 13, '90	0·14	Weather—hot and cloudy. Floods have damaged *aus*, jute, and *amun* crops in the villages in Sujanagore and Khetupara outposts, and in parts of the Serajgunge subdivision considerably. Prices continue stationary.
16	**Darjeeling** „ 13, '90	2·74	Weather—rainy with occasional breaks. Transplantation of winter rice in Terai almost at an end. Potatoes, *chota marua*, and *bhutta* being harvested. *Bara marua*, *haimanti* paddy, and *bhadai* progressing well.
17	**Jalpigoree** „ 13, '90	7·70	Weather—days hot and cloudy; nights rainy and cool. Harvesting of jute and *aus* paddy going on rapidly. Transplantation of *haimanti* paddy nearly finished. Prospects generally good. Prices stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Divn. 18	Dacca Sept. 13, '90	0·39	Weather—hot and cloudy at intervals. Harvesting of jute and *aus* paddy going on. Prospect of *amun* paddy continues good. Rivers falling slowly. Common rice selling at from 11 to 14 seers per rupee.
Dacca Divn. 19	Furreedpur ,, 13, '90	0·29	Weather—seasonable. Flood has gone down, and state of crops hopeful. Outturn of *aus* about 8 annas and of jute about 10 annas. Price of rice stationary.
Dacca Divn. 20	Backergunge ...	.....	Report not received.
Dacca Divn. 21	Mymensingh ,, 13, '90	0·26	Weather—warm and cloudy with occasional showrs. Jute and *amun* plants somewhat damaged by high floods, particularly in the Tangail subdivision. Common rice sells at 13 seers 9 chittacks per rupee.
Chittagong Divn. 22	Chittagong ,, 16, '90	3·64	Weather—seasonable. Twelve annas of *aus* cut. *Amun* transplanted over about eleven annas of land. Prospects fairly good. Prices steady.
Chittagong Divn. 23	Noakholly ...	.....	Report not received.
Chittagong Divn. 24	Tipperah ,, 13, '90	0·95	Sunshine and rain at intervals. *Aus* and jute are being cut. Flood-water falling steadily.
Chittagong Divn. 25	Chittagong Hill Tracts. ...	.....	Report not received.
	Hill Tipperah ,, 12, '90	1·92	Weather—hot. Jute commenced to be cut. *Amun* and *jum* crops doing well. No change in prices.
BEHAR.			
Patna Divn. 26	Patna ,, 13, '90	0·16	Weather—very hot and sultry. Transplantation of paddy finished all over the district excepting in some places in the Behar sub-division. Reaping of *bhadoi* crops going on; outturn estimated on an average at 3 annas. Castor seed and *kulthi* are being sown. Prices of food-grains almost stationary.
	Barh ...	Nil	
	Behar ...	1·10	
	Dinapore ...	Nil	
Patna Divn. 27	Gya ,, 13, '90	Nil	Weather—hot and fair. *Bhadoi* harvest now over; outturn two annas only. Rain urgently wanted for paddy. Prices of food-grains rising daily.
Patna Divn. 28	Shahabad ,, 13, '90	1·49	Weather—very hot. Sky clear. Rain now wanted for paddy, especially in Sasseram and Bhabuah. Prices rising.
	Buxar ...	Nil	
	Bhabuah ...	Nil	
	Sasseram ...	Nil	
Patna Divn. 29	Durbhunga ,, 13, '90	Nil	Weather—hot and occasionally close. Harvesting of *bhadoi* in progress. Retransplanting of rice going on in places inundated, where possible. Crops elsewhere doing well. Prices remain stationary.
Patna Divn. 30	Mozufferpur ,, 13, '90	0·22	Weather—extremely hot. Only one shower during the week. *Bhadoi* being reaped; an average outturn of 6 annas for the whole district may be expected. The last floods from the Bagmati have done no serious damage to the rice crops in the Sitamarhi subdivision. Prospects of these crops are good everywhere, except in very low-lying localities.
	Hajipur ...	Nil	
	Sitamarhi ...	0·08	
Patna Divn. 31	Sarun ,, 13, '90	Nil	Weather—very hot and oppressive. In Sewan and Gopalgunge a little *bhadoi* is being harvested. Preparation of lands for *rubbi* beginning. Prices about stationary.
Patna Divn. 32	Chumparun ,, 13, '90	Nil	Weather—fine, but excessively hot. Harvesting of *bhadoi* rice and *makai* in progress; average outturn estimated at 5 annas. *Aghani* rice in good condition. With rain within the next fortnight or three weeks, a 16-anna crop is hoped for.
	Bettiah ...	0·49	
Bhagulpore Divn. 33	Monghyr ,, 13, '90	Nil	Weather—very hot and sultry. Standing crops doing well; but rain urgently wanted for winter rice.
	Begusarai ...	0·55	
	Jamui ...	Nil	
Bhagulpore Divn. 34	Bhagulpore ,, 13, '90	0·09	Weather—hot with strong sun. Break in the rains favourable to *bhadoi* harvest, which is now nearly over, and if timely rain falls later on, prospects of winter rice will be assured. Average outturn of *bhadoi* for the whole district estimated at 10 annas. A 16-anna winter rice crop may be fairly expected. Floods subsiding.
	Banka ...	0·12	
	Mudhepura ...	Nil	
	Soopool ...	0·32	
Bhagulpore Divn. 35	Purneah ,, 13, '90	10·77	Weather—fine and sunny. Ten inches of rain fell at Purneah on night of 9th, but it was local. Prospects of crops continue favourable. *Bhadoi* harvest nearly completed.
	Kishengunge ...	2·44	
	Arrureah ...	4·94	
Bhagulpore Divn. 36	Maldah ,, 13, '90	2·31	Weather—hot and bright with occasional showers. Winter rice thriving well. Jute is still being cut. *Kalai* sowings going on. Rivers have gone down. Price of common rice continues unchanged.
	Chanchal ...	2·84	
	Shibgunge ...	0·52	
	Gajole ...	2·20	
Bhagulpore Divn. 37	Sonthal Pergns. ,, 13, '90	1·98	Weather—hot and oppressive with local thunderstorms on the last two days. Heavy rain at the Sudder and at Rajmehal, which has greatly benefited the rice crop. More rain is urgently required in other parts, and some damage to up-land rice has already been caused by the break in the rains and the hot sun. *Janera* harvest estimated at 10 annas in Jamtara.
	Deoghur ...	0·47	
	Jamtara ...	0·44	
	Pakour ...	0·89	
	Rajmehal ...	2·41	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Dtvn.	38	Cuttack Sept. 13, '90	1·17	Weather—hot. Slight rain during the week. Harvesting of *satika beali* rice going on. Prospects of early *sarad* rice not good for want of sufficient rain in most places in the Jajpur subdivision. Prospects elsewhere fair.
		Pooree „ 11, '90	1·00	Weather—seasonable. Puddling and weeding of *sarad* crop going on. *Beali* or early rice is being harvested. *Mandia* coming into ear. Miscellaneous crops doing well. Common rice 21 to 23 seers per rupee.
		Khoorda ...	7·40	
	39	Banpur ...	4·64	
	40	Balasore „ 13, '90	0·33	Weather—very hot. Want of rain felt all over the district. Price of rice stationary.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Dtvn.	41	Hazaribagh Sept. 13, '90	0·10	Weather—fine and unusually warm. Rain urgently wanted for rice crop all over the district. *Bhadoi* crops still being harvested with poor outturn. *Rubbi* sowings at a standstill for want of rain. Prices show a tendency to rise.
	42	Lohardugga „ 13, '90	0·37	Weather—hot and cloudy. Reaping of *goondli* and *gora* paddy going on Rain badly wanted for winter rice. Prices steady.
		Palamow (up to 8th Sept.)	0·27	
	43	Singbhoom Sept. 13, '90	Nil	Weather—unseasonable: dry and hot. Rain urgently wanted. With the exception of thanas Ghatsilla and Asanbani, where slight rain has fallen, there has been no rain in the district throughout the week. Two to four annas damage to rice crop reported from every part of the district except thana Monarpur, and if no rain falls within the next two or three days, the damage will be serious.
	44	Manbhoom „ 13, '90	0·37	Weather—very hot during week. More rain badly wanted. Winter crops suffering, but are now in a somewhat more healthy condition than they were three days ago: the recent rain has done some good. Prices rising: common rice 16 to 20 seers per rupee.

* Means for five days. † Means for six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the week. The humidity of the atmosphere is expressed at percentage, saturated air being presumed by 100. A clear sky is denoted by 0 and an overcast sky by 10. The normal rainfall means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the same week. Variation standing in minus divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

week ending Friday, the 12th of September 1890.

The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater.
Cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal means
The means of the district are the numerical average of the rainfall return received in the district, i.e., from total rainfall of the subdivisional

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 12th of September 18

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the re are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 16th September* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 12TH OF SEPTEMBER 1890.

THE break in the monsoon current, which was an important feature of the meteorology of the previous week, has continued during the greater part of the present one, especially in the western districts, where only very scattered light showers have been received. In consequence temperature has been everywhere largely above the normal in all districts except North Bengal and part of East Bengal. The other important features are (1) the existence of low pressure over the Bay which has caused indraught at most of the coast stations, notably so at those in Orissa; (2) slightly deficient pressure, and very light irregular wind circulation at inland stations.

The depression over the Bay at first covered the whole of the northern half, but was very diffused, and without intensification slowly drifted in a westerly direction. On Saturday, the first day of the week, the area within which pressure was under 29·65 inches included this part of the Bay and the whole of Bengal. On the following day the depression had left the east of the Bay and the eastern and northern districts of Bengal behind, and by Monday the 8th, only the western districts of Bengal were within the area, but over the Bay the distribution was unchanged. After the passage of this trough of low pressure over Bengal, the variable winds with a westerly tendency were replaced by southerly or south-easterly directions, and rainfall became more general in East and North Bengal. Meanwhile in Orissa northerly winds blew with considerable steadiness, but as the differences of pressure were very slight, velocity was generally below the average. After the 8th pressure rose slowly, and the depression, though still showing off the coast of the Circars, was of very little importance and gradually filling up. From the 9th till the end of the month the ordinary wind circulation prevailed, southerly or south-westerly winds in Lower Bengal, and easterly in the northern districts. The sky was generally clear, and high temperature prevailed, while at times local heavy showers of rain fall.

Pressure—On the 6th was more than a tenth of an inch below the normal in Burmah and Arakan, and between a tenth and a twentieth below over the whole of the Bay and Bengal, with the exception of Orissa, Chutia Nagpur, and the western half of South-West Bengal. As the depression drifted westwards, pressure rose slowly at the eastern stations, but changed very slightly on the west coast of the Bay, where there was a rise of a few thousandths of an inch on the 7th, and a rise or fall of similar amount on the 8th. The general very slow rise continued on the 9th, and the distribution was then practically normal in Bengal and the northern half of the Bay, after which very small oscillations obtained till the end of the week, and the difference from the normal was generally under two hundredths of an inch. Thus from being considerably below the normal the general tendency has been upwards, and the distribution at the end of the week was almost normal. The means for the week are below the normal by amounts ranging up to ·04 inch.

Temperature—Owing to the clear skies and absence of rain, has been excessive throughout the week, mean excess for the large divisions being 3·9° in South Behar, 3 6 in Chutia Nagpur, 3° in South-West Bengal, 2·7° in North Behar, 2 1 in Orissa, 1 9° in East Bengal, and 1·1° in North Bengal. The hottest days in Lower Bengal were between the 6th and 8th, and in Behar about the 9th or 10th; while the lowest night temperatures were generally recorded on the 6th in Orissa, South-West Bengal, and South Behar, on the 7th in East Bengal, and on the 10th or 11th in the other districts. Maximum temperature rarely exceeded 91° in North and East Bengal and Chutia Nagpur, but in Behar and South-West Bengal it was as high as 97°. Changes were not important, being of the usual oscillatory character and somewhat irregular owing to the local rainfall.

Rainfall—Has been deficient in all districts, defect being 1·98 in South-West Bengal, 1·89 in Chutia Nagpur, 1·78 in East Bengal, 1·74 in South Behar, 1·58 in Orissa, and 1·27 inches in North Behar; while in North Bengal it is only ·3 inch. The total mean falls in South-West Bengal, Chutia Nagpur, and South Behar is half an inch or less, in Orissa 1 inch, in North Behar and East Bengal between one and one and-a-half inches, and in North Bengal nearly three inches. Scattered showers fell in Orissa, East Behar, and North Bengal throughout the week, but in the last two districts falls became much more general after the trough of low pressure drifted westward in the early part of the week, and on Wednesday the 10th general heavy rain fell in these districts and in Purneah; the heaviest reports being 10 inches at Purneah, 7 inches at Siliguri, more than 4 inches at Matiari and Kaliagunge in the Purneah district, and more than 3 inches at Gajol in the Maldah district, Churamon in Dinagepore, Julpigoree, and Bhagatpore. After the 10th rainfall was again lighter and more scattered, very few reports being over one inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 12th of September 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1890.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended *four feet* above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

Calcutta, the 15th September 1890.

MEMORANDUM.

Quarterly review of births and deaths registered in twenty-seven of the principal towns of Bengal for the Quarter ending 30th June 1890.

BIRTHS.

THE births registered in twenty-seven of the principal towns of Bengal during the three months ending with June 1890 were 4,014, and correspond to an annual rate of 15·12 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 3·68 lower than the mean rate of the corresponding quarters of the past five years (1885—89), and is also lower than the rate of the corresponding period of any of the past five years with which comparison is instituted, *vide* the figures below—

	Quarter ending 30th June of—						
	1885.	1886.	1887.	1888.	1889.	Quarterly average of five years 1885—89.	1890.
Ratio of births per 1,000 of the population per annum	23·20	17·16	17·00	17·92	18·76	18·80	15·12

The births registered in each of the twenty-seven principal towns during the second quarters of 1890, 1889, and the average of the five years 1885—89, correspond to the following rates per 1,000 of the population of those towns:—

Towns.	Ratio per mille. Quarter ending 30th June of—			Towns.	Ratio per mille. Quarter ending 30th June of—		
	1890.	1889.	Average of five years, 1885—89.		1890.	1889.	Average of five years, 1885—89.
Burdwan	18·04	20·16	21·44	Narainganj	24·80	25·12	21·96
Midnapore	14·84	13·56	14·88	Chittagong	12·28	12·44	17·68
Hughli and Chinsurah	24·72	25·60	22·32	Comillah	28·12	28·12	29·00
Serampore	21·56	26·24	22·04	Patna	7·80	10·88	15·32
Uttarpara	13·32	23·20	16·68	Gya	17·36	16·20	22·64
Howrah	15·16	18·08	19·28	Arrah	13·52	10·76	13·60
Bali	11·32	14·00	14·84	Mozufferpore	12·72	25·84	16·44
Krishnagar	14·52	16·56	16·28	Durbhanga	21·12	33·44	28·80
Ranaghat	14·28	4·60	5·52	Chupra	9·56	19 04	13·36
Santipore	13·32	10·36	9·96	Bhagulpore	16·60	26·24	29·28
Jessore	8·00	13·16	9·44	Monghyr	19·80	25·84	25·52
Rampore Beauleah	28·28	35·56	29·48	Purneah	16·76	11·16	13·56
Darjiling	16·52	38·16	17·08	Poori.	17·08	18·88	15·00
Dacca	11·56	14·52	12·64	Total ...	15·12	18·76	18·80

The birth rate in India is supposed to be 40 per mille. Judged by this standard it will be seen that in all the towns mentioned births are very inaccurately registered. The highest rate attained during the quarter under report was in the town of Rampore Beauleah where it was 28·28 only. Birth registration appears to be particularly bad in the towns of Jessore, Chupra and Patna where the ratios are all less than 10 per 1,000 of the population.

DEATHS.

The deaths registered in the twenty-seven principal towns of Bengal during the quarter ending with June 1890 were 6,765, and correspond to an annual rate of 25·48 per 1,000 of the aggregate population of those towns. This rate is 2·44 higher than the mean rate of the corresponding period of the past five years 1885—89, and is also higher than the recorded mortality of the corresponding quarter of any of the past five years except 1885, *vide* the figures below—

	Quarter ending 30th June of—						
	1885.	1886.	1887.	1888.	1889.	Quarterly average of five years 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	27·36	23·48	16·32	21·52	23·56	23·04	25·48

The deaths registered in each of the twenty-seven principal towns during the second quarters of 1890, 1889, and the average of the five years 1885—89, correspond to the following rates per 1,000 of the population of those towns :—

Towns.	Ratio per mille. Quarter ending 30th June of— 1890.	1889.	Average of five years, 1885—89.	Towns.	Ratio per mille. Quarter ending 30th June of— 1890.	1889.	Average of five years, 1885—89.
Burdwan	23·68	22·76	27·44	Narainganj	19·40	20·68	24·20
Midnapore	23·36	10·32	15·96	Chittagong	13·52	18·40	23·64
Hughli and Chinsurah	40 04	19·86	27·00	Comillah	24·56	23·36	28·40
Serampore	30·16	32·44	31·24	Patna City	22 56	16·28	18·04
Utterpara	25·40	30·48	21·76	Gya	37·56	37·04	38·76
Howrah	17·04	15·16	17·44	Arrah	24·00	9 44	10·04
Bali	18·32	16·16	16·72	Mozufferpore	24·20	19·92	20·68
Krishnagar	9·28	17·00	18·32	Durbhanga	29·68	32·60	34·52
Ranaghat	12·88	8·72	6·88	Chupra	13·84	16·84	13·20
Santipore	9·00	10·36	8·32	Bhagulpore	24·10	24·08	30·08
Jessore	18·36	21·64	20·24	Monghyr	24·88	20·84	20·28
Rampore Beauleah	28 08	31·52	40 60	Purneah	22·64	33·80	25·00
Darjiling	55·84	27·92	25·04	Poori	101·32	84·56	45·48
Dacca	23·04	19·48	20·28	Total ...	25·48	22·52	23·04

It will be seen that the highest mortality during the second quarter of 1890 occurred in the town of Poori (101·32) and the lowest in Krishnagar (9·28). The total mortality of the twenty-seven principal towns in 1890 is higher than the total rates of the two past periods with which it is compared, and shows that on the whole registration is improving. The death-rates returned from Howrah, Bali, Krishnagar, Ranaghat, Santipore, Jessore, Naraingang, Chittagong and Chupra are I fear inaccurate. The Municipal Commissioners of those towns should again enquire into the matter and take steps to improve registration if the result of their enquiry shows that it is defective as I believe it is. The very high rate of mortality in the town of Poori during the quarter under review is due to an epidemic of cholera which prevailed in that town.

The total mortality during the quarter under review from the several registered death causes is compared in the following table with the mortality from those causes in the corresponding quarters of 1889 and the average of the five years 1885—89 : —

	Ratio per mille during the— Quarter ending 30th June 1890.	Quarter ending 30th June 1889.	Quarterly average of quarter ending 30th June 1885—89.
Cholera	4·52	4·36	4·08
Small-pox	·84	·56	·40
Fever	11·76	8·04	8 84
Bowel-complaints	2·20	2·40	2·92
Injury	·40	·52	·52
Other causes	5·68	6·52	6·20

The above statement, compared with the figures of both the past periods, shows a noticeable increase in the mortality in the 2nd quarter of 1890 under the head Fever.

The highest annual death-rates from the several registered death-causes occurred in the following towns : —

Cholera.	Ratio per mille.	*Small-pox.*	Ratio per mille.	*Fever.*	Ratio per mille.	*Other causes.*	Ratio per mille.
Poori ...	37 60	Poori ...	4·16	Darjiling ...	46·72	Poori ...	14·52
Hughli and Chinsurah ...	10·84	Ranaghat ...	2·76	Poori ...	36·60	Serampore ...	13·72

OFFICE OF SANITARY COMMISSIONER FOR BENGAL;
The 5th September 1890.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

MEMORANDUM.

Monthly review of deaths registered in forty-five districts of Bengal for the month of June 1890.

THE deaths registered in forty-five districts in Bengal during the month of June 1890 were 114,999, and correspond to an annual rate of 20·88 per 1,000 of the aggregate population of those districts, which is 65,859,534. This rate is 2·28 higher than the mean rate of the corresponding months of the past five years 1885—89, and is also higher than the rate of the corresponding period of any of the past five years, *vide* the figures below—

	June 1885.	June 1886.	June 1887.	June 1888.	June 1889.	Monthly average of five years, 1885—89.	June 1890.
Ratio of deaths per 1,000 of the population per annum	18·00	15·96	20·40	19·08	19·68	18·60	20·88

The following table shows the highest proportions of deaths registered during the month of June 1890, compared with the corresponding month of 1889 :—

Districts.	Ratio per *mille* during— June 1890.	June 1889.	*Districts.*	Ratio per *mille* during— June 1890.	June 1889.
Darjiling	46·32	45·48	Noakhali ...	29·52	26·76
Chumparun	42·48	14·40	Monghyr ...	29·28	19·92
Patna	36·48	18·96	Durbhanga ...	26·52	13·08
Julpaiguri	33·00	30·24	Dinajpore ...	24·96	19·44

The figures of June 1890 show a distinct advance towards accuracy in death registration in the districts mentioned.

The total mortality during the month under review from the several registered death causes is compared in the following table with the mortality from those causes in the corresponding month of 1889 and the average of the five years 1885—89 :—

	Ratio per *mille* during— June 1890.	June 1889.	Monthly average of five years 1885—89.
Cholera	2·40	4·32	2·52
Small-pox	·24	·12	·12
Fever	14·40	11·40	12·12
Bowel-complaints	·48	·60	·72
Injury	·60	·60	·60
Other causes	2·52	2·40	1·20

It will be seen that the death-rate of June 1890 under the head Fever was considerably higher than in the two past periods, with which it is compared. Under the head Cholera, there was a sensible reduction in mortality during June 1890 as compared with June 1889. The mortality from the unspecified diseases returned under the head Other Causes in June 1890 is higher than the average rate of the corresponding month of the past five years 1885—89.

The highest annual death-rates from Cholera and Fever occurred in the following districts :—

Cholera.	Ratio per *mille*.	*Fever.*	Ratio per *mille*.
Chumparun	21·24	Darjiling	33·60
Patna	10·92	Julpaiguri	30·72
Monghyr	7·92	Noakhali	26·64
Durbhanga	7·56	Dinajpore	22·68
Poori	5·88	Rungpore	20·04
Mozufferpore	4·68		
Balasore	4·44		
Sarun	3·48		
Bhagulpore	3·36		
Cuttack	3·12		
Gya	2·64		
Shahabad	2·40		

From Small-pox high mortality occurred again only in the district of Chumparun—mortality 2·64 per 1,000 of population.

The mortality of the month under review, according to *Sex*, *Class* and *Age*, was distributed as follows :—

According to Sex.	Ratio per *mille.*
Males	22·92
Females... ...	18·84
Ratio of male deaths to every 100 female deaths calculated on the proportion such mortality bears to the total male and female population ...	121

According to Class.	Ratio per *mille.*
Christians ...	12·00
Hindus ...	21·60
Mahomedans ...	19·56
Buddhists ...	20·04
Other classes ...	19·41

According to Age.	Ratio per *mille.*
Under 1 year	132·48
1 and under 5 years ...	24·24
5 „ 10 „ ...	11·76
10 „ 15 „ ...	10·32
15 „ 20 „ ...	13·68
20 „ 30 „ ...	13·80
30 „ 40 „ ...	15·60
40 „ 50 „ ...	20·76
50 „ 60 „ ...	28·44
60 years and upwards ...	47·16

Detailed information regarding the mortuary statistics of the forty five districts of Bengal during the month under review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 10th September 1890.

Statement showing the Results of the Registration of Deaths in the Districts in Bengal for the month of June 1890.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,

The 10th September 1890.

W. H. GREGG, *Dip. Publ. Health, Camb.*,

Sanitary Commissioner for Bengal.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 30th August 1890.

Births.

The births registered during the week ending with Saturday, the 30th August 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 19· per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 3·7 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	26·5	22·8	20·1	21·5	22·8	22·7	19·0

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 9th August 1890.	16th August 1890.	23rd August 1890.	30th August 1890.	Towns.	Weeks ending— 9th August 1890.	16th August 1890.	23rd August 1890.	30th August 1890.
Burdwan	13·7	15·3	16·8	27·5	Narainganj	16·6	33·1	16·6	13·4
Midnapore	13·9	12·4	18·6	17·0	Chittagong	4·7	16·4	9·4	4·7

Dacca	14·9	17·5	10·4	16·9	Total ...	17·4	18·7	20·7	19·0

It will be seen that last week the highest birth-rate was returned from Darjiling (133·4), and the lowest from Chittagong (4·). No births were registered during the week in Ranaghat and Jessore towns.

Deaths.

The deaths registered during the week under review correspond to an annual rate of 22·9 per 1,000 of the population. The rate of the week is 10· below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	44·5	28·5	28·2	35·2	28·2	32·9	22·9

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 9th August 1890.	16th August 1890.	23rd August 1890.	30th August 1890.	Towns.	Weeks ending— 9th August 1890.	16th August 1890.	23rd August 1890.	30th August 1890.
Burdwan	13·7	10·7	16·8	24·4	Narainganj	13·4	16·6	24·3	13·4
Midnapore	15·5	17·0	23·2	9·3	Chittagong	9·4	21·1	16·4	9·4
Hughli and Chinsurah	18·1	21·3	19·7	36·1	Comillah	7·7	23·1	23·0	11·6
Serampore	31·0	33·4	40·1	33·4	Patna City	20·1	15·2	20·4	10·2
Utterpara	9·4	37·7	18·9	28·2	Gya	23·7	34·7	23·8	34·7
Howrah	20·1	19·5	17·8	19·5	Arrah	29·3	13·2	19·0	9·4
Bali	19·0	24·6	28·1	51·3	Mozufferpore	23·1	20·7	25·5	19·5
Krishnagar	11·4	11·4	15·1	9·5	Durbhanga	24·6	27·5	14·9	44·8
Ranaghat	24·0	12·0	12·0	12·0	Chupra	8·0	15·1	16·1	11·1
Santipore	10·5	14·0	28·0	6·9	Bhagulpore	13·7	24·4	13·6	13·6
Jessore	12·2	18·4	24·1	18·4	Monghyr	28·9	21·7	23·0	21·7
Rampore Beauleah	21·0	24·3	26·3	21·0	Purneah	26·1	13·9	24·3	20·8
Darjiling	66·7	66·7	37·0	44·5	Poori	25·1	25·2	62·9	25·2
Dacca	25·2	20·1	24·7	20·1	Total ...	25·2	23·2	26·2	22·9

It will be seen that last week the highest mortality occurred in the town of Gya (58·7) and the lowest in Arrah (8·4).

Measured by last week's mortality, the highest annual death-rates from the following registered death causes were as follows:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Gya	14 3	Gya	26·0	Gya	17·0
Durbhanga	8·6	Bali	24·6	Poori	14·7
Mozufferpore	6·1	Durbhanga	20·5	Serampore ...	11·8
Chupra	6·0			Hughli and Chinsurah ...	11·5
Dacca	3·2				
Patna City	2 3				

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 3· from cholera, against 3·7 per 1,000 in the preceding week; ·1 from small-pox, against the same ratio; 9·4 from fever, against 10·5; 4·3 from bowel-complaints, against 2·7; ·3 from injury, against ·4; and 5·8 from other causes, against 7·4 in the preceding week.

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	21·9	Christians ...	37·4	Under 1 year ...	190·5
Females	23·7	Hindus ...	24·7	1 and under 5 years ...	34·7
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	92	Mahomedans ...	18·0	5 „ 10 „ ...	12·2
				10 „ 15 „ ...	11·3
				15 „ 20 „ ...	16·7
				20 „ 30 „ ...	11·8
				30 „ 40 „ ...	13·4
				40 „ 50 „ ...	17·0
				50 „ 60 „ ...	26·8
				60 years and upwards ...	51·4

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,

The 15th September 1890. *Sanitary Commissioner for Bengal.*

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 30th August 1890.

LIBERALITY OF SYED MAHOMED MEHDI HASSAIN KHAN, *ALIAS* BADSHAH NAWAB, OF PATNA CITY.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 17th September, 1890.

RESOLUTION.

READ—

A letter from the Commissioner of Patna, No. 499G, dated the 13th August last, and one from the Director of Public Instruction, No. 5038, dated the 5th September, 1890; regarding the offer of Syed Mahomed Mehdi Hassain Khan, *alias* Badshah Nawab, of Patna City, to found a scholarship and two prizes.

Syed Mahomed Mehdi Hassain Khan, *alias* Badshah Nawab, of Patna City, has offered to make over Government securities, of the nominal value of Rs. 2,000, to found a scholarship of Rs. 5 a month and two prizes of Rs. 10 each for award to Behari Mahomedan students of the Anglo-Arabic School in Patna in commemoration of the late visit of the Lieutenant-Governor to that school. The Lieutenant-Governor is pleased to accept the offer and tenders his thanks to the donor for his liberality. In accordance with the donor's wishes the scholarship and prizes will be designated "Badshah Nawab Bayley Scholarship and Prize," and the Collector of Patna is appointed to be the administrator of the fund.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Patna for information and for communication to the donor, and to the Director of Public Instruction for information.

Ordered also that a copy of this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

REVISED PROSPECTUS OF THE FOREST SERVICE BRANCH OF COOPER'S HILL COLLEGE.

Circular No. 12-F.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Forests)—dated Simla, the 26th August, 1890.

Read the following Despatch from Her Majesty's Secretary of State for India, forwarding, with remarks, the revised "Prospectus of the Forest Service Branch of the Royal Indian Engineering College, Cooper's Hill":—

No. 40 (Revenue), dated London, 12th June, 1890.

From—Her Majesty's Secretary of State for India,
To—The Governor-General of India in Council.

I FORWARD 25 copies of the revised Prospectus of the Indian Forest Service Examination, which has been issued here. The alteration in the schedule of subjects for the entrance examination will take effect at and from the examination of 1891. But the extension of the Cooper's Hill Forest Course from two to three years will take effect with the candidates entering Cooper's Hill College in the autumn of 1890. Therefore the probationers of this year will not reach India until 1893, and no recruits will be sent out for the Forest Service in 1892.

2. With reference to article 16 of the Prospectus, I shall, when sending you lists of the recruits starting in 1893 and in subsequent years, inform your Government which of the probationers have been found qualified for the higher initial salary of Rs. 350 a month.

PROSPECTUS OF THE FOREST SERVICE BRANCH OF THE ROYAL INDIAN ENGINEERING COLLEGE, COOPER'S HILL.

(*Post Town, Staines. Railway Station, Egham. Telegraph Station, Englefield Green.*)

STAFF OF THE COLLEGE.*

President—General Sir Alexander Taylor, G.C.B., R.E.
Secretary—J. G. Whiffin, Esq., Paymaster-in-Chief, R.N., Retired.
Bursar—J. P. Pasco, Esq., R.N., Retired.
Chaplain—Rev. C. Croslegh, D.D.

Engineering Branch.

Assistant Professor of Engineering—A. H. Heath, Esq., Assoc. Mem. Inst. C.E.
Professor of Surveying—Major-General E. H. Courtney, R.E.
Instructor in Geometrical Drawing—T. H. Eagles, Esq., M.A., Assoc. Inst. C.E., F.R.I.B.A.
Lecturer in Accounts—J. C. Hurst, Esq.
Instructor in Freehand Drawing—Russell Dowson, Esq.

Mathematical Branch.

Professor of Mathematics—G. M. Minchin, Esq., M.A.

Natural Science Branch.

Professor of Chemistry—Herbert McLeod, Esq., F.R.S.
Professor of Physics—W. N. Stocker, Esq., M.A., Fellow of Brasenose College, Oxon.
Lecturer in Geology and Mineralogy—Professor P. M. Duncan, M.B., F.R.S.

Forestry Branch.

Principal Professor of Forestry—W. Schlich, Esq., Ph.D., F.L.S., late Inspector-General of Forests to the Government of India.
An Assistant Professor of Forestry.
Professor of Botany—H. Marshall Ward, Esq., M.A., F.R.S., F.L.S., Fellow of Christ's College, Cambridge.

* The Staff of the College is only given in so far as it concerns the Forest Service Branch.

Lecturer on Entomology—W. F. H. Blandford, Esq., M.A., Fellow of Christ's College, Cambridge.
Lecturer on Chemistry of Soils and Vegetation—A. H. Church, Esq., M.A., F.R.S.
Instructor in German—T. H. Dittel, Esq.

Director of Practical Study in Forestry on the Continent—Sir Dietrich Brandis, K.C.I.E., Ph.D., F.R.S., late Inspector-General of Forests to the Government of India.*

(The arrangements hereinafter described are subject to revision under the orders of the Secretary of State for India.)

1. The Royal Indian Engineering College is primarily maintained, under the orders of the Secretary of State for India in Council, for the education of candidates for the service of Government in the India Public Works, Telegraph, and Forest Departments; but it is open, to the extent of the accommodation available, to all persons desirous of following the course of study pursued in it.

India Forest Department Appointments.

2. The examination usually takes place in June of each year.

3. The number of candidates to be selected annually varies according to the requirements of the Forest Service in India: the figures as regards each particular year will be advertised from time to time. *In* 1891 *there will be* 12 *appointments offered for competition.*

4. Candidates for the Indian Forest Department are selected under the following arrangements:—

(*a*) An applicant must be a natural-born British subject, and must be above 17 and under 20 years of age on the 1st June of the year in which he competes for an appointment. He must be unmarried, and if he marries before reaching India he will forfeit his appointment.

(*b*) An applicant must send† to the Revenue Department of the India Office, on or before the 1st day of May of the year in which he proposes to compete—

(1) His name and parentage, a certificate or other satisfactory evidence of the date of his birth, and the written consent of parent or guardian that his name should be recorded as a candidate.

(2) A statement of the places of education at which he may have been since he was nine years old, accompanied by testimonials of good conduct during the last four years.

(*c*) Applicants will have to appear before a Medical Board‡ at the India Office, particular stress being laid upon good vision and hearing. A physical test will also be imposed, so as to ensure the selection of persons of active habits and powers of endurance.

(*d*) The applicants who have successfully passed the medical examination and the physical test will be required to undergo an examination before the Civil Service Commissioners§ in the following subjects (Classes I to III), marks being assigned as follows:—

Class I.—Obligatory Subjects.

	Marks.	
1. Mathematics (lower), viz., Algebra up to and including the Binomial Theorem; the theory and the use of Logarithms; Euclid, Books I to IV and VI; Plane Trigonometry up to and including the solution of Triangles; and Mensuration	2,500	In each of these subjects a candidate must obtain not less than one-third of full marks in order to qualify.
2. English composition	1,000	
3. German (400 for colloquial)	2,000	

---

* Sir D. Brandis is not on the Staff of the College.

† There is no form of application; the documents specified in clauses (1) and (2) should be enclosed in a covering letter addressed to the Secretary, Revenue Department, India Office, London.

‡ With a view to prevent parents and guardians from incurring the inconvenience and expense of preparing candidates who may be physically unfit for the Forest Service, it is suggested that, before any such preparation is begun, candidates be submitted to examination by the medical adviser of the family, or any other qualified medical practitioner, with regard to the following points:—

1. A weak constitution.
2. Defective vision.
3. Impaired hearing.
4. The existence of any congenital defect.

It is to be understood that this private examination is merely suggested to lessen the chances of disappointment, and that it is by no means intended to take the place of, or to influence in any way, the official examination.

On the subject of the standard of eyesight required for the Indian Services, a pamphlet has been published, under the authority of the Secretary of State in Council, by Messrs. Churchill and Sons, 11, New Burlington Street.

§ A fee of 4*l.* is required, which can be paid by means of a stamp of that amount. Instructions on this point will be issued to candidates the day before the examination.

CLASS II.—OPTIONAL SUBJECTS.

		Marks.	
4.	Mathematics (higher), including Analytical Geometry, Conic Sections, Differential Calculus, Statics, and Dynamics	2,000	A candidate may take any two, but not more than two, of the optional subjects.
5.	French (400 for colloquial)	2,000	
6.	Latin	2,000	
7.	Greek	2,000	
8.	English History. There will be set: one general paper; one paper limited to a fixed period, of which due notice will be given	2,000	
9.	Botany, viz., the elementary parts of vegetable morphology, histology, and physiology, and the principles of a natural system of classification as illustrated by the more important British natural orders. Candidates will be required to describe plants in technical language. Questions will not be set on vegetable palæontology or on the geographical distribution of plants	2,000	
10.	Chemistry, viz., the elements of Inorganic Chemistry ...	2,000	
11.	Physics: elementary properties of Electricity, Magnetism, Heat, Light, and Sound	2,000	
12.	Physical Geography and Geology, chiefly economic; including the recognition of the more familiar minerals and rocks, and their properties and uses ...	2,000	

CLASS III.—ADDITIONAL SUBJECTS.

13.	Freehand Drawing	500	Either or both of these subjects may be taken in addition to the obligatory and the two optional subjects.
14.	Geometrical Drawing	300	

(*e*) From the competitors who attain the abovementioned minima of marks in obligatory subjects and satisfy the requisite conditions in other respects, the Secretary of State will select candidates, in order of merit, as probationers to enter the college, where they will be further trained for the Forest Service of India.

(*f*) If the full number of competent probationers required in any year cannot be obtained from the persons so examined, the Secretary of State reserves a discretion to fill up the deficiency by selecting any other person or persons who may satisfy the authorities of the College that he or they are properly qualified to become probationers for the Forest Service.

5. The course of study for candidates for the India Forest Service extends over about 34 months divided into nine terms. During the first eight terms the candidates will prosecute their studies at the College, and during the remaining term they will be instructed, under suitable supervision, in such British or Continental forests as may be selected for the purpose. Excursions will also be made for purposes of instruction, both during term time and during part of the vacations. The cost of all such tours or excursions is borne by the Secretary of State (see paragraph 9).

6. Each annual session begins in September, and is divided into three terms, with vacations of about four weeks at Christmas, two weeks at Easter, and eight weeks in the summer.

7. A charge of 61*l.* for each of the first eight terms and 60*l.* for the ninth term is made for each student: the amount must be paid terminally in advance to the Bank of England. Receivable orders, with full directions as to the mode of payment, will be forwarded from the India Office to the parents or guardians shortly before the fees fall due. A student will not be allowed to come into residence until his fee has been paid.

8. A deposit of 5*l.* is required to be paid by each student on admission to the College as caution money, to cover charges incurred by him for damage to books, instruments, &c., or any College bills outstanding on leaving the College. Any balance over and above such charges will be repaid. This deposit is to be paid with the fee for the first term, making the total payment on that occasion 66*l.*

9. The foregoing payments cover all charges for tuition, board according to the College tariff, lodging with washing and ordinary medical attendance while in residence at the College. When students are on tour and during the course of practical instruction, whether in Great Britain or on the Continent, the Secretary of State will defray the expenses of (1) board, lodging, and washing (the maximum expenditure on such account being 10*s.* per diem), (2) travelling expenses, and (3) fees to local Forest Officers, &c.

Students are required to provide their own class books and drawing instruments. Drawing paper, drawing boards, and surveying instruments are provided by the College.

10. The prescribed course of study at present comprises the following subjects:—

I.—*Engineering.*

1. Geometrical Drawing.
2. Freehand Drawing.
3. Surveying.
4. Road-construction.

II.—*Natural Science.*

1. Inorganic Chemistry.
2. Chemistry of Soils and Vegetation.
3. Physics.
4. Geology and Mineralogy.
5. Entomology.
6. Botany.

III.—*Forestry*, theoretical and practical.

IV.—*Miscellaneous.*

1. German.
2. Elements of Law.
3. Accounts.
4. Drill and gymnastics

11. Every student is required to conform to the College rules, to exhibit due diligence in his studies throughout the course, and to give evidence of satisfactory progress in such manner as may be required: failing which, or in the evident of serious misconduct, he will be liable to be removed from the College.

12. During the course of study the proficiency of the students will be tested by periodical examinations, and on the termination of their studies there will be a final examination. Each student may also, at the discretion of the Secretary of State for India, be required to appear before the Medical Board at the expiration of the first year of residence at the College, and should the result be unsatisfactory he cannot claim to be allowed to complete the course.

13. The subjects enumerated in paragraph 10 are grouped in certain main branches of study, and a fixed minimum of qualification is required in each branch, as well as a certain minimum for all branches taken together. Students who obtain these minima will receive the College diploma in Forestry.

14. Candidates who have obtained this diploma, and are found to be of sound constitution and free from physical defects which would render them unsuitable for employment in the Forest Department (the final decision on which points will rest with the Secretary of State for India), will be appointed Assistant Conservators in the Forest Department of India in the order of their standing at the end of the final examination. They will be allowed, before leaving the College, to choose the provinces in which they desire to be first employed, according to the standing in which they pass out of the College. But this choice can only be exercised according to the available vacancies in the different provinces, and on the understanding that officers are at all times liable to be transferred from one province to another at the pressure of the Government of India.

15. Within a month of his nomination as Assistant Conservator, each nominee must sign Articles of Agreement describing the terms and conditions of his appointment. He must embark for India when required to do so by the Secretary of State, and will be provided with a free passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

16. The pay of an Assistant Conservator of Forests will commence from the date of arrival in India. Probationers who acquit themselves creditably during their course at Cooper's Hill College will begin on a salary of Rs. 350 a month; those who fall short of the required standard, though they may have obtained the College diploma in Forestry, will begin on Rs. 250 a month; and this difference of salary will continue until the first Departmental Examination is passed in India. It will rest with the President of the College, in consultation with the Principal Professor of Forestry, to decide which probationers, if any, have failed to qualify for the higher initial salary.

17. Promotion, leave, and pension will be regulated by the rules of the service for the time being. Further information on this point can be obtained from the Revenue Secretary, India Office, London.

18. Every candidate, before proceeding to India, will be required to furnish to the President of the College satisfactory evidence of his competency in riding.

General Rules.

19. Chemical, physical, and botanical laboratories, a forestry museum, a forest nursery, a library, and gymnasium are attached to the College. Means are also provided for the practice of photography. Students making use of the laboratories are supplied with the needful apparatus.

20. The responsibility for the discipline and management of the College and for the superintendence of the studies is vested in the President, under the control of the Secretary of State for India.

21. The students are distributed in divisions, under personal charge of one of the Professors or Instructors selected by the President; such tutor being responsible for exercising the proper degree of personal supervision over each student in his division, and for conducting necessary correspondence with the student's parents or guardians.

22. Each student residing in the College is provided with a separate room, and with fuel and light, also with the necessary attendance. Furniture and bedding are supplied by the College, but each student is required to provide his own towels and bed linen. Meals are

taken in hall. Wine and beer are not included in the ordinary fare, but can be obtained from the College cellar at fixed prices.

23. A chapel is attached to the College, which the students residing in the College are expected to attend, unless specially exempted.

24. Every student will be required to go through a course of gymnastics and also of military exercises, including the use of the rifle.

25. Students are required to wear academical dress, under such regulations as may be prescribed from time to time.

Students not nominated for the Indian Forest Service, but desirous of obtaining a Diploma in Forestry from Cooper's Hill College.

26. Students not nominated for the Indian Forest Service may be received into the College, as far as the available accommodation permits. Such students may pass through the course of instruction prescribed for the nominees of the Indian Forest Service, as detailed above, or they may be permitted to participate in the instruction given in certain subjects only. On attaining the prescribed minima of marks in the several branches of study and in totals as laid down above, they will receive, as the case may require, either the College Diploma in Forestry, or special certificates showing in what subjects they have followed the instruction and with what result.

27. Candidates who desire to be admitted under paragraph 26 may submit the necessary application at any time, but not later than the 15th day of June of the year named for admission, except with the special permission of the President. The application must be made on the prescribed forms, which can be obtained from the Secretary of the College.

28. Candidates whose applications are found satisfactory as to character and in other respects will be required to undergo an examination, to be held at the College, about the last week in June of the year for admission. The object of the examination will be to ascertain whether the candidate is qualified to follow the course of instruction with advantage (or certain parts of it, as the case may be). Candidates who do not come up to the required standard will not be admitted to the College.

The President may dispense with the whole or any portion of this examination in the case of a candidate who produces a University diploma, or other similar certificate granted by a recognized examining body.

29. Candidates admitted to the College under paragraph 26, who propose to pass through the full prescribed course of study, will be required to pay the same fees in every respect as those paid by the nominees for the Indian Forest Service. Candidates who do not become resident, and are admitted only to certain subjects of study, will be required to pay the fees which may be fixed in each special case in consideration of the extent of their studies. The candidates of both classes will be required to abide by the general rules of the College.

ORDER.—Ordered that a copy be forwarded for information to the Local Governments and Administrations noted in the margin, the Inspector-General of Forests, and the Comptroller and Auditor-General.

Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
Punjab.	Ajmere.
Central Provinces.	Andaman Is.
Burma.	Hyderabad.

Ordered also that a copy be forwarded to the Foreign Department for communication to the Agent to the Governor-General in Baluchistan; and that these papers be published in the Supplement to the *Gazette of India*.

(True Extract.)
W. C. BENETT,
Offg. Secretary to the Government of India.

IRRIGATION OPERATIONS FOR RABI SEASON, 1889-90.

No. 1367I.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Irrigation.

Dated Calcutta, the 17th September 1890.

RESOLUTION.

READ—

Statements Nos. I, II, and III, showing irrigation operations of Canals in Bengal during the *rabi* season 1889-90.

OBSERVATIONS.—The area irrigated during the rabi season of 1889-90 was 60,553 acres against 106,883 acres in 1888-89 and 59,130 acres in 1887-88. Thus there was a decrease of 43·3 per cent. on the previous year, in which, however, the rabi season was one of unusual activity.

2. The decrease occurred almost entirely on the Sone and Sarun Canals. On the Midnapore Canal, where the supply of water during the rabi season cannot be guaranteed, 440 acres of boro rice were irrigated against 3,369 acres in the previous year. In Orissa there was an increase from 2,973 to 6,059 acres.

3. The details of increase or decrease in the area irrigated by each canal are given in the following comparative statement:—

Canal.		Rabi season.		More.	Less.
		1888-89.	1889-90.		
		Acres.	Acres.	Acres.	Acres.
Orissa ...	Taldunda	242	631	389	.....
	Kendrapara	2,563	5,272	2,709	.....
	High Level, Range I ...				
	High Level, Ranges II and III	168	156	.....	12
Midnapore		3,369	440	.....	2,929
Sone ...	Patna	11,432	7,319	.....	4,113
	Arrah	35,566	22,661	.....	12,905
	Buxar	50,227	23,915	.....	26,312
Sarun		3,316	159	.....	3,157
	Total ...	106,883	60,553	3,098	49,428

ORDER.—Ordered that a copy of this Resolution, and of the Statements Nos. I, II, and III, be submitted to the Government of India, in the Public Works Department, for information: also that copies be forwarded to the Commissioners of the Orissa, Burdwan, and Patna Divisions; the Collectors of Cuttack, Midnapore, Patna, Shahabad, Gya, and Sarun; the Superintending Engineers of the Orissa, South-Western, and Sone Circles; and the Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

J. M. McNEILE, *Col.*, R.E.,

Secretary to the Government of Bengal.

G. A. G. SHAWE,

Under-Secy. to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 20th September, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.		
BURDWAN DIVN. 1	Burdwan Sept. 20, '90	1·31	Weather—hot and cloudy. *Aus* is being harvested. Prospects of *amun* and sugarcane good. More rain wanted everywhere. Prices of common rice :—
	Culna ...	0·66	
	Cutwa ...	0·37	
	Ranigunge ...	1·05	
			Srs.
			Burdwan ... ... 16½ }
			Culna ... ... 15 } per rupee.
			Cutwa ... ... 16½ }
			Ranigunge ... ... 16 }
2	Bankoora ,, 20, '90	2·14	Sky clear and weather warm. More rain wanted. Prospects of crops continue good. *Aus* harvest commenced. Price of common rice 19 seers per rupee at Sudder and 16½ seers at Bishenpore.
3	Birbhum ,, 20, '90	0·22	Weather—dry and warm. Crops still everywhere excellent; but more rain is wanted. People have already begun to irrigate. Price of rice 16 to 19 seers per rupee.
	Rampore Haut ...	1·03	
4	Midnapur ,, 20, '90	1·20	Bright sunshine with occasional rain. Rain still wanted in many places, but prospects improved. Indigo being sown again. Prices of common rice :—
			Srs.
			Sudder ... ... 16½ }
			Contai ... ... 16 }
			Ghatal ... ... 17 } per rupee.
			Tumlook ... ... 15 }
5	Hooghly ,, 20, '90	0·75	Weather—fair with showers. State and prospects of crops good, but more rain required. Prices of common rice :—
	Jehanabad ...	0·58	
			Srs.
			Sudder ... ... 13 }
			Serampore ... ... 13 } per rupee.
			Jehanabad ... ... 16 }
	Howrah ,, 20, '90	0·73	Weather—seasonable. Harvesting of *aus* and jute and transplanting of *amun* still going on. More rain wanted for *amun* crop. Prospects fair except in some villages where floods have done considerable damage. Price of common rice about 14 seers per rupee.
	Uluberiah ...	1·02	
	Central Districts.		
PRESIDENCY DIVS. 6	24-Pergha. Sept. 23, '90	1·91	Weather—seasonable. Harvesting of *aus* and jute and transplanting of *amun* almost over. Outturn of *aus* and jute estimated at between 13 and 14 annas. Prospects of *amun* continue fair except in the flooded area of the Bussirhat subdivision, where the crop has been destroyed. Relief is being given to persons in distress caused by flood. Prices stationary.
7	Nuddea ,, 20, '90	1·14	Weather—seasonable. Winter rice doing well. Flood rapidly subsiding. *Kalai* and *mung* being sown. Rice selling at 14 seers per rupee.
	Meherpore ...	0·55	
	Chuadanga ...	1·05	
	Ranaghat ...	0·82	
8	Khoolna ,, 20, '90	1·63	Weather—bright and hot with occasional showers. Flood-water receding. Nearly the whole of the crops submerged have been destroyed. Reaping of *aus* and transplantation of *amun* nearly over. Prospects in the flooded thanas bad; elsewhere good.
	Bagirhat ...	1·78	
	Satkhira ...	1·35	
9	Jessore ,, 20, '90	0·15	Weather—hot and cloudy. Flood-water rapidly subsiding. Prospects very good in Magura and Narail. Sowing of cold-weather crops and indigo commenced. Enquiries about flood damages in progress. Charitable relief being given in Bongong and Jhenidah.
	Jhenidah	1·55	
	Magura ...	1·43	
	Narail ...	0·34	
	Bongong ...	1·00	
10	Moorshedabad ,, 20, '90	0·86	Weather—bright and clear. Harvesting of *bhadoi* nearly completed. Some transplantation of *haimanti* paddy still going on in the Kandi subdivision. *Kalai* has been widely sown. Cultivation for *rubbi* commenced. Floods much receded. Agricultural loans and charity being distributed to those in distress.
RAJSHAHYE DIVS. 11	Dinagepur ,, 20, '90	0·40	Weather—variable. Prospects of crops continue favourable. Price of rice unchanged.
	Thakurgaon ...	3·77	
12	Rajshahye ,, 20, '90	0·33	Weather—seasonable. Flood-water subsiding generally, and in some parts rapidly. Prospects improving in Nowgong, and in Nattore are good.
	Nattore ...	1·67	
	Nowgong ...	1·16	
13	Rungpur .. 20, '90	2·50	Weather—sultry with frequent showers. Transplantation of *amun* rice nearly over. Rain now wanted for the young plants. Jute has been greatly over done, and in many places will hardly repay the cutting. Prices still very high.
	Kurigram ...	1·39	
	Nilphamari ...	0·75	
	Gaibanda ...	0·84	
14	Bogra ,, 20, '90	1·70	Weather—days hot and sultry. *Amun* is still being transplanted. Three-fourths of the *aus* paddy have been reaped, and the reaping of jute is not finished yet. *Amun* and sugarcane look promising. Common rice selling at 19 seers per rupee.
	Sherpur ...	0·49	
15	Pubna ,, 20, '90	1·19	Weather—cool and cloudy. Jute harvest not yet finished; outturn estimated at about 14 annas. Prospect of *amun* not good in the sudder subdivision, but good in the Serajgunge subdivision. Prices stationary.
16	Darjeeling ,, 20, '90	1·85	Weather—fair and fine. Transplantation of winter rice in Terai nearly finished. Jute, *bhadoi*, *bhutta*, and *chota marua* still being harvested. *Haimanti* rice and *bara marua* progressing favourably.
	Silliguri ...	2·05	
17	Julpigoree ,, 20, '90	3·47	Weather—hot and cloudy with rain at intervals. About 14 annas of *haimanti* paddy transplanted. Average outturn of *aus* and jute reported to be 12 and 11 annas respectively. Prices continue stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Divn. 18	Dacca Sept. 20, '90	1·08	Weather—hot and cloudy at intervals. Rain heavier in Manickgunge than in other subdivisions. *Aus* and jute being harvested. These crops have been partially damaged be high flood. *Amun* doing well. Rivers falling. Fodder available, but not in abundance. Common rice sold at from 13 to 15 seers per rupee during the week.
19	Furreedpur „ 20, '90	2·49	Weather—seasonable. Flood-water fast receding. Prospect of *amun* crop fair. Jute steeping in progress. Price of rice stationary.
20	Backergunge ...	.....	Report not received.
21	Mymensingh Sept. 20, '90	4·18	Weather—hot and cloudy with occasional rain. Jute still being harvested. Transplantation of *amun* nearly finished. Standing crops flourishing. Rivers going down. Price of common rice 13½ seers per rupee.
Chittagong Divn. 22	Chittagong „ 20, '90	3·84	Weather—seasonable. About 14 annas of *aus* cut, and *amun* transplanted over 12 annas of land. Prospects fairly good. Prices steady.
23	Noakholly „ 20, '90	1·67	Weather—warm and sultry. Reaping of *aus* completed. Transplantation of *amun* still going on. Betel-nuts maturing.
24	Tipperah ...	.....	Report not received.
25	Chittagong Hill Tracts. Sept. 18, '90	2·05	Weather—extremely hot and rainy, except on the 16th and 17th. Gathering of *jum* paddy continues. Plough-paddy progressing. Common rice being sold at 12 seers 15 chittacks per rupee
	Hill Tipperah „ 19, '90	3·17	Weather—hot with occasional showers. Cutting of jute going on. Prospects of *amun* and *jum* crops generally fair. Prices stationary.
BEHAR.			
Patna Divn. 26	Patna „ 20, '90	1·19	Weather—very hot. Transplantation of paddy over and prospects favourable. *Bhadoi* crops are being harvested. *Jowar* and *rahar* look flourishing. Prices of food-grains stationary.
	Barh ...	1·40	
	Behar ...	1·05	
	Dinapore ...	3·20	
27	Gya „ 20, '90	0·53	Weather—sometimes cloudy and sometimes clear. Paddy and *kurthi* are the only crops standing in the fields. Prospect of paddy is doubtful for want of rain. Ploughing of *rubbi* fields commenced. Prices of food-grains have risen to some extent.
28	Shahabad „ 20, '90	0·98	Weather—cooler than last week, but still hot. Rain in Sasseram and Bhabuah
	Buxar ...	0·90	has saved the paddy crop for the present. More rain will be wanted. The
	Bhabuah ...	2·35	rains do not appear to have finished, and prospects are good. Price of wheat
	Sasseram ...	1·02	rising, but that of paddy falling, in Sasseram; elsewhere prices unchanged.
29	Durbhunga „ 20, '90	0·29	Weather—hot and cloudy. *Bhadoi* harvest still in progress. Prospects of rice
	Somastipur ...	1·18	in parts not affected by floods continue favourable. A few showers of rain
	Madhubani ...	0·70	would, however, greatly benefit the crop. Lands being prepared for *rubbi* cultivation. Prices remain stationary.
30	Mozufferpur „ 20, '90	0·62	*Makai* and other *bhadoi* crops are being harvested; outturn will be better than
	Hajipur ...	2·88	was expected during the heavy rains of July and August. Rice is doing
	Sitamarhi ...	0·58	well, specially in the Sitamarhi subdivision, and with a further rainfall of three or four inches before the middle of October, a good outturn will be obtained.
31	Sarun „ 20, '90	0·52	Weather—hot and bright; occasionally cloudy. Paddy, where it survives, has
	Sewan ...	5·88	been benefited by the rain. More rain wanted. Preparation of lands for
	Gopalgunge ...	2·07	*rubbi* commenced.
32	Chumparun „ 20, '90	1·88	Weather—hot and sultry. Rainfall of the week has considerably benefited the
	Bettiah ...	3·41	winter rice on high lands; prospects very good. *Bhadoi* crops are being cut and housed. Prices remain almost stationary.
Bhagulpore Divn. 33	Monghyr „ 20, '90	1·50	Weather—hot and sultry; cloudy at times. Recent rain has benefited the
	Begusarai ...	0·79	winter rice, but more rain is wanted. Lands are being ploughed for *rubbi*
	Jamui ...	0·88	sowing.
34	Bhagulpore „ 20, '90	0·71	Weather—hot and sunny. Prospects of winter rice continue good, but more
	Banka ...	0·88	rain is wanted. *Bhadoi* harvest nearly over.
	Mudhepura ...	Nil	
	Soopool ...	0·43	
35	Purneah „ 20, '90	0·34	Weather—cloudy and close. Prospects continue favourable. *Bhadoi* harvest
	Kishengunge ...	0·93	completed with an average outturn of 13 annas. Transplantation of winter
	Arrareah ...	1·27	rice finished. Prices stationary.
36	Maldah „ 20, '90	0·52	Days hot and bright, but mornings somewhat cool. Jute still being cut. Winter
	Chanchal ...	0·78	rice thriving well. *Kalai* sowings going on. Lands being prepared for
	Shibgunge ...	0·25	*rubbi* crops. Common rice selling at from 12 to 17½ seers per rupee.
	Gajole ...	1·53	
37	Santhal Pergns. „ 20, '90	0·98	Weather—generally cloudy and hot. Rain has done much good to the rice crop,
	Deoghur ...	0·52	and another fair shower will secure an outturn of 16 annas. *Janera* is
	Godda ...	0·46	nearly a failure; about 4 annas will be the outturn of this crop. All the
	Jamtara ...	0·56	minor crops are doing well.
	Pakour ...	1·62	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38	Cuttack Sept. 20, '90	5·29	Weather—seasonable. Harvesting of early *beali* going on. *Laghu* as well as *guru sarad* doing fairly well except in Jajpur, where, as previously reported, paddy crop generally, and *beali* and early *sarad* specially, have suffered from want of sufficient rain. Outturn of early *sarad* estimated at 7 annas. Two heavy showers have, however, fallen during the week, and prospects are likely to improve.
	39	Pooree „ 18, '90	1·24	Weather—seasonable. Weeding of *sarad* crop going on. *Beali* and *mandia* are being harvested. Miscellaneous crops doing well Insects called *haldi-goondi* and *rangi* have attacked the *sarad* crop in the Khoorda subdivision. Price of common rice stationary.
		Khoorda ...	0·59	
		Banpur ...	5·67	
	40	Balasore „ 20, '90	3·36	Weather—seasonable. Rain has come in time to save the winter rice crop on lowlands, but that on high lands is already dead. Estimated crop in Bhuddruck 10 annas, and in the Sudder subdivision at least 12 annas.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh Sept. 20, '90	1·93	Weather—rather unsettled. Rain on 16th and 17th has greatly benefited the rice crop. *Bhadoi* crops are being harvested; outturn generally very poor. Oilseeds and pulses are being sown.
	42	Lohardugga „ 20, '90	3·35	Weather—seasonable. Rainfall during the week has done much good to the winter rice crop. Some more rain is wanted for this crop. Early *gora* rice is being harvested here and there. No material change in price.
		Palamow (up to 15th Sept.)	0·70	
	43	Singbhoom Sept. 20, '90	2·51	Weather—cloudy with storm every day. The recent rain has done immense good to the winter rice crop; more rain is, however, wanted in order to place it out of danger. The upland (*bera*) paddy has suffered to the extent of about 4 annas. Price of rice varies from 13 seers per rupee at Monarpur to 20 seers at Kalkapur; in Chyebassa town it is selling at 16 seers per rupee.
	44	Manbhoom „ 20, '90	2·04	Weather—very favourable. Good rain all over the district, and the rice crop has been materially benefited. Prospects generally fair.

* Means of six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period fo
The humidity of the atmosphere is expressed as percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The
The normal means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during
[illegible] numerical means or average of the rainfall in the district resulting from the returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

Meteorological Division.	District.	District observations. Average cloud amount at 9 A.M. for week.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 15th May 1890. Mean for district.	Since 15th May 1890. Normal mean.	Since 15th May 1890. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of th are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 23rd September* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 19TH OF SEPTEMBER 1890.

THE only noteworthy peculiarities in the weather during the past week are:—

(1) The shallow depression which gradually formed over Orissa and the adjacent part of the Bay, and which, after being displaced southwards by the rapid rise of pressure in Northern India about the middle of the week, intensified slightly in the Circars, but practically filled up on the 19th, the last day of the week.

(2) The scattered rainfall in all districts except Orissa, with heavier and more general showers on Monday and Tuesday in the eastern districts and on Tuesday and Wednesday in the west of the province, the total falls being deficient except in Orissa.

As the shallow depression remained to the south-west of Bengal throughout the week, the wind circulation has been almost unchanged except in the south-west corner where, from northerly, directions changed to east about the middle of the week, when the depression was displaced to the south. On the last two days the tendency was for southerly winds to set in at the inland stations, as pressure was falling in the west of Behar and was very little higher than in the Circars, where the low-pressure area was filling up. On Sunday the 14th, pressure was changing very slightly, and was only two or three-hundredths of an inch below the normal. South-easterly winds were blowing at all stations, and the air was heavily charged with moisture in the east, as very heavy rain was falling at Akyab, Chittagong, and Silchar. On the 15th lowest pressure was at False Point, and the depression seemed to be moving towards the north, while rainfall had become fairly heavy and general in East and North Bengal. Gradients were steeper over the Bay and about normal in Bengal, but on the following day a rapid rise of pressure commenced in the north, continuing on the 17th, whereby gradients became steeper in Bengal, and strongly easterly winds, but of only average velocity, blew over the whole province. After that lowest pressure was at Vizagapatam, and increased on the 17th from 29·619 to 29·717 inches, and winds from being north or west in Orissa changed to east as at the other Bengal stations. Rainfall had almost ceased at eastern stations on the 17th, but was fairly general in South-West Bengal, Orissa, and Behar, amounts however being generally small. The depression intensified somewhat on the 18th, the centre being still close to Vizagapatam, moderately heavy rain falling in the Circars; but in Bengal its influence was ceasing and wind directions were becoming southerly. On Friday southerly winds were blowing at nearly all stations, and though showers continued in Orissa, South-West Bengal, and part of North Bengal, in the other districts rainfall was practically absent.

Pressure—On an average has been slightly above the normal, and changes have been small except in the middle of the week when the rapid rise occurred, commencing in the northern districts. On the 16th the rise was about ·12 inch in North Bengal, and slightly under a tenth in East Bengal, but diminished to less than ·05 inch in Chutia Nagpur. On the 17th the most rapid rise was in Chutia Nagpur, where it exceeded ·17 inch, and from there it gradually diminished to ·07 inch in North and East Bengal and 12 inch in Orissa. The wave appears to have entered the province from the north-east and crossed towards the south-west. Mean pressure is below the normal at Gopalpur, False Point and the stations in the west of Behar, and above elsewhere by small amounts ranging up to ·04 inch.

Temperature—On an average has been below the normal in Orissa, practically normal in Chutia Nagpur and South-West Bengal, and above the normal in the other districts, by ·7° in Behar, ·8° in East Bengal, and 1° in North Bengal.

Rainfall—Has been above the normal in Orissa by nearly one inch, and below in all the other districts by less than half an inch, except North Bengal, where defect is 1·66 inches, the average fall being only ·92 inch. The average fall in Orissa is 3·66 inches, in East Bengal 1·96 inches, in Chutia Nagpur 1·58 inches, and in the other districts, except North Bengal, between 1 and 1·5 inches. As stated above, almost general rain has been received in Orissa and the adjacent parts of South-West Bengal throughout the week, and that general rainfall elsewhere was chiefly on Monday and Tuesday in the eastern districts, and on Tuesday and Wednesday elsewhere. The falls at the various stations are very irregular, but in many cases do not exceed 1 inch, and only in a few 2 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 19th of September 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1890.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ⁀, dew.

N. B.—In the weekly report from 31st August to 6th September 1890 read "89·7" for "89" as the maximum of the 1st, and also read "1·017" for "10·17" as the vapour tension of the 2nd September 1890.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 6th September 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 6th September 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 26·3 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 3·5 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1885—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	28·9	24·1	18·2	23·0	19·1	22·8	26·3

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

TOWNS.	WEEKS ENDING— 16th August 1890.	23rd August 1890.	30th August 1890.	6th Sept. 1890.	TOWNS.	WEEKS ENDING— 16th August 1890.	23rd August 1890.	30th August 1890.	6th Sept. 1890.

Dacca	17·5	10·4	16·9	11·7	Total ...	18·7	20·7	19·0	26·3

It will be seen that last week the highest birth-rate was returned from Arrah (79·), and the lowest from Ranaghat (6·). No births were registered during the week in Jessore town.

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 28·4 per 1,000 of the population. The rate of the week is 2·8 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years except 1887 and 1889—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	42·5	29·4	22·7	35·7	25·5	31·3	28·4

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

TOWNS.	WEEKS ENDING— 16th August 1890.	23rd August 1890.	30th August 1890.	6th Sept. 1890.	TOWNS.	WEEKS ENDING— 16th August 1890.	23rd August 1890.	30th August 1890.	6th Sept. 1890.
Burdwan	10·7	16·8	24·4	16·8	Naraingunj	16·6	34·8	12·4	16·6
Midnapore	17·0	23·2	9·3	17·0	Chittagong	21·1	16·4	9·4	18·8

Rampore Beauleah	34·2	26·3	21·0	18·4	Purneah	15·9	24·2	20·8	10·4
Darjiling	66·6	97·0	44·5	59·3	Poori	25·2	43·0	35·8	46·8
Dacca	20·1	24·7	20·1	15·0	Total ...	23·5	24·8	22·9	28·4

It will be seen that last week the highest mortality occurred in the town of Chupra (82·5) and the lowest in Purneah (10·4).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

Cholera.	Ratio per *mille.*	*Small-pox.*	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Bowel-complaints.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Chupra ...	53·3	Mozufferpore	7·3	Jessore ...	30·6	Darjiling ...	29·6	Poori ...	23·1
Durbhanga ...	18·1			Darjiling ...	29·6			Gya ...	19·8
Patna City ...	11·0			Gya ...	27·3			Serampore ...	17·7
Gya ...	9·6							Chupra ...	13·1
Arrah ...	9·6							Midnapore ...	10·8
Mozufferpore...	6·1								

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 7· from cholera, against 3· per 1,000 in the preceding week; ·3 from small-pox, against ·1; 10·5 from fever, against 9·4; 3·4 from bowel-complaints, against 4·3; ·4 from injury, against ·3; and 6·8 from other causes, against 5·8 in the preceding week.

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	28·6	Christians ...	7·5	Under 1 year	192·6
Females	28·2	Hindus ...	28·8	1 and under 5 years	57·1
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	101	Mahomedans ...	28·1	5 „ 10 „	21·7
				10 „ 15 „	11·3
				15 „ 20 „	14·1
				20 „ 30 „	16·3
				30 „ 40 „	15·7
				40 „ 50 „	19·5
				50 „ 60 „	32·2
				60 years and upwards	64·1

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,

The 22nd September 1890. *Sanitary Commissioner for Bengal.*

RESOLUTION ON THE ADMINISTRATION REPORT OF THE RAJSHAHYE DIVISION FOR THE YEAR 1889-90.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 30th September, 1890.

RESOLUTION.

READ—

The Administration Report of the Rajshahye Division for the year 1889-90.

Tours.

The Commissioner (Mr. Lowis), all the Collectors in the Division, and the Sub-divisional Officers with a single exception, made very complete tours. Among the subjects which engaged their attention are mentioned enquiries into excise matters, chowkidari work, the condition of roads and villages, the state of crops, public health and feeling, the disposal of bad livelihood cases, inspections of police-stations, dispensaries, sub-divisional offices, subsidiary jails, schools, offices of Managers under the Court of Wards, and the collections of ferry and pound rents.

Circumstances affecting the material condition of the people.

2. The rainfall was generally sufficient, and the outturn of the different crops not much below the average. Prices were nevertheless high, owing to a deficiency in the harvest of the previous year. Public health was better than in 1888, and the agriculturists, who comprise the bulk of the population, are said to have been comparatively well off. On the other hand, the high prices of food affected injuriously those who live on fixed incomes, among whom are specially mentioned those engaged on clerical work in its different forms. There was a tendency to a rise in wages: the rates increased in regard to masons, blacksmiths and carpenters in Rajshahye and unskilled labour in Julpigoree, but against this must be set off an unexplained decline in the district of Bogra.

Manufactures and trade.

3. As observed by the Commissioner, the most important manufactures of this Division in indigo, silk, tea, cinchona, and gunny cloth are carried on by Europeans. The first of these industries, which once flourished in Rajshahye and Pubna, has greatly declined

in recent years. The outturn of silk in the Rajshahye district has increased while the business has almost been abandoned in Bogra. The yield of tea was 23,471,100lbs. against 20,649,957lbs. in the previous year. The Commissioner remarks that a great impetus to the trade of the Rajshahye district has been given by the introduction of the daily steamer service between Rampore Beauleah and Damukdea, and the bi-weekly service between Maldah and Beauleah. The trade with Bhootan increased during the year, the imports being valued at Rs. 1,53,690 against Rs. 1,08,070 in 1888 ; the exports Rs. 1,39,933 against Rs. 1,20,927. The imports from Thibet are not precisely stated, but the export trade was as follows:—

		1888.	1889.
Cotton piece-goods (European) ...	Rs.	12,281	18,486
Rice	Mds.	150	...
Copper	„	103	31
Iron	„	122	95
Tobacco	„	700	254
Wool	Rs.	650	4,821

Crime and police.

4. The Commissioner's report does not indicate the character of the year in regard to crime, or convey any expression of his opinion as to the general conduct of the police. It would, however, appear from a comparison of the figures submitted with these returns last year that there was a diminution in the total number of cognizable and non-cognizable offences. Progress was made in the work of raising the pay of chowkidars and assuring its more regular discharge. The Commissioner expresses himself as preferring benches of Honorary Magistrates sitting alone to those over which a Stipendiary Magistrate presides, on the ground that the members take more interest in their work when allowed to act independently, and that relief is thus afforded to the officers of Government. He has, moreover, to some extent given effect to the policy he recommends. These considerations are of weight where Honorary Magistrates are found qualified by knowledge of the law to act alone; but care should be taken to avoid the establishment of benches which cannot be expected to dispose satisfactorily of the criminal work allotted to them. The subject has been under the consideration of the Lieutenant-Governor during the past year, and the Commissioner should embody any proposals he may desire to make in the form of an amendment to the rules for the appointment and guidance of Honorary Magistrates that have been recently promulgated.

Affairs connected with land.

5. Mr. Lowis considers that the conduct of the zemindars in his Division was satisfactory on the whole, and mentions several who have been distinguished for exceptionally good management. On the other hand, certain land-owners in the Pubna district are indicated as well-known disturbers of the public peace, with results which have sometimes proved ruinous to themselves. The number of rent suits in Rungpore has increased from 6,481 to 8,086, and the explanation offered, that the agricultural classes are becoming more able and willing to assert their rights under the Bengal Tenancy Act, is not very satisfactory, as this cause, if the true one, must have operated also in Pubna and Bogra districts, where there has been a falling off under this head. Mr. Lowis considers that the Act worked successfully during the year. Its special provisions were but little used. Of the land revenue 98 per cent. was collected, a result somewhat better than that obtained during the previous year.

Education.

6. There was a nominal decrease of one school during the year, and an increase in the number of pupils from 92,990 to 94,578. In the Rajshahye Division the work of educating the masses makes very slow progress. There was an actual falling off in the attendance at lower primary schools, a decrease which was most marked in the case of Rungpore, in which there were 12,589 such pupils in 1889-90 against 15,517 in 1888-89, and no explanation is offered of the decline.

7. The thanks of the Lieutenant-Governor are given to Mr. Lowis for his administration of the Division during the year. Mr. Marindin, Mr. Paul, C.I.E., and Major Boileau are specially mentioned among Collectors for the excellence of their work, and among subordinate officers Mr. Pargiter, Mr. Bedford, Baboo Gunga Narain Roy, and Baboo Sita Kunta Mukerjee.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE ORISSA DIVISION FOR THE YEAR 1889-90.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 30th September, 1890.

RESOLUTION.

READ—

The General Administration Report of the Orissa Division for the year 1889-90.

Mr. Worsley has submitted a very full and careful report of the administrative history of the year, which in his Division was the reverse of prosperous. The price of food was high, owing to the shortness of the harvest in 1888-89, and the effect of this on the condition of the working class was not counteracted, as it was in some other parts of the country, by unusually steady demand for labour, or by any general rise in wages. The crop was not very bad, the rice yielding 13 annas, pulses 9 annas, wheat 6 annas; but on the other hand it was not good enough to compensate for the deficiency in the two preceding seasons by replenishing the exhausted stocks. The year was also most unhealthy, a result attributable, at least in part, to conditions which are described as follows by the Collector of Balasore:—

General condition of the people.

"The causes are not, I think, far to seek, though they take us back to the autumn of 1888. The October rainfall of that year was an almost total failure throughout the district, and, except in the extreme south, there was practically no rain in November. In their eagerness to save the winter rice, the ryots used for irrigation purposes every available drop of water, with the result that by February there was little left for drinking purposes. In January, February and March, 1889, there was scarcely any rainfall. May, June and July were also much below the average, as was also September. It was no wonder therefore that cholera took root in every part of the district, especially in Basudebpur and Chandbally thanas, which are impregnated with salt, and where drinking-water is always scarce. It should perhaps be noted that these are two of the three thanas that suffered from flood in August and September, 1888. . . . . It is certainly worth remarking that Jellasore suffered less than any other thana. Here the people possess an abundant supply of good water in the Subarnarekha river."

In Pooree the cholera prevailing generally over the whole Division was aggravated by a special cause, the concourse of pilgrims to the temple of Juggurnath. Fever also was very common, and the registered mortality of the year amounted to 131,784 against 76,103 in 1888-89.

2. The question of salt manufacture is being separately considered by Government. The other articles of manufacture mentioned in the report, such as the silver work of Cuttack, the muslins of Goolnagur, and the stone carving of Alsi, are of very minor importance, but they indicate a bent in the Uriya character which, under favourable circumstances, may hereafter lead to important economic results. At present the population is almost entirely agricultural. The sea-borne traffic of Orissa during the year was valued at Rs. 1,21,38,631, made up of Rs. 59,84,345 exports and Rs. 61,54,286 imports. It is somewhat greater than in the preceding year, when the total value was Rs. 1,13,28,886, but considerably below the average of the three years 1885-86 to 1887-88, which was Rs. 1,57,72,237. The decline is partly accounted for by the opening of the Coast Canal, which carried during the year goods valued at Rs. 5,74,531, but is mainly attributable to the bad crop of 1888-89.

Manufacture and commerce.

3. Under the heading of Police the Commissioner quotes observations on the efficacy of the system of providing for the village watch by grants of rent-free land, a subject which will have to be considered with care now that the province has come under resettlement. When properly worked, it is a very cheap system, but it cannot secure any high degree of efficiency. Chapter XIII dealing with this subject will be specially submitted to the consideration of the Committee recently appointed under the presidency of Mr. Beames. The number of criminal cases increased from 11,731 in 1888 to 13,044 in 1889, and in regard to crimes

Police and justice.

against property this is attributed to the prevalence of high prices. There was no appreciable fluctuation in the amount of civil litigation.

Land and land revenue.

4. The revenue collections were not satisfactory, and the Commissioner refers to the standard of 90 per cent. on current demand in a way which may mislead his subordinates as to the expectations of Government. The collections of a whole district are not to be pronounced good because they exceed 90 per cent., although a very special explanation is needed whenever collections fall in any place below that minimum. In Pooree the collections, which amounted to 78·5 per cent. only on the current demand, were very bad, and it is not to be considered as a set-off that they were worse in the preceding year. The collections of the canal rates were most deficient, and the general result is very disappointing. The attention of the Board will be drawn to this point. There were several settlements in progress during the year, important in themselves, and also as preparatory to the general settlement of Orissa, which will be commenced next year. It is satisfactory to observe that only three sales ultimately upheld took place during the year for the realization of Government revenue.

Education.

5. The Lieutenant-Governor observes with regret that there has been a marked decline both in the number of schools and scholars, the former having, as reported, fallen from 8,421 to 8,073, the latter from 125,786 to 115,788, the decrease being principally under the head of primary education. It is attributed, no doubt with truth, to the influence of high prices and to the sickly character of the year; but if a strong movement had been established in the direction of mass education, the effect of such conditions would be merely to retard the rate of progess, not to cause actual retrogression. The special schools of Cuttack, Normal, Medical, and Surveying, are mentioned as doing much practical good.

Conduct of zemindars.

6. The Commissioner observes that—

"Rajah Baikuntha Nath De Bahadur of Balasore and Rajah Badyanath Pundit of Cuttack hold the foremost place among the zemindars of Orissa for liberality and public spirit. Both these gentlemen are good landlords and of enlightened views. Rajah Baikuntha Nath De takes a very active part in the administration of local affairs, and renders much assistance to the district officer in his capacity of an Honorary Magistrate.

"The Rajah of Parikud is conspicuous among the zemindars of the Pooree district, and possesses much influence and authority. He is alive to the advantages of making improvements on his estate.

"Among other zemindars, Babus Koilash Chandra Roy Mohashoy of Dehurda and Gobind Bullabh Roy Mohashoy of Cowpore are favourably noticed by the Collector of Balasore as just landlords and men of public spirit."

7. The thanks of the Lieutenant-Governor are given to Mr. Worsley for the efforts made by him to secure the efficient management of his Division during the year. The three Collectors, Mr. Tute, Mr. Allen, and Mr. Cornish, are noticed by him as having administered their districts satisfactorily, and among Deputy Collectors special note is made of Babu Rash Behari Naik.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

RESOLUSION ON THE ADMINISTRATION REPORT OF THE DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL, FOR THE YEAR 1889-90.

REVENUE DEPARTMENT—AGRICULTURE.

Calcutta, the 23rd September, 1890.

RESOLUTION.

READ—

Letter No. 630A, dated the 13th August, 1890, from the Board of Revenue, Lower Provinces, submitting with their remarks the annual report of the Director of the Department of Land Records and Agriculture, Bengal, for the official year 1889-90.

THE Director was chiefly employed during the year on important settlement work, and, in so far as it relates to this Department, and to the supervision he has exercised over improvements on Government and Wards' estates, his valuable report will be reviewed with those submitted by the Board of Revenue as to Land Revenue Administration and the management of estates under the Court of Wards. He, however, found time to prosecute with effect the agricultural enquiries which form the second part of his duties, completing, with the aid of Mr. B. C. Basu and Mr. N. N. Banerjee, the analysis, as it has been called, of the districts of Dacca and Lohardugga, and making interesting investigations as to forest and fuel reserves, tree-planting and other subjects of a kindred nature.

Eradication of *pebrine* and silk experiments.

The work originally undertaken by Government at Berhampore for the eradication of *pebrine* among silk-worms, by the supply of untainted seed, was carried on during the year under the supervision of a committee of merchants interested in the trade, with Sir Alexander Wilson as President. There appears to be no doubt that the action taken has been judicious, and may ultimately result in reducing very largely the loss suffered from the disease; but last year the success obtained was not as great as had been expected. Of 7,295 maunds of seed raised, only 1,358 maunds were sold—a result which indicates no particular eagerness on the part of the villagers to obtain the improved production. Some experiments undertaken in Midnapore on a small scale were more successful. The sum of Rs. 5,000 a year is contributed by Government towards these experiments, and the services of Mr. Mookerjee, Probationery Deputy Collector, who has studied the subject in Europe, have been lent for the purpose. The Lieutenant-Governor hopes that the work will be continued steadily for a series of years, as from its nature no great improvement can be expected to result at once, while perseverence will probably result in success, such as has been obtained by similar methods in other countries.

Experimental farms.

A series of experiments were tried at the Dumraon, Burdwan, and Seebpore farms during the year. In regard to the fodder grasses tried at Burdwan, the Director observes:—

"From the statement given below it will be seen that bone-meal, applied at the rate of one maund per bigha, gave excellent results with *sorghum*, raising the outturn to more than twice that of an unmanured plot:—

Manure applied per bigha.	Outturn per bigha.
	Mds. s.
Bone-meal, per maund	280 36
Unmanured	118 0

This experiment further showed that *sorghum* succeeds as a rainy weather crop where it had been found to fail as a cold weather crop In the absence of any demand for the grass, the whole of the produce was given to the bullocks of the farm, which did well on it, and used it with the greatest avidity."

At Seebpore—

"Experiments made with this crop last year confirmed the opinion expressed in the annual report of the previous year that sorghum can be profitably grown as a fodder crop in Bengal. The produce was sold at 2 annas 6 pies per maund to a Calcutta dairy, the manager of which, Mr. G. C. Bose, a Cirencester scholar, reported very favourably on it. The

yield of milk of a number of cows was increased from 20 to 25 seers by the substitution of sorghum for straw; while the cost of feeding was at the same time reduced. Mr. Bose has been so far encouraged by the results that he proposes to grow sorghum as a fodder for his milch cows. The cultivation of sorghum realized a net profit of Rs. 12-12-3 per bigha."

Agricultural implements.

The Seebpore plough has met with some recognition, though not very generally successful. Mr. J. W. Crowdy, of Durbhunga, writes:—

"I find the Seebpore ploughs very useful, especially in light soils. I have now over 40 in use, and the great advantage I find is that they are so light that any bullock who can draw a common plough can work them with the greatest ease, so I have not to keep a large complement of bullocks, as I should have to do if they were heavy and unwieldy."

The Director adds as to other agricultural implements:—

"*Sugar turbine.*—The centrifugal sugar drier, also called the turbine, was exhibited at the Khulna Exhibition, and an experiment made there in manufacture of *dolo* sugar by this machine proved successful. The turbine is coming into use for making *dolo* or *kutcha* sugar out of cane *rab* in the district of Shahabad, and it is not improbable that it may be introduced for the same purpose in Central Bengal, where the manufacture of sugar from date-palm juice is an important industry.

"*Butter-making machines.*—An interesting series of experiments was made during the year by Mr. Howman, who had been deputed to India by the Dairy Supply Company of London to show the working of the centrifugal cream separator and other dairy machines, with the ultimate view of creating a market for them in India. The experiments were made at the Metcalfe Hall in Calcutta, at the Khulna Exhibition, and at Bankipore. A comparative trial between the English method of butter-making by these machines and the native process resulted in favour of the former; but the trials of the dairy machines were far from being conclusive, and leave it an open question which system, native or European, gives the larger yield of butter. Since Mr. Howman left, Messrs. Basu and Banerjee have made a comparative trial between the European dairy machines and the native churn, and have found that, not only in respect of quantity, but also of quality, the former are preferable. Attempts will be made to bring the dairy machines to notice at mêlas and elsewhere."

The cost of these experiments is about six thousand rupees a year.

Use of bones as manure.

With regard to the facts stated on the subject by the Director, the Lieutenant-Governor observes that it is better to export bone-dust, obtaining for it Rs. 2 or Rs. 2-8 a maund, than to leave the bones on some deserted spot, where they do no good even if they do not constitute a nuisance. But what is really desirable is that the ryots should learn to prepare and use this valuable manure for suitable soils. If its use yields a profit to farms in Europe after paying all the cost of carriage, and also to indigo and tea-planters in the country, the dust must also in some cases at least be worth its cost to the ryots. Sir Steuart Bayley observes with satisfaction the progress made in the direction of utilizing a product now generally allowed to waste, as indicated in the following passage:—

"A beginning has already been made by ryots in the use of bone-meal as manure in the districts of Burdwan and Hooghly. Arrangements have been made at Belcooly, Pearapole, and Khanian in the Hooghly district, and also in the Burdwan and Dumraon farms, and at Jheria in Manbhoom, to have bones collected and to have them fermented and ground into meal, and then to distribute the bone-meal at cost price to the ryots of the neighbourhood. In this way it may be possible to offer bone-meal at prices not exceeding Re. 1 per maund. At the suggestion of Mr. Donald Sunder, Settlement Officer of the Western Dooars, and with the permission of Dr. Lethbridge, Inspector-General of Jails, it has been arranged to utilize the labour of Mahomedans, low-caste Hindus, and aboriginal prisoners at the Julpaiguri and Purulia Jails for the grinding of bones. The bone-meal prepared in the jail will be available for sale at cost price to parties applying for it. Mr. Sunder believes that he will be able to induce the jotedars of Western Dooars to use it largely. He has already purchased 50 maunds of bone-meal from Messrs. Croft, Wells & Co., of Bally, and distributed it among the jotedars of the Western Dooars."

The thanks of the Lieutenant-Governor are given to Mr. Finucane for his efficient management of the Department during the year. Mr. Sen also rendered satisfactory service.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE PROGRESS REPORT OF THE FOREST ADMINISTRATION IN BENGAL FOR 1889-90.

REVENUE DEPARTMENT—FORESTS.

Calcutta, the 23rd September, 1890.

RESOLUTION.

READ—

The Progress Report of the Forest Administration in Bengal for 1889-90

MR. HOME has submitted a very full and complete report of the working of the Department during the year, for the greater part of which he was himself in charge of the office of Conservator of Forests. Mr. Davis officiated for the three months while the Conservator was on leave of absence.

Area.

2. The area of the Reserved forests is now reported to be 5,195 square miles, of Protected forests 2,239 square miles, of Unclassed State forests and Waste lands 4,034 square miles—in all 11,468 square miles, being $5\frac{1}{2}$ per cent. of the total area of province (193,198 square miles). The forests are confined to the districts bordering on the sea, the sub-Himalayan tracts, and the plateau of Central India, so far as it stretches into Chota Nagpore and Orissa. The rich districts of the interior of Bengal are, most unfortunately, altogether without public forests, and are consequently supplied in a very deficient degree with fuel. An area of 207 square miles was added to the Reserves during the year, and an area of 25 square miles of Protected forests in the Sunderbuns was farmed out for reclamation. Much work is being done in completing the title of Government to existing Reserves by going through the legal formalities prescribed by the Act as a necessary preliminary to the constitution of a forest—formalities which were often overlooked in the first instance. The enquiries incidental to these proceedings will also secure the record and protection of private easements, and in some instances may lead to a more judicious alignment of forest boundaries, which should always be fixed with reference, among other considerations, to the convenience of the neighbouring cultivators The Lieutenant-Governor notices with satisfaction that the average cost per mile of deliminating boundaries has been reduced from Rs. 16 to Rs. 7-3.

Legal proceedings.

3. During this year there have not been so many criminal charges against officers of the Department, and in only one case brought to trial has the prosecution proved abortive. Three forest guards on the Kassalong Range in Chittagong were murdered by a gang of Chakmas, who made away with over Rs. 2,000. All the gang, except the ringleader, have been captured, and it is hoped that he also will soon be in the hands of justice. Owing to the large number of cases compounded, only 120 prosecutions were instituted as against 254 in 1888-89, while the percentage of convictions remains practically the same, viz., 79·6 per cent. Considering the remarks recorded on the subject last year by the Government of India, an explanation should have been given of the small proportion of successful proceedings. The number of cases compounded has increased from 1,450 to 2,524. These came chiefly from the Darjeeling and Sunderbuns Divisions, where the delay and other inconveniences which attend an appeal to the courts have led Forest officers to prefer compounding.

Fires.

4. The result of the special measures taken to protect a portion of the forests against fire were successful—95 per cent. of the areas thus dealt with having escaped, in spite of the dryness of the season, against 72·9 per cent. in the previous year. On the other hand, there was a failure in the area not specially protected, but on which some attempt was made at preservation. In illustration of the advantages of protection reference may be made to Mr. Home's statement in regard to Buxa, that the savannahs are in many places fast clothing themselves with tree growths, thanks to consecutive years of exemption from fires. Similar improvement is observed in the savannahs of the Raidak sâl tract, but it is not so marked in those of the Bholka forest. The area of regular plantations was extended by 116 acres, and that of cultural operations by 18 acres. The cost, including maintenance of former areas, is Rs. 6,604, as compared with Rs. 6,837 last year.

Outturn.

5. The outturn of wood, including timber and fuel, during the year was 29,973,004 cubic feet against 27,793,504 cubic feet in the previous year. The demand for charcoal at

Darjeeling almost trebled during the year and there was a large increase in the demand for timber from the Sunderbuns Division. A notable change was introduced in the Darjeeling Division, where, in spite of the extra work entailed, all growing trees are now marked for felling by gazetted officers. The Lieutenant-Governor is not, however, disposed to think that, apart from some very special local reasons, such a change is desirable. Financial considerations alone would prevent the employment of a gazetted officer for the selection of each tree to be cut; the object of members of the controlling staff should be not to do everything themselves, but to train their subordinates to take an intelligent share in the work.

Financial results.

6. The accounts appended to the report, dealing as they do with the smaller areas only, fail to give a clear idea of the profit and loss in each Division, for which purpose the following table may be found of use:—

Financial results in Forest Divisions for the years 1888-89 *and* 1889-90 *as shown in Form No.* 58.

1888-89.

Division.	Receipts.	Expenditure.	Profits.	Loss.	Remarks.

Orissa	13,236 5 10	30,254 0 0	.....	17,017 10 2	Comprising the Angul and Khoorda sub-divisions.
Total for 1888-89 ...	6,76,906 [illegible] 6	36,81,168 12 2	4,09,333 3 0	1,00,594 6 10	Surplus=Rs. 3,08,738-12-2.

1889-90.

	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	
Direction	5,818 15 10	30,876 0 1	.....	25,057 0 3	
Working Plans	.....	13,135 2 8	.....	13,135 2 8	
Darjeeling	1,19,238 2 4	1,14,472 5 1	4,765 13 3	.....	Comprising the Darjeeling, Teesta, and Kurseong sub-divisions.
Julpigoree	55,931 2 0	46,270 1 11	9,661 0 1	.....	Comprising the Julpigoree and Buxa sub-divisions.
Chota Nagpore	19,304 2 7	46,801 11 5	.....	27,497 8 10	Comprising the Palamow, Hazaribagh, and Singbhoom sub-divisions.
Sunderbuns	4,85,458 2 3	78,663 15 10	4,06,794 2 5	.....	
Chittagong	73,038 2 9	32,509 12 8	40,528 6 1	.....	
Orissa	9,928 13 3	27,535 7 11	.....	17,606 10 8	Comprising the Angul and Khoorda sub-divisions.
Total for 1889-90 ...	7,68,717 9 0	3,90,264 9 7	4,61,749 5 10	83,296 6 5	Surplus=Rs. 3,78,452-15-5.

It will be seen that there is a large and increasing surplus, so that the general result is satisfactory. The profit is very great in the Sunderbuns Division, from which Calcutta is supplied with fuel, as are also the important sugar and other works scattered through Khulna and Jessore. The Lieutenant-Governor has always encouraged the Department to strengthen establishments as much as possible in this Division, and to make free use of steam-launches for inspection, it being generally believed that the revenue here is capable of much greater expansion. It is also desirable to free more officers for making working plans, a duty too generally neglected, and this can only be accomplished by reducing establishments where they do not pay, namely, in Chota Nagpore and Orissa. In the latter province work will probably be considerably reduced when the forest boundaries have been re-aligned by the exclusion of village grazing and fuel grounds, a measure to which the Lieutenant-Governor attaches great importance in the interests of the cultivators.

Mr. Home has devoted great care and attention during the year to the administration of the Department.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE POLICE DEPARTMENT FOR THE YEAR 1889.

RESOLUTION.

POLICE.

Calcutta, the 23rd September 1890.

READ—

The Report on the Administration of the Police Department for the year 1889.

Read also—

The Reports for the years 1887 and 1888, and the orders of Government recorded thereon.

GENERAL.

1. Mr. Veasey's bulky report, which has, as usual, been punctually submitted, is overburthened with more or less unsatisfactory explanations of variations in crime received from the District Superintendents or Magistrates, with the Inspector-General's comments thereon, much of which might well be omitted from future reports, while, on the other hand, the progress made in dealing with each class of crime, and the reasons which lead to failure or success, might with advantage be generalised The work of the police in each district might also be summarised, the sufficiency or insufficiency of organisation and supervision illustrated and commented on, and the report in this way made more interesting to the general public and at the same time more useful both to Government and the District Officers. At present it is long and it is dry, and neither of these qualities enhance its practical value.

2. Excluding Railway Police, the sanctioned force in 1889 was 73 superior officers, 3,418 subordinate officers and 19,365 constables, but at the close of the year the subordinate officers were 74 and the constables 348 under the sanctioned strength. The total expenditure for the year was Rs. 40,81,342, while the expenditure on that portion of the force that was employed on purely police duties was Rs. 26,23,294, or 7·6 pies per head of the population. These figures, as also those of the proportion of police to area, nearly approximate to the figures of previous years.

3. The Town Police have worked with but varying success. In Howrah, Dinajpur, and the Presidency Division generally they are reported to have done well, while in Dacca, Mymensingh, Bhagalpur, and at the head-quarters of four of the important districts of the Patna Division they have failed in many respects. In Patna itself the procedure in cases instituted for breach of municipal bye-laws would appear to be faulty in the extreme, and in Faridpur it is said that the great extension of the boundaries of the municipality has rendered its proper watch and ward an impossibility. The Magistrate of this last district will be asked for a special report on this point. It has for some time been clearly necessary to take measures to lighten the duties and increase the popularity of Municipal Police. A redistribution of batta allowances, which are now given to all fourth grade constables on town duty, and the successful introduction of a new system of working this force (described in paragraph 9 of the Resolution on the Police Report for 1888) in Midnapur and Hughli, have effected some improvement. The further extension of this scheme has now been sanctioned. Street lighting has made but little progress, and until local municipalities are persuaded of the importance of improving the present condition of affairs in this respect, the Town Police must always work at a disadvantage. The paragraph in the Inspector-General's report which deals with this subject will be communicated to the Municipal Department of this Office for such action as may be deemed necessary.

4. In dealing with rural police the Inspector-General has made up his narrative mainly by jottings from the pages of local reports with his own remarks on them. Had Mr. Veasey given his views on the working of Act VI of 1870 generally, illustrating his opinions by reference to the cases described, and so worked up his paragraphs into a consistent account of the working of the chowkidari system, the result would have been more interesting. Many of the facts recorded are clearly of importance and worthy of comment; but

they are introduced without sequence, and it is difficult to ascertain their true bearing on the problem that Government has to solve. It would be useless to recapitulate all the cases that illustrate the well-known failure of the District Police in Bengal. In Kulpi, in the 24-Pergunnahs, two of the ringleaders in a dacoity case were chowkidars, while the punchayet was the receiver; in Murshidabad the chakeran men are described as a community of subsidised ruffians mostly belonging to the criminal classes and constituting a positive source of danger to the public; while abuses in the matter of distribution of pay and arrears of collection continue as numerous as ever. There are a few exceptions to this very general failure, but the reports have long since shown that further reform is needed. Colonel Ramsay, District Superintendent of Police of Monghyr, was placed on special duty at the end of the year in order to investigate certain points connected with the chowkidari system. His labours have now merged in those of the Committee which has been appointed to consider the general question of police reform. It will be, perhaps, the most important portion of the Committee's duty to attempt to devise means of welding together more completely than has hitherto been done the rural and the regular police. In the tea districts it will probably be necessary to introduce some system by which Government may be kept informed of what goes on in the gardens. Mr. Veasey sums up the present conditions in the following unfavourable terms:—

"The position of the chakeran men remains as it was, whilst that of the others has much improved wherever attention has been given to the subject, and in Chota Nagpur at all events, under the special Act, the chowkidar has at present certainly nothing to complain of. In any further legislation which may be attempted the powers of the punchayet should be restricted to assessment and collection, and the chowkidar must be brought under police control in a way that will bring home to him the fact that he is our subordinate with nothing to expect or fear from the village community. But the material is for the most part bad and rotten, and by placing things on a sounder footing we are not removing its inherent vices."

5. One hundred and twenty special constables were appointed during the year in the districts of Howrah, Pubna, Faridpur, Patna, and Monghyr. Out of these, 10 were employed in the Behar sub-division of the Patna district for an unspecified period. This was, however, contrary to the provisions of section 17 of Act V of 1861, under which the period for which the men were appointed should have been specified. The attention of the District Magistrate will be called to this irregularity. It is worthy of notice that in Jessore, Dacca, Mymensingh, and Tipperah not a single special constable was appointed during the year, though this measure used to be freely resorted to in those districts in previous years. The three parties of punitive police in the district of Backerganj continue to be retained.

6. Four head constables and five constables were judicially convicted and sentenced to various terms of imprisonment for ill-treating accused and suspected persons; and one sub-inspector and three constables in Jessore were dismissed for the same reason, although the judicial prosecution against them broke down for want of corroborative evidence. On this subject Mr. Veasey remarks—

"This exhausts the list of cases of this nature ordered to be shown as true, and it cannot, I think, be said that it is either long or serious. It is certainly outnumbered by the list of false charges, for accusations of this nature are much in favour amongst the criminal classes and their advisers; but although the police attach far too much weight to confessions, the old stock theory that most confessions are extorted by violence might very well be put on one side, though it is too much to hope that this will happen."

7. The percentage of officers punished departmentally shows a slight falling off, but is still very high. It is noteworthy that out of a total of 928 sub-inspectors, so many as 487, or over 52 per cent., should have been thus punished during the year. The Lieutenant-Governor agrees with Mr. Veasey in considering that minor breaches of discipline should, as far as possible, be dealt with departmentally, and that a resort to law in such cases should always be discouraged. But he also thinks that District Superintendents should not lightly, or hastily, fine their officers, who are, even at the best, far from being well paid; and generally, in inflicting punishments on their higher subordinates, they should not lose sight of the necessity of preserving their dignity in the eyes of the lower ranks. Sir Steuart Bayley is inclined to fear that sometimes

injudicious severity does mischief and deters persons of respectability from offering themselves as recruits.

8. Money rewards were given to 1,600 officers and men and 34 more were specially promoted. The Lieutenant-Governor has seen with approval the names of the Inspectors, Sub-Inspectors, and Head-constables selected for particular mention; it is satisfactory that officers of this last much abused grade have been found deserving of this distinction.

9. Deaths from suicide increased from 2,448 to 2,917. In Cuttack (250), Jessore (204), Nadiya (185), Gya (170), 24-Pergunnahs (166), Dacca (162), Rajshahye (123), Sarun (111) and Puri (102), the number of suicides exceeded 100. It is remarkable that all these districts have headed the list for the last six years. In Gya and Dacca there were 13 and 6 cases, respectively, of suicide by children. The number of suicides by young women and girls might, as suggested by Mr. Veasey, be separately shown in future. The number of accidental deaths rose from 28,053 to 31,823. It is said that 20 cases reported as accidental death proved on enquiry to have been murders or culpable homicides. It should have been noted whether prosecutions were instituted in any of these cases for giving false information, and if so, how far they ended in conviction.

10. The following statement shows the proportion of cognizable crime to population and police in various provinces of India :—

Province.	Police.	Population.	Crime (cognizable).	Proportion of police to population.	Proportion of police to crime (cognizable).	Proportion of crime (cognizable) to population.
				Policeman. Persons.	Policeman. Cases.	Cases. Persons.
North-Western Provinces and Oudh ...	32,652	43,323,599	192,123	1 to 1,326	1 to 5·8	1 to 225
Punjab	20,095	18,842,264	87,721	1 to 937	1 to 4·3	1 to 214
Central Provinces	8,053	9,838,731	25,505	1 to 1,137	1 to 2·9	1 to 385
Bombay, including Sind	19,049	15,674,613	41,178	1 to 822	1 to 2·1	1 to 380
Madras	21,048	30,868,504	128,476	1 to 1,425	1 to 5·9	1 to 240
Assam, including Frontier Police ...	4,607	6,064,298	10,934	1 to 1,316	1 to 2·3	1 to 554
Bengal	23,306	65,964,160	111,476	1 to 2,830	1 to 4·7	1 to 591

In paragraph 14 of the Resolution on the Report for 1888, the difficulty of drawing any satisfactory conclusion from such statistics as are given in the above table was commented on, and it was said that it would be more interesting to compare the police of Bengal with that of other provinces in the matter of success in dealing with crime. In accordance with this suggestion, Mr. Veasey gives the results obtained by applying the tests of police work to the crime of the different provinces, and the following table has been compiled from these results :—

	North-Western Provinces and Oudh.	Punjab.	Central Provinces.	Bombay (including Sind).	Madras.	Assam (including Frontier Police).	Bengal.
Test A3—Percentage of police cases ending in conviction to cases investigated ...	35·4	33·8	51·6	32·4	27·2	30·5	32·8
Test A4—Percentage of police cases ending in conviction to cases decided	69·4	63·8	74·6	58·3	68·9	62·5	59·2
Test B2—Percentage of persons convicted in police cases to persons arrested by police	62·6	57·2	66·6	43·2	42·9	55·8	48·7

The Lieutenant-Governor concurs with Mr. Veasey in his opinion that Bengal does not "appear to advantage as regards judicial results, and the figures given under test A4 must represent a large number of failures of justice. The high standard of proof demanded, the latitude allowed to the advocates of accused persons, and the dilatory procedure so much in vogue, are all obstacles well known and to be reckoned with in these provinces, whilst elsewhere they may be factors of less importance, but they would not exercise the influence they do if investigating officers were more careful and if supervision were more efficient." At the same time, (if the Central Provinces, which are in a great proportion inhabited by comparatively simple races, be excluded) the variations between provinces are not so great as might reasonably have been expected.

11. The following figures show the amount of cognizable and non-cognizable crime reported in the province as compared with that of the two previous years:—

	1887.	1888.	1889.	Increase as compared with 1888.	Increase as compared with 1887.
Cognizable ...	101,969	110,357	119,656	9,299	17,687
Non-cognizable ...	109,254	112,006	117,407	5,401	8,153
Total ...	211,223	222,363	237,063	14,700	25,840

During the year under review there was an increase of cognizable crime in all the Divisions of Bengal except Rajshahye, the increase being most marked in the Burdwan and Patna Divisions. In non-cognizable crime there was also a general increase, the only exception being Patna, which shows a small decrease of 127.

As in the previous year, the increase in cognizable crime was mainly under "Cases against property" and "Other cases," the number of which rose from 68,951 and 30,275 in 1888 to 74,431 and 34,072 respectively in 1889. This is said to have been chiefly due to the high prices of food-grains during the year. As remarked in the Resolution on the Jail Administration Report for 1889, the large increase of offences against property also affected the number of direct admissions into jail during the year, which rose to 33,542, the highest that has been recorded since 1879. The details of the increase in non-cognizable crime will be noticed in paragraph 23 below.

12. The percentage of cases declared false decreased slightly from 6·0 to 5·8. The divisional percentages vary from 7·8 in Chittagong to 3·9 in the Orissa Division. The variations are most marked in the district returns, the highest being 21·2 in the Chittagong Hill Tracts and the lowest 1·3 in the Sonthal Pergunnahs. In the Burdwan Division, the percentage varied from 8·2 in Hughli to 2·1 in Howrah. The high rate in Hughli is said to have been due to the inclusion in the returns of direct cases summarily dismissed under section 203 of the Code of Criminal Procedure, while no satisfactory explanation is given of the abnormally low percentage in Howrah. In this latter district a Sub-Deputy Magistrate was employed in making preliminary enquiries in false cases, a delegation of duty of which the Lieutenant-Governor does not approve. It is to be observed that in some cases the same districts, such as Bogra and Chumparun, in the former of which the percentage was 13·7 against 4 in 1888, and in the latter 9·3 against 17·6 in 1886, show considerable variations in the figures of different years. According to Mr. Veasey these variations are due more to "individual views and influences" than to any local conditions. It seems, however, to the Lieutenant-Governor that, though this statement is true, both in regard to the police officers who investigate and the magisterial officers who decide (and such fluctuations as those shown in Bogra and Chumparun are, doubtless, due to the personal equation of the Magistrates), it does not apparently cover the whole ground, as otherwise it would be difficult to account for the fact that the Chittagong Division generally returns the highest, and the Presidency Division the lowest percentage of false cases. It is unsatisfactory that in Puri, Balasore, and Maldah so many as 24, 31, and 39 cases, respectively, sent up in A form were declared false without any attempt to prosecute. Such wholesale entries as these are, in His Honour's opinion, manifestly unfair to the police.

13. The statistics of the prosecution of complainants for bringing false cases are unsatisfactory in every way. There is a great falling off both in the number of prosecutions instituted and in the percentage of convictions obtained in the Presidency and Chittagong Divisions, and the Lieutenant-Governor has looked in vain for signs of real improvement anywhere. Backerganj, Monghyr, and Chumparun have done best, but the 24-Pergunnahs, Hughli, Patna, Mozufferpur, and Purneah are all exceedingly bad. The whole subject has been reviewed lately by Sir Steuart Bayley in dealing with a proposal which has been made by the Government of the North-Western Provinces to extend the scope of section 250 of the Criminal Procedure Code, and His Honour is of opinion that, although much of the failure of officers in dealing with such cases is due to

preventible causes, much more is due to defects in the law. The remarks of the Commissioner of Orissa quoted by Mr. Veasey, which would tend to the discouragement of prosecutions for laying false charges, do not commend themselves to the judgment of the Lieutenant-Governor, who believes that the evil is far more serious than Mr. Worsley appears to think, and that every prosecution, whether successful or not, acts as a deterrent.

14. The results of sessions trials were unsatisfactory in the extreme, the percentage of convictions for the whole province falling from 56·0 in 1887 and 51·7 in 1888 to 49·1. For the first time for many years the chances of the escape of an accused person who has been formally committed for trial by an investigating officer appear to be greater than the chances of his conviction. For this result the districts of Pubna and Bogra, appear to be very largely responsible, and the Lieutenant-Governor cannot but think that causes other than the alleged misconduct of the police must have contributed to the failures of justice that undoubtedly occurred. The percentage fell in Bogra from 51·7 in 1888 to 22·2 in 1889, and in Pubna from 48·9 to 10·0; and it is worthy of notice that the Jail Report for the past year shows that Pubna headed the list of releases on appeal with a percentage of 22·76, while Bogra was not much better with a percentage of 12·11. These two districts are included in one Sessions charge.

The Lieutenant-Governor is glad to see that the good management of the Government Pleader of Rungpur is given as the reason for the improvement in that district. In six out of eight jury districts the results were bad, notably so in Hughli and Burdwan, but in Patna there was great improvement, and in Howrah the percentage (60·4) was above the average. The subject of trial by jury is now under the special consideration of the Lieutenant-Governor, who has been asked for a report on the subject by the Government of India.

15. The following table shows the number of true cognizable cases for the last five years, as well as the percentage of convictions obtained in such cases during those years:—

	1885.	1886.	1887.	1888.	1889.	1885.	1886.	1887.	1888.	1889.
Abetment	1	...	2	...	1	.....	.....	...	.....	.....
Class I.—Offences against the State and public tranquility.	2,802	2,801	2,901	2,872	2,818	57·7	56·7	59·0	57·9	61·1
„ II.—Serious offences against the person.	4,484	4,542	4,545	4,622	4,702	43·3	41·8	43·0	42·6	47·1
„ III.—Serious offences against person and property or against property only.	24,103	22,803	22,234	25,247	27,824	9·7	8·4	8·5	8·2	8·6
„ IV.—Minor offences against the person.	2,533	2,682	2,427	2,405	2,334	21·9	21·1	19·6	20·8	20·1
„ V.—Minor offences against property.	42,206	40,020	36,131	38,381	41,032	36·2	34·6	33·4	23·6	35·8
„ VI.—Other offences not specified above.	24,819	27,003	27,753	30,159	33,980	89·9	88·8	89·5	89·3	90·7
Total ...	100,948	99,941	95,993	103,686	112,061	43·7	43·9	44·7	44·4	46·0

These results justify the conclusion arrived at in connection with the recent enquiries into the state of crime, that a large proportion of serious offences goes unpunished in Bengal. The reasons for this unsatisfactory conclusion, and the best method of organising reforms, are now the subjects of special enquiries.

16. CLASS I.—*Offences against the State and public tranquillity.*—Under this class there was a small decrease of 54, due to a falling off in cases of rioting. The cases of coining were few in number and mostly unimportant. The decrease in the number of rioting cases is found in three Divisions only, an increase being shown in the number of such cases in all the others. The great fall from 512 to 377 in the Dacca Division is most satisfactory, although even this lower number still leaves the Division at the head of the list. There were 353 cases in the Patna Division, but they were generally of a trivial nature, and the number does not appear excessive when the large area and vast population of this Division are taken into consideration. There were some serious cases in the Presidency Division, in which rioting has increased in the past two years. Jessore and the 24-Pergunnahs are responsible for the increase, while the figures in Khulna are still high. A most satisfactory fall in the number of persons bound over in Backerganj was not followed by any increase in rioting, though the presence of three bodies of punitive police in the district must have had its proper influence on the figures.

There is but little to note in the way of individual cases. In Nadiya the police sent up both parties in a serious case in which two men were killed by

the defending party, but the plea of private defence was successfully raised, and only trifling punishments were awarded. In the Narail sub-division of Jessore hired mercenaries were engaged by rival zemindars for local warfare, but they were usually dealt with leniently, and the principal criminals were left untouched. In a case from Bagirhat in Khulna the action of the executive is severely criticised by Mr. Veasey, and a special report will be called for. In Jalpaiguri a vague reference is made to an increase in attacks on managers by tea-garden coolies, but no details are given. In Sarun there were some disputes about the cutting of bunds, inevitable in a season of floods; and in Patna there was one serious riot in which the sepoys of the 2nd Native Infantry at Dinapur were concerned. The matter was taken up promptly by the military as well as the civil authorities, but with unsatisfactory results.

Only 8 persons were convicted during the year for harbouring offenders as against 9 in 1888. As remarked by Mr. Veasey, this offence is no doubt much more common than is generally supposed, and a larger number of convictions would be obtained if the law were set in motion in every case, and if perfunctory excuses were more commonly rejected.

17. CLASS II.—*Serious offences against the person.*—There is very little fluctuation in the figures under this class. There was a slight improvement in the percentage of convictions before the Sessions Courts (47·9 in 1889 to 44·4 in 1888), but the standard is very low. On the whole, the results in cases which come under this heading fully justify recent strictures on the working of the police, and show that they are as unsuccessful in prosecution as in detection.

There were 316 murders, the largest number reported since 1880. Robbers were responsible for 26 of these as against 10 in 1888 and an average of 8·2 for the five years before that, and there were again 13 due to poison. It is curious that this is the exact number of murders by poison in the years 1887 and 1888, and the average number of such murders in the four years before 1887. The increase in the total number of murders must be considered with the decrease of 17 in the number of culpable homicides.

There was a slight improvement in the percentages of conviction, but the standard is so low that there is not much room for congratulation. In one of the cases of murder by dacoits in Midnapur all five of the dacoits were sentenced to transportation for life, but only six persons had been convicted for murder as robbers before the close of the year. In the cases of murder by poison only one solitary person was convicted. For all other murders 214 were acquitted at the Sessions and 103 convicted, the majority of the latter receiving sentences of transportation.

If the figures of this class of crime be taken separately for each Division, a marked feature of the statistics is, as usual, the very large number of cases reported from the Dacca Division, in which serious crime is always prevalent. The statistics in Backerganj alone will bear comparison with those of the whole Divisions of Chota Nagpur, Orissa or Bhagalpur, and Mymensingh is not far behind Backerganj, and it is in Mymensingh that there has been a notable increase in 1889 of 71 true cases. In the Presidency Division there has been a marked decrease common to most districts, while in Burdwan there has been an increase due chiefly to the district of Hughli. The figures for the Rajshahye Division show an increase of 33 cases in Rungpur, and those of the Chittagong Division show that there has been a distinct growth of crime attended by violence in the district of Chittagong. Chumparun, in the Patna Division, shows an increase of over 50 per cent.

Results in murder cases were very bad in most Divisions. In the two jury districts of Burdwan and Hughli there was not a single conviction in 20 cases. In the Presidency Division 63 persons were tried for "other murders," but only eight convicted. In 10 cases in Dacca only two persons were convicted, while in Faridpur, in the same number of cases, 44 persons were released and one was convicted. In Patna there was no conviction in a murder by dacoits and three murders by robbers, while in the Patna Division generally there were only nine persons convicted to 48 acquitted in 39 murders. But these are only examples of the general rule of results in 1889, and the Lieutenant-Governor agrees with Mr. Veasey in thinking that most of the failures of justice are due to the police attaching too much weight to confessions and the Courts too little weight to circumstantial evidence.

In perusing the brief accounts of important cases given by the Inspector-General, it is melancholy to note that many were due to quarrels between husbands and their youthful wives. In Hughli a school pundit, afterwards shown to be insane, hacked his wife, a girl of 13, about the head with a *katari* because she would not or could not satisfy his desires. In Nadiya a husband killed his wife, a sickly girl of 12, for refusing to cohabit. In Maldah a man throttled his child-wife, aged 11, because she could not satisfy his lust. He was treated with extraordinary leniency by the Judge, who gave him two months' imprisonment for hurt—a sentence enhanced by the High Court to two years for culpable homicide. In Hughli, again, a young wife of 15 refused to cohabit with her husband, and died from the effects of the savagery with which that husband and his two brothers branded her in and about her private parts. In the remaining cases of wife-murder the ages of the victims are not given, but a further case in which a girl of 14 was chopped to death by her father-in-law on suspicion of misbehaviour may be mentioned here.

In Midnapur a woman was murdered by her neighbour, also a woman, who charged her with having bewitched her husband. The murderess escaped from the police, but was taken by some cooly recruiters, into whose hands she fell, to the sadr station, where she was recognised and re-arrested.

In a case in Dum-Dum which attracted much attention, a villager was shot by one of four European soldiers out in search of liquor. The criminal was convicted, but the conviction was upset by a Full Bench of the High Court—a notable instance of failure of justice.

In Rajshahye the following extraordinary case is reported, and the action of the officers who dealt with it will be further enquired into:—

"A man chained his wife up and then handed the key to his kept woman, who set fire to the house and let her burn with it, refusing to give up the key when it was demanded. This atrocious crime was, in the opinion of the trying Magistrate, sufficiently punished, as far as the husband was concerned, by a year's imprisonment and fine on a conviction only for wrongful confinement, whilst the woman got an additional year on a further conviction under 304A. Eventually it found its way to the Sessions, where the woman was transported for life, whilst the sentence on the husband, light as it was, was made lighter, though there was evidence to show that he had removed all his property and was no doubt an accomplice before the fact."

It is satisfactory to note that in Backerganj a principal, who had turned Queen's evidence and retracted his statement at the Sessions trial, was given five years' imprisonment on his own statement under section 194, Indian Penal Code.

The son of one of the zemindars concerned in the murder of a tehsildar in 1884 surrendered himself, and, although acquitted by the jury, was sentenced to three years' rigorous imprisonment by the High Court.

In two cases in Bhagalpur and in one in Patna there was strong evidence to show that the informants had killed one of their own party for the purpose of instituting a serious false case against an enemy; and in a case in Singbhum a burglar was wounded by the owner of the house and then murdered by his companions, who cut off his head to prevent identification.

Two cases in Tipperah are thus described:—

"An unpopular naib was shot dead at night as he was holding cutcherry; the case for the prosecution being that this was the work of a number of the ryots, who had hired a bad character from a distance for the purpose. Twelve persons were arrested and sent up, and seven of them were convicted at the Sessions: however, they were all released on appeal.

Another bad case in this district, described by the Commissioner as 'as cold-blooded a murder as could well happen,' ended in the principal accused being convicted of hurt and sentenced to six months' rigorous imprisonment. A mahout was pushed off his elephant in a bheel by two men, who deliberately left him to drown, rapping him over the knuckles when he tried to get into their boat, and afterwards cynically described his dying struggles."

There were 234 cases of culpable homicide against 251 in the previous year. The decrease is nominal, some cases having been included under the head of murder. The results of trials show a slight falling off, the percentage of convictions in true cases being 38·8 against 40·2 in 1888.

Drugging cases rose from 28 to 30. The number of persons convicted was six, the same as in the previous year. In the Rajshahye Division, out of 13 persons sent up in nine cases, 12 were discharged or acquitted. Four cases occurred in Manbhum, in all of which the victims were travellers, who fell a ready prey to designing persons. Only one arrest was made.

18. CLASS III.—This class includes dacoity, robbery, serious mischief, and burglary.

The increase in these crimes reported in 1888 shows no signs of diminution in 1889. The results of trials are wholly unsatisfactory, and there is scarcely any portion of the report, which is the reverse of flattering to the Police in most of the statistics it produces, which more seriously reflects on their efficiency than this.

The following table shows the figures relating to dacoity for the last five years:—

	Cases, including those pending from previous year.	Convictions.	Percentage.	PERSONS.			Percentage of convictions to persons who appeared.	Percentage of convictions to persons tried.
				Appeared before Magistrate.	Convicted.	Acquitted.		
1885	182	37	20·3	663	159	385	23·9	29·2
1886	113	35	30·9	558	135	291	24·1	31·6
1887	115	24	20·8	508	95	277	18·7	25·5
1888	144	34	23·6	607	132	399	21·7	24·8
1889	190	31	16·3	782	168	554	21·4	23·2

The percentage of convictions and the very great increase in the number of persons acquitted are both most serious features of the above statistics. The falling off in power and efficiency is everywhere observable, though Burdwan and Patna account for 16 cases each out of a total increase of 40 cases. In Chumparun alone, there were 13 cases against a blank return for 1888. This serious outbreak of crime is attributed to the distress caused by high prices. Out of 35 persons sent up from this district, only nine were convicted, 26 being released. Results are worse in the Hughli district, which, with 11 cases, shows only one conviction under section 411, Indian Penal Code. In the Rajshahye Division, again, only two persons were convicted in 17 cases, against 49 discharged or acquitted. In the Burdwan district no arrest was made in three out of four cases, while in Purneah all the nine persons convicted have since been released by the High Court. The only exception to this general run of bad results is Tipperah, where, out of 40 persons sent up for trial in four cases, 28 were convicted—a result no doubt creditable to the police of both Tipperah and Noakhali, who worked together, the dacoits belonging to the latter district.

In Midnapur there was a small increase from 8 to 11 cases. Five troublesome gangs in this district were broken up during the year, one of the ringleaders (Kristo Chunder Chowdhury), who admitted having had a hand in 15 dacoities, and who was last released from jail in 1885, being sentenced on conviction to transportation for life. It is hoped that the breaking up of these gangs will have the effect of materially diminishing the number of dacoities in this district.

Two river dacoities, both attacks on rice-boats, are reported from the 24-Pergunnahs. The Inspector-General says that in these cases the accused were summarily acquitted and released at the Sessions without the evidence against them having been gone into. He adds:—

"The police do not appear to have been to blame. In the course of investigating one of these cases they were opposed and roughly handled, a sub-inspector having his arm broken, whilst the number of men concerned in the original case is given as not less than 150, and an attempt had been made to scuttle the boat on the villagers coming to the crew's assistance.

"The failure of these two cases is not only unfortunate in itself, but must encourage and strengthen the demands for black-mail which are known to be made from time to time upon certain sections of the route through the Sunderbuns. It is easy enough to discourage reporting, and when manjhis find they are not protected, we can hardly blame them if they pay what is asked and say nothing, sooner than give offence by employing the police to conduct investigations and make arrests which are after all to end in nothing. There were 18 men acquitted in these two cases, and every one of them is a standing example of the many chances on the side of the criminal, who need never despair of scoring a victory."

A case of technical dacoity, but none the less serious, is reported from Dinajpur. In this case the assailants, who used fire-arms and had an elephant, attacked the homestead of a recalcitrant ryot. A man was killed on the side of

the ryots, but the case fell through, as they absolutely denied having recognised any one.

A rather curious case occurred in Bhagalpur, in which a woman hired a gang of dacoits to plunder her brother's house in satisfaction of a claim she had against him. This was carried out; but as the dacoits offered her Rs. 5 only, she applied to the police, who made several arrests and recovered some of the property, but could get only one person convicted.

In a case in Shahabad, a retired Deputy Magistrate returned his loss at Rs. 37,275. The police recovered property of the value of Rs. 4,018, and eight persons, two of them receivers, were convicted at the Sessions.

There were 177 cases of robbery against 155 in 1888. No explanation is given of the increase which occurs under the heading of "Highway robberies." Out of 231 persons brought to trial, only 91, or 39·3 per cent., were convicted. In the Chota Nagpur Division six convictions were obtained in eight cases. In a case of mail robbery in Hazaribagh the accused was, on conviction, sentenced to four years' imprisonment.

There were 501 cases of mischief by fire against 506 in 1888, but the judicial results were extremely bad, 30 persons being convicted against 211 discharged or acquitted. The worst districts were Dinajpur and Mymensingh. In the former district only two persons were convicted in 86 cases, and in the latter only one in 36 cases.

The Lieutenant-Governor is glad to observe that much attention is paid in Dinajpur to the prosecution of criminal gangs. Out of a total for Bengal of eight cases with 93 persons brought to trial, this district alone accounts for three cases and 53 persons. Results were no doubt very poor, only six persons having been convicted; but, as remarked by Mr. Veasey, the sections relating to the offence "have been so little worked that they are new to most judicial officers, and it is only by keeping on that we can succeed in obtaining an explicit ruling as to what the Courts consider necessary."

19. Class IV.—*Minor offences against the person.*—A decrease of 71 under this class calls for no notice. The following case is from the 24-Pergunnahs. A man, whose girl-wife had offended him by running away home, tied her by her hair to a rafter, and on her escaping rivetted a chain on to her legs and kept her thus for a fortnight. He was on conviction sentenced to six months' rigorous imprisonment.

20. Class V.—*Minor offences against property.*—Including burglaries, which, for purposes of comparison, are usually treated with offences under this class, as well as under Class III, the number of cases was 66,932 against 61,711 in 1888. The large increase of 5,221 cases is attributed to the failure of crops and the consequent impoverishment of the lowest classes. The variations were most marked under the heads of theft and burglary, which show an increase of 2,305 and 2,501 cases respectively. Under burglary the percentage of convictions in cases was 7·5 against 7·2 in 1888; but the percentage of persons convicted shows a slight improvement, being 55·5 against 53·7. This is said to be due to the fact "that in a considerable proportion of cases the men sent up have been caught red-handed, so that the police have had their work done for them." Patna is again the worst among the Divisions, the number of burglaries (7,654) being nearly 700 more than any total reached in the Division during the last eight years, and 1,529 more than the total for 1888. Chowkidari parades and an increased use of the power to refuse investigation under section 157 have undoubtedly contributed to this increase; but the danger of too free a use of this power is shown in the falling off of cases in Patna, where there was a high percentage (37·0) of refusals, and Mr. Veasey is probably right in thinking that with fewer refusals there would have been more crime reported. In this matter the Lieutenant-Governor considers that much discretion should be left to the District Superintendents and their station officers, subject to the control of the Magistrate, and His Honour would call attention here to the remarks made in paragraph 12 of the Resolution on the Report for 1887:—"The discretion is one which must be exercised. It requires to be carefully controlled, as it is liable to serious abuse, but its judicious exercise may relieve the police of much useless work. No general orders should be laid down in any district that particular classes of cases are not to be enquired into." The large increase of burglary in the Patna Division attracted the Lieutenant-Governor's notice last year when

dealing with the statement of serious crime for the third quarter of that year. The attention of the Commissioner has since been drawn to the matter, and he has been asked to impress upon Magistrates and District Superintendents in the Division the absolute necessity for greater exertion on their part in the matter of checking and controlling this crime.

Amongst districts the worst was Monghyr with 1,945 cases against 1,890 in 1888. In the Bhagalpur district there was an increase of 329 cases owing, it is said, to better reporting and high prices. The results in Midnapur were good in comparison with the bad ones last year, and the remarks of Mr. Munro on the crime of this district, which have been quoted by Mr. Veasey, show an intelligent grasp of the wants of the district which is not always to be found elsewhere. In Dinajpur much good work is said to have been done of late years. This is indicated by the fact that there was a decrease in burglary both in 1889 and in the previous year, though the causes at work were much the same. Judicial results were, however, not satisfactory. In this connection the Magistrate remarks:—

"It is difficult to obtain a conviction from some Deputy Magistrates, and in a great many true cases the offenders go unpunished."

There is, however, nothing to prevent notable instances of failures of justice from being reported to Government with a view to an appeal being preferred against the order of acquittal.

In Darjiling the number of cases increased from 91 to 141, or more than 50 per cent., while Faridpur shows an increase of 125 cases, and results are said to be going from bad to worse. Separate reports will be called for regarding both these districts.

21. CLASS VI.—*Other offences not specified above.*—An increase of 3,791 cases under this class was due to prosecutions for nuisance, the number of which rose from 21,641 to 25,599 during the year.

Bad livelihood cases show an increase of 54, but, as remarked by Mr. Veasey, this is far from satisfactory, in view of the fact that there was such a considerable increase during the year in cases of dacoity and burglary. Two thousand and twenty-five cases were instituted on the report of the police and 82 by petition before the Magistrate. Of these 1,178 of the former and 49 of the latter ended in conviction. In paragraph 27 of the Resolution on last year's Report, a report was called for from the Inspector-General of Police on the subject of reckoning the time occupied in disposing of these cases. This report has since been received. Mr. Veasey recommends that the date of institution be reckoned from the date on which the report is made to the Magistrate. The Lieutenant-Governor has no objection to this recommendation being given effect to, but he desires at the same time that the procedure which has been followed in the present report may be continued, and that a separate column may in future be appended to statement J, showing the average duration of cases from the date on which the first process is issued. This will show at a glance at what stage the procedure in Court has been dilatory. The Lieutenant-Governor is disappointed to find that, though the importance of disposing of these cases as quickly as possible has repeatedly been insisted upon in previous Resolutions, the returns for the past year show no improvement in this respect. In 29 districts the average duration of cases exceeded 50 days from the date of first report to the Magistrate, while in two districts it was more than 100 days. In Durbhunga a case was no less than 717 days, or for nearly two years, under trial; while in one case in Dinajpur and in another in Midnapur so many as 442 and 404 days, respectively, were allowed to intervene between the date of report to the Magistrate and that of the issue of the process. Such delays as these are wholly inexcusable and completely stultify the whole proceedings. Again, there is apparently no reason why the average duration of a total of 31 cases in Dacca should be 148 days, when Sarun with 88 cases shows an average duration of only 4·6 days. As a means of effectually putting a stop to these delays, Mr. Veasey suggests that the cases should be entered in the Magistrate's case register. This matter will be dealt with separately. The number of cases tried in Court was 1,083, against 811 tried locally. The Lieutenant-Governor is of opinion that the increase in the number of cases tried in Courts is a move in the right direction, though he would not wish that the advantages of an efficient local enquiry should be forgotten. But the delays that are inseparable from an invariable determination

to try these cases locally have very bad effects, and His Honour wishes to repeat here the remarks made in the Resolution on the Report for 1886, that "it is far better that a case should be taken up at once in Court than that men should have charges hanging over their heads for months and months because it is not found convenient to depute an officer to the spot. There are many cases in which it is no kindness to the suspected person to make the enquiry in his village, and in which no advantage can accrue from such a procedure." The number of bad characters under police surveillance rose from 41,561 to 42,812. The increasing number on the registers is, however, the chief obstacle to effective scrutiny, and the Lieutenant-Governor is therefore glad to observe that Mr. Veasey has introduced a system of classification which, by making the duty lighter, will enable the police to devote more attention to habitual criminals.

Offences against excise laws fell from 2,753 to 2,687. The decrease was chiefly under the head of illicit possession or sale of country spirit. Opium cases decreased from 30 to 16. There was only one important case, in which two Punjabis, who were found with 41 seers of Nepal opium concealed in under-jackets made with pockets fitting over their shoulders, were sentenced to a year's rigorous imprisonment each. An increase of 742 in offences against the salt laws was mainly due to Balasore, where the number of cases rose from 46 to 579. No explanation is given of this large increase.

22. *Railway Police.*—There was an increase of 314 in the number of cases reported. Out of 3,016 persons brought to trial 2,504 were convicted. Mr. Veasey remarks:—

"The police as a rule are very successful with pick-pocket cases, which are nearly always the work of habitual criminals; but in these days of light sentences the releases pretty well balance the convictions, and the thief on coming out returns to his old ways, only changing the scene of his operations. A case is mentioned in which an old offender sentenced to five years at the Sessions was released on appeal, as the money was found under the seat. He was sitting next the person robbed, who had his pocket slit open in the usual way, and the result may perhaps be considered unfortunate. In two cases railway thieves of this class, well-dressed men of respectable appearance, came under observation only owing to their travelling without tickets, and were then found to be old hands, who would of course have indignantly resented suspicion."

In the case of a dacoity at Paleza ghât the railway employés, who out-numbered the dacoits, excused themselves from assisting the police on the plea that they were not engaged to fight, and that if they did and got hurt they would probably be discharged. As an instance of the failure of railway cases when tried by inexperienced officers, the Assistant Inspector-General of Government Railway Police on the East Indian Railway mentions a case in which a pointsman, guard, and driver were prosecuted for gross negligence which might have been attended with the most disastrous results. The pointsman was convicted, but the driver and the guard were both acquitted, the former on the ground that it was a dark night and it was difficult for him to see, and the latter because he had "too much other work to look after between the stations." He suggests that it might be considered whether the more important cases should not be tried at the head-quarters of the district in which they occur by one of the senior officers. The Lieutenant-Governor does not see his way at present to issue a general order to this effect. The attention of the District Magistrates will, however, be called to the importance of taking up all such cases themselves, where possible, or at least of seeing that they are not tried by inexperienced officers.

One hundred and fifty-three persons were killed in 217 railway accidents, including 34 railway servants and 25 persons who committed suicide.

23. *Non-cognizable crime.*—Non-cognizable offences increased by 5,401, as will be seen from the subjoined table:—

	1888.	1889.
Class I	8,556	8,581
„ II	30	33
„ III	955	848
„ IV	56,689	56,535
„ V	9,110	9,730
„ VI	11,074	11,856
Special laws	25,592	30,324
Total ...	112,006	117,407

The increase was mainly in offences under "special laws," and was due to a larger number of prosecutions under the Municipal Act. In class VI cases under section 106 of the Criminal Procedure Code (security for keeping the peace on conviction) fell from 1,907 to 1,860. It is to be regretted that Magistrates make so little use of this important section, which, judiciously applied to a certain class of offenders, may be employed with the most salutary effect. The attention of district officers will be called to this matter Process was issued against 115,303 persons in 1889, of whom no fewer than 31,594 were acquitted. In many districts compliance with a summons appears to have been more or less a matter of choice, as remarked by Mr. Veasey, and the percentage of persons who appeared to persons summoned, which stands at the low figure of 78·7 for the whole province, is very low indeed in the districts of Dacca, Faridpur, Purneah, Noakhali, and Tipperah. The above figures combine to show, even when full allowance is made for compromises appearing as acquittals, that complaints are insufficiently tested before process is granted, and it will require the close and constant supervision of the Magistrate to check the failure in administration which these statistics disclose. There is perhaps some error of calculation in the case of those districts which show this percentage as over 100 per cent., and explanations will be called for from the officers concerned; it seems scarcely likely that so large a number of persons as these returns indicate would voluntarily appear before the Magistrates without the issue of process.

In last year's Resolution the Lieutenant-Governor approved a proposal made by the Inspector-General of Police that in reporting the number of cases of non-cognizable crime in which the police are employed, only such cases should be shown as are referred to them by the Magistrate for enquiry. Mr. Veasey now brings to notice that it frequently happens that in the same complaint charges, both cognizable and non-cognizable, are mixed up together, and suggests that Magistrates should, when ordering an enquiry, state whether it is to be treated as cognizable or non-cognizable in the first instance. There is no objection to the adoption of this suggestion, and instructions will be issued accordingly. The practice which obtains in the Noakhali and Tipperah districts of employing even apprentices to make preliminary local investigations under section 202, Criminal Procedure Code, is highly reprehensible, and should be at once discontinued.

24. *Remands.*—The number of A forms sent up rose from 35,716 to 38,605. They were disposed of as follows:—

	1888.	1889.
At first hearing	34·6	37·3
Remanded once	20·6	20·1
Do. twice	13·9	13·4
Do. thrice	9·8	9·2
Do. four times	·2	6·1
Do. five do.	4·2	3·9
Do. six do.	2·7	2·6
Do. more than six times	5·1	5·1

There was a slight improvement in the percentage of cases decided on the first two hearings, but the percentage of cases remanded more than six times continued the same. Amongst districts it was only in Hughli, Howrah, the 24-Pergunnahs, Darjiling, the Chittagong Hill Tracts and the Gurjhats that more than two-thirds of the cases were decided in two hearings, while in Lohardugga, Faridpur, Jessore, Bogra, and Noakhali less than one-third were concluded in the same number of hearings. Mr. Veasey says :—

"A selection of cases made haphazard (in Lohardugga) brought to light one case remanded 20 times, another 10, another 9, and another 7. The Hazaribagh report mentions a case tried by a Munsif with magisterial powers which lasted for over two months, though the value of the property was only 2 annas. I have not seldom, however, seen as bad instances amongst Magistrates, and the knowledge that they are noticed soon works reform. Of the delays in Faridpur no notice is taken. In Noakhali the District Superintendent states that he finds nothing to note, and the subject is not referred to by the Magistrate, whilst the Commissioner says generally that officers were everywhere overworked. In Bogra the blame is laid on an officer who was at Dinajpur in 1888, and the Magistrate suggests that he must have been responsible for the delays noticed there in that year. There were 51 cases in this district remanded for more than six times, but it is not said how many of them were on his file. Seven cases were remanded 11 times and one 15 times."

The general inferences which have been drawn by the Lieutenant-Governor are (to use the words of the Government of India) "that although crime generally is not positively great in Bengal, and is decreasing relatively to the increase of population, certain offences show a tendency to increase; that an unduly large proportion of the crime actually occurring is not brought to the notice of the Police or of the Magistrates, and is therefore never enquired into; that the Police enquiry into a large number of the cases taken up is fruitless, and such cases never come before the Courts, and that a disproportionate number of the persons brought before the Courts are acquitted." The broad result is that upwards of 70 per cent. of serious crime goes unpunished, that at least 90 per cent. of the most dangerous offences against property remain undetected, and that in the 11 years under review the percentage of convictions among the total number of persons tried by the Courts and charged with offences included in classes I, II, III, and V never exceeded 56, and in one year fell to 52.

2. It is evidently necessary to enquire minutely into the causes of this highly unsatisfactory condition of affairs, and to ascertain by what means, whether legislative or executive, remedies capable of being made practically effective can be devised and applied. It is, perhaps, not difficult to suggest measures which would be generally useful, but the conditions under which the administration of different provinces is carried on vary so much that practical results are likely to be attained only by concentrating attention on local circumstances and requirements. For this reason the Governor-General in Council has thought it better not to appoint a general Commission to consider the question of Police reform throughout India, but has left it to the Lieutenant-Governor, if he should see fit, to convene a Provincial Committee.

3. Having regard to the magnitude and importance of the questions involved, to the necessity for bringing wide experience to bear upon them, and for looking at them from different points of view, Sir Steuart Bayley is satisfied that the work is not such as can be properly done without a special agency or by the deputation of a single officer. He has therefore determined to appoint a Committee.

4. The Lieutenant-Governor most fully recognises the necessity of obtaining from the public all the information as to facts, and all the advice for future action which can be made available for his assistance. It is for the advantage of the public and for the protection of their lives and property, it is to save them from oppression and needless harassment that the present enquiries are being undertaken; and the Lieutenant-Governor quite understands that they have opportunities of observing Police work from points of view which are not accessible to officials. Still he thinks that, in the beginning at all events, a small official Committee will be best adapted to direct enquiries and collect information. He desires that information should be collected from all sources, but there is in Police work very much that is technical and requires official experience to understand and appreciate its various relations. Many plausible suggestions are likely to be brought forward which may not be capable of introduction into any practical scheme; but the detection of the difficulties would be scarcely possible to persons who have not had the advantage of special experience. At a later stage His Honour will probably enlarge the Committee, so that the bearings of whatever proposals may be deemed by it worthy of consideration may be ascertained as accurately as possible.

In this way Sir Steuart Bayley hopes to derive the greatest profit from unofficial assistance, while shortening the enquiry and keeping its results within the limits of practicability.

5. The Committee as now to be constituted will consist of the following officers:—

Mr. John Beames, C.S., Commissioner of Bhagulpore ... *President.*
Mr. J. F. Stevens, C.S., Judge of Gya ... } *Members.*
Mr. J. C. Veasey, C.S., Inspector-General of Police ... }

Mr. Beames will be on special deputation from the date of his return from privilege leave. Mr. Stevens will serve on the Committee in addition to his own duties, until arrangements can be made for relieving him of the latter, when he will be on special deputation. Mr. Veasey will serve on the Committee in addition to his own duties, unless hereafter there should appear to be sufficient reason for making some other arrangement.

The Lieutenant-Governor has not thought it necessary to place on the Committee any Police officer in rank inferior to the Inspector-General, because he is aware that the help of the Deputy Inspectors-General will be available, and has no doubt that it will be freely given. His Honour also hopes that the Committee will receive the cordial co-operation both of other officers of Government and of unofficial gentlemen.

6. In the meantime the papers have, by direction of the Lieutenant-Governor, been circulated to certain experienced officers for the purpose of obtaining their general views. The reports have been nearly all received, and His Honour's acknowledgments are due to the writers. They contain much variety of opinion, and there is not a little in them which the Committee may find worthy of consideration. It is not necessary to discuss the different suggestions which have been made, but His Honour desires to record a few observations, arising partly out of these reports and partly out of the orders of the Government of India.

7. In reflecting upon the causes of the comparative failure of the Police in Bengal, it is necessary not to lose sight of the obstacles which the Police, as well as the Magistracy, have to surmount. Foremost among our difficulties is the character of the general mass of the population from which the Police are drawn. The Police are of, and from, the people; and as are the people so are the Police. To speak broadly, the people have but a faintly developed sense of public morality, of the far-reaching duties of the individual towards the public at large; they view without reprobation the giving and taking of bribes; they will not interest themselves, in matters outside their immediate personal concerns, to oppose oppression or blackmail or false evidence or other offences against the public. The Police, therefore, have not the sharp incentive of public opinion to keep them up to the mark, and the discipline to which they are subjected is not sufficient to raise their standard of public morality in any marked way above that of the class to which they belong. Mr. Macpherson describes the state of public feeling in this connection as follows:—"In Bengal" (he writes) "it is, I believe, much more difficult than in England to bring offenders to justice, because we have not here so high a standard of truth and so general sympathy with public justice. The public spirit which in England will prompt strangers and disinterested persons to give evidence for the Crown and for the defence, with no object but that truth may be established, is not often found in this country. The mass of the people have not the intelligence and sturdiness of character which should make them denounce the oppression of a neighbour by a zemindar, or refuse to pay blackmail to the cattle thief, or be ashamed to protect the house-breaker and receiver of stolen goods by professed ignorance of his guilt. Aggrieved persons and witnesses are often reluctant to go to the authorities, because the authorities are dilatory, troublesome and inefficient, and thus cause and result act and re-act on one another. The only remedy for this want of public spirit is to spread education among the masses." Another difficulty which Mr. Macpherson points out arises from the frequent connection of crime with complicated questions of title to, and possession in, land and of tenancy and rent. Other difficulties arise out of climate; houses are left open and property unprotected, while the rains supply facilities for burglary which amount almost to temptation.

But these conditions must for the present purpose be considered as unavoidable. "They justify" (as Mr. Macpherson says) "a demand for good officers. We want better Magistrates, better station police and better village police." The problem to be solved is how these are to be attained.

8. It is admitted universally that the state of the village police is far from being satisfactory under any of the systems which are in force, but there is much variety of opinion as to the remedy. While some would foster the village punchayet and enlarge its control over the village chowkidars, others would go so far as to abolish the village chowdidars entirely and supply their place by an army of constables. Others, again, think it possible to retain the local character of the chowkidar, while binding him more closely to the Police and subjecting him to more strict discipline than heretofore. This is, perhaps, the most difficult and important question which the Committee will have to consider; its solution is not now being attempted for the first time, and the previous essays, their results and their teachings will all have to be passed in review. The Committee will not be obliged to devise an absolutely uniform scheme to

There is no doubt in the Lieutenant-Governor's mind that these delays are to a great extent the result of a want of system and bad supervision. For instance in Purneah, where the number of cases remanded more than six times was 132 out of a total of 769 cases, a frequent excuse for the remand was, the Lieutenant-Governor learns, that the process had not been duly served, yet the late Commissioner found in the course of his inspection that no trouble was ever taken by the judicial officers to ascertain the cause of the failure; again in the sadr subdivision of the Dinajpur district, where no less than 198 cases were pending with the police and 55 with the Magistrates, the case registers, instead of being utilized, had been superseded by a special statement which must have given unnecessary trouble and have afforded insufficient information. This state of things is certainly not creditable to the officers concerned, and the Lieutenant-Governor must insist on the Magistrates exercising a closer supervision over these matters; a systematic and periodical examination of the registers, such as need occupy but little time, would, he is sure, produce a marked effect.

25. *Reconvictions.*—The number of persons reconvicted rose from 1,640 to 1,915. Mr. Veasey remarks that the increase—

"is considerably discounted by the proof it affords that the sentences passed cannot in many instances be really deterrent, and further, that we have a large criminal population who find so little to object to in a life in jail that they begin to qualify for re-admission almost as soon as the gates close behind them. On the other hand, the police generally understand now the importance of verifying the antecedents of accused persons, and much information is thus elicited which a few years ago would have remained neglected."

The Lieutenant-Governor believes that, though there has been some improvement in this matter, much remains yet to be done, both by the police in putting the information before the Courts, and by the Courts in attaching proper importance to previous convictions in awarding punishment. Several cases have recently come to His Honour's notice in which old offenders have been treated with most uncalled for leniency, on the ground that some of the previous convictions proved against them were of a date more than ten years back, and were consequently excluded from consideration. Sir Steuart Bayley is not prepared to accept the principle involved in this explanation, and regrets to think that these and other similar cases show that Mr. Veasey is justified in saying that "authorities who are practically irresponsible (to the Commissioner) are apt at times to ignore local requirements." Amongst districts, Patna and Monghyr take the lead with 123 and 106 reconvictions respectively. There were only four districts, viz., Bankura, Pubna, Bogra and Khulna, in which the number in each case did not exceed 10. In 199 cases, as against 142 in 1888, it was proved that the accused had been convicted three times or more.

26. *Criminal Tribes.*—Under the directions of the Government of India, the subject of the control and punishment of Criminal Tribes is now under special enquiry, and the Committee on Police Reform has been asked to take the subject up. The Mughya Domes still continue to give much trouble, and the scheme instituted some years ago for their reclamation does not appear to have had any lasting success. The question of the retention of the Dome colonies in Chumparun is now under consideration. It is, however, noteworthy that the Magistrate of that district, while he calls them 'pilferers by choice and burglars by necessity,' is of opinion at the same time "that they get credit for much crime which is in reality the work of Ahirs, well-to-do people who thrive by thieving, and with whom the chowkidars are hand-in-glove in consequence," and the Lieutenant-Governor believes that there is much justification for this view. The Rajshahye Division, and more especially the districts of Rungpur and Dinajpur, are still overrun by miscellaneous gangs of vagabonds whose movements it is very difficult to control.

27. *Absconders.*—The total number of names entered during the year was 2,610, of whom 804 were arrested and 531 surrendered themselves. This subject has not hitherto found a place in the annual report. The Lieutenant-Governor fully agrees with Mr. Veasey's comments on the unsatisfactory nature of the returns on this subject, and in his remarks as to the importance of giving special attention to it, and trusts that the Commissioners of Divisions will, in the course of their inspections, personally look into the matter and adopt such measures as may lead to the submission of accurate returns for the several districts under them.

28. In conclusion, the Lieutenant-Governor is constrained to express his opinion that a review of the results obtained by the police from their work in 1889 shows that they have obtained no marked success in dealing with crime, and that there has been a decided diminution of efficiency in the work done in Sessions cases—the most important class of cases with which they have to deal. A Commission has recently been appointed to investigate the causes of failure and, as far as may be possible, to suggest remedies. The fault does not entirely lie with the police, and it is admitted that they frequently have to contend with great difficulties. The Lieutenant-Governor is well aware that among the superior officers there are men who are devoted to their duties, and whose efforts are rewarded by a considerable measure of success; his acknowledgments are due to the District Superintendents and Assistant Superintendents whom the Inspector-General has selected for honourable mention. His Honour also recognises the zeal and ability of the Inspector-General himself.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Inspector-General of Police and the Commissioner of Police, Calcutta.

Ordered also that a copy of the Resolution be forwarded to all Commissioners of Divisions for information.

Ordered also that a copy of the Resolution and extract paragraph 49 from the Report be forwarded to the Appointment Department of this Office for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,
Offg. Chief Secy. to the Govt. of Bengal.

POLICE REFORM IN BENGAL.

RESOLUTION.

POLICE.

Calcutta, the 24th September 1890.

READ—

Letter No. 634, dated 22nd December 1888, from the Secretary to the Government of India, Home Department, to the Government of Bengal.

Letter No. P $\frac{P}{1}$ 2, dated 9th January 1890, from the Chief Secretary to this Government, to the Government of India, Home Department.

Letter No. 398, dated 28th May 1890, from the Secretary to the Government of India, Home Department, to the Government of Bengal.

Resolution of this Government, dated 3rd January 1890, appointing Colonel Ramsay, on special deputation, to enquire into certain matters connected with the chowkidari systems in force in Bengal,

Letter No. P $\frac{P}{1}$ 2, dated 7th July 1890, from the Chief Secretary, to certain selected officers.

The replies to the above letter received from Messrs. A. Smith, D. R. Lyall, C. F. Worsley, R. C. Dutt, C. W. Bolton, H. Savage, W. C. Macpherson, B. L. Gupta, A. W. Mackie, and J. Crawfurd.

Letter No. 208, dated 14th July, from the European and Anglo-Indian Defence Association, to this Government.

The reply to the above letter.

IN compliance with the instructions of the Government of India, the statistics of crime cognizable by the Police, reported and disposed of in Bengal during the 11 years 1878-88, have been scrutinized and compared and the results communicated to that Government.

Various circumstances were indicated which tended to affect those statistics and to prevent them from representing with perfect accuracy the number of cases which had really occurred; but, since no means existed of measuring these influences with precision, it was necessary to accept the figures shown in the statements as giving an approximately correct account of the fluctuations of crime during the series of years to which they referred.

be applied to the whole province. They will, perhaps, find that different tracts require different treatment, and it will be open to them to diversify their suggestions accordingly.

9. Before the appointment of this Committee was contemplated, the Lieutenant-Governor deputed Colonel Ramsay, of the Bengal Police, who was known to have given great attention to the subject of chowkidars, to collect information on various points connected with the institution. His enquiries have now become merged in the more extended investigations of the Committee, and the information which he has obtained is available, and will, it is hoped, be found useful. Sir Steuart Bayley has not found it necessary to ask the Government of India to have the period of Colonel Ramsay's deputation extended, but, if requisite, arrangements can readily be made by which the Committee may obtain his assistance.

A question connected with the foregoing is how far the duty of reporting crime which the law imposes on landholders can be insisted on, and whether any village organization can be expected or relied on to act either co-ordinately or as an efficient substitute.

10. Very great importance must be attached to the improvement of the investigating officers. It is universally admitted that their present pay and prospects are insufficient to attract trustworthy and competent men. In the lower grades especially, it is plain that such a man can barely live on his pay; while, even in the higher, the pay is but an indequate remuneration for the high qualities and great responsibilities which are required of an officer in charge of a station. Neither the names nor the scale of pay suggested by the Government of India are to be taken as final, and it will be open to the Committee to make their own proposals. As at present advised, the Lieutenant-Governor is not inclined to think it altogether immaterial whether an officer employed in investigation is called a Head-constable or a Sub-Inspector. The higher title does in practice, he believes, connote a higher standard. He would also invite the Committee to consider whether the scale of pay provides for sufficiently even and frequent promotion, or whether the increments proposed are not too large and sudden. Due regard is to be paid to financial considerations, but the Lieutenant-Governor would observe that the scheme to be submitted to the Government of India is one which is expected to "place the Police of Bengal upon a satisfactory basis as regards pay and promotion." He is, therefore, prepared to accept recommendations involving a moderate increase in expenditure.

11. The amelioration of the position of Inspectors is, perhaps, not so urgent as that of the lower grades, but it nevertheless demands the careful consideration of the Committee. A suggestion has been made that deserving Inspectors may be rewarded by being appointed Deputy Magistrates and Collectors. Independently of the fact that an additional difficulty would thus be introduced into the recruitment of the Subordinate Executive Service, it is, perhaps, open to question whether this measure is desirable in itself. The experiment, so far as it has been tried in Bengal, has not, it is believed, been attended with success, and several of the officers consulted object to it and think that it would be preferable to give higher promotion in the Police Service itself; doubtless the whole matter will receive due attention from the Committee.

12. The pay of constables is another topic for discussion, and in this case it will be well to see whether the same scale is appropriate to the whole Province.

13. The improvement of prosecutions is to be considered. Is this likely to be best attained by separating the appointment of Court Inspectors and other Court officers completely from the station police, so that they may be used only as prosecutors and for the Court clerical work, or by retaining the present connection and compelling the officers set apart for the Courts to pass certain examinations, or is there some other and better expedient?

14. The Committee is invited to deal with the question of recruitment of the Police of all grades below that of Assistant Superintendent. One proposal which has been made is that the Head-constables should be simply what their name implies, and that there should be a sharp line of demarcation between them and the Sub-Inspectors; further, that appointments should be made direct to Sub-Inspectorships, endeavours being made to attract well-educated men of respectable families. This would probably involve the creation of a small grade of probationers. The Committee will advise the Lieutenant-Governor

whether any, and if so what, educational tests can be applied. He will also be obliged to them if they will consider whether anything reasonable and compatible with discipline can be done to render Police service more attractive than it now is.

15. The weakness of the Magistracy both in numbers and in individual power is brought prominently to notice in these papers. It is beyond question that the number of officers available both in the Civil Service and the Subordinate Executive Service is quite inadequate to the increasing requirements of the province. Apart from this general deficiency, it is to be observed that the exigencies of the Sonthal Pergunnahs and certain other special localities require that they should generally be officered by Europeans, and it will be necessary that arrangements should be made to recruit suitable persons. In this connection the suggestion that the junior European Police officers should undergo some magisterial training will, doubtless, receive attention.

16. The Lieutenant-Governor also desires the Committee to report on the best means of supervising the work of Subordinate Magistrates; the conviction is frequently forced upon him by his own observation that at present the supervision is not generally sufficiently systematic and persistent, and he is constrained to believe that very much depends upon the strictness of the individual Commissioner or Magistrate.

17. The Lieutenant-Governor is by no means disposed to sympathize with the sweeping denunciations of the Native Magistracy which he sometimes sees. He believes that the Magistrates are very often industrious and well-meaning men, but they receive very little education of a kind specially adapted to fit them for their duties on the Bench. A Munsif will have had the advantage of watching the procedure of the Courts for some years, and thus of learning by experience, not the mere letter of the law only, but the method in which the discretionary powres allowed by the law are exercised in practice. The Deputy Magistrate has no such advantage. Often the first case which he has seen tried is the first which he has tried himself; at any rate it may be so. Again, the legal practitioners who appear before the Deputy Magistrate are of an inferior class in respect of their knowledge, both technical and general, and far from affording him the assistance which a Munsif gets from a well-educated bar, they do more harm than good in influencing the general conduct of cases. To counteract these influences, Sir Steuart Bayley is sure that what is required is the kindly but firm and frequent interposition of the superior officers. He will be glad to learn from the Committee in what way they think this object can best be attained.

18. Sir Steuart Bayley would invite the attention of the Committee to the 10th paragraph of Mr. Lyall's letter of the 28th May, which has reference to the extended use of the provisions of the law for the prevention of offences. He wishes to know whether it is possible or advisable to make rules with this object, and if so, what form these rules should take, having regard on the one hand to the protection of the public from professional criminals, and on the other to the necessity for ensuring that the law may not be abused, so as to be a powerful engine of oppression.

19. The Lieutenant-Governor has purposely abstained from putting before the Committee any series of definite questions of a nature to hamper them in their deliberation. He has little doubt that as their labours progress points, at present unforeseen, will arise; and it is possible that new solutions of some of the difficult problems before them may suggest themselves. He is anxious, therefore, that members of the Committee should regard themselves as free to consider and report on any matter which they may regard as relevant to their enquiries. He expects their report to be submitted within six months from the date of the President's deputation.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,

Offg. Chief Secretary to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CHITTAGONG FOR THE YEAR 1889-90.

No. 2683 Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

RESOLUTION.

Dated Calcutta, the 26th September 1890.

READ—

The Administration Report of the Commissioners of the Port of Chittagong for the year 1889-90.

The report, which is submitted by the Commissioners of the Port of Chittagong, is the first report of their administration of the Port. Although a Port Trust was constituted in 1887-88, the Chittagong Port Commissioners' Act, 1887, not having been brought into operation, the Trust had no legal status, and the appointments and elections were subsequently cancelled. The law came into force from the 25th April 1888, and in June of that year a Trust was lawfully established. The entire management of the Port and of the Port Fund was not, however, as stated in the Resolution on the Administration Report of the Port for 1888-89, made over to the Commissioners until the 1st April 1889, and the year under review is the first in which the Act has been in full operation.

2. The management of the Pilot Service at Chittagong was transferred to the Commissioners during the year with a contribution of Rs. 1,000 per annum to their revenues to meet the charges which will be incurred by them on clerical establishment, &c., in working the Pilot Service. Permission was given to the Commissioners to deal with moveable property up to the value of Rs. 1,000. Since the close of the year, rules have been made under sections 17 and 45 of Act IV (B.C.) of 1887 (the Chittagong Port Commissioners' Act), and the scale of charges prepared under section 33 and the by-laws made under section 64 of the Act have been approved. New rules under section 6 of the Indian Ports Act, 1889, have also been made for the Port.

3. The purchase of a steam-tug for the Port, the necessity of supplying which had been urged upon the Government for some years past, was sanctioned during the year, and the Commissioners are now making arrangements for procuring the vessel. The cost of the tug will be advanced to the Commissioners by the Government.

4. The financial position of the Port Trust is satisfactory. The Port Fund opened on the 1st April 1889 with a credit balance of Rs. 67,958, being the sum made over to the Commissioners of the Port by the Accountant-General, Bengal, and it closed with a balance of Rs. 90,197 on the 31st March 1890. These figures are exclusive of a sum of Rs. 20,200 invested in Government securities. The receipts for the year amounted to Rs. 56,218, and the charges to Rs. 33,979.

5. The rice trade of the Port, a somewhat fluctuating one, again fell off during the year under review, owing, it is stated, to the exportation to Central Bengal of the rice produced in the northern districts of the Chittagong Division, but the loss was more than compensated by a considerable increase both in the quantity and the value of the jute exported, and the results of the year were, on the whole, satisfactory.

6. The following statement shows the number and tonnage of vessels which visited the Port during the year as compared with the figures of the preceding year:—

		1889-90.		1888-89.	
		Number.	Tonnage.	Number.	Tonnage.
European vessels trading with Foreign ports.	Entered	39	60,701	41	55,774
	Cleared	37	59,355	44	59,655
Native craft trading with Foreign ports	Entered	4	808	4	814
	Cleared	4	701	6	949
Vessels trading with Home ports	Entered	982	176,550	845	165,318
	Cleared	983	180,058	836	165,495

7. The number of vessels engaged in the foreign trade fell off by 11, but their tonnage exceeded that of the previous year by 4,373 tons. The decline in the number of vessels is attributed to the decline in the grain exports, while the increase of tonnage is due to the employment of larger vessels in the jute trade.

8. Of the 41 sea-going vessels which cleared for foreign ports during the year, the destination of 25 was the United Kingdom, of 3 the Mauritius, of 4 the Maldives, of 8 the United States, and of 1 Trinidad. Those for the United Kingdom and the United States carried jute; the remaining 8 rice. The number of vessels that cleared with rice in the preceding year was 22.

9. The increase in the number and tonnage of vessels entering the Port from Home ports is due chiefly to Chittagong and other native vessels engaged in the jute trade making more frequent trips between Chittagong and Naraingunge in tow of steamers belonging to the jute exporters. There was a decrease in the tonnage of steamers, although their number was in excess of that of the previous year. This was owing to the British India Steam Navigation Company having run bi-weekly steamers of small tonnage for several months of the year.

10. The subjoined table gives the statistics of the principal articles of export and import for the past eight years—

	1882-83.		1883-84.		1884-85.		1885-86.		1886-87.		1887-88.		1888-89.		1889-90.

11. The report under review does not furnish statistics of the different articles exported to Home ports, nor does it supply information regarding the quantity of salt and oils imported during the year. The Lieutenant-Governor has in past years desired that the subject of trade should be dealt with in greater detail in the report, and he hopes that the Commissioners will not overlook this important point in future.

12. The importation of mineral oil, which, for the reasons explained in the Resolution on the Administration Report of the Port for 1888-89, fell off during that year, made a considerable advance during the year under review, and there was an increase of Rs. 1,84,107 in the value of the oil imported as compared with the figures of the previous year. The falling off of Rs. 1,32,693 in the value of salt imported during the year is attributed to the unusually large importation of the year before.

13. The jetty was kept in good order, and the depth of water at its head remained unchanged. The jetty opposite the double moorings, which was erected in 1888-89, has proved convenient to the public. The buoys and moorings, with the exception of the middle bar red buoy, the spire of which is broken off, were kept in efficient condition. On account of the extension of the Eastern Sand it has become necessary to move the moorings further west, and it is proposed to relay them next cold season. The Port boats were kept in good order.

14. The Commissioners are of opinion that a penalty on the officer in charge of a vessel, the lights of which have been allowed to get out of order, would be more effective than her detention, and they suggest that some punishment, either in the shape of a fee for the inspection of the lights or a fine, may be provided to meet such cases. Under section 30 of the English Merchant Shipping Act, 1873 (36 and 37 Vic., Cap. 85), a fee is leviable for

* The figures are not given in the report.
† These figures represent the quantity exported to Foreign ports.

each visit made to a ship on the application of the owner, and for each visit made when the lights are found defective. The Indian law does not provide for the levy of a fee for the inspection of lights, and the question does not appear to have been raised when the Act was passed. The detention of a ship which is not properly provided with lights and with the means of making fog signals is necessary for the protection of life and property. The proposal to levy a fee for the inspections, as is done in the United Kingdom, will receive the consideration of the Lieutenant-Governor.

15. The health of the shipping in the port was not so good as in the year before. There were 73 admissions into the hospital against 28 in the preceding year, and the number of deaths was 6 against 2 in 1888-89. With a view to provide proper medical attendance and sufficient hospital accommodation for the shipping at the port, the levy of hospital port dues at the rate of one anna per ton on all ships manned by European crews has been sanctioned under section 49 of Act X of 1889 (the Indian Ports Act), with effect from the 1st April 1890.

16. There were four wrecks during the year against two in 1888-89. Three of these were brigs wrecked in the Megna river on the voyage from Naraingunge to Chittagong. Their jute cargoes were totally lost. The fourth wreck was that of a brig bound to Chittagong with a cargo of planks. It occurred to the south-west of Kutubdia. The vessel and her cargo were lost, but the crew was saved. Two fires occurred in the port on vessels laden with jute, one of which was totally lost.

17. The barque *Grosvenor*, which grounded on the D'Apres shoal near Chittagong, and was given up as lost, was, as stated in the Resolution on the Annual Report of the Port for 1888-89, found drifting about near the mouth of the Shabazpore river. The wreck has since been salved, the vessel and her cargo having suffered little damage.

18. The lights at Kutubdia and Norman's Point are both inefficient, and it is hoped that new lights will be provided at both places before the close of the current year.

19. The Pilotage Fund is in deficit. The year under review opened with a debit balance of Rs. 2,938, and it closed with a similar balance of Rs. 4,970. The receipts during the year amounted to Rs. 12,137, and the charges to Rs. 14,170.

20. The charges of the Port are now distributed between the Port and Pilotage Funds in accordance with the orders contained in the letter [No. 1202T.—M.] of the 28th June 1886; but having regard to the altered circumstances of the Port, the distribution of the charges will have to be examined. In order that this may be done, the Lieutenant-Governor desires that the Commissioners will furnish the details of the expenditure which was incurred in 1889-90 under the following heads and debited to the Pilotage Fund :—

Vessels and boat establishment.
Contingencies.
Stores and repairs.
Contingencies.
Petty construction and repairs.
Miscellaneous.

21. It is understood that the pay of the Harbour Master is at present charged to the Pilotage Fund. The Lieutenant-Governor desires that the Commissioners will report whether his salary should not in future be debited to the Port Fund.

By order of the Lieutenant-Governor of Bengal,

J. M. McNEILE, *Col.*, R.E.,
Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 27th September, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.		
	BURDWAN DIVN.		
1	**Burdwan** Sept. 27, '90	2·47	Weather—rainy and cool. *Aus* harvested; outturn estimated at 14 annas. The rain has done much good to *amun* and sugarcane. Price of common rice :— Srs. Burdwan ... ... 16 Culna ... ... 16 Ranigunge ... ... 16 } per rupee.
	Culna ...	1·66	
	Ranigunge ...	4·03	
2	**Bankoora** „ 27, '90	5·97	Sky overcast with rain till the morning of 27th; weather has since cleared. Copious rain during the week. Prospects of crops excellent. Common rice selling at 19 seers per rupee at Sudder and 17 seers at Bishenpore.
3	**Birbhum** „ 27, '90	5·54	The rain came in the very nick of time, and the prospects are as brilliant as possible.
	Rampore Haut ...	4·40	
4	**Midnapur** „ 27, '90	4·31	Daily rain. Prospects much improved, especially in the Contai subdivision, by the heavy rain of the week. Sowing of indigo begun. Price of cocoons in Ghatal stationary. Price of common rice :— Srs. Ch. Sudder ... ... 16 0 Ghatal ... ... 16 13 Tumlook ... ... 14 3 Contai ... ... 15 0 } per rupee.
5	**Hooghly** „ 27, '90	3·38	Weather—showery with heavy rain. The rain has improved prospects greatly. Prices of common rice :— Srs. Sudder ... ... 13 Serampore ... ... 13 Jehanabad ... ... 16 } per rupee.
	Serampore ...	1·66	
	Jehanabad ...	0·49	
	Howrah „ 27, '90	4·78	Weather—seasonable. Harvesting of *aus* and jute nearly finished. Prospects of *amun* favourable owing to recent rain. Price of coarse rice about 14 seers per rupee.
	Uluberiah ...	0·73	
	Central Districts.		
6	**24-Perghs.** Sept. 29, '90	5·48	Weather—overcast, stormy, and heavy rain. Harvesting of *aus* and jute and transplanting of *amun* finished. Prospects of standing crops continue good except in the small flooded area. Gratuitous relief is being given to the destitute sufferers at the late floods in thana Baduria. Prices stationary.
	PRESIDENCY DIVN.		
	Nuddea „ 27, '90	3·29	Weather—cool and cloudy with heavy rain. Sowing of winter crops going on. *Kalai* on chur lands in the Kushtea subdivision almost destroyed by rise of rivers and heavy rain during the week. No change in the price of rice.
7	Kushtea ...	2·42	
	Meherpore ...	3·86	
	Chuadanga ...	1·10	
	Ranaghat ...	0·78	
8	**Khoolna** „ 27, '90	2·68	Weather—rainy. The flood has nearly subsided. Prospects of *amun* in the flooded thanas bad; elsewhere very good. *Aus* harvest nearly completed; outturn about 10 annas.
	Bagirhat ...	2·45	
	Satkhira ...	1·00	
	Jessore „ 27, '90	4·01	Weather—cloudy with occasional rain, and windy. Rivers again rising slowly in the Magura and Narail subdivisions. Sowings of cold-weather crops and indigo going on, and prospects good. Enquiries about the damage done by the flood are in progress, and charitable relief is being giving in the Bongong and Jhenidah subdivisions and in parts of the Sudder subdivision.
9	Jhenidah ..	1·81	
	Magura ...	0·22	
	Narail ...	0·52	
	Bongong ...	0·65	
10	**Moorsheda bad** „ 27, '90	Figures not given.	Weather—rainy and overcast. Harvesting of *bhadoi* almost completed. The rainfall of the week has done much good to *haimanti* paddy. *Kalai* is being sown and lands prepared for *rubbi*. Charitable relief and agricultural loans are being given.
	RAJSHAHYE DIVN.		
11	**Dinagepur** „ 27, '90	3·82	Weather—cool for the time of year. A cyclonic storm on Friday (26th) night. *Prospects of crops continue favourable.* Price of rice unchanged.
	Thakurgaon ...	0·77	
12	**Rajshahye** „ 27, '90	1·66	Weather—cool and rainy. Prospects of crops at Nattore and Nowgong fair. Floods subsiding in Nowgong. Ganges rising again at Beauleah, but prospects of crops as yet not unfavourable.
	Nattore ...	2·88	
	Nowgong ...	1·11	
13	**Rungpur** „ 27, '90	3·84	Weather—overcast and sultry. Rain threatening. It is wanted for the young *amun* plants. Cold-weather crops, such as *kalai*, &c., are being sown in places. Prices abnormally high.
	Nilphamari ...	2·85	
	Gaibanda ...	4·02	
	Kurigram ...	1·84	
14	**Bogra** „ 27, '90	0·44	Weather—mornings and nights chilly. The whole week has been more or less cloudy. *Amun* is still being transplanted, and this crop and sugarcane look promising. Reaping of *aus* completed; estimated outturn 15 annas. Jute is still being cut. Common rice selling at 19 seers per rupee.
	Sherpur ...	0·61	
	Nowkhilla ...	0·15	
15	**Pubna** „ 27, '90	4·07	Weather—cool and rainy. Prospect of *amun* good in Serajgunge subdivision, but not good in Sudder subdivision. Prices stationary.
16	**Darjeeling** „ 27, '90	1·17	Weather—fair. Transplantation of winter rice at Siliguri finished, and lands are being ploughed for mustard and pulses. *Bhutta, chota marua,* and *kagni* in the hills are being harvested. *Bhadoi* paddy reaped. *Haimanti* paddy progressing favourably.
	Silliguri ...	6·82	
17	**Jalpigoree** „ 27, '90	0·80	Weather—hot and cloudy with rain on the last day of the week. About 15 annas of *haimanti* paddy transplanted. Average outturn of jute and *aus* paddy reported to be 12 annas. Prices stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.—*concluded.*			
	Eastern Districts.		
Dacca Divn. 18	Dacca Sept. 27, '90	0·21	Weather—seasonable. Jute nearly harvested. *Amun* doing well. Rivers falling steadily. Fodder available. Common rice sold at from 13 to 15 seers per rupee.
Dacca Divn. 19	Furreedpur „ 27, '90	2·34	Weather—seasonable. State and prospects of *amun* rice fair. Manufacture of jute in progress. Rice selling at 14 seers per rupee in Goalundo and Madaripur subdivisions and 13 seers at head-quarters. Cattle suffering for fodder.
Dacca Divn. 20	Backergunge „ 27, '90	4·06	Weather—seasonable. State and prospects of crops good. Common rice selling at about 13 seers per rupee.
	Bhola ...	2·05	
	Perozepore ...	1·07	
Dacca Divn. 21	Mymensingh Sept. 27, '90	0·65	Weather—hot and bright, but 26th and 27th windy and rainy. *Amun* paddy thriving well. Harvesting of jute still going on. *Kalai* is being sown. Common rice sells at 13¼ seers per rupee.
Chittagong Divn. 22	Chittagong „ 27, '90	1·37	Weather—seasonable. About 15 annas of *aus* cut. *Amun* transplanted over 13 annas of land. Prospects fairly good. Prices steady.
Chittagong Divn. 23	Noakholly „ 27, '90	7·10	Weather—seasonable. Transplantation of *amun* nearly completed. Price of rice stationary.
Chittagong Divn. 24	Tipperah „ 27, '90	2·07	Weather—seasonable. Jute being cut: prices fairly good. *Amun* being transplanted extensively; prospects good. Price of rice stationary.
Chittagong Divn. 25	Chittagong Hill Tracts. Sept. 25, '90	1·90	Weather—rainy and cloudy with occasional sunshine throughout the week. Harvesting of late *jum* paddy continues. Cotton in flower. Sugarcane and late rice in low lands progressing. Common rice is being sold at 12 seers 15 chittacks per rupee.
	Hill Tipperah „ 26, '90	2·49	Weather—days hot; nights cool. Harvesting of jute continues. *Amun* thriving well. *Til* and cotton in good condition. No change in prices.
BEHAR.			
Patna Divn. 26	Patna „ 27, '90	0·72	Weather—cool and cloudy. Reaping of *bhadoi* crops nearly finished. Paddy looks well. Rain during the week very beneficial to paddy. *Rahar* and *jowar* flourishing. Prices of food-grains stationary.
	Barh ...	1·50	
	Behar ...	1·21	
	Dinapore ...	2·71	
Patna Divn. 27	Gya „ 27, '90	0·26	Weather—cloudy with drizzling rain for the last day or two. The rainfall has been very beneficial to paddy and other standing crops. Copious rain has since fallen, and prices of food-grains have decreased.
Patna Divn. 28	Shahabad „ 27, '90	4·12	Weather—much cooler. Paddy ought to be generally a very good crop. *Hathia* rains set in yesterday (26th), and there is apparently a good quantity of rain yet to come down. Prices stationary.
	Buxar ...	4·33	
	Bhabuah ...	1·76	
	Sasseram ...	1·57	
Patna Divn. 29	Durbhunga „ 27, '90	0·33	Weather—stormy and rainy in the latter part of the week. *Bhadoi* harvesting completed; outturn expected to be 10 annas all round. It has been raining since yesterday (26th), and will do immense good to the winter rice crop. Lands are being ploughed for *rubbi* sowings. Prices stationary.
	Madhubani ...	0·61	
	Somastipur ...	0·02	
Patna Divn. 30	Muzufferpur „ 27, '90	0·50	Heavy rain falling at the time of report. It appears to be general and ensures a good rice harvest. All crops on the ground doing very well. Land is being prepared for *rubbi* sowings.
	Hajipur ...	1·26	
Patna Divn. 31	Sarun „ 27, '90	0·52	Weather—seasonable. Occasional squalls. Heavy rain, which has been falling since the evening of 26th, will secure the rice where there is any, and will supply moisture for the *rubbi* which will be sown at once. Prospects very good.
	Sewan ...	5·88	
	Gopalgunge ...	2·07	
Patna Divn. 32	Chumparun „ 27, '90	3·66	Weather—rainy and squally. Good showers of rain fall during the week, benefiting the paddy crop, the prospects of which are very good indeed. Harvesting of *bhadoi* crops nearly over, and the new grains are selling in the markets. Price of *makai* falling.
	Bettiah ...	0·86	
Bhagulpore Divn. 33	Monghyr „ 27, '90	2·03	Weather—hot and clear in the beginning of week; latterly cool and cloudy. Stormy this day (27th), and rain falling at time of report. Winter rice much benefited by rain. *Rubbi* sowing commenced in places.
	Begusarai ...	0·61	
	Jamui ...	1·53	
Bhagulpore Divn. 34	Bhagulpore „ 27, '90	1·82	Weather—cloudy. Strong east wind. Raining at time of report. State and prospects of crops good. *Bhadoi* harvest over. The rain which is falling will be favourable to standing crops.
	Banka ...	0·31	
	Mudhepura ...	1·20	
	Soopool ...	3·11	
Bhagulpore Divn. 35	Purneah „ 27, '90	4·71	Weather—stormy with rain. Prospects of *aghani* rice everywhere favourable. Good rain now falling. Preparation of lands for *rubbi* crops progressing.
	Kishengunge ...	4·78	
	Arrareah ...	4·81	
Bhagulpore Divn. 36	Maldah „ 27, '90	1·84	Weather—generally cloudy and rainy. East wind prevails. Prospect of winter rice crop favourable. *Kalai* sowing and preparation of lands for *rubbi* sowings going on. A great deal of *kalai* sown in the dearah tract has been damaged by the rising of the Ganges. Price of common rice stationary.
	Chanchal ...	0·20	
	Shibgunge ...	1·46	
	Gajole ...	2·32	
Bhagulpore Divn. 37	Sonthal Perghs. „ 27, '90	1·76	Weather—rainy and cool. Good rain has fallen everywhere except at Godda and Rajmehal. Prospects of winter rice excellent, and a full crop may be expected.
	Deoghur ...	1·36	
	Godda ...	0·91	
	Jamtara ...	3·02	
	Pakour ...	3·21	
	Rajmehal ...	0·56	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38	Cuttack Sept. 27, '90	14·03	Weather—seasonable. Reaping of *bara beali* has commenced. Recent rain has improved prospects of early *sarad* in Jajpur subdivision. Prospects generally good.
	39	Pooree „ 25, '90	11·00	Weather—gloomy. Weeding of *sarad* crop going on. *Beali* is being harvested. Miscellaneous crops doing well. Price of common rice stationary.
		Khoorda ...	3·05	
		Banpur ...	5·11	
	40	Balasore „ 27, '90	16·67	Weather—very rainy with a little wind. Much of the district is under water. It is too early as yet to estimate the effects of the flood.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh Sept. 27, '90	3·33	Weather—cloudy and almost constant rain. Prospects of winter rice excellent. *Gora* paddy and *gundli* have yielded 8 to 12 annas, *marua* about 8 annas, and Indian-corn from 2 to 6 annas. Prices easier.
	42	Lohardugga „ 27, '90	5·33	Weather—seasonable. Rain daily during the week, which has much benefited the winter rice crop. *Gora* rice is being harvested. Prices steady.
		Palamow (up to 22nd Sept.)	1·16	
	43	Singbhoom Sept. 27, '90	1·99	Weather—seasonable. Cloudy; heavy falls of rain yesterday (26th). Rain has removed all fear for the winter rice crop, which is now reported to be safe everywhere. *Gora* paddy has yielded a 16-anna crop, and other *bhadoi* crops have yielded well. Only the *bera* land crops have suffered from the late drought. No change in the price of rice reported this week.
	44	Manbhoom „ 27, '90	2·39	Heavy rain with occasional breaks. The weather has been distinctly beneficial to the crops, and all anxiety is at an end so far.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; t, thunder; d, drizzling rain; p, passing temporary showers; g, gloomy; ⌓, dew.

* Means of six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past ten years. The number of stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 26th of September 1890.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	OF WEEK. Mean for district.	OF WEEK. Normal mean.	DISTRICT OBSERVATIONS. RAINFALL. Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the return are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 30th September* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 26TH OF SEPTEMBER 1890.

Weather conditions during the past week have been controlled by the depression which beginning to form on the second day of the week, moved slowly across the Circars Coast into Central India towards the end of the week. Though the influence of the depression has extended over almost the whole of India, still in the neighbourhood of the centre, when forming off the coast of the Circars between Gopalpur and Vizagapatam, weather was never seriously disturbed, wind velocity being very little above the average and squalls generally light. This was probably due to the depression being diffused and even from the first, covering a large area including the western half of the Bay and the land as far as the North-Western Provinces.

At the commencement of the week the pressure distribution was recovering from a shallow depression which had existed off the coast of the Circars for some days, but a trough of low pressure still remained, extending in a north-westerly direction as far as the Himalayas. This began to deepen on the 21st, and wind circulation again became cyclonic in the north-west corner of the Bay. On the 22nd there was a considerable intensification, as pressure fell briskly between Vizagapatam and Masulipatam, and rose briskly to rapidly in Central India and the northern districts. Defect was ·128 inch at Vizagapatam, and under a tenth of an inch at all other stations, but as there had been a rather large rise in the east of Assam the difference between pressure there and in the Circars was ·3 inch, which resulted in a regularly defined indraught over the whole of Bengal. During these two days rain had been falling in North and East Bengal, and had been scanty in the western districts, but after the 22nd it almost stopped in the former districts and became general elsewhere, especially in Orissa where some heavy falls were received. On the 23rd pressure rose everywhere rapidly in the east of Bengal and briskly elsewhere, except in Orissa and the Circars, where changes were about ·03 inch only. On the east of the depression, therefore, gradients again increased, and the area of lowest pressure was just on the point of crossing the coast. Fairly heavy general rain was falling in Lower Bengal and Orissa, but wind velocity increased very slightly, and easterly directions prevailed over the whole province. On the 24th the barometer continued rising in Bengal, and the depression was moving in a north-westerly direction into Central India, while rainfall in the north-west corner of the Bay had become heavier, and wind velocity was generally above the average. Up till the end of the week these conditions remained unchanged, as the depression moved slowly and kept, relatively to Bengal, almost the same position, but on the last day it began to recurve and take a northerly or north-easterly direction so as to bring the western districts of Bengal more within its influence.

Pressure changes have been rather large on several days of the week; but as the depression was chiefly due to differences of increasing pressure, means are nearly everywhere above the normal, the difference varying from ·075 inch below the normal at Gopalpur to about ·05 inch above in Assam, East and North Bengal and North Behar.

Temperature has been everywhere below the normal, defect in the weekly mean for Orissa and Chutia Nagpur being 2·5°, in South-West Bengal 2°, South Behar 1·4° and in the other districts about 1°. At the beginning of the week there was defect of between 3° and 5° in North Bengal and Assam, but elsewhere the difference from the normal was about 1°, except in the west of Behar where there was considerable excess. A rather rapid fall commenced in North Bengal and gradually extended over the province till the 24th, when there was defect over the whole province generally between 3° and 5°.

Rainfall has been very heavy in Orissa, moderately heavy in South-West Bengal and Chutia Nagpur and below the average elsewhere, slightly in Behar and considerably in East and North Bengal. The average excess fall in Orissa is 7·42 inches, in South-West Bengal ·9 inch, Chutia Nagpur ·75 inch; while defect varies from ·2 inch in Behar to 1·34 inches in North Bengal. At the beginning of the week only very scattered showers were falling in Lower Bengal and Behar, but after the formation of the depression on the 21st, general rain fell in Orissa and South-West Bengal till the end of the week, while in East Bengal, Chutia Nagpur, Behar and the southern districts of North Bengal showers were much more frequent, but in the north of North Bengal rainfall almost entirely ceased. The heaviest falls in Orissa were—Balasore 16·67, Cuttack and Jellasore over 14, and Pooree about 12 inches. In the Midnapore district falls were between 5 and 10 inches, and in Bankoora and Beerbhoom they were frequently over 5 inches, but elsewhere the falls at the various stations were very irregular owing to the local character of the showers.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 26th of September 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 13th September 1890.

Births.

The births registered during the week ending with Saturday, the 13th September 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 22· per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is ·9 lower than the average rate of the corresponding week of the past five years, and is higher than the rate of the corresponding week of any of the past five years except 1885 and 1889—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	26·6	21·1	19·6	21·9	25·7	22·9	22·0

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 23rd August 1890.	30th August 1890.	6th Sept. 1890.	13th Sept. 1890.	Towns.	Weeks ending— 23rd August 1890.	30th August 1890.	6th Sept. 1890.	13th Sept. 1890.
Burdwan	16·8	27·5	53·4	33·6	Naraingunj	16·6	12·4	29·0	20·7
Midnapore	18·6	17·0	17·0	9·3	Chittagong	9·4	4·7	9·4	9·4
Hughli and Chinsurah	14·8	29·5	39·4	39·4	Comillah	19·3	34·7	27·0	11·6
Serampore	13·7	31·4	30·3	31·4	Patna City	15·3	10·1	17·2	15·3
Utterpara	37·7	9·4	37·7	37·7	Gya	31·4	20·0	30·1	26·0
Howrah	21·8	17·2	13·2	21·8	Arrah	41·9	16·7	79·0	16·7
Bali	21·1	14·0	10·5	17·5	Mozufferpore	18·2	9·7	25·5	7·3
Krishnagar	18·9	11·4	34·1	26·5	Durbhanga	14·9	37·0	22·0	22·8
Ranaghat	12·0	.....	6·0	... ..	Chupra	18·1	4·0	25·2	28·2
Santipore	14·0	7·0	22·8	28·3	Bhagulpore	24·4	25·3	30·8	30·8
Jessore	12·2	.. ...	... ..	12·2	Monghyr	37·1	28·0	45·2	38·9
Rampore Beauleah	34·2	42·0	34·2	39·4	Purneah	..	10·4	20·8	10·4
Darjiling	88·9	133·4	29·6	37·0	Poori	12·6	4·2	10·5	14·7
Dacca	10·4	16·9	11·7	14·9	Total ...	20·7	19·0	26·3	22·0

It will be seen that last week the highest birth-rate was returned from Hughli and Chinsurah (39·4), and the lowest from Mozufferpore (7·3). No births were registered during the week in Ranaghat town.

Deaths.

The deaths registered during the week under review correspond to an annual rate of 24·7 per 1,000 of the population. The rate of the week is 6· below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	40·4	28·0	25·1	2·7	31·2	30·7	24·7

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 23rd August 1890.	30th August 1890.	6th Sept. 1890.	13th Sept. 1890.	Towns.	Weeks ending— 23rd August 1890.	30th August 1890.	6th Sept. 1890.	13th Sept. 1890.
Burdwan	16·8	24·4	16·8	29·0	Naraingunj	24·8	12·4	16·6	16·6
Midnapore	23·2	9·3	17·0	20·1	Chittagong	16·4	9·4	18·8	9·4
Hughli and Chinsurah	19·7	30·1	18·1	37·7	Comillah	26·9	11·6	19·3	27·0
Serampore	49·1	38·4	43·2	53·0	Patna City	30·4	16·2	26·9	20·4
Utterpara	18·9	28·3	28·3	28·3	Gya	66·3	58·7	58·1	40·3
Howrah	17·6	19·5	10·9	13·7	Arrah	12·0	6·4	29·9	15·6
Bali	28·1	31·6	14·0	16·5	Mozufferpore	25·5	19·5	20·7	24·3
Krishnagar	15·1	9·5	11·4	32·7	Durbhanga	14·9	44·8	30·3	22·8
Ranaghat	29·9	12·0	12·0	6·0	Chupra	16·1	11·1	32·5	30·2
Santipore	25·3	8·8	15·8	19·3	Bhagulpore	12·6	19·0	23·5	18·1
Jessore	58·1	18·4	38·7	42·6	Monghyr	22·6	21·7	27·1	21·7
Rampore Beauleah	26·3	21·0	18·4	39·4	Purneah	34·2	20·8	10·4	18·9
Darjiling	37·0	44·5	59·2	14·8	Poori	42·0	23·2	46·3	31·5
Dacca	24·7	20·1	15·0	26·5	Total ...	24·8	22·0	28·4	24·7

It will be seen that last week the highest mortality occurred in the town of Serampore (53·) and the lowest in Ranaghat (6·).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Chupra ...	30·2	Jessore ...	42·8	Serampore ...	27·5
Mozufferpore ...	8·5	Rampore Beauleah	28·9	Hughli and Chinsurah	14·8
Patna City ...	5·5	Poori ...	25·2	Gya ...	13·7
Gya ...	3·4	Comillah ...	23·1	Dacca ...	11·7
Durbhanga ...	3·1	Gya ...	22·5	Bhagulpore ...	10·0
Dacca ...	2·6				

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 3·5 from cholera, against 7· per 1,000 in the preceding week; ·04 from small-pox, against ·3; 11· from fever, against 10·5; 2·6 from bowel-complaints, against 3·4; ·5 from injury, against ·4; and 7· from other causes, against 6·8 in the preceding week.

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males ...	25·1	Christians ...	14·9	Under 1 year	215·1
Females ...	24·3	Hindus ...	25·3	1 and under 5 years	40·8
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	103	Mahomedans ...	23·7	5 „ 10 „	11·3
				10 „ 15 „	13·5
				15 „ 20 „	13·5
				20 „ 30 „	12·8
				30 „ 40 „	12·5
				40 „ 50 „	16·2
				50 „ 60 „	28·9
				60 years and upwards	64·1

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,

The 29th September 1890. *Sanitary Commissioner for Bengal.*

General remarks on the fluctuation of principal staples carried over the East Indian Railway during five weeks ended 30th August 1890.

INCREASES.

Coal and coke.—There was an increase in the weight of upwards traffic carried, attended with decreased earnings; and this was due to larger bookings of short distance coal for the Bengal and North-Western Railway; to increased despatches of short distance Umaria coal, and to a falling off of long distance traffic for the Bombay, Baroda and Central India Railway to Cawnpore, Agra and Delhi.

The improvement in the downward traffic was from nearly all the colliery stations, and was due chiefly to demand for export to coast ports.

Turmeric.—Chiefly in despatches from Howrah to several stations on this line and the Oudh and Rohilkhand Railway.

Lac, shell and stick.—Due to a good demand for shell-lac for export to London. There were also considerable despatches of stick-lac from stations on the Bengal-Nagpur Railway *vid* Asansol.

Oil.—Chiefly kerosine oil from Howrah to Patna.

Railway material, Foreign.—The increase under this head was chiefly in rails from Howrah to Benares, for the Oudh and Rohilkhand Railway.

Other saline substances.—Chiefly hide salt from Patna to different stations on the Howrah and Sahebgunge districts.

Sugar (refined and unrefined)—There was a decrease in the weight of unrefined sugar, chiefly jaggree, from the Oudh and Rohilkhand Railway *vid* Aligarh to Agra and to stations on the Bombay, Baroda and Central India Railway passing Hathras; the slight increase in the earnings of refined sugar was in consignments booked from Howrah to the North-Western Provinces.

Bones.—The increase in this commodity was principally in despatches from Mokameh Ghât, Digha Ghât, Agra and *vid* Mogulsarai to Bally and Sealdah.

DECREASES.

Cotton.—Due to exceptional despatches last year from Agra to some cotton mills near Calcutta, for manufacture.

Piece-goods, European.—The falling off was chiefly in despatches from Howrah owing to the condition of the import trade.

Gunny.—Limited demand, owing to the dull state of the seeds and wheat markets, led to the falling off recorded under this head.

Wheat.—The falling off was chiefly in long distance despatches from the North-Western Railway and stations on the Tundla district to Howrah.

Gram and pulses.—Principally in gram and arhar from stations on the Tundla district, owing to the cold-weather crops having been injured by frosts; also in despatches from the Oudh and Rohilkhand Railway *vid* Moghalsarai to Howrah.

Rice (husked and unhusked).—The increase in the weight carried was chiefly in downwards despatches from stations on the Loop line to Howrah, to replenish stocks and for export. The decreased earnings were entirely in upwards consignments despatched last year from stations on the "A" district.

Government stores.—Chiefly in despatches from Howrah, Allahabad Fort, Agra and *vid* Delhi from stations on the Bombay, Baroda, and Central India Railway.

Brass and copper.—Principally in despatches from Howrah owing to limited demands.

Salt.—The falling off was chiefly in receipts of Kheura salt at Patna; of Sambhar salt at Hathras for stations on the Oudh and Rohilkhand Railway; and of Faraknagar salt at Delhi for stations on the North-Western Railway.

Saltpetre.—From Patna and the Bengal and North-Western Railway principally to Howrah for export.

Seeds.—Chiefly in linseed to Howrah for export and in mustard-seed for local consumption in the Burdwan district.

Stone.—The falling off was principally in despatches of road metal from Pakur.

Tobacco.—Chiefly in despatches from the Tirhoot section of the Bengal and North-Western Railway to Cawnpore and Jubbulpore owing to roads in Tirhoot being impassable.

W. A. DRING, *for Traffic Manager.*

† Excluding steamer earnings.

NOTE.—The decrease, as compared with 1889, is general, and is due to partial failure of a bridge near Bogoola which necessitated the stoppage of goods trains and some of the night passenger services.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE EXCISE DEPARTMENT FOR 1889-90.

FINANCIAL DEPARTMENT—EXCISE.

Darjeeling, the 3rd October 1890.

RESOLUTION.

READ—

The Report of the Commissioner of Excise on the Administration of the Excise Department for the year 1889-90, with the observations of the Board of Revenue thereon.

In accordance with the orders of the Government of India, an account of the various systems of excise in force in Bengal has been prefixed to this report.

Appointment of Excise Commissioner.

2. Mr. Westmacott took charge of his appointment as Commissioner of Excise on the 4th April 1889, and has worked in direct communication with district officers under the general supervision and direction of the Board. During the past year seven additional Deputy Collectors have been sanctioned for the better administration of excise work. There were previously 14 special Deputy Collectors employed on excise duty, and the total number sanctioned is therefore now 21. With reference to financial considerations, however, only four out of the seven new appointments

And of special Excise Deputy Collectors.

have been filled up, and the remaining three appointments are in abeyance. There are at present 17* districts in which the excise control is placed in the hands of a special Deputy Collector, who is also made responsible for the administration of the income-tax, but who is, as a general rule, not entrusted with other revenue or any magisterial functions. Mr. Westmacott speaks very favourably of this arrangement, and observes that with few exceptions the excise administration in the 26 districts in which it has been entrusted to officers who have much other work to do has been greatly inferior to that in districts where there are special officers, and he would be glad if Government could place more special officers at his disposal. This view is not altogether accepted by the Board, who are not satisfied that the appointment of a special officer has always resulted in better work, and also point out that the deputation of an officer to excise duties alone is only beneficial when the excise work of the district is such as to occupy the whole of his time during the whole of the year; and add that it has come to their knowledge that in several districts in which these special officers are employed, the Collectors do not think that they have work enough to occupy the whole of their time, and wish to employ them on other duties. The question is one of considerable practical difficulty, and it is not easy to reconcile the conflicting claims of the head of a department, who naturally contends that the whole of the services of a staff of officers whose salaries are entirely defrayed from his own budget should be placed exclusively at his disposal, with those of district officers who are more interested in the efficiency of their general administration than in that of any particular department, and would gladly utilise the excise officer on general duties whenever necessity arises for doing so. It appears to the Lieutenant-Governor that the solution of this difficulty can only depend on the actual facts in each case. It is not desirable that these Deputy Collectors should be employed on judicial duties: so far His Honour accepts Mr. Westmacott's position: but if in point of fact a special excise officer's time is not fully employed on excise in any district, it is the duty of the Excise Commissioner to raise no objection to his being employed on general miscellaneous and revenue work so long as excise is not neglected. The pressure of the general administration in all districts is now so great that it is imperatively necessary to insist on the utilisation of all Deputy Collectors and Magistrates to the utmost of their power. Where the whole time of an Excise Deputy Collector is employed for the whole year on excise work, there is nothing left to be said; but where he is not so employed, his services must be fully utilised in the district where he serves. The Lieutenant-Governor is confident that the highest consideration will always be given by the Board to the views of the Excise Commissioner in regard to the requirements of particular districts; but at the same time the Board, who are responsible for the administration of the revenue in all departments, are obviously in a better position than the Excise Commissioner can be to decide when there is any difference of opinion with the local authorities on questions of fact, and it must be left therefore for the Board to advise the Government in all cases in which they consider that the present practice of the exclusive employment of the Special Deputy Collectors on special work should be relaxed. The question of budget provision appears to be sufficiently met by the reply that, although the whole salary of these Special Deputy Collectors is met from Excise, it is also true that the whole salary of Deputy Collectors whose time is only partially devoted to excise duties is wholly paid from General Revenues.

* One Special Deputy Collector is employed as Personal Assistant to the Excise Commissioner.

3. In other respects the Department of Excise has been materially strengthened during the year. The Board observe:—

Subordinate establishment.

"The dual appointments of Assessor-Inspectors employed partly on excise and partly on income-tax work have now been abolished, and, as regard excise, a Sub-Inspector has been appointed in the room of each. As vacancies occur in the ranks of Inspectors of Excise, or as these officers are otherwise provided for, they are being replaced by Sub-Inspectors receiving from Rs. 50 to Rs. 70 per mensem. By these means a larger number of Sub-Inspectors can be employed, while at the same time it is found that the duties of detection,

prevention, and inspection of retail shops and outstills can be as well performed by Sub-Inspectors as by Inspectors."

The Lieutenant-Governor is glad to notice that Mr. Westmacott writes in very satisfactory terms of the improvement in the work done by the new class of officers (who are men of some education and of better position than the old officials) in comparison with the darogahs and excise mohurirs whom they have replaced.

Financial results.

4. The financial results of the administration of the department during the year show a decrease in the revenue of Rs. 4,15,547 and an increase in the charges of Rs. 44,974, leaving a decrease of Rs. 4,60,521 in the net revenue. The statement of charges wrongly omits the salary of the Excise Commissioner and his establishment. If these are added, the increase, as the Board point out, becomes Rs. 85,000 in round numbers, and the percentage of charges on revenue is raised to five per cent. The decrease in revenue occurred in all divisions except Rajshahye and Chota Nagpore. The figures for each division compared with those of 1888-89 are shown below :—

Divisions.	1888-89.	1889-90.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Burdwan ...	11,69,671	11,26,936	.....	42,735
Presidency ...	29,72,143	29,02,896	....	69,247
Rajshahye ...	7,50,612	7,83,233	32,621	.....
Dacca ...	8,03,582	7,76,974	.....	26,608
Chittagong ...	2,87,896	2,27,259	.....	60,637
Patna ...	26,14,265	23,76,193	.....	2,38,072
Bhagulpore ...	11,98,293	11,76,995	.....	21,298
Orissa ...	5,22,438	5,04,908	.....	17530
Chota Nagpore ...	5,70,173	5,98,032	27,859	.. ...

5. The fluctuations in the total collections under the different heads of revenue are shown in the following table:—

Articles of Excise.	Revenue.			In 1889-90 compared with 1888-89.		In 1889-90 compared with 1884—89.	
	Average of 1884—89.	In 1888-89.	In 1889-90.	Increase.	Decrease.	Increase.	Decrease
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Country spirits	49,37,075	50,90,315	47,07,132	.....	3,83,183	...	2,29 943
Rum	89,182	72,851	1,00,675	27,824	..	11,493	...
Imported liquors	2,22,189	2,21,153	2,14,090	.....	7,363	...	8,099
Tari	7,07,780	7,88,901	8,26,314	37,413	...	1,18,534	..

Siddi, sabzi or bhang	38,222	42 671	3,141	470	... .	4,919	.
Majum	2,289	2,092	2,067	.....	25	.....	202
Madak	86,482	85,753	82,825	.....	2,928	...	3,657
Chandu	32,643	30,254	35,216	.....	1,038	2,573	..
Spirits used for arts	246	119	143	24	...	...	103
Ganja	21,16,690	23,18,354	22,50,690	...	58,663	1,43,600	.. ...
Onium	19,29,455	20,08,134	19,59,486	.....	48,648	30,031	.....
Miscellaneous	5,708	4,131	6,430	2,299	.....	632	.
Total	1,03,50,351	1,08,88,973	1,04,73,426	86,301	5,01,848	3,65,079	2,42,004

The population being taken at 66,700,000, the total excise revenue, exclusive of the customs duty on imported liquors, was at the rate of $2\frac{2}{5}$ annas per head.

6. The statement of charges in the Excise Department amounts to Rs. 4,77,739 (excluding the cost of the Excise Commissioner and his establishment) against Rs. 4,32,765 in the previous year. The increase occurred chiefly under the heads of establishment and petty constructions connected with the gradual re-introduction of the distillery system.

Current settlements

7. The settlements for the current year show a decrease of Rs. 1,32,270 as compared with those of the year under review. This result is attributable in the Burdwan and Dacca Divisions to the abolition of outstills, and the loss will be recouped in a large measure in stillhead duty. Elsewhere it is due to combination among the abkars and to the prevailing scarcity and high price of food.

8. The figures given in the margin show in an abstract form the results of the working of the outstill and sudder distilleries during the past two years. In 1887-88 the revenue was Rs. 52,05,042, in 1888-89 it was Rs. 50,90,315: it has now fallen in the past year to Rs. 47,07,132. There is a large decrease, therefore, of Rs. 3,83,183, of which Rs. 2,19,603 occurred in the Patna Division alone. The Board observe: "Generally speaking the decrease in revenue under this head may be attributed partly to the reduction in the number of outstills, partly to resistance on the part of the abkars to the excise policy of increasing taxation, partly to the falling off in advance collections owing to the introduction of the distillery system, and in no small degree to agricultural scarcity."

Country spirits.

	Average of 1884—89.	1888-89.	1889-90.

Re-introduction of central distilleries.

9. The year was an eventful one in the history of Bengal excise. Upon the 1st April 1889 outstills were abolished throughout the whole of the district of the 24-Pergunnahs, as well as in Howrah and the Serampore sub-division of Hooghly. This change has resulted in a decrease of revenue, and, what is more important to observe, a decrease in consumption also. The revenue from country spirits throughout the whole of the metropolitan area affected, including Calcutta, fell from Rs. 14,19,384 to Rs. 13,32,888. The consumption of liquor throughout the same area decreased from 275,842 to 228,925 gallons. In the area previously supplied from outstills the consumption fell from 50,913 gallons, as shown in the outstill accounts, to 13,079 gallons issued from the central distilleries. These calculations are in gross gallons in each case, and although the central distillery liquor in Calcutta is of high alcoholic strength, while the outstill spirit was exceedingly weak, there can be no doubt that there has been in this area a satisfactory reduction in the consumption of country spirits. The retail price was more than doubled. *Per contra* there was an increase in the consumption of country rum.

10. From the 1st April 1890 outstills have been abolished throughout the whole of the Burdwan, Presidency, Dacca, and Orissa Divisions. The Lieutenant-Governor is glad to acknowledge the loyal co-operation of Mr. Westmacott in giving effect to the wishes of Government for the re-introduction of the distillery system in this large area. It is unfortunate that both this reform and that of raising the price of outstill liquor in order to equalise the estimated duty on it with that of distillery liquor, should have had to be introduced in a season of general high prices, which form a disturbing element and obscure for the present the real effects of the measure. How important the effect of high prices has been may be gathered from the falling off of consumption in distillery liquor in Patna, where there has been no other cause to account for the diminution. Both the Board and Mr. Westmacott are of opinion that in certain parts of Western Bengal, where these reforms have been introduced, the facilities for obtaining a cheap illicit supply of liquor are so great that it would have been advisable to retain outstills at least for the present, and in the same connection the Board record the significant observation that they "trust that the measures already adopted for re-introducing the central distillery system may be regarded as an experiment which requires watching before it is extended." Upon this question the Lieutenant-Governor can say little more than emphatically repeat what he has already declared on more than one occasion, that "it must be distinctly understood by the Excise Commissioner, and by all officers concerned with the administration of excise in Bengal, that the policy which has received the approval of the Secretary of State and of Government is that the outstill system should be replaced by a central distillery system whenever circumstances render it

expedient; and, speaking generally, the only circumstances which render the change inexpedient are sparse population, difficulties of supervision, proximity to alien territory, and a liquor which will bear neither transportation nor keeping." This enunciation of policy has been approved by the Secretary of State. On the other hand, it has been declared under equal authority that "it is not intended that outstills should be suppressed in localities where experience shows that distilleries cannot be advantageously introduced." It is on these lines that the action of Government has been based. The Secretary of State expressed a hope, in his despatch dated 18th July 1889, to the Government of India, that the rates of excise revenue raised under the outstill system in Bengal might be reduced from 61 per cent. to some such rate as that which obtained in Madras and the North-West Provinces at any rate, if not to that obtaining in Bombay. The percentage of outstill revenue to total revenue from country spirits in the several provinces mentioned during the year 1887-88, which is the period referred to by the Secretary of State, is given in the margin. During the year under review the proportion in Bengal had slightly decreased to 58 per cent., and during the current year there will be a considerable further reduction. But it will not be possible in Bengal to work up to the low percentage attained in other provinces. One-half of the Bengal revenue from country spirits is derived from the Patna, Bhagulpore, and Chota Nagpore Divisions, where the principal material used for the manufacture is the flower of the mohwa tree, and the spirit so made, as is well known, will not bear transport, and rapidly deteriorates when kept. It is of the weakest possible description, being 80 or 90 per cent. below London-proof. Such spirit must be manufactured near the place where it is consumed; and this, if there were no other objection, is a conclusive reason why a central distillery system cannot be successfully introduced into such tracts of country as the rural parts of Behar and Chota Nagpore. The people are accustomed to this weak liquor, and will only drink it when it is fresh. The number of central distilleries must everywhere be limited. The failure of the old system of distilleries was largely due to their excessive number and to the consequent impossibility of exercising proper supervision over them. It has now been deemed advisable to have central distilleries only at the head-quarters of districts where they can be thoroughly watched by responsible officers. At the same time arrangements have been made for the establishment of depôts or warehouses at all sub-divisional head-quarters, from which shops remote from the distilleries can be supplied with liquor. This system, as Mr. Westmacott points out, adds greatly in cost of carriage to the price of liquor before it reaches the retail vendors. But it appears to be the only way in which a central distillery system can be worked in Bengal without risk of fraud. It cannot be worked in Behar because, as already explained, the liquor will not keep or bear the transit. The depôts are kept under the eyes of the Assistant or Deputy Collectors in charge of sub-divisions.

Bengal ...	61 per cent.
Madras ...	15 „
Bombay ...	5 „
North-Western Provinces and Oudh	16 „

11. The total revenue realized under the central distillery system during the past year was Rs. 19,32,207 against Rs. 19,55,754 in the previous year. There was thus a small falling off notwithstanding the extension of the distillery area. The statistics of consumption show, however, a large decline from 10,57,119 gallons in 1888-89 to 8,53,259 gallons in 1889-90. The decrease was almost entirely in the Patna Division, of which the figures, district by district, are given in the margin. As both the system and the distillery area in these districts remained unchanged, there can be no explanation of this decrease other than that the year was one of general depression and bad trade. The figures are unaffected by any action of the Excise Department.

	1888-89.	1889-90.
	Gross gallons.	Gross gallons.
Patna	409,408	3,25,643
Gya	106,262	6[illegible],285
Shahabad	53 3[illegible]4	44,892
Mozufferpore	21,345	11,765
Durbhunga	10,339	8,31[illegible]
Saran	91,828	41,765
Chumparam	8,980	6,587
Total ...	706,546	507,256

Outstills.

12. The total revenue derived from outstill license fees decreased from Rs. 31,34,561 to Rs. 27,74,925. Great attention has been paid to limitation of capacity of stills and fermenting vessels. In the districts of the Chittagong Division the capacity of stills has, with regard to local considerations, not been reduced. For the rest

of the province in which outstills still exist, that is to say, in the Patna, Bhagulpore, Chota Nagpore and Rajshahye Divisions, the following figures will show the number and aggregate capacity of the outstills allowed during the past five years:—

	Number of outstills allowed.	Liquid capacity of outstills in gallons.
Open in 1886 87	2,409	76,230
„ in 1887-88	2,410	53,632
„ in 1888-89	2,359	45,874
„ in 1889-90	2,141	38,147
Sanctioned for 1890-91	1,798	30,492

13. The number of outstills is being reduced wherever they appear to be more numerous than is necessary to satisfy the local demand for liquor; and as the fees are being gradually raised so as to force the retail price up to the price fixed by the distillery rate of duty for each district, the abkars in many cases refuse to accept settlement. The changes involve an increase in the retail price of liquor which is stubbornly resisted. In the Lieutenant-Governor's opinion, Mr. Westmacott deserves credit for the firm attitude he has maintained in adhering to the high fees fixed for outstills, and he entirely approves of the action of the Board in supporting this policy. The experiment must be allowed a full and fair trial: it was always anticipated that it would entail an immediate loss of revenue, and the deliberate intention throughout has been to force the abkars to increase their retail prices and so reduce consumption. If this result is attained, a temporary loss of revenue is comparatively a small matter, and unless the demand for liquor has been artificially stimulated by an undue cheapening of outstill liquor (as compared with the price maintained by distillery spirit), it is certain that the normal demand will re-assert itself and the revenues will recover. Sir Steuart Bayley has no doubt that the policy is a sound one. It must be introduced gradually and with discretion, and there should, in his opinion, be no going back from it, though the effects of bad seasons render its influence on the revenue more conspicuous than it would otherwise have been. The consumption of outstill liquor has materially decreased in the 16 districts of Bengal where what is known as the Patna system prevails, and outstills and central distilleries are allowed in the same district. The figures are obtained by the district officers from the abkars, and cannot be altogether relied on as accurate; but the errors of a particular year are balanced by the errors of another, and for purposes of comparison the result is one which may be generally accepted. The figures are in London-proof gallons, and show a decreasing consumption during the past three years as follows:—

	Gallons.
1887-88	1,396,537
1888-89	1,188,123
1889-90	755,553

	Rs.
1887-88	... 18,64,727
1888-89	... 18,06,366
1889-90	... 15,91,178

The outstill revenue from these districts also shows a decrease as noted in the margin, but the proportion of the decrease in revenue is much less than that of the decrease in consumption.

Selection of sites for outstill shops.

14. During the course of the year special rules were issued by Government and published for general guidance on the subject of the selection of sites for excise shops. Distinct instructions have been given to the licensing officers to ascertain and consider local opinion, and it has been ordered that where municipalities exist the Municipal Commissioners should be consulted in determining the location of shops. The procedure prescribed is one of old standing in these provinces; but it has now for the first time been promulgated in the form of rules. It is reported that there has been some loss of trade and consequent loss of revenue from fees on account of the more careful observance of the principles now enforced. The question of the location of shops in the vicinity of tea-gardens is one of special difficulty and importance. Under the orders of the Secretary of State a most careful and exhaustive enquiry was made into the facts connected with the excise administration in the tea districts in Bengal. The papers then submitted afford conclusive evidence of conscientious and successful endeavours to organize the department in

accordance with the recognized principles on which a proper excise policy must rest. It was shown that the coolie population had enormously increased owing to the establishment of new gardens, that the coolies all belonged to tribes who habitually consume spirituous liquor, and that the increase in drinking was certainly not more than commensurate with the increase in number of the drinking classes. The tea districts are surrounded by foreign territory, and foreign outstills pour their contraband liquor across the British frontier at half or even a quarter the price at which it is obtainable from the licensed shops. In such cases it is probably true that from want of licensed facilities for obtaining liquor there has been a great deal of illicit manufacture and smuggling. At the same time it is obvious that unnecessary shops must not be retained. It is drunkenness which the Government desires to put down rather than the moderate use of liquor. If shops are too far off from a tea garden, it is probable that the coolies will get drunk on every occasion of a visit. The problem is to place them not too near and not too far off, and especially (as Mr. Westmacott has pointed out) not in such a position as to suggest drinking to anybody. In deference to the objection of certain tea associations, the selection of sites recommended by the local authorities has in some cases been abandoned, and special arrangements have been sanctioned to prevent the importation of smuggled liquor.

Country rum, &c.

15. The revenue from country rum has fluctuated in recent years, as the following figures will show:—

	Rs.
1885-86	77,091
1886-87	1,08,111
1887-88	88,885
1888-89	72,851
1889-90	1,00,675

The increase in the past year is principally due to the reduction in the rate of duty from Rs. 5 to Rs. 4 per gallon London-proof. At first this led to a falling off in the receipts, but afterwards it resulted in a largely increased consumption which, with a diminished duty, gave an increased revenue. The consumption increased from 24,318 gallons to 44,535 gallons, entirely in the metropolitan area. Of this increase no less than 13,620 gallons is due to rum consigned from Shahjehanpore. The total of Shahjehanpore rum consumed in Bengal during the year is 28,770 gallons, and the duty on this being credited locally is not shown in the Bengal excise accounts. The revenue derived from license fees for selling imported spirits and wines has again fallen from Rs. 2,21,453 to Rs. 2,14,090. Under tari the revenue has risen from Rs. 7,88,901 to Rs. 8,26,314. The revenue derived from licenses for the sale of puchwai increased from Rs. 2,15,191 to Rs. 2,32,682.

Ganja.

16. The statistics of ganja during the past three years are as follows:—

	Number of shops.	Consumption.	Revenue.
		Mds.	Rs.
1887-88 ...	... 2,949	6,550	22,45,020
1888-89 ...	... 2,922	6,413	23,18,353
1889-90 ...	... 2,819	6,101	22,59,690

The decrease in consumption is satisfactory, and although there is during the past year a small decrease also in revenue, it is to be observed that the receipts are greater than those of 1887-88 and of all previous years. The report on the subject of Gurjat ganja, to which allusion is made by the Board and the Excise Commissioner, is awaited by Government.

Opium.

17. The consumption of abkari opium decreased from 1,925 to 1,905 maunds, and the revenue from Rs. 20,08,134 to Rs. 19,59,486. The largest decrease occurred in the Chittagong district, and is attributed to the more successful prevention of smuggling into Arracan. The Excise Commissioner enumerates several important cases of opium-smuggling detected during the year.

Offences against the excise laws.

18. The number of arrests for offences against the excise laws was 4,441 against 3,879 in the previous year, and the number of convictions 3,747 against 3,324. There was a

decided improvement in the work of the excise officers, but a falling off in the number of convictions obtained by the police.

19. The acknowledgments of the Lieutenant-Governor are due to Mr. Westmacott for the zeal with which he has administered this important department, and the thoroughly loyal manner in which he has given effect to the policy of Government. His administration has been successful in reducing the consumption of spirits and drugs, and there can be no doubt that the results would have been more favourable from a revenue point of view if they had not been affected by the prevailing agricultural depression. The names of the officers selected by him for special mention for the excellence of their excise administration will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT FROM THE BOARD OF REVENUE ON THE ROAD AND PUBLIC WORKS CESS OPERATIONS FOR THE CESS YEAR 1889-90.

FINANCIAL DEPARTMENT—ROAD CESS.

Darjeeling, the 29th September 1890.

RESOLUTION.

READ—

The Report from the Board of Revenue on the Road and Public Works cess operations for the cess year 1889-90.

During the year under review the cesses continued to be levied at the maximum rates in all the districts in which Act IX (B.C.) of 1880 is in force, except Backergunge, where the Public Works cess was levied at full rates and the Road cess at half rates The current demand for the year amounted to—

	Rs.
Road Cess	37,81,538
Public Works Cess	38,79,001
Total ...	76,60,539

2. In the subjoined table the figures for the past year are compared with those of the two preceding years:—

	Demand.			Collections.	Remissions.	Balances.	Percentage of balance on gross demand.
	Current.	Arrear.	Total.				
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1887-88 ...	76,13,146	16,61,553	92,74,699	75,35,113	16,498	16,98,409	18·3
1888-89 ...	76,19,896	17,20,662	93,40,558	74,86,777	20,925	17,98,942	19·2
1889-90 ...	76,60,539	18,04,134	94,64,673	77,54,684	76,885	16,58,728	17·5

The percentage of arrear collections on arrear demand was 76·8, that of current collections on current demand was 82·2, and that of total collections on current demand was 101·2. With a larger demand the collections have been larger, and the balances have been reduced. The item of remissions, however, shows a large increase, which is due to a sum of Rs. 65,896 having been written off in Burdwan as irrecoverable arrears of petty rent-free holdings.

3. In the following districts the arrear collections fell short of 90 per cent.:—

	Percentage of arrear collections on arrear demand.	Percentage of current collections on current demand.
Shahabad	40·7	85·9
Burdwan	43·4	83·7
Furreedpore	46·6	66·4
Bankoora	47·2	81·
Khoolna	65·	81·2
Moorshedabad ...	71·8	92·5
Gya	73·8	74·1
Mozufferpore	74·6	61·7
Jessore ...	75·4	74·9
Hooghly	77·1	66·3
Bhagulpore	80·	88 4
Cuttack	80·5	90·
24-Pergunnahs ...	82·8	80·4
Durbhunga	83·4	86·
Pooree ...	86·	97·6
Sarun	86·7	72·8
Patna	89·3	75·7

The districts of Furreedpore, Gya, Mozufferpore, Jessore, and Hooghly show short collections of both current and arrear demands. The indifferent results in Furreedpore are primarily attributable to the confused state of the revenue-roll which facilitated the frauds noticed in last year's report. In Gya the short collections are said to be due to the postponement of the date of new assessment from the 1st April 1889 to the 1st April 1890, and to the adoption of the tehsildari system under section 99 of Act IX (B.C.) of 1880 in preference to the certificate procedure. The unfavourable results in Shahabad are ascribed to the lax system of realizing arrears. The Collector should adopt, as suggested by the Board, stringent measures to reduce the increasing balance. A large arrear balance has become chronic in Burdwan since the assessment of its rent-free tenures. Measures have not been adopted to remedy the defective system of keeping accounts which hitherto retarded the collections, and the realizations during 1889-90, though far from satisfactory, show an improvement on the percentage of previous years. In Bankoora heavy defaults were made as usual by the sardar ghatwals, and to prevent this the assessment of the ghatwali lands is being revised. The short percentage of arrear collections in Khoolna and Moorshedabad is attributed to the accumulation of the arrears of three years to be recovered from rent-free holdings under section 70 of the Cess Act.

4. In the following districts, though the arrear collections were not less than 90 per cent., the current collections fell below that amount:—

	Percentage of current collections on current demand.	Percentage of arrear collections on arrear demand
Chumparun	68·	99·8
Lohardugga	72·2	96·9
Monghyr	73·9	90 5
Dacca	78·3	90·
Midnapore	79 1	90·
Pubna	80·8	93 5
Rajshahye	81·8	98·5
Dinagepore	81·9	99·8
Backergunge	82·	94·3
Maldah	87·3	99·8
Balasore	88·1	95·
Tipperah	89·3	95·9
Manbhoom	89·8	99·6

In Chumparun, Lohardugga, and Monghyr the short current collections are ascribed to the 15 days' grace allowed for payments, and in Dacca to the difficulty of realizing the dues from holders of petty estates. In Midnapore the cesses due from some large zemindaries were not paid until the last coercive measures under the Public Demands Recovery Act had been resorted to.

5. Arrears to the extent of Rs. 1,06,435 have become barred by limitation. The total amount barred in Burdwan was calculated to be Rs. 1,63,267, out of which Rs. 65,896 were remitted during the year, and there still remain

Rs. 97,371 which will be written off as soon as pending objections to the original assessment have been disposed of.

6. The collections on both the current and arrear demand exceeded 90 per cent. in 11 districts—

	Percentage of arrear collections on arrear demand.	Percentage of current collections on current demand.
Hazaribagh	100·	97·1
Singbhoom	100·	99·9
Bogra	99·8	93·5
Purneah	99·2	95·6
Nuddea	98·2	92·1
Noakhally	98·	94·
Beerbhoom	97·5	91·3
Julpigoree	95·7	93·2
Mymensingh ...	94·7	92·5
Rungpore	93·9	90·6
Chittagong	92·3	92·9

Darjeeling had no arrears to collect, and realized its current demand in full. In these 12 districts the results are satisfactory and reflect credit on the officers concerned.

7. The number of certificates filed for the recovery of arrears was 71,076, which, with the 35,260 pending on the 31st March 1889, gave a total of 106,336 for disposal. Of these, 73,115 were disposed of, leaving 33,221 pending at the end of March 1890. The outturn of work compares favourably with that of the previous year. Sales actually took place in only 583 cases, of which 54 were subsequently cancelled. The number of institutions was smallest (428) in the Chota Nagpore Division and largest in the Burdwan, Patna, and Presidency Divisions—20,018, 14,560, and 10,921 respectively. In Gya and Mozufferpore the certificate procedure was set aside in favour of the tehsildari system under section 99 of the Cess Act, with the result that collections fell off. As remarked by the Commissioner, more active measures should have been taken, or certificates should have been filed to realize the Government dues.

8. Complete revaluations of the district of Shahabad, resulting in an increase of Rs. 1,05,477 in the annual demand, and of Gya, resulting in an increase of Rs. 50,423, were brought to a close during the year. Partial valuations and revaluations were completed in the Khulna, Backergunge, Mymensingh, Maldah, Bogra and Tipperah districts.

9. The names of the Deputy Collectors who have been favourably noticed by the Board will be communicated to the Appointment Department.

ORDER.—Ordered that a copy of the Resolution and of the Board's report be submitted to the Government of India, Finance and Commerce Department, for information.

Ordered also that a copy of the Resolution be forwarded to the Board of Revenue, and that copies of the Resolution, and of the Board's report, be forwarded to the Appointment and Revenue Departments for information.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE CUSTOMS DEPARTMENT FOR THE YEAR 1889-90.

FINANCIAL DEPARTMENT—CUSTOMS.

Darjeeling, the 29th September 1890.

RESOLUTION.

READ—

The Report on the Administration of the Customs Department for the year 1889-90.

Customs receipts.

The following statement shows the gross and net customs duty, inclusive of the duty on imported salt, collected in Bengal during the last five years :—

	1885-86.	1886-87.	1887-88.	1888-89.	1889-90
	Rs.	Rs.	Rs.	Rs.	Rs.
Import duty (excluding duty on salt) ...	13,99,392	15,05,764	14,56,057	21,61,242	24,45,683
Import duty on salt ...	1,80,35,154	1,94,85,102	1,85,30,955	2,27,28,687	2,25,83,827
Export duty ...	18,10,621	15,80,340	21,37,248	17,09,406	16,08,145
Total gross duty ...	2,12,45,167	2,25,71,206	2,21,54,260	2,65,99,335	2,66,37,955
Refunds and drawbacks—					
Imports ..	2,29,064	2,48,992	2,46,759	2,81,544	3,12,697
Exports ...	62,202	40,363	81,742	84,930	31,606
Total ...	2,91,266	2,89,355	3,28,501	3,66,474	3,44,303
Total net duty ..	2,09,53,901	2,22,81,851	2,18,25,759	2,62,32,861	2,62,93,652

Since the year 1882-83, when the reduction of salt duty and the remission of all import duties, except those leviable on arms, ammunition, liquors and opium, came into operation, there have been considerable fluctuations in the revenue, but the increase in 1888-89 was maintained in the year under review. This is entirely due to the levy of a duty of 6 pies per gallon on mineral oil, the importation of which continues to expand in a remarkable manner, thus amply justifying its selection as a suitable article for taxation. Import duties levied on other articles than petroleum, such as wine and spirits, show a general falling off. The decrease in export duty is due to a falling off in the rice trade.

Value of trade.

2. There was a fall in the value of imports (exclusive of Government transactions) from Rs. 32,51,37,468 to Rs. 31,56,52,561, principally in piece-goods. The export foreign trade, exclusive of treasure, shows an advance from Rs. 37,82,25,789 to Rs. 39,67,26,895, which is due chiefly to the high prices obtained for rice, jute, linseed, and raw silk. Taking exports and imports together, the total value of the trade of the Province increased by nearly a crore of rupees, or from Rs. 78,17,13,654 to Rs. 79,12,31,540.

3. The value of imports on Government account declined from 100 lakhs to 97½ lakhs, and was noticeable under almost every head. There was, however, a marked increase of 17½ lakhs in the value of materials required for State Railways. The exports made on Government account amounted to only 2¾ lakhs, against 4 lakhs in the preceding year, and consisted mostly of copper coin for Ceylon and the Straits Settlements.

4. As usual, the bulk of the trade is carried on by the United Kingdom, the proportion of the trade absorbed by that country being no less than 61·71 per cent. of the whole trade of Bengal. This percentage is, however, less than that of the preceding ten years. The second place is occupied by China, due to opium transactions (10·1 per cent.), and next stands the United States (6·47 per cent.). The trade with Germany continues to show a considerable increase.

Calcutta.

Foreign trade.

5. The proportion of the foreign trade of Calcutta carried through the Suez Canal to the total foreign trade of Calcutta declined from 65·8 per cent. in 1888-89 to 63·7 per cent. in the year under review. The decrease is attributed to the falling off in the value of cotton manufactures imported from the United Kingdom. The following statement compares the imports and exports through the Canal during the last five years :—

	Imports.	Exports.	Total.
	Rs.	Rs.	Rs.
1885-86 ...	18,25,69,465	16,02,59,864	34,28,29,329
1886-87 ...	21,49,95,033	17,28,69,556	38,78,64,589
1887-88 ...	20,52,71,237	18,17,29,261	38,70,00,498
1888-89 ...	23,45,06,444	18,51,90,952	41,96,97,396
1889-90 ...	21,80,03,096	19,24,35,956	41,04,39,052

6. The number of steam vessels which passed through the Suez Canal on their way to and from Calcutta without touching at another British Indian port decreased from 305 to 294, and the tonnage from 604,094 to 586,199 tons. The total number of arrivals and departures from foreign countries is given in the following statement:—

	1888-89.		1889-90.	
	No.	Tonnage.	No.	Tonnage.
Steam vessels ...	489	899,667	521	961,104
Sailing „ ...	603	877,853	554	824,724
Native craft	49	6,045	42	6,111

It must be understood that these figures do not include all vessels engaged in the Foreign trade of Calcutta, but only those which arrive here and leave the port without touching at any other Indian port.

Imports.

The total value of imports shows a decrease of Rs. 59,34,038 as compared with that of the previous year. The value of cotton manufactures declined by Rs. 142 lakhs, machinery 12½ lakhs, silk 9⅕ lakhs, umbrellas 8⅓ lakhs, horses 4¾ lakhs, liquors 3½ lakhs, drugs 2¾ lakhs, fruits and unrefined sugar each 2 lakhs. On the other hand, the import of metals shows an advance of 81 lakhs, oils 34¾ lakhs, refined sugar 13⅓ lakhs, spices and railway plant and rolling-stock each 7⅓ lakhs, woollen manufactures 3⅔ lakhs, and matches 3½ lakhs.

7. The statement below shows the values of the principal articles imported into Calcutta during the last two years:—

	1888-89.	1889-90.
	Rs.	Rs.
Cotton goods	14,54,76,859	13,12,43,435
Metals	1,65,31,166	2,46,68,410
Oils	85,07,955	1,18,08,390
Machinery	86,30,301	74,07,618
Salt	76,35,910	73,38,054
Woollen goods	66,41,405	70,11,664
Liquors	52,39,340	49,00,323
Apparel	40,35,825	41,33,901

The trade in cotton piece-goods was not remunerative: large stocks were in hand, while at the close of the year money was scarce and the Bank rate of interest very high. It is reported that the trade of native houses continues to expand, and was larger than in any previous year. The very large increase in the import of metals is due to the trade righting itself after the collapse of the Copper Syndicate. The increase in petroleum oil is entirely from the United States, and there was a decrease both from the United Kingdom and from Russia. Although there is a decrease in machinery, the figures of the year are far in excess of those in any year previous to 1888-89. Under the head of Liquors there is an increase in ale, beer and porter, a large decrease under Spirits, and a very small decrease under Wines and Liqueurs. Regarding the importation of spirits, Mr. Scobell Armstrong, the Collector of Customs, observes:—

"Brandy has declined by 13½ per cent., which, considering the nature of much of the liquor imported under this name, is not surprising. A considerable portion of it has very little resemblance to brandy, except perhaps in colour. It is the commonest German spirit got up to look like brandy and comes chiefly from Humburg and Antwerp, and the average

declared value is from Rs. 2-8 to Rs. 3 per imperial gallon. The best brandies come in bottle through the United Kingdom.

"Gin has again declined, and the taste for it seems to be steadily falling off.

"The imports of whisky show a very slight advance in quantity with a considerable decline in value, and there was no accumulation of stocks in bond. The quality of the established marks and brands continues the same, for it would not pay to tamper with them, and so risk the loss of the trade; but with the commonest sorts of whisky, as of brandy, the tendency in quality is downwards. A quantity of it is inferior German spirit made from anything but malt, I believe principally from rice, and coloured and flavoured to represent whisky. Nearly the whole of the whisky imported came from or through the United Kingdom, but there have been some importations of high class whisky from Australia.

"Rum, which was formerly an item of importance, has fallen away to insignificant figures, being only 910 gallons in the past year, against 9,047 gallons in 1888-89. China formerly sent the largest quantity of this spirit to Calcutta, but last year none at all was received from that country. The cheap common spirit from Germany has apparently killed this trade."

Among minor items it may be observed that the trade in umbrellas has declined owing to accumulation of stock. The value of matches imported now amounts to Rs. 7,39,000, and the quantity is estimated by Mr. Armstrong to be about 152 millions of boxes. Most of these are manufactured in Sweden and Norway, and the wholesale value is about Rs. 35 per case of 50 gross. With this low price the matches of Bryant and May, which are of a more substantial nature, cannot compete.

8. The following statement gives the value of the principal articles of Indian produce and manufacture exported in 1888-89 and 1889-90:—

Exports.

	1888-89.	1889-90.
	Rs.	Rs.
Raw jute	6,94,28,984	7,26,67,026
Opium	6,41,48,256	6,37,25,170
Tea	5,16,52,620	5,12,39,079
Oilseeds	3,57,89,078	4,13,04,984
Indigo	2,73,46,873	2,49,05,266
Gunny-bags	2,33,35,337	2,31,92,559
Rice	2,07,02,266	2,48,74,668
Hides and skins	1,90 82,457	1,84,21,934
Wheat	1,08,24,635	60,11,810

There was a slight falling off in the export of jute, although prices ruled higher than in the previous year, but the deficiency of Calcutta was more than supplied by the shipments from Chittagong, which increased to the extent of 222,846 cwts. The export of tea declined slightly in value, but advanced in quantity, being 101,750,725lbs. in 1889-90, against 95,749,163lbs. in 1888-89. The cost per pound last year was 8 annas 1 pie, against 8 annas 6 pies in the previous year. The following table shows the production of tea in the different districts during the last two years:—

	1888.	1889.
	lbs.	lbs.
Assam ...	41,865,499	42,030,564
Cachar and Sylhet ...	27,343,505	29,750,054
Darjeeling, Terai, and Dooars ...	18,950,822	20,497,857
Chittagong and Chota Nagpore ...	1,148,458	1,378,920
Dehra Dun, Kumaon, and Kangra ...	4,000,000	4,500,000
Private and native gardens ...	3,000,000	4,500,000
Total ...	96,308,284	102,657,395

The estimated outturn for the current year is no less than 115,000,000lbs.

The importations of tea into the United Kingdom during the last two years are—

	1888.	1889.
	lbs.	lbs.
Indian	92,387,000	96,693,000
Ceylon	20,325,000	31,191,000
China, &c.	109,285,000	93,208,000

It cannot be said that any material progress has been made in opening out new markets for Indian tea. Australia is the only country where Indian tea is

being rapidly taken; the increase last year was over half a million pounds, or 18½ per cent. In America the export is falling off, and China tea still finds favour in Russia. In India itself the efforts to popularise tea have hitherto failed.

Although the value of rice exported last year shows an increase, the quantity was less owing to a shorter crop. Ceylon continues to hold its first place as the consumer of Bengal rice, and the United Kingdom stands next.

There was a further large fall in the export of wheat, from nearly 3 million cwt. to a little over 1½ millions. The continent of Europe has received nearly the whole of its Indian wheat from the Western side of India. The total quantity of Indian wheat sent to the United Kingdom was 9,217.332 cwt., while Russia exported 21,321,628 cwt. and the United States 17,061,250 cwt.

There was a small increase in the quantity of indigo exported, but the average declared value was the lowest ever recorded in the Custom House.

The trade in raw cotton, which had declined in 1888, showed an improvement of about 20½ per cent. The increase was entirely in the export to continental countries.

Treasure.

9. The import of treasure during the last year decreased by Rs. 31,38,497, but while silver declined by nearly 50 lakhs, the import of gold advanced by 18½ lakhs.

Coasting trade.

10. The value of the coasting or interportal trade with Calcutta declined in 1889-90 by about 52 lakhs, and is observable both in the export and import of Indian produce and of foreign merchandise.

Chittagong port.

11. The value of the trade of Chittagong, which had fallen off during 1888-89, greatly augmented during the year under review, and amounted to Rs. 3,16,96,703, which is the highest on record. The enormous expansion of the trade in raw jute has materially contributed to the prosperity of this port.

The Orissa ports.

12. The following table shows the trade of the Orissa ports for the past year as compared with that of the previous year :—

	Balasore.		Cuttack.		Pooree.	
	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Foreign	1,32,209	4,37,513	8,23,691	13,15,803	39,386	39,842
Coasting	95,35,286	93,03,035	1,68,554	4,39,940	20,426	1,76,934

It will be seen that there has been a considerable increase in the trade of Cuttack and Pooree.

Naraingunge.

13. Naraingunge was in November 1889 declared to be a Customs port for the shipment and landing of goods and a warehousing port. The year was a prosperous one, and the total value of trade was Rs. 1,14,90,150, consisting principally of jute consigned to Chittagong

14. The Lieutenant-Governor's thanks are due to the Board of Revenue for their supervision of the Customs Department during the year, and in particular to Mr. Armstrong for his full and interesting report and for his efficient administration of the Calcutta Customs Office. The services of the following officers are favourably noticed by the Board :—Messrs. Kilby, Amos, Bonnaud, Bradbury, and Burrup of the Calcutta office, and Mr. Warden, Collector of Customs at Chittagong. Their names, with the remarks recorded, will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE INCOME-TAX IN BENGAL FOR THE YEAR 1889-90.

FINANCIAL DEPARTMENT.—INCOME-TAX.

Darjeeling, the 30th September 1890.

RESOLUTION.

READ—

The Report of the Board of Revenue on the financial results of the Income-tax Administration for the year 1889-90.

Previous annual reports have shown collections up to the end of the year, and all other operations up to the 30th June. The present report deals only with operations up to the end of March, a change which has enabled the report to be submitted at a much earlier date than was formerly possible. The scheme of amalgamating the posts of Excise Inspector or Sub-Inspector and Excise Assessor continued in operation in 20 districts during the year under review, but has since been discontinued. Service in the Income-tax Department was during the year declared permanent and pensionable, and this step, together with the separation of excise and income-tax establishments, has led to a complete revision of the assessing agency.

Results of the tax.

2. The total demand for the year under all parts of the Act stood at Rs. 44,89,476 against Rs. 42,41,806 in the previous year, while the total collections, exclusive of advance payments and excess collections, were Rs. 41,44,257 against Rs. 38,88,388. The receipts, charges, and net revenue are compared as follows:—

	Receipts.	Charges.	Percentage of charges.	Net revenue.
	Rs.	Rs.	Rs.	Rs.
1888-89	39,11,616	1,56,470	4	37,55,146
1889-90	41,66,798	1,66,778	4	40,00,020
Increase ...	2,55,182	10,308	..	2,44,874

The net revenue shows an increase of 6·1 per cent. against 5 per cent. in the previous year.

Demand, collections and balances.

3. The amount originally assessed was Rs. 39,38,829, which was reduced to a final demand of Rs. 37,12,130 against Rs. 35,53,678 in 1888-89. By far the larger portion of the increase was as usual contributed by Calcutta, but it was shared by every division except Chittagong and Bhagulpore. The percentage of collection on the final demand was the same as in the previous year, viz., 92·5. In six districts the entire demand was collected within the financial year. The outstanding balance on account of the tax, with penalties and costs, amounts to Rs. 3,45,219, of which Rs. 1,46,143 are reported to be good, Rs. 1,31,162 doubtful, and Rs. 67,914 irrecoverable.

Assessments.

4. There was a falling off of 6,893 in the number of villages visited by the Assessors, the decrease being attributed in many cases to their desire to concentrate their attention on towns and marts, which offer a more fruitful field for enquiry. In Calcutta a marked improvement appears in the number of streets visited by the assessors. The number of persons finally assessed was 102,265 against 102,407, the percentage of exemption on revision being 3·1 against 4·01 in 1888-89.

Objections.

5. The petitions of objection numbered 15,027 against 16,770 in the previous year. The number of successful objections was 6,361 against 6,934, or 42·3 per cent. against 41·3 per cent. in 1888-89. The percentage was highest in Maldah (60·8), Chittagong (55·2), Calcutta (54·6), Patna (53·7) and Tipperah (52·1).

Incidence of tax.

6. The average incidence of the tax on the whole population of the province (excluding the assessments on salaries of Government servants and on Government securities) was Re. 1 to every 17·9 persons, and excluding Calcutta the average incidence in the districts was Re. 1 to every 36 inhabitants. The proportion of the number of persons assessed to the whole population was 1 to 650. The Board have furnished in their present report some interesting statistics illustrating the proportion of

the tax contributed by Calcutta and the whole of the province under the present Act and under former Income-tax and License-tax Acts. Of the entire amount of the present tax nearly one-half is paid in the metropolis alone. The productiveness of the tax bears a larger proportion in Calcutta under the present Income-tax Act because agricultural incomes are exempted under it and the great bulk of large incomes due to other sources than agriculture is to be found in Calcutta.

Coercive measures.

7. There has been a steady decline in the number of cases in which coercive measures were necessary for the recovery of the tax. In only 267 cases out of 102,265 assessments was actual sale resorted to. The number of sales was comparatively large in Rungpore (51), Purneah (24) and Singbhoom (21). The percentage of warrants issued has declined from 11·9 in 1886-87 and 6·3 in 1888-89 to 4·6 in 1889-90. In Calcutta distress warrants were issued in only 112 cases against 1,243 in the previous year.

Expenditure.

8. The expenditure of the year amounted to Rs. 1,66,778 against Rs. 1,56,470 in the previous year, while the percentage of the cost on the net collections stood at the same figure as in 1888-89, viz., 4·02.

Classification of income.

9. The largest share of tax paid (Rs. 5,73,728) was, as usual, from assessees under class I (incomes from Rs. 500 to Rs. 750); Rs. 5,19,082 were paid by assessees in class XV (Rs. 1,00,000), Rs. 4,84,807 were paid by assessees in class VIII (Rs. 2,500 to Rs. 5,000), and Rs. 4,00,999 by assessees in class IX (Rs. 5,000 to Rs. 10,000). The lowest contribution was from class XIII (Rs. 40,000 to Rs. 50,000). Classified according to trades and professions, the largest contributions to the tax were the following :—

			Rs.	Percentage of total collection.
Class 44.	Money-lending and changing	...	5,72,092	14·6
„ 1.	Salaries paid by Government		3,93,059	10
„ 45.	General merchants ...	...	3,63,550	9·3
„ 69.	Dealers in other articles	...	1,96,671	5
„ 46.	Piece-goods merchants	...	1,59,973	4·1
„ 9.	Clerks paid by companies, &c.	...	1,52,828	3·9
„ 85.	Taxable estate-holders	...	1,28,081	3·2
„ 35.	Barristers, &c. ...	...	1,23,254	3·1
„ 82.	House proprietors ...	...	1,16,050	2·9
„ 7.	Managers, &c. ...	...	1,06,135	2·7
„ 22.	Jute and hemp ...	...	1,05,606	2·7
„ 47.	Grain merchants ...	...	1,04,677	2·6

10. The Board have little to add to what has been said in previous reports on the subject of popular feeling in regard to the tax. That the tax continues to be unpopular is notorious; but they observe that a larger revenue is annually obtained with less friction and less necessity for having recourse to coercive measures.

11. The names of the Deputy Collectors specially reported by the Board as having done good service will be communicated to the Appointment Department. Mr. Kilby, the Collector of Income-tax in Calcutta, administered the tax with marked vigour and success. The careful supervision exercised over this Department by the Board merits the acknowledgments of Government.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the Board's Report, be submitted to the Government of India, Finance and Commerce Department, for information, and that a copy of the Resolution be forwarded to the Board of Revenue.

Ordered also that extract paragraph 11 of the Resolution and extract paragraph 57 of the Report be forwarded to the Appointment Department for information.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Secretary to the Government of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE CHITTAGONG HILL TRACTS FRONTIER FOR THE YEAR 1889-90.

POLITICAL.

Darjeeling, the 29th September 1890.

READ—

Letter from the Commissioner of Chittagong, No. $\frac{855 H.T.}{VI—12}$, dated the 15th July 1890, forwarding the Report on the Administration of the Chittagong Hill Tracts Frontier for the year 1889-90.

The operations of the Chin-Lushai Expeditionary Force have been brought to a successful termination. Of the captives taken away in the Chengri Valley and Chima Valley raids, 7 escaped from the hands of the raiders and 75 were recovered by ransom or otherwise. But the expedition dealt with the northern tribes and had no effect on the Shendoos living to the south of Fort Lungleh. Two of their parties entered our territory during the past year while the expedition was in progress. On receipt of information patrols were immediately despatched in search of them. The first party could not be found, but traces of a large encampment said to have been occupied by them were visible in the neighbourhood of the Chanda village. The second party was discovered within 2½ miles of the Pyramid Hill post, but they beat a precipitate retreat as soon as they found themselves pursued. There is little doubt that they crossed the border for raiding purposes, which they would have carried out had circumstances favoured them. The complicity of these tribes in some of the raids of previous years, the necessity of securing the release of the persons then taken prisoners by them and still held in captivity, and their general raiding propensities, render it imperative to adopt measures for exercising control over the villages inhabited by them. This question forms the subject of a separate correspondence.

There was also a scare in the Upper Chengri Valley in the month of August, due to a rumour that Lienpunga was preparing for another raid. The Joormorong outpost was re-occupied by the frontier police in consequence, and confidence was soon restored among the villagers.

2. The military expedition prevented the holding of the annual durbar, but Captain Shakespear, the Assistant Political Officer, held a meeting of the Mulienpui Chiefs after the close of the year.

3. There was a considerable falling off in the export and import of almost all kinds of articles of trade on the frontier, but this is attributable to the unsettled condition of the country due to the expedition, and the figures of the past year do not, as observed by the Commissioner, afford an indication of the future progress of trade. The trade in salt is already more extensive than before, and the further improvement effected in the communication with the Demagri Bazar will facilitate the sale of other commodities in much larger quantities in future. It is satisfactory to note that during the past year 3,663 persons belonging to the trans-frontier tribes resorted to the Demagri Bazar, against 2,949 in the preceding year. From April to August the attendance was very small as compared with that of the corresponding period in previous years, the hillmen being then in a state of doubt and uncertainty as to the consequence of the expedition of 1888-89; but through the exertions of Mr. Murray, the Assistant Political Officer at Lungleh, for which he deserves credit, that feeling gave way to one of security long before the commencement of the second expedition.

4. Besides the permanent posts at Demagri, Burkal, Ruma, and the newly-established one at Lungleh, three temporary posts at Pyramid Hill, Joormorong and Keokradong were occupied during the year. The frontier force performed their very arduous duties in connection with the expedition cheerfully and well. General Tregear, who commanded the Chittagong column of the expedition, was fully satisfied with their work, and recorded the following remarks in the report submitted by him:—

"During the last expedition I was able to make very favourable mention of the men composing the Chittagong Frontier Police Battalion under the

command of Mr. C. S. Murray, District Superintendent of Police. During this expedition 50 men accompanied the Northern column, and 100 under Mr. S. V. Tayler, Assistant Superintendent of Police, were employed with the advanced party and did excellent work. They are the most useful and willing men I should ever care to serve with. Besides being keen soldiers, they can build huts, thatch roofs, construct rafts, and, in fact, put their hands to anything, and are accustomed to carry all their own kits." It is, however, to be regretted that the severe and fatiguing duties and exposure to which they were subjected increased the number of casualties from 16 to 51 under the heads of discharge, retirement, and resignation. A considerable number of men appear to have resigned in consequence of an order prohibiting the grant of leave except on medical certificate, but this restriction has since been withdrawn and leave is now freely granted. The question of the reorganization of the frontier force is now under consideration. The expenditure incurred in provisioning the force amounted to Rs. 52,614, against Rs. 33,051 in the previous year. The increase is due to the fact that the men garrisoning distant outposts were not, as usual, brought in to Rangamati during the rainy season of the past year.

5. The coolie corps, mainly composed of recruits from the Sonthal Pergunnahs, was of great service during the expedition. The men were first employed in improving a portion of the road from Rangamati to Peskisurra, but the work had to be stopped before much progress had been made, as they were required to work on the Burkal tramway in consequence of the desertion of the local coolies owing to an outbreak of cholera.

6. The Commissioner's remarks on the character of officers will be noted in the Appointment Department.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Commissioner of Chittagong for information and for communication to the Deputy Commissioner of the Chittagong Hill Tracts.

Ordered also that a copy of the Resolution and a copy of the Report be submitted to the Government of India in the Foreign Department.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,

Offg. Chief Secy. to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE TRIBUTARY AND POLITICAL STATES OF THE CHOTA NAGPUR DIVISION FOR THE YEAR 1889-90.

POLITICAL.

Dated Calcutta, the 1st October 1890.

READ—

The Report on the Administration of the Tributary and Political States of the Chota Nagpur Division for the year 1889-90.

Read also—

The Reports for 1887-88 and 1888-89 and the Resolutions recorded thereon.

The present report is submitted by Mr. W. H. Grimley, who was in charge of the Chota Nagpur Division throughout the year, except from the 1st to the 27th April 1889. The Commissioner's tour in the Tributary States was unavoidably of short duration. It being the first year of his office, the district headquarters claimed prior attention, and at the same time the Kol agitation prevented his moving far from head-quarters. But although the Commissioner was only able to visit the States of Udaipur, Sirguja and Jashpur during the year under review, he had an opportunity of seeing the Chief of Bonai in Ranchi in May and June, and the Raja of Seraikela and the Thakur of Khursawan were met both at Chyebassa and Ranchi; while during the course of the tour Mr. Grimley was able to inspect the scene of some recent troubles with the Kurwas and to give some valuable advice for the future prevention of raids on civilised villages.

2. The rainfall was sufficient and the crops generally good, but the influx of workmen employed in the Bengal-Nagpur Railway caused an unusual demand for all articles of food, and prices ruled high in consequence.

3. The general health of the people was good in all the States, except Sirguja and Gangpur. Small-pox carried off 1,144 persons in Sirguja, and cholera was fatal in 101 cases in Gangpur and 85 cases in Sirguja. There was a slight falling off in the number of vaccinations, and some of the Chiefs still repeated in the past year the old established objections to this operation, but their prejudices are said to have been overcome, and vaccinators will probably be less hindered in their work in future. The statistics of cattle disease are not very trustworthy, but the report of its general prevalence is undoubtedly true. With a view to diminish the mortality, instructions have been issued by the Maharaja for the segregation of the stricken animals, and by the Commissioner for the prompt burial of cattle that die of the disease and for the destruction of their hides. It is hoped that the measures proposed to be taken during the ensuing grazing season will have the desired effect.

4. The Lieutenant-Governor regrets to observe that education, which has always been backward, has further retrograded during the year under review. Although six additional schools were established, the number of pupils in the majority of the States was smaller than in the previous year. The total number in all the States was 1,219 against 1,329 in 1888-89. His Honour would be glad to see other Chiefs following the excellent example of the Raja of Udaipur in this respect. It is not clear why the schools in Khursawan and Seraikela should receive assistance from the primary school grant of a British district.

5. No new roads were constructed during the year, but the existing lines of communication were kept in repair. The territories of many Chiefs are now being rapidly brought into communication with other parts of India by the construction of the Bengal-Nagpur Railway, and the efforts that are being made to open out the mineral wealth of the country will soon make the question of road construction one of paramount importance. Sir Steuart Bayley hopes that the Commissioner will lose no opportunity of impressing on the Chiefs the importance of improving existing means of communication within their States, and will endeavour to obtain for them any assistance which they may require in the selection of suitable lines of road.

6. There is but little to remark in the figures of Sessions trials, and most of the important cases have come before the Lieutenant-Governor either for confirmation of the sentences passed or in appeal. The fines imposed rose from

Rs. 2,874 to Rs. 3,043, and Rs. 2,522 were realized against Rs. 2,161 the year before. Any tendency to impose fines as a source of revenue rather than as punishments must be watched and checked. The number of escapes from custody is very large, and His Honour hopes that the Commissioner will continue his enquiries into the cause of them, and take such measures as he may find practicable for minimising the chance of their recurrence in the future. The mortality in the Sirguja Jail was heavy and calls for some explanation.

7. The statistics of crime are given in the appendices to the report, which show also the averages of the preceding five years. The number of offences against the person increased in Gangpur and Khursawan, and there was a larger number of theft cases in the former State and in Changbhakar than in 1888-89. House-breaking cases rose from 6 to 14 in Udaipur.

8. In paragraphs 34 to 40 an account is given of the principal matters which engaged the Commissioner's attention in connection with the Native States during the year under review. Most of these have been the subject of special reports to Government in the course of the year, and have been already reviewed by the Lieutenant-Governor; but His Honour would be glad to hear further on the subject of the establishment of a mission station at Ghoghor in Gangpur where the Raja is said to have stopped the building of the station, although he had himself given land as a site for it. The Lieutenant-Governor is glad to record his high appreciation of the prudence and tact displayed by Mr. Grimley in bringing to a satisfactory termination the long-standing and complicated disputes between the Raja of Bonai and the Gond Chiefs, and in dealing with the Gohandals of Khursawan. Great credit is also due to Mr. Grimley for the measures taken by him to quell the disturbance made by the Jashpur Kurwas.

9. The State of Khursawan, which has been successfully managed by Government during the minority of the Thakur, has now passed into the hands of its Chief, and Sir Steuart Bayley has much reason to hope that this young ruler will prove a successful and prudent administrator.

10. Sir Steuart Bayley has read with pleasure the Commissioner's favourable comments on the Chiefs, the majority of whom have maintained their reputation as judicious and wise rulers, and all of whom have generally followed the advice given to them by the Commissioner on difficult questions. Special credit is due to the Maharaja of Sirguja and his Dewan, Maulvi Jaffir Ali Khan, and to the Rajas of Udaipur and Jashpur.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Commissioner of Chota Nagpur for information and guidance, and that a copy of the Resolution, together with a copy of the Report, be submitted to the Government of India, in the Foreign Department, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,

Offg. Chief Secy. to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 4th October, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.		
	Burdwan Divn.		
1	Burdwan, Oct. 4, '90	3·05	Weather—rainy and seasonable. Prospects of crops good. Prices of common rice :—
	Culna ...	3·70	
	Cutwa ...	7·09	
	Ranigunge ...	2·12	
			Srs. Burdwan ... ... 16 / Culna ... ... 16 / Cutwa ... ... 16¼ / Ranigunge ... ... 16 } per rupee.
2	Bankoora ,, 4, '90	1·27	Weather—warm and bright. Rains ceased since 30th ultimo. Prospects of crops continue good. Common rice selling at 19 seers per rupee at Sudder and 17 seers at Bishenpore.
3	Birbhum ,, 4, '90	2·58	Good rain. Rice crop is in quite perfect order, and may now be looked upon as safe. A 20-anna crop may be confidently expected. Prices of rice still keep high, having from 16¼ to 18 seers per rupee.
	Rampore Haut ...	7·19	
4	Midnapur ,, 4, '90	1·52	Weather—bright but cloudy at times. Recent heavy rain has considerably improved prospects of standing crops throughout the district. Prices of common rice :—
			Srs. Sudder ... ... 15 / Ghatal ... ... 17 / Tumlook ... ... 15 / Contai ... ... 19 } per rupee.
5	Hooghly ,, 4, '90	7·14	Weather—alternately fair and stormy. *Aus* and jute nearly harvested with average outturn. Prospects of winter rice and sugarcane excellent. Prices of common rice :—
	Serampore ...	7·55	
	Jehanabad ...	1·09	
			Srs. Ch. Sudder ... ... 13 0 / Serampore ... ... 13 0 / Jehanabad ... ... 15 11 } per rupee.
	Howrah ,, 4, '90	5·12	Weather—seasonable. Standing crops benefited by heavy rain. Prospects of *amun* crop satisfactory. Price of coarse rice about 14 seers per rupee.
	Uluberiah ...	7·52	
	Central Districts.		
	Presidency Divn.		
6	24-Perghs. Oct. 7, '90	3·81	Weather—seasonable. Prospects of *amun* continue excellent except in the small flooded tract of the Bussirhat subdivision. Lands are being prepared for *rubbi* crops. Prices stationary. Relief in the form of rice, dál, &c., that was being issued to the destitute sufferers at the late floods has been wound up; but medical relief is being given and advances are being made for the construction of huts.
7	Nuddea ,, 4, '90	5·35	Weather—seasonable. Heavy rain fell during the early part of the week. *Kalai* sown on chur lands has been submerged by a fresh rise of the rivers and heavy rain. No change in the price of rice. Agricultural loans and charitable relief are being given.
	Kushtea ...	4·75	
	Meherpore ...	4·65	
	Chuadanga ...	5·80	
	Ranaghat ...	5·30	
8	Khoolna ,, 4, '90	0·32	Weather—bright and warm. Transplantation of *amun* nearly completed. Prospects in the flooded thanas bad, but elsewhere good.
	Bagirhat ...	0·90	
	Satkhira ..	3·14	
9	Jessore ,, 4, '90	1·83	Weather—hot and cloudy with occasional showers. Sowing of cold-weather crops commenced, except in flooded tracts. Jute steeping in progress. Average price of rice 13 seers per rupee. Charitable relief being given in Bongong and Jhenidah.
	Jhenidah ...	3·25	
	Magura ...	0·81	
	Narail ...	0·92	
	Bongong ...	3·10	
10	Moorshedabad ,, 4, '90	4·83	Bright sunshine prevailing. *Amun* paddy promises excellently. Rivers still very high. Some *kalai* submerged. *Rubbi* cultivation going on. Agricultural loans and gratuitous relief being given.
	Rajshahye Divn.		
11	Dinagepur ,, 4, '90	6·86	Weather—seasonable. Prospects continue favourable. Price of rice stationary. Sugarcane promises well.
	Thakurgaon ..	9·25	
12	Rajshahye ,, 4, '90	6·31	Weather—rainy, but rather clear to-day (4th). Floods subsiding. Prospects of winter paddy good. Jute is still being gathered. Some *kalai* sown too early washed off by recent sudden rise of the river, which is however falling.
	Nattore ...	13·16	
	Nowgong ..	10·8	
13	Rungpur ,, 4, '90	14·43	Weather—bright sunshine alternating with heavy showers. Immense mischief has been done by a storm accompanied with an unprecedented fall of rain on the 28th and 29th ultimo. The young *amun* paddy has suffered severely from inundation, as also the jute stocked for steeping. Numbers of houses have been blown down, and men and cattle have been killed.
	Nilphamari ...	11·21	
	Kurigram ...	6·74	
14	Bogra ,, 4, '90	13·31	Weather—stormy on 27th and 28th ultimo; since then fine, still and sultry. Excessive rainfall from 27th to 29th ultimo (13·61 inches) caused a high flood, which has destroyed some and damaged more of the *amun* rice. A considerable area of grazing ground has also been under water, but the flood is falling. Some jute also has been washed away, but most of the crop had already been housed. In many places the *amun* was not submerged, or was submerged for a very short time, and is in excellent condition. Sugarcane promises very well. Prices have scarcely risen, and common rice is selling at 18 seers a rupee.
	Sherpur ...	9·50	
	Nowkhilla ...	6·36	
15	Pubna ,, 4, '90	3·71	Weather—cool. Prospects of crops continue as before. *Rubbi* sowings going on. Prices a little higher than before.
16	Darjeeling ,, 4, '90	9·06	Weather—rainy during the first part of the week and fair during the latter part. *Bhutta*, and *bhadoi* paddy are being harvested. *Bara marua* and *haimanti* paddy progressing favourably. Prospects good.
17	Julpigoree ,, 4, '90	5·94	Weather—generally cloudy and rainy. Harvesting of jute going on. *Haimanti* paddy progressing favourably. Prices stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Divn. 18	Dacca Oct. 4, '90	0·14	Weather—hot and bright. Harvesting of jute nearly completed. *Amun* paddy doing well. *Shail* and *roachia* paddy thriving. Fodder available. Common rice sold at from 12 to 15 seers per rupee.
Dacca Divn. 19	Furreedpur „ 4, '90	1·45	Weather—seasonable. State of all standing crops good. Rivers rapidly subsiding. Common rice selling at 13 seers per rupee.
Dacca Divn. 20	Backergunge „ 4, '90	0·42	Weather—hot. State and prospects of standing crops good. Outturn of *aus* crop 15 annas. Common rice selling at about 13 seers per rupee.
Dacca Divn. 21	Mymensingh „ 4, '90	2·89	Weather—days hot and sometimes cloudy with high wind, and nights cool. A violent whirlwind in the form of a tornado passed this station on the 28th ultimo. State and prospects of crops on the whole good. Jute and *amun* paddy have been somewhat injured by the high flood. Harvesting of jute continues. Common rice sells at 13 seers per rupee.
Chittagong Divn. 22	Chittagong „ 7, '90	0·10	*Amun* transplanted. More rain is wanted for this crop. *Aus* nearly cut with average outturn. Prices steady.
Chittagong Divn. 23	Noakholly „ 4, '90	Nil	Weather— very hot. Transplantation of *amun* completed; prospects fair. *Amun* plants in the islands are being damaged to a small extent by insects called *broma jana* and *kalmundar*. Price of rice stationary.
Chittagong Divn. 24	Tipperah „ 4, '90	0·27	Weather—seasonable. *Amun* promises well. Jute cutting continues. Price of rice has risen at Chandpur.
Chittagong Divn. 25	Chittagong Hill Tracts. „ 2, '90	0·57	Weather—hot and dry throughout the week. Harvesting of *jum* paddy continues. Cotton plants in flower. Paddy plants in low lands progressing. Common rice is being sold at 12 seers 15 chittacks per rupee.
	Hill Tipperah „ 3, '90	0·45	Weather—hot. Harvesting of jute nearly over. *Amun* and *jum* crops doing well. Prices stationary.
BEHAR.			
Patna Divn. 26	Patna „ 4, '90	2·87	Weather—hot. Harvesting of *bhadoi* crops over. Paddy doing well, and the late rain has much benefited it. *Rahar* and *jowar* look well. Prices of food-grains advancing.
	Barh ...	5·10	
	Behar ...	4·62	
	Dinapore ...	3·63	
Patna Divn. 27	Gya „ 4, '90	5·25	Weather—clear. Paddy and sugarcane doing well. Fields being ploughed for *rubbi*. Prospects very favourable, and prices of food-grains falling.
Patna Divn. 28	Shahabad „ 4, '90	2·39	Weather—days hot and nights comparatively cool. Sky now and then spotted with clouds. Owing to recent rain prospect of paddy very cheering. Sugarcane fair. Prices stationary.
	Buxar ...	3·73	
	Bhabuah ...	3·75	
	Sasseram ...	4·07	
Patna Divn. 29	Durbhunga „ 4, '90	4·40	Weather—early part of the week cloudy and rainy. The rainfall of the week has done immense good to the winter rice crop. It has also facilitated the ploughing for *rubbi* sowings. Transplantation of tobacco and *alsa* going on. Prices remain almost stationary.
	Madhubani ...	2·66	
	Somastipur ...	6·29	
Patna Divn. 30	Mozufferpur „ 4, '90	4·62	The rainy season appears to have closed, and dry weather, with increasing coolness, has set in. The recent rainfall has been abundant and most beneficial to the crops. *Bhadoi* outturn is now returned at 8 annas from most parts. Prospects of rice crop excellent.
	Hajipur ...	4·15	
	Sitamarhi ...	4·24	
Patna Divn. 31	Sarun „ 4, '90	4·40	Very heavy rain with wind at the beginning of the week, since then weather fine and seasonable. The heavy *kathia* rainfall has done much good. Rice crop promising, and prospects of *rubbi* excellent. Preparation for *rubbi* sowings going on everywhere.
Patna Divn. 32	Chumparun „ 4, '90	5·12	Weather—days very hot. *Bhadoi* crops all cut; some are still being threshed. Prospects of winter rice very good, and with the rain of the week there should be a 16-anna crop.
	Bettiah ...	2·66	
Bhagulpore Divn. 33	Monghyr „ 4, '90	3·27	Weather—seasonable. Standing crops doing well. *Rubbi* sowing going on.
	Boguserai ...	3·82	
	Jamui ...	2·54	
Bhagulpore Divn. 34	Bhagulpore „ 4, '90	3·06	Weather—clear now with hot sun. Rain has fallen very favourably for the winter rice and *rubbi* sowings.
	Banka ..	2·45	
	Mudhepura ...	6·17	
	Soopool ...	5·50	
Bhagulpore Divn. 35	Purneah „ 4, '90	4·88	Weather—fine with passing storms. Heavy rain at the end of last week did good to winter rice. Prospects generally good. *Rubbi* sowings are commencing. Many cattle died from exposure to the storm of 27th September.
	Kishengunge ...	7·70	
	Arrareah ...	5·31	
Bhagulpore Divn. 36	Maldah „ 4, '90	9·76	Heavy rain with high wind on 27th and 28th ultimo. Weather now bright and hot. *Amun* paddy thriving well. *Kalai* sowings going on. Preparation of lands for *rubbi* crops in progress. State of mulberry plants good. Common rice selling at from 12½ to 18 seers per rupee.
	Chanchal ...	7·65	
	Shibgunge ...	5·55	
	Gajole ...	14·91	
Bhagulpore Divn. 37	Santhal Pergns. „ 4, '90	2·08	Weather—very seasonable. Prospects of paddy and other cold-weather crops are excellent. Outturn of *makai* in Pakour is estimated at 4 annas only.
	Deoghar ...	3·53	
	Godda ...	2·48	
	Jamtara ...	1·85	
	Pakour ...	5·38	
	Rajmehal ...	7·64	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38	Cuttack Oct. 4, '90	0·13	Weather—seasonable. Sowing of *rabbi* has commenced. Prospects generally good.
Orissa Divn.	39	Pooree „ 2, '90	1·10	Weather—seasonable. Weeding of *sarad* crop going on and in some places almost over. *Beali* and *mandia* are being harvested. Miscellaneous crops doing well. Common rice selling at from 18 to 26 seers per rupee.
		Khoorda ...	2·19	
		Banpur ...	5·05	
Orissa Divn.	40	Balasore „ 4, '90	2·53	Weather—generally fine. In places the lately transplanted rice crop was injured by last week's floods, but generally much benefit was caused by the heavy rainfall.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh Oct. 4, '90	2·05	Weather—seasonable. Prospects of winter rice excellent. Sugarcane also doing well. *Bhadoi* crops are still being harvested with very poor outturn generally.
Chota Nagpore Divn.	42	Lohardugga „ 4, '90	1·33	Weather—hot and cloudy. Rainfall during the week has much benefited the winter rice crop, the prospect of which is favourable. Harvesting of *gora* rice continues. Prices steady.
		Palamow (up to 29th Sept.)	1·72	
Chota Nagpore Divn.	43	Singbhoom Oct. 4, '90	2·18	Weather—seasonable; a cold weather feel in the air. Everything progressing satisfactorily. Yield of *gora* paddy will average about 10 or 11 annas. Price of rice varies from 15 seers per rupee at Ghatsilla to 24 seers per rupee at Asonboni.
Chota Nagpore Divn.	44	Manbhoom „ 4, '90	0·77	Weather—very favourable. Crops are in excellent condition all over the district, and with a little more rain, the outturn will probably be the best obtained for years. Rice selling at 18 seers per rupee.
		Govindpore ...	1·65

* Mean of six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers in the rainfall column are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional stations for the period in question during the past week, the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 3rd of October 1890.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	District observations. Rainfall. ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater.

denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal means ten years. The means of the district are the numerical average of the rainfall returns received in the district, *i.e.*, from total rainfall at the subdivisional

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 3rd of October 1890.

Meteorological division.	District.	Station.	Rainfall. Saturday, 27th September.	Sunday, 28th September.	Monday, 29th September.	Tuesday, 30th September.	Wednesday, 1st October.	Thursday, 2nd October.	Friday, 3rd October.	Total Number of rainy days.	Total Rainfall of week.	Total rainfall since 1st of September.	Average total rainfall from 1st of September.	Total rainfall since 15th May 1890.	Average rainfall from 15th May to date.

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 7th October* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 3RD OF OCTOBER 1890.

At the end of the previous week the depression which had commenced off the Circars was in the Central Provinces, but had ceased to move in a westerly direction, and at the beginning of the present one was moving to the east-north-east. Its influence in Bengal, even when furthest west, was apparent in the easterly winds and general rainfall, but, as from its commencement, wind velocity was generally low. On Saturday the 27th the area of lowest pressure was partly over Chutia Nagpur where pressure was falling briskly, and as there was a general rise elsewhere, the depression diminished very little in intensity. Winds were south-west or south in Lower Bengal, and were beginning to get stronger at the head of the Bay and at some of the stations in South-West Bengal. Moderately heavy rain fall over the whole province on this day, but in the south-east as well as in Orissa weather was improving, and very little rain fell after the first day of the week. On Sunday the 28th, pressure had risen rapidly at the western stations, and the depression was rapidly filling up, but being now well over Bengal, weather was more unsettled, especially in Behar and North Bengal, where very heavy rain was falling. Lowest pressure from being between 29·6 and 29·65 was over 29·75 inches, and moderate southerly winds were blowing in all districts except North Bengal and Behar, where north-east winds of considerable strength continued. As the depression was filling up, thunderstorms with heavy local falls of rain became general over almost the whole province, especially in the north-east corner. One of these gave stormy winds at Mymensingh, and seems to have been somewhat of the nature of a tornado. On the 29th lowest pressure was again over the Circars, but the distribution was rapidly changing, and by the end of the month became very uniform with a diffused low-pressure area covering the whole of the Bay, with a faint indraught across the coast. Light scattered showers fell in Orissa and Chutia Nagpur on the 30th, but elsewhere rain had almost entirely ceased. The tendency to greater uniformity continued on the 1st of October, and the light winds changed from east to west except in Assam, one apparent result of which was the commencement of rainfall in North Bengal, brought by local storms due to the interaction of these opposing currents. Up to the end of the week these showers were confined to North Bengal and were generally light, rarely exceeding one inch.

Pressure was about ·2 inch below the normal at Hazaribagh and Dehree at the beginning of the week, when there was considerable increase in steepness of the gradients over Bengal owing to a brisk fall in Chutia Nagpur and a brisk rise in the eastern districts, the relative change being about ·15 inch. A rapid rise occurred in Chutia Nagpur and South Behar on the 28th, exceeding ·22 inch at Dehree, and though rising over the whole province, the rate diminished rapidly towards the east. The rapid rise continued in the central districts on the 29th, and the area of lowest pressure was forced southwards as far as the Circars, after which pressure rose slowly until the distribution was very uniform over Bengal and the Bay. Mean pressure for the week differs very little from the normal, and is generally above by varying amounts under ·02 inch.

Temperature was very low while the disturbed conditions lasted, and it recovered rapidly after the skies cleared during the latter half of the week. The means are all below the normal, defect being 5·5° in South Behar, 4·9° in North Behar, 3·8° in Chutia Nagpur, 3·5° in North Bengal, 1·8° in South-West Bengal, 1·2° in Orissa, and ·4° in East Bengal, the southern part of which was but slightly affected by the depression. Some very low minimum temperatures were recorded during the week, the lowest being 64·8° in Chutia Nagpur, 65·6° in North Bengal, 66·5° in Behar, and between 71° and 72° in Lower Bengal. On the 27th defect was between 6° and 7° in Behar, but by the following day it had increased to between 10° and 12° at the more western stations, and on the 29th in the whole of Behar and North Bengal. After the filling up of the depression there was a rapid rise in these districts, and a steady rise continuing, defect by the end of the week was replaced by an excess of about 3° in the lower districts and 1° in Behar and North Bengal.

Rainfall was general and rather heavy in Behar, Chutia Nagpur, and South-West Bengal on the 27th. On the 28th it was much heavier in the northern districts and lighter in Chutia Nagpur and South-West Bengal, many of the falls in Behar and North Bengal being over 5 inches. The area of heavy rainfall was transferred gradually to the east, and on the 29th only a few heavy showers fell in the contiguous parts of East and North Bengal, after which rain almost entirely ceased except in the south west corner, where fairly general light showers fell. The mean falls for the week are all largely above the normal except in Orissa where there is a small excess, and in East Bengal where there is defect of ·7 inch. The very heavy rainfall of the first three days of the week in North Bengal is shown by the weekly mean for the whole district being 11·1 inches, or 9·36 inches in excess of the normal. In North Behar excess is 2·78, in South Behar 2·49, in South-West Bengal 2·77, and in Chutia Nagpur 1·13 inches. In East Bengal falls were generally below 1 inch except in the Mymensingh district, where they varied between 1 and 10 inches, in South-West Bengal and Orissa they ranged up to 7 inches, in North Bengal they were generally between 5 and 10 inches, the heaviest being Panchibi 24·49, Ulipore 17·46, and Mohadebpore 16·6, Baloorghat and Rungpore over 15 inches, and in Behar and Chutia Nagpur they were nearly all between 2 and 4 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 3rd of October 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of September.		Since 15th May 1890.

The range of temperature during the month	20·9		
The mean daily range of temperature	10·7		
The greatest range of temperature in one day	16·4	5th.	
	Per cent.		
The mean humidity of the month	87		
The average humidity of September from 24 years' registers ...	85		
	Inches.		
The mean vapour pressure of the month	0·966		
The average vapour pressure of September from 9 years' registers	0·987		
The mean cloud proportion of the month	6·35		
The average cloud proportion of September from 13 years' registers	7·09		
The total rainfall of the month	12·53		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	11·92		
The average fall of September from 48 years' registers ...	10·18		
The greatest fall in 24 hours	3·41	27th.	
	Days.		
The number of rainy days in the month	18		
The average number of rainy days in September from 24 years' registers	21		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	145·0		
The mean difference of sun and air temperatures	57·5		
The greatest sun temperature	161·4	12th.	
The greatest excess of sun over air temperature	70·6	12th.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	75·2		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·0		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·1	30th.	
	Miles.		
The mean movement of the wind per day	70·7		
The greatest movement of the wind in one day	176·0	23rd.	
The greatest movement of the wind in one hour	13·0	23rd noon to 1 P.M.	

The number of hours with winds from each of the 8 points—

N. 1, N.E. 17, E. 167, S.E. 172, S. 115, S.W. 69, W. 8, N.W. 3, Calm 168.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently equal; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer which is the standard of reference at the present Observatory.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; p, passing temporary showers; d, drizzling rain; t, thunder; ≏, dew; =, fog; ≤, lightning.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
The 6th October 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 20th September 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 20th September 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 26·6 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 2·5 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1885 and 1889—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885–89.	1890.
Ratio of births per 1,000 of the population per annum	27·5	23·4	18·4	22·1	28·9	24·1	26·6

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 30th August 1890.	6th Sept. 1890.	13th Sept. 1890.	20th Sept. 1890.	Towns.	Weeks ending— 30th August 1890.	6th Sept. 1890.	13th Sept. 1890.	20th Sept. 1890.
Burdwan	27·5	53·4	33·6	21·4	Narainganj	12·4	29·0	20·7	37·3
Midnapore	17·0	17·0	9·3	13·9	Chittagong	4·7	9·4	9·4	4·7

Howrah	17·2	13·2	21·8	21·8	Arrah	16·7	79·0	16·7	57·4
Bali	14·0	10·5	17·5	10·5	Mozufferpore	9·7	25·5	7·3	25·5
Krishnagar	21·4	34·1	26·5	17·0	Durbhanga	37·0	22·0	22·8	37·0
Ranaghat	.....	6·0	.....	12·0	Chupra	4·0	25·2	28·2	38·2
Santipore	7·0	22·8	26·3	14·0	Bhagulpore	25·3	30·8	30·8	19·9
Jessore	.....	.....	12·2	.....	Monghyr	28·0	45·2	38·9	46·1
Rampore Beauleah	42·0	34·2	39·4	57·8	Purneah	10·4	20·8	10·4	10·4
Darjiling	33·4	29·6	37·0	37·0	Poori	4·2	10·5	14·7	12·6
Dacca	16·9	11·7	14·9	15·6	Total ...	19·0	26·3	22·0	26·6

It will be seen that last week the highest birth-rate was returned from Rampore Beauleah (57·8), and the lowest from Chittagong (4·7). No births were registered during the week in Jessore town.

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 23·4 per 1,000 of the population. The rate of the week is 7·4 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years except 1887—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885–89.	1890.
Ratio of deaths per 1,000 of the population per annum	37·4	31·5	22·5	25·7	33·6	30·3	23·4

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 30th August 1890.	6th Sept. 1890.	13th Sept. 1890.	20th Sept. 1890.	Towns.	Weeks ending— 30th August 1890.	6th Sept. 1890.	13th Sept. 1890.	20th Sept. 1890.
Burdwan	24·4	16·8	29·0	19·8	Narainganj	12·4	16·6	16·6	16·6
Midnapore	9·3	17·0	20·1	17·0	Chittagong	9·4	18·8	9·4	14·1
Hughli and Chinsurah	30·1	18·1	37·7	24·6	Comillah	11·6	19·3	27·0	19·3
Serampore	33·4	45·2	59·0	29·4	Patna City	16·2	26·9	20·4	14·9
Utterpara	28·3	28·3	28·3	28·3	Gya	58·7	58·1	40·3	38·9
Howrah	19·5	10·9	13·7	13·2	Arrah	8·4	29·9	15·8	35·9
Bali	31·6	14·0	10·5	38·8	Mozufferpore	19·5	29·7	24·3	26·6
Krishnagar	9·5	11·4	22·7	11·4	Durbhanga	44·8	39·3	22·8	36·2
Ranaghat	12·0	12·0	6·0	29·9	Chupra	11·1	62·5	39·2	28·2
Santipore	8·8	16·8	19·3	14·0	Bhagulpore	19·0	23·5	18·1	17·8
Jessore	18·4	36·7	42·8	18·4	Monghyr	21·7	27·1	21·7	35·3
Rampore Beauleah	21·0	18·4	39·4	31·5	Purneah	20·8	10·4	13·9	17·3
Darjiling	44·5	59·3	14·8	14·8	Poori	25·2	46·3	31·5	21·0
Dacca	20·1	13·0	28·5	21·4	Total ...	22·9	29·4	24·7	23·4

It will be seen that last week the highest mortality occurred in the town of Gya (38·9) and the lowest in Krishnagar (11·4).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Chupra	10·1	Arrah	25·1	Gya	15·7
Durbhanga	9·4	Bali	24·6	Poori	10·5
Mozufferpore	4·9	Ranaghat	23·9		
Patna City	4·2	Rampore Beauleah ...	23·6		
		Gya	21·8		

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 2·3 from cholera, against 3·5 per 1,000 in the preceding week; 3 from injury, against ·5; and 7·2 from other causes, against 7·. Fever and bowel-complaints exhibit the same ratios as in the preceding week, viz. 11· and 2·6 per 1,000 respectively. No death was recorded under the head small-pox during the week under review.

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	24·4	Christians ...	14·9	Under 1 year ...	225·2
Females	22·2	Hindus ...	23·3	1 and under 5 years ...	34·1
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	110	Mahomedans ...	23·8	5 „ 10 „ ...	14·1
				10 „ 15 „ ...	9·7
				15 „ 20 „ ...	12·2
				20 „ 30 „ ...	9·9
				30 „ 40 „ ...	11·9
				40 „ 50 „ ...	18·7
				50 „ 60 „ ...	25·6
				60 years and upwards ...	62·5

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,

The 6th October 1890. *Sanitary Commissioner for Bengal.*

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 20th September 1890.

Comparative Statement of the principal commodities carried over the Bengal Central Railway during the month of July 1890.

	Tons.
Decreases.	
Coal	277
Sufficiency of stock for railway and flotilla purposes.	
Unscrewed jute	761
Due to dulness of the Calcutta market. The decrease was almost exclusively in despatches from Khoolna.	
Sugar	187
Due to the successful competition of raw sugar from Java.	
Increases.	
Betel-nuts	485
From the Bengal Central Flotilla station exclusively.	

CALCUTTA, *the 24th September* 1890.

F. P. QUINLAN,
Joint Auditor and Examiner of Accounts.

Nalhati State Railway.

Total	1,245	136	2,039	175	1,369	2,214	935	9

	Tons.
Increase.	
Coal	517
Due to increased demand.	
Grains—	
(2) Rice	144
This is due to greater export from intermediate stations.	
(4) Others	85
Due to import of paddy for greater demand.	
Oil-seeds—	
(2) Mustard and rape	23
Due to greater demand.	

	Tons.
Provisions—	
(3) Others	73
Due to greater export of fresh fruits from Azimganj, chiefly jack fruits.	
Railway plant and rolling-stock	39
Due to greater despatches of railway materials.	
Silk, raw—	
(2) Indian	22
Due to greater despatch of silk to Europe this year.	
Sugar—	
(2) Undrained	28
Due to sudden demand.	
DECREASE.	
Sugar—	
(1) Drained	17
Due to despatches from Calcutta by steamer.	

R. G. MOOKERJEE,
Manager, Nalhati State Railway.

RESOLUTION ON THE TRIENNIAL REPORT ON THE WORKING OF CHARITABLE DISPENSARIES UNDER THE GOVERNMENT OF BENGAL FOR THE YEARS 1887, 1888 AND 1889.

MEDICAL.

Dated Darjiling, the 6th October 1890.

READ—

The Triennial Report on the working of Charitable Dispensaries under the Government of Bengal for the years 1887, 1888 and 1889.

Read also—

The Annual Report for 1886 and the Resolution recorded thereon.

Dr. Hilson's triennial report on the working of the charitable dispensaries under the Government of Bengal is a satisfactory document, which records much progress in the popularity and usefulness of these institutions throughout the province, and reflects much credit on the Inspector-General himself, to whose administrative energy and perseverance a large proportion of this encouraging result is due.

The post of Inspector-General of Civil Hospitals was held, during the past three years, by Dr. A. J. Cowie, from January 1887 to April 1888, and again from November 1888 to April 1889, and by Dr. A. H. Hilson in the intervening months, and from May 1889 to the end of the year. Dr. Hilson has brought to bear upon his work a large experience of other provinces, which has been of great service to him in reorganizing the medical institutions of Bengal, and his present report, which is full of interest and yet not too long shows that, while much has been done to improve the facilities for the introduction of medical skill and science in the mofussil, much yet remains to be done before this province, which is in many respects one of the most unhealthy in India, can rival the more northern provinces in the management and efficiency of its charitable dispensaries.

2. The total number of dispensaries in Bengal has increased from 234 in 1886 to 261 in 1889; of this last number 125 are in class II and are under the management of local bodies, and the Inspector-General brings to notice the fact that there are several other institutions which might well be made over to the management of local Municipalities or District Boards. The Lieutenant-Governor is prepared to consider any recommendations which Dr. Hilson may wish to make in specific instances.

3. The interest taken by Municipalities and District Boards in the charitable medical institutions placed in their charge is favourably noticed by the Inspector-General, who at the same time comments on the indifference shown by many local Committees in the control of their dispensaries. His Honour is of opinion that the individuality of the medical officers attached to the various dispensaries has much to do with this, but would at the same time impress on the Chairmen and members of local bodies the importance of supervision and encouragement in the case of institutions of such practical usefulness as these, and would remind them that the remarks recorded by unofficial visitors in the inspection-books provided for the purpose are often of the greatest service to the authorities in remedying defects and detecting abuses. Sir Steuart Bayley regrets to notice that although there was an improvement in the figures of the number of inspections made by Civil Surgeons, there are still a large number of dispensaries which are only visited once instead of twice in the year.

4. The figures of attendance, both out-door and in-door, have steadily increased in the past three years, as is shown in the following table:—

Year.		Divisions.									Grand Total.
		Burdwan.	Presidency.	Rajshahye.	Orissa.	Dacca.	Chittagong.	Patna.	Bhagulpur.	Chota Nagpur.	
1887	In-door	3,578	2,581	2,422	1,933	3,791	625	6,630	1,996	963	24,474
	Out-door ...	149,217	138,288	136,703	62,680	106,327	31,059	316,513	86,214	28,404	1,055,465
1888	In-door	3,590	2,812	2,494	1,950	3,745	781	6,842	2,435	1,102	25,751
	Out-door ..	144,372	142,382	154,546	65,242	65,242	33,918	34,082	91,851	27,899	1,106,700
1889	In-door	3,920	2,970	2,858	2,770	4,135	851	7,688	2,648	1,141	2-,981
	Out-door ..	152,313	159,873	155,270	74,766	113,333	35,193	364,544	94,361	30,190	1,179,843

The proportion of persons treated, both indoors and out of doors, to population is very low, and it is only in a few exceptional areas that it touches 3 per cent., the total for the province being in 1889 1,208,824 persons treated out of a population of 69,536,861, or 1·73 per cent. But, on the other hand, it may be added that the returns from dispensaries are becoming more accurate year by year, and the steady increase in numbers, in spite of the elimination of many fictitious returns of large attendance, is clearly a matter for congratulation.

5. On the subject of in-door patients, Dr. Hilson remarks:—

"The native of India, when sick, prefers to be treated at his own house, and at such a time will not leave his family if it can possibly be avoided—a characteristic which seems to be more strongly marked in Bengal than elsewhere. The desire is only natural, and he cannot be blamed for it; but it seems to me that one cause of it is to be found in the very limited provision of separate accommodation for the families of patients at dispensaries, and this is a point well worth the attention of Municipal Committees and others interested in these institutions. In the Punjab and North-Western Provinces many of the dispensaries have a few rooms apart from the main building, which are reserved for the accommodation of well-to-do patients and those who bring relatives with them, and they are largely taken advantage of."

Sir Steuart Bayley would be glad to see the above proposal carried out, as he has no doubt that the defect pointed out by the Inspector-General is a serious one. Dr. Hilson records many valuable remarks on the subject of various dispensaries at which the mortality among in-door patients was high, and it is worthy of notice that it is at the various shrines to which pilgrims resort that the mortality is found to be highest, the fatigue and poverty of the pilgrims rendering them an easy prey to attacks of cholera and dysentery. The mortality among in-door patients was 12·71 per cent. in 1887, 12·77 per cent. in 1888, and 13·9 per cent. in 1889.

6. The increase in the number of out-door patients is very satisfactory, and speaks well for the improved management and popularity of the charitable dispensaries in the mofussil. The Lieutenant-Governor has no doubt that, as remarked by Dr. Hilson, the professional qualifications of the officer in charge

of a dispensary greatly affect its popularity, and local Municipalities and others who have the management of these institutions would do well to bear in mind his warning that an excellent building and a full stock of medicines and medical comforts will not be of much service if the officer in charge is not a skilled practitioner, who is earnest and devoted to his work.

7. Very few cases of small-pox are treated in dispensaries, although the disease continues to be prevalent in several districts. Cholera is dealt with in almost all such institutions, but they are not sufficiently large or adequately equipped to deal with anything approaching to an epidemic of this disease. The number of cases of malarial fever increased from 202,933 in 1887 to 232,582 in 1889, and in the latter year formed a percentage of 19·24 of the total number of cases treated. This disease is most prevalent in the Burdwan, Presidency and Rajshahye Divisions. The proportion of cases of malarial fever in the Presidency Division has increased from 26·68 per cent. in 1887 to 30·28 per cent. in 1889. On this subject Dr. Hilson remarks—

"Malarial fevers are not more common in Bengal than in other Indian provinces, but they have this peculiarity that they are usually of a more severe and fatal type, which is probably due to the damp, relaxing nature of the climate. They leave their traces behind in the form of anæmia, enlarged spleen, diarrhœa, and dysentery, and it has truly been said that if the prevalence of malarial fever could be abolished one-half the diseases of the country would disappear with them."

The Inspector-General shows that very few lepers resort to charitable dispensaries for relief, the average number treated in these institutions in the past three years being only 2,525. His general remarks on the nature of the disease and its contagious and non-contagious properties are of great value as showing how much remains to be done before it can be asserted with any confidence that the disease is understood, or that it can be effectively dealt with by segregation even of the strictest kind.

8. The increase in the number of surgical operations is very satisfactory, and the Lieutenant-Governor agrees with Dr. Hilson in thinking that successful operative surgery is greatly appreciated by the poorer classes, and that the performance of major operations by qualified Assistant Surgeons adds much to the popularity of mofussil dispensaries. The very large attendance at the Chupra and Monghyr dispensaries, where the Assistant Surgeons, the late Babu Aghore Nath Bose and Babu Upendro Nath Sen, especially distinguished themselves by their success in surgical work, tends to support this view, and His Honour hopes that every encouragement will be given to such medical subordinates as may show good results in the exercise of this branch of their profession. These remarks more especially apply to cases of cataract, and there can be no doubt that success in restoring failing sight has great influence on the popular mind.

9. The following statement, which shows at a glance the financial position of the charitable medical institutions of Bengal for the past three years, is reproduced *in extenso* from the Inspector-General's report:—

Income.

Total expenditure ...	3,94,750	0	2	4,14,394	13	10	4,37,095	3	9
Cash balance on 31st December	33,756	7	1	38,927	1	11	36,237	11	4

The variations in the figures shown as closing balance on 31st December and opening balance on 1st January are fully explained by Dr. Hilson, and are due to the correction of the accounts of various dispensaries at the close of the year. The figures are very satisfactory, and show that these medical charities are well and liberally supported and are in a flourishing financial position. The total amount of the subscriptions, both from Europeans and Natives, has largely increased, and municipal and local bodies deserve the Inspector-General's congratulations on the co-operation of the general public that these figures disclose.

The increase in expenditure is inevitable in the face of the extension of medical aid to the poorer classes, and Dr. Hilson notices with regret that in many cases a laudable desire for economy has led to restriction of the pay of the officers employed to that of the lowest grade of Assistant Surgeons—a form of economy which is open to criticism. It is, however, not improbable that in some cases not more than this scale of pay can really be afforded, and that an effort is made in order to obtain the services of an officer of qualifications superior to those of a Hospital Assistant. The whole question of the appointment of officers to the control of dispensaries has lately been again brought under the consideration of Government, and it will be separately dealt with by the Lieutenant-Governor after consulting the Municipal Department and the Commissioners of Divisions; it is therefore unnecessary to make further comment on the remarks on this subject contained in the Inspector-General's present report.

10. The notes and statistical tables which are appended to the report are full of interesting detail and form a record of much good work. Sir Steuart Bayley agrees with the Inspector-General in his commendation of certain Assistant Surgeons who have shown exceptional ability in various branches of their profession, and their names will be noted for future guidance.

ORDER.—Ordered that a copy of the Resolution, together with a copy of the Report, be submitted to the Government of India, Home Department, for information.

Ordered also that a copy of the Resolution be forwarded to the Inspector-General of Civil Hospitals, to the Municipal Department of this Government, and to all Commissioners of Divisions for information, and that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,

Offg. Chief Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE ADMINISTRATION OF THE STAMP DEPARTMENT DURING THE THREE YEARS ENDING 31ST MARCH 1890.

FINANCIAL DEPARTMENT—STAMPS.

Darjeeling, the 7th October 1890.

RESOLUTION.

READ—

The Report of the Board of Revenue on the Administration of the Stamp Department during the three years ending 31st March 1890.

The present report is the first which has been submitted under the triennial system introduced by the orders of the Government of India, No. 4417 of 23rd August 1887, statistical information only with brief explanatory notes having been supplied in the two previous years. The Acts under which the stamp revenue was collected during the period under review were the Indian Stamp Act 1 of 1879 and the Court-fees Act VII of 1870 as modified by subsequent enactments. Under the orders of the Government of India, the copying fee has been reduced from four to three annas per folio from 1st April 1890. From 1st April 1888 the rate of discount on the sale of court-fee stamps of all values above one rupee has been reduced from 3 pies to 1½ pie per rupee. The other changes in the law and rules issued by Government are not of sufficient importance to call for special notice.

Stamp revenue.

2. The financial results of the administration of the Stamp Department during the past four years, according to the returns furnished by the Accountant-General, are shown in the following table:—

Year.	Stamps under Act I of 1879.			Court Fees under Act VII of 1870.			Total.		
	Receipts.	Refunds and other charges.	Net revenue.	Receipts.	Refunds and other charges.	Net revenue.	Receipts.	Charges.	Net revenue.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1886-87	34,72,802	1,89,293	32,83,509	99,80,759	4,21,010	95,68,749	1,34,62,561	6,10,303	1,28,52,258
1887-88	35,51,253	2,55,242	32,96,011	1,02,64,782	3,60,835	99,03,947	1,38,16,035	6,16,077	1,31,99,958
1888-89	37,50,871	2,76,042	34,74,829	1,00,88,114	3,39,661	97,48,453	1,38,38,985	6,15,703	1,32,23,282
1889-90	38,88,945	2,88,689	36,00,256	1,03,48,824	3,39,535	1,00,09,289	1,42,37,769	6,28,244	1,36,09,525
Average of 1887-88 to 1889-89	37,30,356	2,73,324	34,57,032	1,02,33,907	3,46,684	98,87,223	1,39,64,263	6,20,008	1,33,44,255

The gross average annual revenue collected under both the Acts during the three years under review was Rs. 1,39,64,263 against Rs. 1,34,62,561 in 1886-87. Both judicial and non-judicial stamps contributed to the increase; the total realizations during 1889-90 exceeded those of any previous year. The average receipts were highest in Calcutta (Rs. 19,51,882) and lowest in Singbhoom (Rs. 10,833). The incidence is highest throughout East and Central Bengal, where trade is brisk and the population most prosperous. The general incidence of stamp revenue on the population of Bengal, estimated at 66 millions, is 3 annas 4¼ pies per head.

Stamp sales.

3. Another table which has been compiled in the office of the Superintendent of Stamps shows the receipts from sales of the different descriptions of stamps during the same period. The figures will differ from those given in the previous statement, inasmuch as they do not include miscellaneous receipts or receipts from the sale of plain paper prescribed by the High Court for use with court-fee stamps. They show stamp sales only, but apart from these differences there

is a small discrepancy with the Accountant-General's figures which is under adjustment:—

Year.	Sales of Non-Judicial Stamps used under the Indian Stamp Act.										Sales of Judicial Stamps or Stamps used under the Court-fees Act.			Total of both kinds of stamps.
	Impressed sheets, including certificate stamps, salt bond, P. W. D. forms, bills-of-lading and kabuliyat form stamps.	Impressed labels.	Receipt or one-anna revenue stamps.	Share transfer stamps.	Foreign bill stamps.	Hundi or bills-of-exchange stamps.	Notarial stamps.	Advocate, vakeel, and attorney stamps.	Impressed one-anna stamps for cheques, bills, &c.	Total of non-judicial stamps.	Adhesive and impressed court-fee stamps.	Stamps for copies.	Total of court-fee stamps.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1886-87	23,71,386	5,85,402	2,32,638	17,771	39,065	86,643	4,573	10,000	44,616	33,92,184	93,06,760	5,06,868	98,13,128	1,32,05,312
1887-88	24,12,972	5,76,248	2,22,353	32,634	50,081	96,210	3,920	7,250	49,283	34,51,251	95,30,446	5,48,859	1,00,79,305	1,35,30,556
1888-89	25,71,283	6,32,403	2,28,704	44,840	51,318	1,11,754	3,014	12,750	48,207	37,04,403	93,23,219	5,71,916	98,95,134	1,35,99,537
1889-90	26,89,643	6,41,927	2,40,757	26,068	42,731	1,18,673	3,114	15,750	47,260	38,26,523	95,71,539	5,79,875	1,01,51,414	1,39,77,937
Average of three years, 1887-88 to 1889-90.	25,57,939	6,16,879	2,30,634	34,714	46,343	1,08,879	3,149	11,916	48,250	36,60,725	94,75,068	5,66,883	1,00,41,951	1,37,02,676

Non-judicial stamps.

There has been a steady increase in non-judicial samp stales, which was shared by almost all classes of stamps. The average yearly receipts of impressed sheets, which are the most important of non-judicial stamps, show an increase of Rs. 1,86,573, or 7·8 per cent., as compared with the receipts in 1886-87. The increase was contributed by 39 districts, notably Mymensingh, and is ascribed to the normal growth of business and a growing tendency to substitute written agreements for verbal contracts. Impressed labels, which are available only in Calcutta, show an increase of Rs. 31,387, or 5·3 per cent. The sale of one-anna revenue stamps, commonly known as receipt stamps, shows a falling off of Rs. 2,003, or 8 per cent., as compared with 1886-87, but an increase of Rs. 11,963 in 1889-90 as compared with the preceding year. The other classes of non-judicial stamps, which are of minor importance, show increases of Rs. 16,943 under share transfer stamps, Rs. 9,278 under foreign bill stamps, and Rs. 22,236 under hundi or bills-of-exchange stamps, and a decrease of Rs. 1,424 under notarial stamps.

Judicial stamps.

4. The average income of the past three years from the sales of judicial stamps is Rs. 91,67,320 under court-fee stamps, Rs. 2,333 under High Court service stamps, Rs. 3,05,415 under Calcutta Small Cause Court stamps, and Rs. 5,66,883 under stamps for copies, making a total of Rs. 1,00,41,951, an increase of Rs. 2,28,823, or 2·3 per cent., over the income from the same sources in 1886-87. The largest increases were in Midnapore (Rs. 52,511), Tipperah (Rs. 46,256) Monghyr (Rs. 40,500), Rungpore (Rs. 29,054), Calcutta (Rs. 23,996) Mozufferpore (Rs. 23,037), Mymensingh (Rs. 20,608), Khoolna (Rs. 15,693); and the largest decreases were in Pubna (Rs. 33,635), 24-Pergunnahs (Rs. 28,990), Nuddea (Rs. 12,753), Bhagulpore (Rs. 11,592), and Gya (Rs. 10,069). Taking each denomination of court-fee stamps sold during the period under review, there was an increase of nearly 3 lakhs in the sale of one-anna stamps, 2½ lakhs in that of ½-anna stamps, 2¼ lakhs in that of 12-annas stamps, and 2½ lakhs in that of 1-rupee stamps, and a decrease of a lakh under 6-annas, Rs. 49,579 under 2-rupees, and Rs. 16,123 under 4-rupees stamps. The decrease in the sales of stamps of higher values, accompanied by an increase in the sales of stamps of lower values, is probably due to the fact that stamps of lower values on which the higher rate of discount is still allowed are used in combination for stamps of higher values on which the discount has been reduced.

5. The revenue from the sale of stamps of all classes has increased from Rs. 87,88,026 in 1874-75 to Rs. 1,27,76,907 in 1884-85 and to Rs. 1,39,77,937 in 1889-90.

Levy of penalties.

6. The number of cases in which deficient stamp duty and penalty were levied by Civil and Revenue Courts during the last four years, and the amount realized in these cases, are exhibited in the following table :—

Year.	Number of cases.		Amount of duty and penalty realized.		Total.	
	Civil Courts.	Revenue officers.	By Civil Courts.	By Revenue officers.	Cases.	Amount.
			Rs.	Rs.		Rs.
1886-87	1,371	2,173	12,337	21,643	3,544	33,980
1887-88	1,400	2,122	10,555	23,010	3,522	33,565
1888-89	1,277	2,076	11,107	22,022	3,353	33,129
1889-90	1,338	2,399	11,127	24,869	3,737	35,996
Average of three years, 1887-88 to 1889-90 ...	1,334	2,198	10,952	23,208	3,532	34,250
Average increase in the triennium compared with 1886-87	.....	25	.....	1,655	..	250
Average decrease in the triennium compared with 1886-87	37	.....	1,385	.....	7	.....

Prosecutions.

7. The average number of prosecutions instituted for various breaches of the stamp law was 816. The average number of persons brought to trial was 929, of convictions 740, and of acquittals 116. The average amount of fines imposed by Magistrates was Rs. 6,626, while Rs. 1,756 were disbursed as rewards to informers. The Board bring to notice the fact that not a single rupee was paid as reward in the Patna, Orissa, and Chota Nagpore Divisions, in three out of the four districts of the Bhagulpore Division, in five out of the seven districts of the Rajshahye Division, in four out of the six districts of the Presidency Division, and in three out of the five districts of the Burdwan Division. This would seem to show that this important subject has not met with due attention on the part of local officers, for it is on the encouragement afforded by a liberal distribution of rewards that detection of infringements of the stamp law must largely depend.

8. The Board dwell at some length in their report on the evasion of duty in respect of probates, letters and certificates of administration, and remark on the absolute necessity of providing some agency for checking the valuation of estates of deceased persons by executors, and also for adjudicating on the valuations when objected to. This question has already formed the subject of a special correspondence between the Board, the High Court, and the Government, and the Lieutenant-Governor would prefer to deal with it separately from the triennial report.

9. The Lieutenant-Governor's acknowledgments are due to the Board for their careful administration of the Stamp Department. The names of the officers who have been mentioned as specially deserving of credit will be noted in the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 11th October, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.		
BURDWAN DIVS. 1	Burdwan Oct. 11, '90	0·13	Weather—hot. Prospects of *amun* and sugarcane good. Prices of common rice :— Srs. Burdwan ... ... 16½ Culna ... ... 15 Cutwa ... ... 16½ Ranigunge ... ... 16 } per rupee.
	Culna ...	1·60	
	Cutwa ...	1·17	
	Ranigunge ...	0·01	
2	Bankoora ,, 11, '90	Nil	Weather—warm and cloudy. A smart shower on the 11th. Harvesting of *aus* paddy proceeding. Prospects of *amun* paddy continue good. Common rice selling at 19 seers per rupee at the Sudder station and 17½ seers at Bissenpore.
3	Birbhum ,, 11, '90	Nil	Storms seem to be gathering, and some good showers may be expected. Prospects of crops as good as can be all over the district. Price of rice 17 to 18½ seers per rupee.
	Rampore Haut ...	0·75	
4	Midnapur ,, 11, '90	0·22	Weather—sultry with occasional slight showers. Prospects of crops in irrigated areas excellent, elsewhere fairly good. Some complaints of too much rain in the Contai subdivision. Indigo being sown. Prices of common rice :— Srs. Sudder ... ... 15 Contai ... ... 19 Tumlook ... ... 15 Ghatal ... ... 16 } per rupee.
5	Hooghly ,, 11, '90	Nil	Weather—clear. Temperature increasing. Prospects excellent. Outturn of jute and *aus* estimated at 12 annas. Prices of common rice :— Srs. Sudder ... ... 13 Serampore ... ... 13 Jehanabad ... ... 16 } per rupee.
	Serampore ...	0·89	
	Jehanabad ...	0·55	
	Howrah ,, 11, '90	0·03	Weather—generally fine. Prospects of crops satisfactory. *Amun* crop doing well. Price of common rice 14 seers per rupee.
	Uluberiah ...	0·18	
	Central Districts.		
PRESIDENCY DIVS. 6	24-Perghs. Oct. 14, '90	1·72	Weather—rainy, overcast and unsettled at the end of the week. Prospects of *amun* paddy continue excellent except in the small flooded area of the Bussirhat subdivision. Lands being prepared for *rubbi* crops. Prices stationary.
7	Nuddea ,, 11, '90	0·27	Weather—seasonable. *Amun* rice doing well. Sowing of winter crops going on. No change in the price of rice.
	Kushtea ...	Nil	
	Meherpore ...	1·25	
	Chuadanga ...	0·41	
	Ranaghat ...	0·54	
8	Khoolna ,, 11, '90	0·84	Weather—bright and warm. Transplantation of *amun* nearly completed. Prospects good except in the flooded thanas.
	Bagirhat ...	Nil	
	Satkhira ...	0·63	
9	Jessore ,, 11, '90	0·69	Weather—warm and fine. Prospects very good in Magurah and Narail. Sowings of cold-weather crops in progress. Price of rice steady.
	Jhenidah ...	0·15	
	Magura ...	Nil	
	Narail ...	0·76	
	Bongong ...	0·60	
10	Moorshedabad ,, 11, '90	Nil	Weather—bright and clear. Prospects of *amun* favourable. *Kalai* is still being sown. It is being resown on lands submerged by the recent rise of the rivers. Water gradually going down. Agricultural loans and gratuitous relief are still being given.
RAJSHAHYE DIVS. 11	Dinagepur ,, 11, '90	0·40	Weather—seasonable. Prospects continue favourable. Outturn of *haimanti* rice may at present be estimated at almost 20 annas. Price of rice unchanged.
	Thakurgaon ...	0·11	
12	Rajshahye ,, 11, '90	2·08	Weather—dry; clouds passing; rainy to-day (11th). *Aus* paddy gathered. Jute steeping and cleaning continue. Other crops thriving and flood receding. Prospect of *haimanti* paddy good. A tornado passed over villages Jonail and Dighsoil in subdivision Nattore south to north, rising from Bulsatoil towards Beelchalan. About 22,000 bighas paddy and some 400 houses destroyed.
	Nattore ...	0·08	
	Nowgong ...	0·39	
13	Rungpur ,, 11, '90	Nil	Weather—cool and pleasant in the morning, but sultry later on. Rain is evidently impending. The mischief done by the storm of the 26th—28th extends over 200 villages which have lost the greater part of their crops. A tornado with a course of 2 miles in length by 120 feet in diameter has swept everything away on its track. Generally, however, prospects are excellent all round.
	Nilphamari ...	1·23	
	Kurigram ...	2·90	
	Gaibanda ...	1·45	
14	Bogra ,, 11, '90	Nil	Weather—fine, with northerly breeze. Hot sun. The recent flood in the north and west of the district has destroyed or damaged a considerable area of transplanted rice: in those parts the outturn on the whole may perhaps be 10 annas, but the inquiries are not yet complete. Some jute has also been destroyed, but the outturn has been on the whole very large. The broadcast *amun* has been rather benefited, and elsewhere the *amun* rice of both kinds is mostly in excellent condition. Sugarcane promises generally well. Ploughing is going on, and mustard and *kalai* are being sown. Common rice is selling at 18 seers per rupee.
	Sherpur ...	0·03	
	Nowkhilla ...	Nil	
15	Pubna ,, 11, '90	Nil	Weather—rather hot. *Rubbi* sowings have commenced. Prospects of winter crops continue as before. Prices of food-grains have risen higher.
16	Darjeeling ,, 11, '90	0·07	Weather—fair. Prospects good. *Haimanti* paddy doing well in Terai. Lands being prepared for *rubbi* crops.
	Silliguri ...	1·73	
17	Jalpigoree ,, 11, '90	3·13	Weather—hot and cloudy. Prospects of all crops generally good. Harvesting of jute continues. Price of rice unchanged.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF SEPTEMBER 1890.

THE most notable features in the weather conditions during September are:—

1. During a large part of the month lowest pressure was over the Bay, and at times a trough of relatively low pressure extended from the head of the Bay in a northerly direction over Bengal. Changes of pressure have seldom been large, and readings differed to any large extent from the normal only towards the end of the month.

2. The rainfall distribution was largely influenced by the almost permanent low-pressure area over the Bay, especially during the first half of the month, when very small amounts were received; the defect in North Bengal and Behar being about 2 inches for both the first and second weeks.

3. In ordinary years the western districts of Bengal derive part of their rain from the western current blowing across the Central Provinces, but this year, though steady westerly winds blew over almost the whole of Bengal for several days at the beginning of the month, these winds were so dry that only very scattered showers fell at that time.

4. While the dry westerly winds were blowing in the early part of the month, and even after the ordinary easterly circulation recommenced, clear skies were general and temperature several degrees above the normal, but after the disturbed conditions commenced during the last ten days, a very rapid fall commenced, and some unusually low temperatures were recorded, especially in Behar and North Bengal.

5. As stated above, pressure was generally low over the Bay, but between the 13th and 19th, and again from the 22nd, the differences of pressure increased, causing what may be called the depressions of the month, the former being very shallow and local in its influence, but the latter of greater importance, because of the heavy rain received over the whole of Bengal, which was under its influence from the 22nd till the end of the month.

From the 1st to the 5th lowest pressure was over North Bengal and North Behar, and a steady westerly current was blowing over almost the whole province as far east as the boundary of Assam, where the only showers at that time received in Bengal were probably caused by the meeting of this westerly current with that from the Assam valley. Day after day the stations in this corner reported rain, while elsewhere there was unusually dry, clear weather. On the 6th pressure was low over the Bay, and northerly winds were blowing in Orissa, but at inland stations light, variable breezes were general, or the westerly directions, which were gradually retreating, still obtained. Up till the 9th a trough of low pressure, extending from the centre of the Bay in a northerly direction, gradually drifted from east to west. During its passage variable winds prevailed, but afterwards the ordinary monsoon circulation became established, viz., south or south-west in Lower Bengal and east or south-east in the northern districts. From the 9th to the 13th the distribution of pressure was very uniform, and fine, clear weather prevailed in all districts, except North Bengal, where showers, sometimes heavy, were as general as earlier in the month.

Shallow depression from 13th to 19th.—On the 13th pressure began to fall in the north-west corner of the Bay, and a shallow depression formed, at first covering part of the Bay, Orissa, Chutia Nagpur, and the Central Provinces. After a further brisk fall of pressure it concentrated over Orissa on the 15th, where it practically remained till the 19th, when it filled up. On the 16th and 17th pressure rose to the north of the depression, and this rise forced it towards the south, more over the Circars, but this was the only motion observable while it existed. Rain commenced to fall in the central districts of Bengal on the 13th, and became more general till the 16th, after which it ceased in the north and east, though in South-West Bengal and Orissa showers fell till the 19th.

On the 19th and 20th fine weather generally prevailed, but on the 21st unsettled conditions again began, a depression developing rapidly off the Circars on the 22nd in consequence of the rapid general rise of pressure in the surrounding country, while there it either remained steady or fell.

Depression from 22nd to 30th.—On the 22nd, when the low pressure area first became clearly defined, lowest pressure was at Vizagapatam, just under 29·65 inches, and gradients were steeper than usual, especially towards the north-east, the difference between Vizagapatam and Sibsagar being a quarter of an inch. On the 23rd there was still further intensification, and gradients were again steeper over the head of the Bay, and in Lower Bengal, a clearly defined indraught towards the area of low pressure resulting. The centre was close to the coast between Gopalpur and Vizagapatam, and on the 24th it was well inland, moving in a north-westerly direction. Between the 25th and 26th the direction of motion was northerly, and after that it moved almost due east, covering part of Chutia Nagpur on the 27th, and almost entirely filling up on the 28th, when a widely diffused low pressure area extended from the north of Bengal as far as the Circars. The barometer continuing to rise rapidly in Bengal on the 29th, pressure was again lowest in the Circars and the adjacent part of the Bay, and the depression was in almost the same position as when it commenced to form a week before, with the difference that pressure was higher by two-tenths of an inch. On the 30th a widely diffused low pressure area covered the Bay, and the distribution was steadily becoming more uniform.

Between the 23rd and 26th rainfall in Bengal was almost entirely confined to the southern districts, and heavy rain fell daily in Orissa, but after the change of direction of motion on the 26th, winds became southerly in Orissa, South-West and East Bengal, and general rain fell in all districts, continuing very heavily in the northern districts on the two following days, and especially in North Bengal after the storm broke up. Local thunder storms occurred over the whole province, the most severe being in North Bengal and the northern parts of East Bengal, and these were in places accompanied by very heavy falls of rain. On the 30th conditions were becoming more settled, and only a few showers fell in Lower Bengal.

Pressure—During the first half of the month underwent small changes only, and the mean was very nearly normal. On the 16th a wave of high pressure, entering the province from the north-east and moving to the south-west, caused a rapid rise of pressure, first in North Bengal and afterwards in the southern districts, and forced the low pressure area from the Orissa coast southwards over the Circars, where it filled. The largest change was ·17 inch in Chutia Nagpur on the 17th. Pressure continued to rise rather rapidly, and up till the 26th there was a general excess, varying from ·075 inch at Gopalpur to ·05 inch in Assam, East and North Bengal and North Behar. After the depression commenced to move to the east from Central India, there was a rapid fall in the western districts, defect amounting to ·2 inch at Hazaribagh and Dehree on the 27th. A very rapid rise followed on the 28th in Chutia Nagpur and South Behar, and in the central districts on the 29th, after which a slow rise continued, the distribution becoming very uniform.

The means for the month are below the normal by about ·02 inch in the south of Orissa, and above by nearly ·03 inch in East Bengal, but elsewhere the difference from the normal is only a few thousandths of an inch.

Temperature—Was below the normal for a day or two at the beginning of the month, when a steady rise setting in, first in the western districts, a considerable excess soon accumulated, averaging 3° or more in Behar, Chutia Nagpur and South-West Bengal and more than 1° over the whole province till about the middle of the month, after which it was generally below the normal, defect being between 3° and 5° at nearly all stations on the 24th. Temperature fell very rapidly between the 27th and 29th in Behar and North Bengal. On the 27th defect was between 6° and 7° in North Behar, and by the following day this had increased to between 10° and 12° at the more western stations, and on the 29th in Behar and North Bengal. Some very low night temperatures were recorded during these days, the lowest being 64·8° in Chutia Nagpur, 65·6° in North Bengal, and 66·5° in Behar. After the filling up of the depression there was a rapid rise, and by the end of the week defect was replaced by excess of 3° in Lower Bengal and 1° in the northern districts.

Rainfall—As stated above, was very scattered during the first half of the month in all districts, except North Bengal, but the formation of the two depressions in the south-west corner of the Bay gave continuous heavy rain in Orissa and part of South-West Bengal, and as the latter and more important of the two ultimately broke up in the northern districts, very heavy rain fell there at the end of the month. The greater part of the province has received deficient rainfall, the whole of North Bengal and the northern parts of Behar and East Bengal, as well as a strip of country running north and south and including Orissa and the western half of South-West Bengal, being the area over which falls have been heavier than usual. The connection of this distribution with the depressions is sufficiently clear, the lower districts being affected during their formation, and the northern districts while the second was filling up. Over the large area including Chutia Nagpur, South Behar, and part of North Behar on the west, and East Bengal and the eastern half of South-West Bengal on the east, the deficiency is very variable, being between 20 and 70 per cent. of the normal at eastern stations, and up to 40 per cent. in the western districts.

The comparison of the actual rainfall of the various large divisions of the province during the month is most accurately shown in the form of a percentage. The figures representing the rainfall for the month, calculated in this way, are included in the following table under the heading of September. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division; the first nine columns giving the actual average falls in each division for each month expressed as a percentage of the normal, while the tenth column gives the actual rainfall of the first nine months as a percentage of the normal rainfall for that period.

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Actual rainfall of first nine months of 1890, expressed as a percentage of the normal fall for the period.
Orissa ...	24	5	216	20	99	124	97	80	168	111
South-West Bengal	98	Nil	39	75	87	141	102	69	104	95
East Bengal ...	184	4	70	122	102	89	120	88	60	93
North Bengal ...	98	Nil	26	155	81	132	129	132	143	125
North Behar ...	38	2	25	40	95	140	174	134	97	130
South Behar ...	Nil	5	63	80	95	183	186	125	82	123
Chutia Nagpur ...	Nil	Nil	120	1	66	132	116	75	81	94

The districts which have received more than 50 per cent. excess rainfall are :—Poore e Cuttack, Balasore, Bogra, Dinagepore and Rungpore (where the average fall is double the normal) : between 25 and 50 per cent.—Burdwan, Rajshahye and Purneah. Those where defect is over 50 per cent. are—Furreedpore, Dacca, and Tipperah : between 25 and 50 per cent.—Khoolna, Jessore, Backergunge, Durbhunga, Gya, South Bhagulpore, Lohardugga, and Manbhoom.

The heaviest falls in Orissa are 22 inches at Balasore and Jellasore, and 21 inches at Cuttack, while amounts at the other stations are nearly all over 15 inches. In South-West Bengal a large number of places received between 10 and 12 inches, except in Khoolna and Jessore, where falls are generally under 7 inches. In East Bengal the heaviest falls are Harrishpore 21·3, Subornakhally 16·8, Kutubdia 15·54, Jamalpore 14·1, and a few others in Chittagong and Mymensingh between 10 and 12 inches. In Tipperah and parts of Furreedpore and Dacca total falls are generally between 2 and 5 inches. In North Bengal falls are nearly all over 12, and in Rungpore, Julpigoree, Cooch Behar, and Darjeeling over 20 inches. The only reports under 10 inches are Pubna 8·85, Manda 6·55, and Sibgunge 7·78. The rainfall in Purneah is similar to that in North Bengal, amounts being generally between 15 and 20 inches, but in the other districts of North Bengal falls are nearly always between 5 and 10 inches In parts of South Behar less than 5 inches have been rather frequently registered, especially in Gya and the Southal Pergunnahs, but falls elsewhere are usually between 5 and 8 inches. In Chutia Nagpur the distribution is very uniform at about 7 inches.

The mean fall for the whole of Orissa, as shown in the table below, is 17·2 inches, or 6·9 above the normal ; and in North Bengal, 19·17, which is 5·75 inches above the normal. The mean for South-West Bengal is practically normal, and for the other districts below the normal by 4·87 inches in East Bengal, 1·68 in Chutia Nagpur, 1·45 in South Behar, and ·32 in North Behar.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the month of September 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.							
			Averages for month.				Of month.			Rainy days.			Since 15th May 1890.	
	Highest observed during month.	Lowest observed during month.	Of highest of each day.	Of lowest of each day.	Of mean for each day.	Average mean of month above or below normal mean of month.	Average.	Normal average.	Variation.	Average number in month.	Normal average number in month.	Variation.	Average.	Normal average.

Meteorological Office, Bengal; C. Little,

The 14th October 1890. *Offg. Meteorological Reporter to the Govt. of Bengal.*

Meteorological Report of the Province of Be

for the week ending Friday, the 10th of October 1890.

Meteorological Division	District.	Representative station.	STATION OBSERVATIONS. Air pressure. Mean barometric height, 8 A.M.	Mean reduced to sea-level.	Variation from mean.	Wind. Prevailing direction.	Mean wind velocity.	Temperature. Highest during week.	Date.	Lowest during week.	Date.	Mean maximum temperature.	Mean minimum temperature of week.	Mean daily temperature of week.	Variation from normal mean of week.	DISTRICT OBSERVATIONS. Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	Rainfall. Of week. Mean for district.	Normal mean.	Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 15th May 1890. Mean for district.	Normal mean.	Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.

* Mean of six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for t
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The nu
are the arithmetical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during t
stations in the district during in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater.
denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal
ten years. The means of the district are the numerical average of the rainfall return received in the district, i.e., from total rainfall at the subdi

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 10th of October 1890.

Meteorological division.	District.	Station.	Rainfall. Saturday, 4th October.	Sunday, 5th October.	Monday, 6th October.	Tuesday, 7th October.	Wednesday, 8th October.	Thursday, 9th October.	Friday, 10th October.	Total Number of rainy days.	Total Rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May 1890.	Average rainfall from 15th May to date.

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 14th October* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 10TH OCTOBER 1890.

EXCEPT on October 4th, the first day of the past week, weather was fine and settled, with neither pressure nor temperature differing to any great extent from the normal, and an almost entire absence of rainfall. On Saturday pressure was falling briskly in Behar, where readings were lowest, and up till then south-westerly or westerly winds had been blowing over Bengal as far east as Assam, but a shift to south-east of directions over the eastern half of the province seems to have caused the thunderstorms which prevailed so extensively on the evening of the 3rd in all districts except Behar, Chutia Nagpur, and Orissa, in the last two of which, however, a few scattered showers were received. Rain fell in varying quantity at nearly all stations in North Bengal, South-West Bengal and East Bengal, but after the 4th conditions again became settled with light variable winds in Bengal, and a slow indraught towards a commencing low-pressure area over the Bay. Up till the 6th there was very little change, and then a brisk rise commenced along the foot of the hills, giving relatively highest pressure there and north-east winds in East and North Bengal. At the same time a steady slow fall was going on in the Bay, making the depression daily more definite, at first in the extreme south, and probably covering a large area. By the end of the week it was not far from the coast, moving slowly towards Vizagapatam. The indraught to the low-pressure area stopped the flow of moist air from the Bay, so that during the latter part of the week very fine clear weather was general in Bengal. The influence of the depression, however, was beginning to be felt in Orissa, a few light showers falling there both on Thursday and Friday.

Pressure has been on an average below the normal by about two-hundredths of an inch at nearly all stations; changes have generally been below a twentieth of an inch. There was a brisk to moderate fall during the first two days, then a moderate rise for two days which gave a distribution very nearly normal, and on the last three a general slow fall.

Temperature has been below the normal in Assam and North Bengal, above the normal by less than half a degree in Lower Bengal, and above in Behar by about 1·5°. Changes have been very irregular, but generally small.

Rainfall.—Almost all the rain of the week fell on Saturday the 4th, being caused by the thunderstorms which were so general on that day. The weather almost immediately became more settled, and during the rest of the week only a few light scattered showers fell in East Bengal, chiefly in Chittagong, Backergunge, and Noakhally; in North Bengal in the Cooch Behar and Darjeeling Hill Districts, and in Orissa towards the end of the week. Average falls are very small in Orissa, Behar, and Chutia Nagpur, and very little over half an inch in the other districts. The average fall expressed as a percentage of the normal gives Chutia Nagpur 3, North Behar 7, South Behar 8, Orissa 14, North Bengal 44, East Bengal 49, and South-West Bengal 70.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 10th of October 1890:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1890.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

t, thunder; ≺, lightning; p, passing temporary showers; ≏, dew; 〓, fog; g, gloomy; o, overcast.

J. H. Gilliland,

MEMORANDUM.

Monthly review of deaths registered in forty-five districts of Bengal for the month of July 1890.

THE deaths registered in forty-five districts in Bengal during the month of July 1890 were 115,581, and correspond to an annual rate of 21· per 1,000 of the aggregate population of those districts, which is 65,859,534. This rate is ·24 lower than the average rate of the corresponding months of the past five years 1885—89, and is higher than the rate of the corresponding period of any of the past five years except 1887 and 1889, *vide* the figures below—

	July 1885.	July 1886.	July 1887.	July 1888.	July 1889.	Monthly average of five years, 1885—89.	July 1890.
Ratio of deaths per 1,000 of the population per annum	18·72	16·80	24·84	20·52	25·08	21·24	21·00

The following table shows the highest proportions of deaths registered during the month of July 1890, compared with the corresponding month of 1889 :—

Districts.	Ratio per *mille* during— July 1890.	July 1889.	*Districts.*	Ratio per *mille* during— July 1890.	July 1889.
Darjiling	48·36	54·72	Julpaiguri	32·88	31·44
Patna	33·72	39·12	Balasore	28·68	44·04
Noakhali	33·00	34·32	Khulna	26·40	21·96
Chumparun	33·00	16·92	Gya	25·92	31·08

The total mortality during the month under review from the several registered death causes is compared in the following table with the mortality from those causes in the corresponding month of 1889 and the average of the five years 1885—89 :—

	Ratio per *mille* during— July 1890.	July 1889.	Monthly average of five years 1885—89.
Cholera	1·68	3·48	2·64
Small-pox	·12	·12	·09
Fever	14·76	16·08	13·80
Bowel-complaints	·60	·96	·84
Injury	·72	·84	·72
Other causes	2·88	3·48	2·88

Compared with the figures of July 1889, there is a noticeable reduction in the mortality of July 1890 under the heads cholera and fever.

The highest annual death-rates from the registered death-causes occurred in the following districts :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Bowel-complaints.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Chumparun ...	15·48	Darjiling ...	32·28	Darjiling ...	10·32	Poori ...	11·64
Patna ...	8·28	Julpaiguri ...	30·36				
Balasore ...	5·76	Noakhali ...	30·00				
Mozufferpore ...	4·68	Khulna ...	22·20				
Poori ...	4·32	Rajshahye ...	21·48				
Cuttack ...	3·96	Rungpore ...	20·52				
Shahabad ...	3·84						
Gya ...	3·60						
Sarun ...	2·40						
Midnapore ...	2·16						
Durbhanga ...	2·04						

The mortality of the month under review, according to *Sex*, *Class* and *Age*, was distributed as follows :—

According to Sex.	Ratio per *mille.*	*According to Class.*	Rat oper *mille.*	*According to Age.*	Ratio per *mille.*
Males	22·80	Christians ...	15·84	Under 1 year	149·04
Females... ...	19·20	Hindus ...	21·36	1 and under 5 years ...	24·72
Ratio of male deaths to every 100 female deaths calculated on the proportion such mortality bears to the total male and female population ...	118	Mahomedans ...	20·52	5 „ 10 „ ...	12·48
		Buddhists ...	17·88	10 „ 15 „ ...	10·80
		Other classes ...	17·04	15 „ 20 „ ...	13·80
				20 „ 30 „ ...	12·84
				30 „ 40 „ ...	14·52
				40 „ 50 „ ...	19·56
				50 „ 60 „ ...	27·60
				60 years and upwards ...	46·92

Detailed information regarding the mortuary statistics of the forty-five districts in Bengal during the month under review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 8th October 1890.

Statement showing the Results of the Registration of Deaths in the Districts in Bengal for the month of July 1890.

Office of Sanitary Commissioner for Bengal,

W. H. Gregg, *Dip. Publ. Health, Camb.*,

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 27th September 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 27th September 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 22·2 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 3·3 below the average rate of the corresponding week of the past five years, and is also below the rate of the corresponding week of any of the past five years except 1887—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	28·9	26·9	18·7	27·3	25·7	25·5	22·2

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 6th Sept. 1890.	13th Sept. 1890.	20th Sept. 1890.	27th Sept. 1890.	Towns.	Weeks ending— 6th Sept. 1890.	13th Sept. 1890.	20th Sept. 1890.	27th Sept. 1890.

Dacca	13·0	28·5	21·4	22·1	Total ...	28·4	24·7	23·4	22·4

It will be seen that last week the highest mortality occurred in the town of Serampore (49·1) and the lowest in Narainganj (4·1) No deaths were registered during the week in Santipore town.

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Arrah	4·8	Rampore Beauleah	... 28·9	Serampore ...	... 15·7
Gya	4·1	A[illegible] ...	... 25·1	Dacca ...	... 11·0
Patna City	3·9	G[illegible] ...	... 24·6	Gya ...	... 10·2
Durbhanga	3·9	J[illegible] ...	... 22·2		
		[illegible] ...	... 21·1		

From bowel-complaints high mor[illegible] occurred in the town of Serampore—mortality 15·7 per 1,000 of population.

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 1·6 from cholera, against 2·3 per 1,000 in the preceding week; ·04 from small-pox, against *nil*; 10·4 from fever, against 11· ; 3·3 from bowel-complaints, against 2·6; ·3 from injury, against the same ratio; and 6·7 from other causes, against 7·2 in the preceding week.

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	22·5	Christians ...	22·4	Under 1 year	... 221·2
Females	22·4	Hindus ...	22·2	1 and under 5 years	... 30·8
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	100	Mahomedans ...	23·3	5 „ 10 „	... 12·2
				10 „ 15 „	... 12·4
				15 „ 20 „	... 12·2
				20 „ 30 „	... 11·8
				30 „ 40 „	... 13·9
				40 „ 50 „	... 14·1
				50 „ 60 „	... 26·8
				60 years and upwards	... 45·9

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 13th October 1890.

REPORT ON THE ECONOMIC AND ART SECTION OF THE INDIAN MUSEUM FOR THE YEAR 1889-90.

REVENUE DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 13th October 1890.

RESOLUTION.

READ—

The Report of the Trustees of the Indian Museum on the Economic and Art Section of the Indian Museum for the year 1889-90.

The Report of the Assistant Curator of the Economic and Art Section of the Indian Museum was submitted to Government with remarks by the Trustees of the Indian Museum on the 6th September 1890.

2. As in previous years, the work was mainly confined to preserving specimens from the influences of climate and the ravages of insects, the insecure condition of the present building and the insufficient number of show cases making this a difficult task. In spite of every care, some samples of woollen goods and raw materials were so damaged as to be unfit for display. It is considered that air-tight glass-cases, with the air inside fully impregnated with napthaline, afford the only means of securing efficient protection, and provision for such cases has accordingly been made in the estimate of fittings for the new building now under construction. The attention of the Public Works Department will be drawn to the recommendation of the Trustees that the completion of this building be expedited.

3. The Lieutenant-Governor is glad to notice that the arrangements referred to in last year's Resolution, as to the exchange of specimens between the Economic Museum and the Jaipur Museum, have been effected. An interesting series of specimens was received from Jaipur, and the return collection is reported to be almost ready for despatch. A number of valuable specimens, not represented

before, was added to the Artware Court during the year, partly by donation and partly by purchase. Additions were also made to the exhibits in the Ethnological and Economical Courts. The total number of specimens in the register of each Court stood as follows on the 31st March, 1890:—

	Last number on 31st March, 1889.	Last number on 31st March, 1890.	Number of articles damaged during 1889-90.	Net increase during the year.
Art-ware Court ...	10,090	10,526	*Nil*	436
Economic „ ...	16,816	16,954	13	123
Ethnology ...	6,972	7,145	*Nil*	173

4. The most important works in which the Assistant Curator and his staff were engaged during the year were (1) the formation of a large and exhaustive collection of the fibres and mat and paper grasses of India for distribution to several institutions in the United Kingdom; and (2) the formation of comprehensive collections of the whole of the economic products of India for the Imperial Institute, London, the Indian Museum, and any other museums in India which Provincial Governments may recommend, and for which they may be prepared to purchase a set of specimens. No actual collecting was done during the year, but tabular statements of all the products required from the various provinces during 1890-91 were prepared, and the preliminary correspondence issued. It is proposed to make the collections *pari pasu* with Dr. Watt's Dictionary of the Economic Products of India, which will thus form an analytical and descriptive catalogue of the specimens. The proposal has the approval of the Lieutenant-Governor.

5. On the recommendation of the Bengal Committee of the Colonial and Indian Museum, who brought their work to a close during the year, a sum of Rs. 7,025, being the balance of the sale proceeds of exhibits, was placed at the disposal of the Trustees for the purchase of good specimens of Bengal art-ware to form a collection under the name of the "Asanullah and Swarnamayi" collection in commemoration of the liberal donations of the Nawab Asanullah of Dacca and the Maharani Swarnamayi of Cossimbazar towards the cost of the Bengal Screen.

6. The Lieutenant-Governor notices with pleasure that the arrangement under which the accounts of the Economic and Art Museum were transferred to the Trustees' Office on the 1st May 1890 is working well.

7. The lamented death of Mr. E. F. T. Atkinson, C.S., C.I.E., Chairman of the Trustees, which occurred in September, 1890, has deprived the Government and the Board of Trustees of the services and advice of an enthusiastic worker in the causes to which the Indian Museum is devoted. Sir Steuart Bayley desires to record his appreciation of the late Mr. Atkinson's zeal and labours in the pursuit of scientific knowledge.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE CHOTA NAGPORE DIVISION FOR THE YEAR 1889-90.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 16th October, 1890.

RESOLUTION.

READ—

The General Administration Report of the Chota Nagpore Division for the year 1889-90.

Material condition of the people.

The report, submitted by Mr. Grimley, who was in charge of the Division throughout the year, deals fully with all the prescribed topics, and it is necessary to touch in this Resolution only on some points to which the attention of the Lieutenant-Governor has been specially attracted. The price of food was high during the year, a condition favourable to the ryot in his character of a producer, but injurious to such labourers as are paid in money. The yield of the different crops was good, with the result that there was a large increase in the export trade. In the Lohardugga district there has been a distinct rise in the rate of wages, unskilled workmen now getting from 2 annas to 2 annas 3 pies a day against 1 anna 9 pies to 2 annas in 1887-88, and a similar tendency is observed in Manbhoom. Public health was better than in the preceding year, and there were also some minor causes at work to improve temporarily or permanently the condition of the masses, which in this Division is generally the reverse of satisfactory. The Commissioner writes:—

"In Manbhoom the opening of the Bengal-Nagpur Railway enabled the cultivators to take advantage of the high prices ruling in the neighbouring districts and to export their surplus stocks of rice, oilseeds, &c., at a substantial profit, while the excellent outturn of the lac crop materially benefited the people of Jhalda, Bagmoondi, and the rest of the western parts of the district. In Singbhoom the construction of the railway brought a great deal of money into the district, a good portion of which was earned by people of all classes from all parts of the district. In Hazaribagh, apart from the general prosperity consequent on the good harvests, the people of Gawan, Koderma, Baraganda and Giridih and their neighbourhood found ample work in the numerous mica, copper and coal mines at comparatively high wages. In Lohardugga the 'opening of the Bengal-Nagpur lines in the Division, the operations of the public works and road cess departments on a large scale within the district, extensive development of trade at the various centres and the local tea-gardens, have increased the demand for labour, and the consequent rise in the price of wages has greatly ameliorated the condition of the poorer classes.' The working of the Anglican and German Missionaries has also brought on a great change among the aboriginal races who at present constitute an important section of the population of the district. Much improvement is to be observed in their mode of building houses, and they take greater care to keep themselves neat and clean, and have a general tendency to give up some of their primitive habits and ways of living. A great advance is also noticeable in their style of clothing. The condition of the non-Christians too, as regards dress and dwelling-houses, has made a visible improvement within the past few years."

Mining.

2. In this Division considerable importance attaches to mining operations, and it should be the object of all Government officers having the charge of estates, or being otherwise in a position of authority in regard to such matters, to afford every facility for prospecting, while refraining from making any settlement of permanent mining rights otherwise than in accordance with the prescribed rules. An economic survey is now being made of the Jharia coal-fields, and leases were granted for mica prospecting, under rules lately framed by this Government for the purpose, over 190 acres out of 370 acres applied for. The applications in regard to the balance should be promptly disposed of, if this has not been done already. In the principal coal mines the output was 564,971 tons against 630,527 tons in the preceding year; in the mica mines 1,333 maunds; in refined copper 320 tons against 218. In regard to gold the Commissioner writes:—

"In Lohardugga the aborigines of Sonapet have for a long time obtained small quantities of gold by washing the sand of the Sona river, but the quantities gathered have never been sufficient to pay them anything more than their daily wages. The Sonapet valley is almost entirely encircled by a belt of hills, and some of the reefs in these hills have been examined by mining geologists, and the favourable reports submitted have encouraged several persons to take up tracts of land with the view of forming mining companies. The Bengal-Nagpur Railway has brought the district of Singbhoom within reach of Calcutta and into prominent notice in commercial circles. Syndicates have been formed there with

the view of exploiting its mineral resources, and there are at the present time several important applications pending before me for licenses to prospect for minerals. In fact, signs are not wanting that this district with its mineral and forest products has a great future before it."

State of public feeling.

3. Of chief importance in connexion with the subject of public feeling is an agrarian agitation which has arisen among the Kols and which has connected itself with a singular religious development. The Kols have for many years shown signs of discontent with their existing condition, especially in relation to the claims made upon them by landlords for excessive rents and for unpaid labour. At one time the feeling induced a few of them to put forward political claims which had to be unhesitatingly rejected. During the past year the dissatisfaction with the landlords' demands showed itself in some lawlessness, not of a very aggravated character, and in frequent refusals to pay rent or to give unpaid labour—symptoms which have caused the landlord class considerable uneasiness. A body of Jesuit missionaries have recently been extending their operations in the Division and have warmly taken up the cause of their Kol converts. Under this influence the number of conversions has been remarkable, though, as Mr. Grimley points out, in many cases "the enquiry established the fact that the conversions to Christianity were effected by the rough and simple process of depriving the new convert of his topknot, and also that those who allowed themselves to be thus easily converted to the new faith did so in the full hope and belief that they would be thereby enabled to escape from the exactions of their landlords, whether in the shape of rent, cesses or predial services." With the consent of the Government the Commissioner issued a proclamation specifying the amount of services which had been customary in past times and warning the zemindars to demand nothing in excess, at the same time urging the ryots to yield what was due. Other remedial measures of a more permanent character were discussed at a conference at Ranchi, and the Lieutenant-Governor is now awaiting a report from the Commissioner on them.

4. The thanks of the Lieutenant-Governor are given to Mr. Grimley for his careful administration of the Division during the year. Colonel Garbett, Colonel Lillingston, and Colonel Samuells all worked well as Deputy Commissioners, and Mr. Baker, of Manbhoom, showed administrative ability of an exceptional degree. The remarks of Deputy Commissioners as to their subordinate officers are not included in the Commissioner's report. This omission should now be supplied.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Offg. Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 18th October 1890.

10	**Moorshedabad** „ 18, '90	5·89	Weather—most part of the week overcast and rainy; bright sunshine prevailing from this morning (18th). Prospects of *amun* favourable. In some parts it is in ear. *Kalai* has been much injured by the recent rain, but it is still being sown. The sudden rise of the Brahmini river has submerged a considerable portion of *amun* lands in Panchgram outpost in the Lalbagh subdivision. *Rubbi* being sown.. Agricultural loans and gratuitous relief are still being given.
Rajshahye Dtvn. 11	**Dinagepur** „ 18, '90	14·38	Rain and storm on 14th and 15th. Prospects of crops continue good. Floods have caused injury in the south, but to what extent not known until they subside.
	Thakurgaon ...	16·93	
12	**Rajshahye** „ 18, '90	8·20	Strong gale accompanied with heavy rain. Weather clear since yesterday (17th). Winter rice and other standing crops thriving well. Jute steeping and gathering in progress. *Bhadoi* almost gathered in. (In last week's return for "22,000" bighas of paddy land destroyed by tornado read "2,200" bighas.)
	Nattore ...	5·88	
	Nowgong ...	9·18	
13	**Rungpur** „ 18, '90	18·78	Heavy rain with storms on the 14th and 15th. Weather hot and gloomy at intervals. Standing crops in low lands have suffered much from rain. Prospects, however, are good. Prices high.
	Nilphamari ...	12·32	
	Kurigram ...	14·64	
	Gaibanda ...	15·35	
14	**Bogra** „ 18, '90	11·54	Weather—gloomy, rainy and excessively damp till 17th; now gradually clearing. Excessive rainfall from 12th to 16th has done some more harm to the transplanted rice in the west and north-west. In the middle and the east of the district this crop is still in very good condition, and the outturn and the prospects of all other crops are good throughout the district. *Kalai* is being sown, and land is being ploughed for the spring crops. A considerable extent of grazing ground has been under water, and there has been temporary scarcity of fodder. Common rice is selling at 18 seers a rupee.
	Sherpur ...	9·56	
15	**Pubna** „ 18, '90	3·30	Weather—cool and bright. Prospects of *amun* and *aus* continue as before. Winter sowings damaged by the late heavy rain.
16	**Darjeeling** ...	...	Report not received.
17	**Julpigoree** „ 18, '90	13·04	Weather—rainy and cool. Harvesting of jute going on rapidly. Standing crops doing well. No change in the price of rice.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Divn. 18	Dacca Oct. 18, '90	2·00	Weather—hot and mostly cloudy. Harvesting of jute nearly completed, and that of *aswini* paddy going on. Recent rain has done much good to the standing crops. Sowing of *rubbi* crops commenced. Fodder is available. Common rice sold at from 12 to 15 seers per rupee.
Dacca Divn. 19	Furreedpur ,, 18, '90	2·32	Weather—rainy. State of crops good. Common rice selling at 13 seers per rupee at head-quarters of all the subdivisions.
Dacca Divn. 20	Backergunge ,, 18, '90	3·72	Weather—seasonable. State and prospects of crops good. Common rice selling at about 13 seers per rupee.
Dacca Divn. 21	Mymensingh ,, 18, '90	4·10	Rain every day. Prospect of *amun* crop continues favourable. Coarse rice selling at 12½ seers per rupee.
Chittagong Divn. 22	Chittagong ,, 21, '90	0·88	Weather—seasonable. *Aus* harvested with average outturn. Prospects of *amun* good. Prices steady.
Chittagong Divn. 23	Noakholly ,, 18, '90	5·51	Weather—variable: cloudy at times. Mornings occasionally foggy. State of *amun* crop good. Lands being prepared for winter crops. Price of rice stationary.
Chittagong Divn. 24	Tipperah ,, 18, '90	4·40	Weather—seasonable. *Amun* expected to yield good outturn. Jute crop cut; market dull. Price of rice stationary.
Chittagong Divn. 25	Chittagong Hill Tracts. ,, 16, '90	2·10	Weather—rainy on the 10th, 11th, 12th, 15th and 16th. Harvesting of *jum* paddy still continues. Cotton in flower. Late rice crop in low lands progressing. Lands being ploughed for mustard. Common rice being sold at 12½ seers per rupee.
	Hill Tipperah ...	...	Report not received.
BEHAR.			
Patna Divn. 26	Patna ,, 18, '90	1·02	Weather—hot; cool at night. Paddy looks flourishing. *Rubbi* crops are being sown in the Barh subdivision; in other places fields are being prepared for sowing. Prospects of other crops on the ground are favourable. Prices of food-grains stationary.
	Barh ...	1·10	
	Behar ...	1·11	
	Dinapore ...	1·60	
Patna Divn. 27	Gya ,, 17, '90	0·32	Weather—clear and sometimes cloudy. Prospects of paddy and other crops favourable. Sowing of *rubbi* commenced. Sugarcane prospering. Prices of food-grains falling daily.
Patna Divn. 28	Shahabad ,, 18, '90	2·99	Weather—cool. The late rain has checked *rubbi* ploughing, and has harmed *bajra*, which, however, is cultivated only in small quantities. On the whole, the rain will not have harmed *rubbi*, and will, if anything, improve the paddy, which is now excellent.
	Buxar ...	2·06	
	Bhabuah ...	0·31	
	Sasseram ...	0 94	
Patna Divn. 29	Durbhunga ,, 18, '90	Figures not given.	Weather—cloudy and rainy during greater portion of the week. There has been sufficient rain this week. It has greatly improved the prospects of the rice crop. A break is, however, necessary to facilitate *rubbi* sowings. Prices almost stationary.
Patna Divn. 30	Mozufferpur ,, 18, '90	1·56	Weather—somewhat cloudy and cold. Prospects of rice crop excellent. Recent rainfall has done some harm to *rubbi* crops which are being sown. Prices stationary.
Patna Divn. 31	Sarun ,, 18, '90	1·93	Weather—seasonable. Much cooler since the rainfall early in the week. Prospects of crops very good, and still further improved by the rain which fell almost universally during the week.
Patna Divn. 32	Chumparun ,, 18, '90	6·83	Weather—cool and cloudy. Ploughing of fields for *rubbi* sowings stopped by incessant rain. Prospects of paddy very good.
Bhagulpore Divn. 33	Monghyr ,, 18, '90	2·29	Weather—cloudy and rainy. Prospects of standing crops continue favourable. Rain has been beneficial to the winter rice.
Bhagulpore Divn. 33	Begusserai ...	2·22	
Bhagulpore Divn. 33	Jamui ...	2·02	
Bhagulpore Divn. 34	Bhagulpore ,, 18, '90	5·41	Weather—cloudy and rainy for most part of the week. Prospects of winter rice much improved by the rain. *Kurthi* sowings complete.
Bhagulpore Divn. 34	Banka ...	3·35	
Bhagulpore Divn. 34	Mudhepura ...	2·32	
Bhagulpore Divn. 34	Soopool ...	1·35	
Bhagulpore Divn. 35	Purneah ,, 18, '90	6·22	Weather—much rain and stormy in the first portion of the week; now fair. State and prospects of crops favourable. *Rubbi* crops are being sown.
Bhagulpore Divn. 35	Kishengunge ...	13·00	
Bhagulpore Divn. 35	Arrareah ...	6·02	
Bhagulpore Divn. 36	Maldah ,, 18, '90	6·72	Weather—cloudy and damp; first five days very cool, since then sunny and bright. Prospects of winter rice crop continue favourable. *Kalai* sowings and preparation of lands for *rubbi* crops were retarded for the incessant rainfall during the first five days of the week. Price of rice unchanged.
Bhagulpore Divn. 37	Sonthal Pergns. ,, 18, '90	11·45	Weather—heavy rain and cloudy. Prospects of rice crop very good; an outturn above the average is expected. *Rubbi* sowings commenced.
	Deoghur ...	3·84	
	Jamtara ...	17·81	
	Pakour ...	11·60	
	Rajmehal ...	8·37	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	ORISSA.			
Orissa Divn.	38	Cuttack Oct. 18, '90	8·98	Weather—seasonable. The late rain has somewhat interfered with the sowing of *rubbi*. Prospects of *sarad* rice in the Jajpur subdivision have further improved.
Orissa Divn.	39	Pooree „ 16, '90	9·02	Weather—seasonable. Weeding of *sarad* crop almost over. *Mandia* and *kaliansa* are being harvested. Miscellaneous crops doing well. Price of common rice from 18 seers 6 chittacks to 27 seers 9 chittacks per rupee.
		Khoorda ...	4·59	
		Banpur ...	6·05	
Orissa Divn.	40	Balasore „ 18, '90	8·61	Weather—stormy. Outturn of *beali* crop estimated at 12 annas. Prospects of *sarad* crop estimated at nearly the same figure.
	CHOTA NAGPORE.			
	South-West Frontier Agency.			
Chota Nagpore Divn.	41	Hazaribagh Oct. 18, '90	0·25	Weather—seasonable. Nights getting cold. Prospect of winter rice excellent; 16 to 20 annas outturn expected. Sugarcane doing well. *Rubbi* crops being sown. Prices stationary.
Chota Nagpore Divn.	42	Lohardugga „ 18, '90	1·44	Weather—seasonable. Harvesting of *gora* rice continues. Prospect of winter rice continues favourable. *Rubbi* crops being sown here and there.
		Palamow (up to 13th)	Nil	
Chota Nagpore Divn.	43	Singbhoom Oct. 18, '90	0·89	Weather—seasonable and getting cold. Prospects of crops very satisfactory.
Chota Nagpore Divn.	44	Manbhoom „ 18, '90	2·96	A good deal of rain during early part of week. It has done immense good. Prospects of crops very favourable.
		Govindpore ...	3·08

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater.

The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers denoting cloud amount represent the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past ten years. The means of the district are the numerical average of the rainfall return received in the districts, *i.e.*, from total rainfall of the subdivisions in the district reading in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fall.

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 17th of October 1890.

Meteorological division.	District.	Station.	Rainfall.							Total		Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May 1890.	Average rainfall from 15th May to date.

Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 21st October* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 17TH OCTOBER 1890.

METEOROLOGICALLY speaking, the past week has been the most important of a very uneventful season, in that it furnished the severest cyclonic storm of the year up to date. It may be remembered that at the end of the previous week a low-pressure area had formed, with its centre between the Andamans and Madras. On the 11th it had intensified considerably and approached the coast, wind increased to a gale at Pooree and Gopalpore, and fierce squalls developed in the south and south-west quadrants of the whirl. On the 12th the centre of the depression continued its north-westerly march and crossed the coast during that night, winds meanwhile abating somewhat. On the 13th and 14th the depression moved northwards, its centre keeping steadily parallel to the coast; winds of course increasing at all points in its progress and quieting down in those localities from which it was receding. The far-reaching effects of the depression are exemplified, however, not so much by any very unusual wind velocity as by the general and very heavy rain which followed in its wake. So far as reports have been received, not one single station in the province, including Assam, Behar, and Orissa, fails to report rainfall, and in the great majority of cases the weekly fall exceeds the average for the whole month.

Pressure has been almost everywhere below the normal of the week, but owing to the movements of the depression it has of course varied greatly from day to day. The ultimate result is that it considerably above the average, with a disquieting element in the shape of a relatively low-pressure area in the south of the Bay. As might be expected, in Orissa and South-West Bengal have suffered the greatest defect (—·080″ to —·050″), whilst Behar and East Bengal are closest to the normal.

Temperature.—Consequent mainly on the depression, temperature was below the average by amounts varying from 0·9° in East Bengal to 3·8° in North Bengal. These refer to divisional averages, but local temperatures do not differ from them much. The tendency throughout the week at all places was distinctly towards a decline.

Winds were cyclonic at the beginning of the week. As the depression passed away they naturally became more feeble and variable in direction. At the close, however, they were again feebly cyclonic.

Rainfall.—As mentioned above, the rainfall has formed the most abnormal element of the weather for this season of the year. North Bengal records the highest divisional average, 11·26 (just eight times the weekly normal). Next come Orissa and South-West Bengal with 6·95″ and 6·30″ respectively, each about four times the normal quantity for the week. North and South Behar each received 3·41″ (about five times the normal), East Bengal 3·25″ (nearly double the normal), and Chutia Nagpur 1·53″, which is more than double its average fall. Some very heavy subdivisional falls are reported as under:—

Humidity and cloud proportion were very high throughout the week.

Weather has been dull and gloomy, and much rain has fallen. Northerly winds have set in West Bengal and along the Madras coast, and barometer has recovered everywhere. These are conditions favourable to an early cold season, but unfortunately they also favour the formation of another cyclonic storm, and the latter appears the more likely favourite.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 17th of October 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week. Of highest of each day.	Of lowest of each day.	Of mean for each day.	Average mean of week above or below normal mean of week.	Of week. Average.	Normal average.	Variation.	Rainy days. Average number in week.	Normal average number in week.	Variation.	Since 1st of month. Average.	Normal average.	Since 15th May 1890. Average.	Normal average.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; ≤, lightning; ●, continued rain; p, passing temporary shows; ≏, dew.

N. B.—In the weekly report from 28th September to 4th October 1890 read "149·5" for "14·59" as the maximum in sun of the 29th September, and also read "29·786" inches for "29·76" inches as the mean pressure of the 3rd October 1890.

J. H. GILLILAND,

The 20th October 1890.

MEMORANDUM.

Monthly review of deaths registered in forty-five districts of Bengal for the month of August 1890.

THE deaths registered in forty-five districts in Bengal during the month of August 1890 were 116,479, and correspond to an annual rate of 21·12 per 1,000 of the aggregate population of those districts, which is 65,859,534. This rate is 1·44 lower than the mean rate of the corresponding months of the past five years 1885—89, and is also lower than the rate of the corresponding period of any of the past five years except 1886 and 1888, *vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Monthly average of five years, 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	24·60	20·64	24·96	19·68	23·04	22·56	21·12

The following table shows the highest proportions of deaths registered during the month of August 1890, compared with the corresponding month of 1889 :—

Districts.	Ratio per *mille* during— August 1890.	August 1889.	*Districts.*	Ratio per *mille* during— August 1890.	August 1889.
Darjiling	37·20	42·00	Shahabad	29·88	38·16
Gya	36·84	42·00	Khulna	27·12	17·40
Chumparun	34·08	15·84	Mozufferpore	25·92	18·96
Patna	33·12	40·20	Julpaiguri	25·20	23·64
Noakhali	30·60	23·04	Hazaribagh	25·08	32·64

The total mortality during the month under review from the several registered death-causes is compared in the following table with the mortality from those causes in the corresponding month of 1889 and the average of the five years 1885—89 :—

	Ratio per *mille* during— August 1890.	August 1889.	Monthly average of five years 1885—89.
Cholera	1·32	2·64	2·64
Small-pox	·08	·06	·04
Fever	15·24	15·12	15·12
Bowel-complaints	·48	·96	·84
Injury	·72	·84	·72
Other causes	3·00	3·36	3·00

It will be seen from the above that there was a noticeable decrease in cholera deaths during August 1890. The mortality under the other heads was pretty much the same as in corresponding past periods.

The highest annual death-rates from cholera and fever occurred in the following districts :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*
Chumparun	11·64	Noakhali	28·08
Gya	6·48	Gya	24·84
Shahabad	6·00	Julpaiguri	23·64
Mozufferpore	5·64	Darjiling	23·52
Patna	4·68	Khulna	23·28
Sarun	3·00	Dinajpur	21·36
Durbhanga	2·28	Jessore	21·12
		Hazaribagh	20·88
		Rajshahye	20·40

The mortality of the month under review, according to *Sex*, *Class* and *Age*, was distributed as follows :—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	22·68	Christians ...	12·36	Under 1 year	151·20
Females... ...	19·68	Hindus ...	21·96	1 and under 5 years ...	25·68
Ratio of male deaths to every 100 female deaths calculated on the proportion such mortality bears to the total male and female population ...	115	Mahomedans ...	19·92	5 „ 10 „ ...	12·72
		Buddhists ...	13·56	10 „ 15 „ ...	10·80
		Other classes ...	16·68	15 „ 20 „ ...	12·96
				20 „ 30 „ ...	12·84
				30 „ 40 „ ...	14·04
				40 „ 50 „ ...	19·44
				50 „ 60 „ ...	27·96
				60 years and upwards ...	48·60

Detailed information regarding the mortuary statistics of the forty five districts of Bengal during the month under review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 15th October 1890.

Statement showing the Results of the Registration of Deaths in the Districts in Bengal for the month of August 1890.

Office of Sanitary Commissioner for Bengal,

The 15th October 1890.

W. H. Gregg, *Dip. Publ. Health, Camb.*,

Sanitary Commissioner for Bengal.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 4th October 1890.

Births.

The births registered during the week ending with Saturday, the 4th October 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 29·7 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 7·9 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885–89.	1890.
Ratio of births per 1,000 of the population per annum	27·9	21·1	15·4	25·0	19·8	21·8	29·7

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 13th Sept. 1890.	20th Sept. 1890.	27th Sept. 1890.	4th Oct. 1890.	Towns.	Weeks ending— 13th Sept. 1890.	20th Sept. 1890.	27th Sept. 1890.	4th Oct. 1890.
Burdwan	33·6	21·4	16·8	53·4	Narainganj	20·7	37·3	41·4	37·3
Midnapore	9·3	13·9	9·3	17·0	Chittagong	9·4	4·7	11·7	9·4

Dacca	14·9	15·6	21·4	13·0	Total ...	22·0	26·6	22·2	29·7

It will be seen that last week the highest birth-rate was returned from Rampore Beauleah (63·1) and the lowest from Utterpara (9 4). No births were registered during the week in Jessore town.

Deaths.

The deaths registered during the week under review correspond to an annual rate of 23· per 1,000 of the population. The rate of the week is 5·7 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years except 1887—*vide* the figures below : —

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885–89.	1890.
Ratio of deaths per 1,000 of the population per annum	39·2	33·4	18·3	25·4	24·1	28·7	23·0

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 13th Sept. 1890.	20th Sept. 1890.	27th Sept. 1890.	4th Oct. 1890.	Towns.	Weeks ending— 13th Sept. 1890.	20th Sept. 1890.	27th Sept. 1890.	4th Oct. 1890.
Burdwan	29·0	19·8	24·4	30·5	Narainganj	16·6	16·6	4·1	16·6
Midnapore	20·1	17·0	18·6	15·5	Chittagong	9·4	14·1	16·4	9·4

Ranaghat	6·0	29·9	6·0	6·0	Chupra	39·2	28·2	11·1	34·2
Santipore	19·3	14·0	.....	12·3	Bhagulpore	18·1	17·2	20·8	14·5
Jessore	42·8	18·4	6·1	18·4	Monghyr	21·7	35·3	28·9	30·7
Rampore Beauleah	39·4	31·5	36·8	36·8	Purneah	13·9	17·3	6·9	10·4
Darjiling	14·8	14·8	37·0	22·2	Poori	31·5	31·0	14·7	25·2
Dacca	28·6	21·4	22·1	17·5	Total ...	24·7	23·4	23·4	23·0

It will be seen that last week the highest mortality occurred in the town of Gya (47·1) and the lowest in Ranaghat (6·).

Measured by last week's mortality, the highest annual death-rates from cholera and fever occurred in the following towns:—

Cholera.	Ratio per mille.	*Fever.*	Ratio per mille.
Durbhanga	8·6	Gya	29·4
Chupra	8·0	Rampore Beauleah ...	28·9
Gya	6·1		
Patna City	3·6		

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 2·3 from cholera, against 1·6 per 1,000 in the preceding week; ·5 from small-pox, against ·04; 11·7 from fever, against 10·4; 2·6 from bowel-complaints, against 3·3; ·3 from injury, against the same ratio; and 5·6 from other causes, against 6·7 in the preceding week.

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males	22·9	Christians ...	7·5	Under 1 year ...	165·9
Females	23·0	Hindus ...	24·1	1 and under 5 years ...	32·5
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	99	Mahomedans ...	20·5	5 „ 10 „ ...	12·2
		Other classes ...	76·8	10 „ 15 „ ...	10·3
				15 „ 20 „ ...	9·0
				20 „ 30 „ ...	13·5
				30 „ 40 „ ...	13·9
				40 „ 50 „ ...	16·2
				50 „ 60 „ ...	29·5
				60 years and upwards ...	68·0

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,

The 17th October 1890. *Sanitary Commissioner for Bengal.*

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 4th October 1890.

FINANCIAL DEPARTMENT.

FINANCE.

Darjeeling, the 19th October 1890.

RESOLUTION.

THE Lieutenant-Governor is now in a position to review the actual financial results of the year 1888-89, the revised estimates for the year 1889-90, and the budget estimates for 1890-91. The Accountant-General's memorandum on the accounts of the first year has just been received, and the Government of India have considered the estimates which the Local Government formed of its financial position at the close of the past year, and of the funds at its disposal during the current year.

Part I.

ACCOUNTS OF 1888-89.

2. The revised estimate adopted in the Financial Resolution of the 28th September 1889 assumed that the year 1888-89 had opened with a credit balance of Rs. 33,09,000 and closed with a credit balance of Rs. 28,29,000, that the total amount available for expenditure was Rs. 5,22,10,000, and that Rs. 4,93,81,000 had been spent. The actual result was less favourable than this estimate by Rs. 1,77,917. The amount actually available for expenditure was Rs. 5,20,86,994, and the amount actually expended Rs. 4,94,35,920. The closing credit balance was Rs. 26,51,074. The following statement will show to what extent the anticipations formed at the beginning of the year were actually realized under each major head of account:—

REVENUE.

3. The net decrease of Rs. 1,22,997 under the head of Receipts is principally due to the fact that no credit was afforded to Provincial Revenues for the assignment made by the Government of India on account of the cost of the construction of a vessel to replace the pilot brig *Cassandra*, and for which a provision of one lakh was included in the revised estimate. The total cost on account of the

brig has been adjusted in the accounts of 1889-90. The principal change introduced into the accounts of 1888-89 is the reclassification of loans and advances, the control of which has been made over to the Provincial Government. The interest on these loans received during the year amounted to Rs. 24,820, viz.:—

	Rs.
On loans to Municipalities and other Public Corporations, excluding Presidency Corporation	1,324
On loans to landholders and other notabilities	345
On advances to cultivators	12,192
On advances under special laws	10,959
Total ...	24,820

The 4 per cent. payable to the Imperial Revenues on the amount advanced from the treasury amounted to Rs. 45,802, and the difference between the two amounts, Rs. 20,982, has been credited to Provincial under the head of Land Revenue.

EXPENDITURE.

4. The actual expenditure shows a net increase of Rs. 54,920 compared with the revised estimate. There was an increase of Rs. 83,198 under "Marine," in consequence of larger payments made than were anticipated to the Government Dockyard at Bombay for the cost of building the pilot brig to replace the *Cassandra*. The final adjustment of accounts also caused an increase of Rs. 14,632 under "Miscellaneous." Against these increases there was a decrease of Rs. 30,905 under "General Administration," caused chiefly by the restricted expenditure under "Tour expenses of the Lieutenant-Governor" and by savings under "Commissioners" on account of privilege leave absences of officers during the year. There were also small decreases under "Police" and "Scientific and other Minor Departments."

5. The transactions of the Provincial loans and advances not included in the cash account are as follow:—

	1889-90.		
	Outgoings.	Receipts.	Closing balance.
	Rs.	Rs.	Rs.
Advances to cultivators, &c.—Loans under the Land Improvement Act XIX of 1883 ...	2,44,714	56,233	1,88,481

Part II.

REVISED ESTIMATE, 1889-90.

6. A revised estimate, based on the actuals of eight months, was submitted to the Government of India with letter No. F $\frac{1-E}{41}$ 62, dated 30th January 1890. A few important changes in these estimates were again reported on the

6th March 1890. The year has now expired, and although the account has not yet been finally closed and is still open to adjustment, there are sufficient materials to make an approximate estimate of the actual financial position of the province at the close of the year. The following statement shows the revised estimates as framed by the Local Government, the estimates as modified by the Government of India, and the estimates as now adopted with reference to the preliminary actuals of the year :—

Receipts.	Revised estimate, Bengal Government.	Revised estimate passed by Government of India.	Revised estimate now adopted.

Receipts.

7. *Land Revenue.*—The total Land Revenue receipts for the year 1889-90, as estimated by the Local Government in January last, amounted to

Rs. 3,82,59,000, and this estimate was raised by the Government of India to Rs. 3,86,50,000. The Comptroller-General's statements show that the total collections in 1889-90 were Rs. 3,89,05,000. The 10 per cent. on collections from Government estates amounts to Rs. 4,14,000, and the total Provincial share of land revenue for the year is therefore one-fourth of (Rs. 3,89,05,000—Rs. 4,14,000) + Rs. 4,14,000, or Rs. 1,00,37,000. This amount has been taken as the revised estimate of Provincial share of Land Revenue (proper) for 1889-90. The adjustments between Imperial and Provincial will result in a net credit for Rs. 2,71,208 to the latter as shown below :—

Total ...	—8,34,000	+2,34,000	+2,71,208

The addition of Rs. 2,71,000 to the Provincial share of Land Revenue against a net credit for Rs. 8,34,000 to Imperial provided for in the revised estimate of the Local Government is chiefly due to the decision of the Government of India to appropriate the special contribution of 10 lakhs in 1890-91 instead of in 1889-90.

8. *Salt.*—The original estimate under this head was raised from Rs. 83,000 to Rs. 1,18,000 in consequence of the increase under "Rents of warehouses," caused chiefly by the reduction of the rate of rent from Rs. 5 to Rs. 3 for 1,000 maunds of salt bonded. The amount of salt bonded during the year was the largest on record, and the salt was kept longer in the golahs than formerly. The actual Provincial receipts have amounted to Rs. 1,24,000.

9. *Stamps.*—The revised estimate of the Local Government under this head, amounting to Rs. 1,05,75,000 (Provincial share), was raised to Rs. 1,06,50,000 by the Government of India. The Comptroller-General's statements show that the total receipts amounted to Rs. 1,42,38,000. The revised estimate of Provincial share has accordingly now been placed at Rs. 1,06,78,000. The increase was chiefly under court-fee stamps.

10. *Excise.*—The estimate of receipts under this head was originally placed by the Accountant-General at Rs. 1,11,09,000, but was reduced by the Local Government to Rs. 1,05,00,000, and this amount was passed by the Government of India. The results of the settlement of shops for the sale of country spirits having shown a decrease of more than 8 lakhs in license fees as compared with

the actuals of 1888-89, the estimate was reduced to Rs. 1,02,00,000 in the Financial Resolution dated the 28th September 1889, and the same figure was adopted in the revised estimate of the Government of India. The latest returns show that the total receipts of the year were not less than Rs. 1,04,75,000, and one-fourth of this, or Rs. 26,19,000, has been taken as the revised estimate of the Provincial share.

11. *Assessed Taxes.*—The revised estimate of the Local Government under this head, amounting Rs. 40,00,000, was raised by the Government of India to Rs. 40,50,000. The actuals amounted to Rs. 41,66,000, and half of this, or Rs. 20,83,000, has been taken as the revised estimate of the Provincial share. The greater portion of the increase was due to the careful revision of assessments in Calcutta.

12. The total receipts of the Civil Department amount to Rs. 38,20,000 against Rs. 36,83,000, the revised estimate adopted in the Financial Statement. The increase was chiefly under Jails.

13. *Railways.*—The following statement compares the estimates as originally proposed by the Local Government with those passed by the Government of India and those now adopted :—

	Revised estimate passed by the Local Government.	Revised estimate passed by the Government of India.	Revised estimate now adopted.

Total Provincial ...	61,58,000	65,20,000	64,19,000

The total Provincial gross receipts amounted to Rs. 1,25,04,000, thus:—

	Rs.
From the Eastern Bengal	72,70,000
Less excess over the contract assignment	11,69,000
	61,01,000
From other Sections of the Eastern Bengal System ...	41,87,000
Tirhoot	21,12,000
Nalhati	1,04,000
Total ...	1,25,04,000

14. *Irrigation—Major Works.*—The orginal estimate of Rs. 13,58,000 under this head was increased to Rs. 14,44,000 in the revised estimate, but the actuals amount to Rs. 15,21,000. The excess has been general, but is most marked on the Orissa and Sone projects.

15. *Civil Works.*—The receipts in charge of the Public Works Department were originally estimated at Rs. 3,75,000, but owing to the sale of the Burrakur Iron Works, and to the Akra Brick Factory having been leased out, a reduction was anticipated, and the revised estimate was placed at Rs. 2,42,000. The actual result has been better than this by Rs. 11,000, owing to the apportionment of the sale proceeds of the Burrakur Iron Works between Imperial and Provincial Funds having been made on the basis of the actual capital outlay to end of 1889-90 instead of on the outlay to end of 1888-89 as originally made.

Expenditure.

16. *Land Revenue.*—The estimate of the Local Government was raised by the Government of India by Rs. 12,000, in order to accord with the survey estimates passed in Finance and Commerce Department Resolution No. 736, dated the 12th February 1890. The latest information shows that the total expenditure under this head is not less than Rs. 35,67,000, and this figure has been taken as the revised estimate for 1889-90.

17. *Salt.*—The original estimate, amounting to Rs. 22,000, was raised by Rs. 67,000 to provide for the cost of Kilby's patent scales for the weighment of salt, the introduction of which into the Port of Calcutta was sanctioned by Government in July 1889. But as Rs. 15,685 could only be spent on this account in 1889-90, the estimate has been reduced to Rs. 46,000, which is the amount reported to have been actually spent during the year.

18. *Forests.*—The Government of India have reduced the estimate of the Local Government under this head from Rs. 4,50,000 to Rs. 4,10,000. The expenditure amounts to Rs. 3,90,000, and the revised estimate of the Provincial share has been placed at Rs. 1,95,000.

19. *General Administration.*—There was larger expenditure under "Commissioners" than had been provided for in the revised estimate, and the total estimate now stands at Rs. 16,16,000 against Rs. 15,93,000, the estimate passed by the Government of India.

20. *Law and Justice.—Courts of Law.*—The estimate of the Local Government under "Civil and Sessions Courts" was raised by the Government of India by Rs. 29,000 with reference to later actuals than were available when the estimate was submitted by this Government. The actual charges under the heads "High Court," "Law Officers," "Civil and Sessions Court," and "Criminal Courts" exceeded the estimates, and the total expenditure is not less than Rs. 81,58,000.

21. *Jails.*—The increase under "Jail Manufactures" was attended with a corresponding increase under receipts. The revised estimate now stands at Rs. 19,00,000 against Rs. 18,20,000 passed by the Government of India.

22. *Marine.*—There has been an increase of expenditure under "Purchase and hire of ships and vessels" and "Purchase of marine stores and coal for the building, repairs, and outfit of ships and vessels." The total charges are Rs. 12,03,000 against Rs. 11,48,000, the estimate passed by the Government of India.

23. *Education.*—There was an increase of expenditure under "Inspection" and "Scholarships," and the total expenditure is Rs. 24,94,000 against Rs. 24.73,000 passed by the Local Government.

24. *Stationery and Printing.*—The value of "Stationery supplied from Central Stores" in 1889-90 amounts to Rs. 5,07,000 against Rs. 5,30,000 provided for in the estimate of the Government of India. The revised estimate of total expenditure has been reduced from Rs. 10,13,000 to Rs. 9,87,000.

25. *Miscellaneous.*—The revised estimate now adopted amounts to Rs. 2,73,000 against Rs. 2,19,000 passed both by the Government of India and the Local Government. The increase has been under the heads of "Subscriptions to periodicals," "Donations for charitable purposes," and "Miscellaneous and unforeseen charges."

26. *Famine Relief.*—A lump grant of Rs. 3,75,000 was provided in the estimate under this head. The adjustment of charges between Provincial and Local Funds, which has been reported to Government, shows a debit of only Rs. 1,40,000 to Provincial, and this figure has been provisionally adopted as the approximate expenditure on this account.

27. *Construction of Railways.*—It was anticipated, when both the budget and the revised estimates were passed, that a net credit for Rs. 2,000 would be given to the Capital account of the Kawnia and Dharla State Railway, but the debits to "Capital" on account of the coal purchased for this section more than absorbed the credits arising out of the issue of stores to "Revenue."

28. *Irrigation—Major Works.*—The "Working expenses" of these works amounts only to Rs. 13,56,000 against Rs. 14,36,500, which was provided in the departmental estimate.

29. *Minor works.*—The latest information shows that the grant provided for expenditure on Capital account of the Orissa Coast Canal and the grant for Agricultural works could not be fully utilized within the year. The total expenditure amounts only to Rs. 14,19,000 against Rs. 16,96,000, the estimate passed by the Government of India.

30. *Civil works.*—The expenditure in charge of the Public Works Department shows an increase of Rs. 1,46,000 over the final grant, which is mainly due to the adjustment of the value of iron girders supplied by the Port Storekeeper, Calcutta, for the Mahanuddy bridge, to the Darjeeling hill cart road, and to roads in the Chota Nagpore Division.

31. *Contributions.*—The revised estimate of contributions in aid of Incorporated Local Funds for the year was Rs. 8,00,000, but the total amount drawn amounts to Rs. 11,83,000. The increase is mainly due to the payment of arrear contributions to District Funds for 1887-88 and 1888-89. The Accountant-General has been instructed to take steps to prevent the recurrence of such arrears in future, and to see that the fixed annual grants to District Boards are regularly paid at the commencement of the year for which they are due, and not deferred till applications are made for them.

32. *Closing balance.*—According to the revised estimates now adopted, the closing balance of the past year amounts to Rs. 37,87,000 against Rs. 35,39,000 anticipated by the Government of India when passing the estimate for the current year.

Part III.

BUDGET ESTIMATE, 1890-91.

33. The Lieutenant-Governor has already in separate Resolutions reviewed the estimates of receipts and expenditure for the current year under each head of account. Later information, however, has led to a modification of these in some respects. The following table shows the original budget of the Local Government, the figures accepted by the Government of India, and the estimates which the Lieutenant-Governor has finally resolved to adopt :—

To be substituted for pages 2165—2168 of the Supplement to the *Calcutta Gazette*, dated 29th October 1890.

Provincial surplus (+) or deficit ...	+52,000	−5,06,000	−12,81,000

34. *Land Revenue.*—The total collections in 1889-90 amount to Rs. 3,89,05,000, and the estimate for 1890-91 has been placed at Rs. 3,82,79,000. The collections in the first five months of the current year amounted to Rs. 74,72,000 against Rs. 77,50,000 obtained in the corresponding period of last year. These figures do not justify any change in the estimate of total collections, but the Provincial assets from the 10 per cent. on collections on Government estates, which were estimated at Rs. 3,60,000, with reference to the actuals of 1888-89, amounting to Rs. 3,26,000, amounted to Rs. 4,14,000 in 1889-90,

and as the receipts in the first four months of the current year show an increase of Rs. 13,000 over those of the corresponding period of last year, there is no reason why the estimate should be placed at a lower figure than four lakhs. The estimate on this account has accordingly been raised to Rs. 4,00,000. The Provincial share of the total revenue will therefore be one-fourth of (3,82,79,000—4,00,000)+4,00,000, or Rs. 98,70,000. The adjustments between Imperial and Provincial will probably result in a net debit of Rs. 10,99,000 against Provincial as shown below:—

	Annual estimate of the Government of Bengal.	Estimate of the Government of India.	Estimate now adopted.
	Rs.	Rs.	Rs.
Fixed contribution to Imperial ...	—6,90,000	—6,90,000	—6,90,000
Special benevolence to Imperial ...	.....	—10,00,000	—10,00,000
Hidgellee Tidal Canal ...	+2,10,000	+2,10,000	+2,10,000
Interest on exchange, Railways ...	+93,000	+93,000	+93,000
Inter-provincial adjustments ...	—82,000	+30,000	+30,000
Adjustment for Shajehanpore rum	+17,000	+24,000	+24,000
Half the cost of the Special Branch of the Police Office	+5,000	+5,000	+5,000
Adjustment for ganja exported ...	—44,000	—25,000	—25,000
Custom House Appraisers ...	+8,000	+8,000	+8,000
Conservation of ancient monuments ...	+1,000	+1,000	+1,000
Petroleum wharf establishment at Budge-Budge	+4,000	+4,000	+4,000
Eastern Bengal Railway Police ...	+41,000	+41,000	+41,000
Political charges	+21,000	+21,000	+21,000
Calcutta Police	+2,00,000	+2,00,000	+2,00,000
Forest survey charges ...	—3,000	—3,000	—3,000
New method of testing distillation of imported spirits ...	+3,000	+3,000	+3,000
Adjustment on account of the new classification of rewards out of criminal fines in excise and stamp cases	.....	.....	—30,000
For the up-keep of the *Rhotas* ...	.....	.....	9,000
Total ...	—2,16,000	—10,78,000	—10,99,000

The difference between the estimate of the Government of India and that now adopted is due to a credit for Rs. 9,000 afforded to Provincial for the up-keep of the *Rhotas*, and to a debit of Rs. 30,000 on account of the rewards paid out of criminal fines in excise and stamp cases being now adjusted departmentally, instead of, as formerly, under the wholly Provincial head of "Law and Justice."

35. *Salt.*—The receipts under this head during the first four months of the current year amounted to Rs. 43,000 against Rs. 39,000 obtained in the corresponding period of 1889-90. The total receipts in 1889-90 amount to Rs. 1,24,000; and as some further increase is anticipated when the railway siding and other works now under construction in the Sulkeah Salt Golahs have been completed, the estimate for 1890-91 has been raised from Rs. 1,00,000 to Rs. 1,30,000.

36. *Stamps.*—The total receipts from stamps amount to Rs. 1,42,38,000 in 1889-90 against Rs. 1,42,00,000, the revised estimate for the year. The details furnished in the district returns show that, while the receipts from the sale of "General stamps," including duties and penalties, increased by Rs. 1,14,000 in the first five months of the current year over those of the corresponding period of last year, the proceeds from the sale of "Court-fee stamps" and "Plain paper" diminished by Rs. 2,61,000. The increase under non-judicial stamps and the decrease under court-fee stamps have not been confined to one month, but have been spread over all the months except June, in which the receipts from court-fees were nearly equal in two years. A part of the latter decrease is probably due to the reduction of the rate of copying

fees from 4 annas to 3 annas per folio which has been sanctioned with effect from 1st April 1890, but an allowance of one lakh was made for this in the estimate originally sanctioned. These figures give some cause for anxiety as to the continued expansiveness of this source of revenue, and they certainly tend to show that it will not be safe to adhere to the original estimate of Rs. 1,42,00,000. The estimate under "General stamps" will be raised from Rs. 39,37,000 to Rs. 42,00,000, and that under "Court-fee stamps" reduced from Rs. 1,02,63,000 to Rs. 98,00,000, and the total placed at Rs. 1,40,00,000. The Provincial share will amount to Rs. 1,05,00,000.

37. *Excise.*—The estimate of total revenue under this head amounts to Rs. 1,02,00,000. The Comptroller-General's statements show that the actual receipts in 1889-90 amounted to Rs. 1,04,75,000. The results of the recent settlement of excise shops for 1890-91 show a falling off of nearly two lakhs in "License fees" as compared with the last year, but the details furnished in the district returns show that, while the receipts from "License fees" diminished by Rs. 1,77,000 in the first five months of the current year, the receipts under other heads increased by Rs. 1,55,000. In view of these figures, and looking to the falling off of revenue in the Patna Division in particular, the Lieutenant-Governor considers that it will not be safe to place the estimate for the current year at a higher figure than Rs. 1,04,00,000. The Provincial share will be Rs. 26,00,000.

38. *Customs.*—The revised estimate of Provincial receipts under this head for 1889-90 now stands at Rs. 55,000. The receipts during the first four months of the current year show an increase of Rs. 2,000, and there is no reason to anticipate any falling off. The estimate will be raised from Rs. 50,000 to Rs. 55,000.

39. *Assessed Taxes.*—The Government of India placed both the revised estimate for 1889-90 and the estimate for 1890-91 at Rs. 40,50,000. The receipts in 1889-90 amount to Rs. 41,66,000. The estimate for the current year can safely be raised to Rs. 41,50,000. The Provincial share will stand at Rs. 20,75,000.

40. *Forests.*—The estimate of total receipts has been reduced by Rs. 14,000, and a corresponding reduction has been made on the expenditure side.

41. *Interest.*—The Government of India have accepted the revised estimate of loans and advances for 1889-90 as passed by this Government, but have made a lump deduction of Rs. 6,85,000 from the provision made under the head of "Loans to municipalities and other local bodies" for 1890-91. This deduction will reduce the estimate of Provincial receipts from Interest by Rs. 15,000, and the amount payable to the Imperial Government by Rs. 14,000. The estimate of Provincial receipts will therefore be reduced from Rs. 1,59,000 to Rs. 1,44,000.

42. *Law and Justice—Courts of Law.*—The total receipts under this head in the first four months of the current year show an increase of Rs. 29,000 over those of the corresponding period of last year. The approximate actuals for 1889-90 were Rs. 8,03,000. The estimate for the current year will be raised from Rs. 7,84,000 to Rs. 8,00,000.

43. *Jails.*—The Inspector-General of Jails originally estimated the total receipts for the current year at Rs. 8,32,000, and this was accepted by the Local Government. This estimate has since been raised by Rs. 1,80,000 on account of the anticipated sale proceeds of castor-oil to be supplied to the Eastern Bengal State Railway, a corresponding additional grant being made on the expenditure side for the purchase of seed. The estimate now stands at Rs. 10,12,000.

44. *Marine.*—The original estimate under this head amounts to Rs. 8,76,000 against Rs. 8,54,000, the latest estimate for 1889-90. The receipts in the first four months of the current year show a decrease of Rs. 11,000 as compared with those of the corresponding period of last year. The Lieutenant-Governor does not consider it safe to take more than Rs. 8,40,000 as the estimate for the current year.

45. *Medical.*—The estimate of receipts under this head amounts to Rs. 1,40,000 against Rs. 1,46,000, the revised estimate as it now stands. The receipts from Medical College and School fees in the first four months of the current year show a small increase, and there is no reason to suppose that the total receipts will be less than those of the preceding year. The estimate will accordingly be raised to Rs. 1,46,000.

46. *Superannuations.*—The Provincial receipts under this head consist chiefly of contributions received from officers employed on foreign service. The original estimate for the current year stands at Rs. 56,000 against Rs. 45,000, the latest estimate for 1889-90. The increased provision is due to the anticipated increase in receipts, with reference to the Government order directing that contributions shall be levied on the salaries of employés of Municipalities and District Boards whose services have been declared to be qualifying for pension. The estimate will now be further raised by a sum of Rs. 75,000 on account of arrear contributions to be recovered from the salaries of employés under Road Cess and Educational officers transferred to the District Boards.

47. *Railways.*—The estimates of State Railways as passed by the Government of India have been compared below with the latest estimates for 1889-90 and those originally adopted by this Government for the current year:—

	Estimate, 1890-91.		Latest estimate, 1889-90.
	Bengal.	India.	
Receipts—			
	Rs.	Rs.	Rs.
Eastern Bengal ...	72,00,000	75,10,000	72,70,000
Other branches ...	38,00,000	39,90,000	41,87,000
Tirhoot ...	21,50,000	22,50,000	21,12,000
Nalhati ...	1,01,000	1,01,000	1,04,000
Total ...	1,32,51,000	1,38,51,000	1,36,73,000
Expenditure—			
Eastern Bengal ...	33,60,000	33,60,000	31,01,000
Other branches ...	17,40,000	17,40,000	20,02,000
Tirhoot ...	9,94,000	10,00,000	9,06,000
Nalhati ...	80,000	80,000	76,000
Total ...	61,74,000	61,80,000	60,85,000
Net Receipts—			
Eastern Bengal ...	38,40,000	41,50,000	41,69,000
Other branches ...	20,60,000	22,50,000	21,85,000
Tirhoot ...	11,56,000	12,50,000	12,06,000
Nalhati ...	21,000	21,000	28,000
Total ...	70,77,000	76,71,000	75,88,000
Deduct excess of net receipts of the Eastern Bengal Railway over the contract assignment of 30 lakhs	8,40,000	11,50,000	11,69,000
Total Provincial ...	62,37,000	65,21,000	64,19,000

The latest returns from the Examiner of Accounts show that the receipts of the Eastern Bengal System during the first five months of the current year were more than 2 lakhs in excess of those during the corresponding period of the past year. But against this increase must be taken into account the falling off of revenue owing to the interruption of traffic, though temporary, occasioned by the floods on both the Northern Bengal and Eastern Bengal State Railways. The decrease in the first week of September amounted to about Rs. 56,000. The management of the Tirhoot State Railway has been made over to the Bengal and North-Western Railway Company under an agreement from the 1st July 1890,

62. *Marine.*—The original estimate under this head, amounting to Rs. 8,86,000, includes a provision of Rs. 10,000 for grant to the Balasore Port Fund. As grants of Rs. 20,000 have been sanctioned to each of the "Balasore" and "Cuttack and Pooree" Port Funds, the estimate will be raised by Rs. 30,000. It will be further increased by Rs. 9,000 to provide for the up keep of the *Rhotas*, which has now been transferred to Provincial with an assignment of a like amount. The grant will stand at Rs. 9,25,000.

63. *Education.*—The estimate under this head has been reduced by Rs. 6,278, and a grant of a corresponding amount has been made to the Public Works Department for additions and alterations to the Gya Zillah School building. The grant now stands at Rs. 24,61,000.

64. *Medical.*—The expenditure under this head for 1890-91 has been estimated at Rs. 15,11,000 against Rs. 15,27,000, the latest estimate for 1889-90. The charges under Medical establishment show however no Reduction and the estimate will, therefore, be raised to Rs. 15,27,000. The estimate does not include any provision for the salary of the Sanitary Engineer and the establishment and other contingent charges of the Sanitary Board now formed under the orders of the Government of India. An Engineer has been appointed with a salary of Rs. 700 and an allowance of Rs. 100 per mensem and a small establishment, costing Rs. 39 per mensem, has been sanctioned. A provision of Rs. 7,000 will be made on this account. The total grant will stand at Rs. 15,34,000.

65. *Superannuations.*—The Provincial expenditure under this head in past years has been as follows:—

		Increase.
	Rs.	Rs.
1884-85	11,99,000	.....
1885-86	12,39,000	40,000
1886-87	12,68,000	29,000
1887-88	12,80,000	12,000
1888-89	13,70,000	90,000
1889-90	14,36,000	66,000
Estimate, 1890-91	14,47,000	11,000

The increase in the last five years amounted to Rs. 2,37,000, or an average of Rs. 47,000 a year. The actuals of the first four months of the current year show an increase of about Rs. 13,000 as compared with the corresponding period of last year. In view of these figures, it will not, be safe to place the estimate for the current year at a lower figure than Rs. 14,70,000.

66. *Miscellaneous.*—The estimate of Rs. 2,46,000 under this head has been raised to Rs. 2,51,000 to provide for an increased grant of Rs. 3,600 to the St. Mary's House of Charity Building Fund, and for the regrant of Rs. 1,352, being the unexpended balance of the Government grant on account of the passage-money of Clewer sisters, to the Honorary Secretary, Lady Canning Memorial Fund.

67. *Railways—Subsidized companies, land, &c.*—The original estimate of Rs. 5,000 under this head represents the capitalized value of the abatement of Government revenue to be credited to Government and debited to the Provincial revenues under the head "Tarkessur Railway." The estimate does not provide for the cost of land required for the construction of a metre-gauge railway from Julpigoree to the tea districts in the Western Dooars and for establishment required for the demarcation of land. It has been decided to meet the charge from Provincial revenues, and the Board of Revenue have been asked for a rough estimate of the cost of land. In the meantime a provision of Rs. 11,000 will be made on this account.

68. *Minor Works and Navigation.*—The estimate of the Government of India, amounting to Rs. 17,33,000, will be raised by Rs. 16,921, the amount added to the grant for expenditure by the Collector of Gya on irrigation in Government estates, and by Rs. 3,000 for the adjustment of expenditure on Kutubdia embankments in the Chittagong Division under this head. The total grant thus stands at Rs. 17,53,000.

69. *Civil Works by Public Works Department.*—The grant under this head was originally fixed at Rs. 28,97,000. This has subsequently been raised to Rs. 30,20,000 by the following additions and deductions :—

	Rs.	Rs.
As originally fixed		28,97,000
Add—		
Grant for the telegraph office at Budge-Budge	17,478	
Grant for the construction of pontoons (Rs. 28,210), crane and other works (Rs. 3,750) in the Sulkea Salt Golahs	31,960	
Grant for additions and alterations to the Gya Zillah School building	6,278	
Grant for the construction of a metalled road from Matigurah to Nuxulbari	60,000	
Grant for the construction of Jailors' quarters in the Rungpore Jail	2,124	
Grant for the repairs of the river bank in proximity to the Nawab's Palace at Moorshedabad .	25,000	
Grant for the repairs of the roads from Buxa and Santrabari to Chunabatti	3,000	
	———	1,45,840
		30,42,840
Deduct—		
Grant to the District Board of Gya	20,000	
„ Durbhunga Municipality ...	2,426	
	———	22,426
		30,20,414
Or in round numbers ...		30,20,000

A further grant of four lakhs will now be made to enable the Public Works Department to undertake urgent works, and especially to defray the cost of repairs and maintenance of the roads in the Darjeeling district where considerable damage has been done by the recent rains. The total grant will now stand at Rs. 34,20,000.

70. *Civil Works by Civil Department.*—The estimate under this head was originally passed for Rs. 88,000. The estimate has since been raised by Rs. 2,000 to meet the Government contribution to the Mahomedan Burial Board. It will further be raised by (2,426+1,653=) Rs. 4,079 for grants already sanctioned to the Durbhunga and the Calcutta Municipalities for the maintenance of certain roads formerly under the control of the Public Works Department and the 24-Pergunnahs District Board respectively. The total grant thus stands at Rs. 94,000.

71. *Contributions.*—The original estimate of Rs. 8,30,000 for grants-in-aid of District and other Incorporated Local Funds will be retained.

72. *Closing balance.*—According to the estimate originally passed by this Government, it was expected that the year would close with a credit balance of Rs. 20,32,000. According to the estimates now adopted, the closing balance will be Rs. 25,06,000. The improvement in the resources of the Local Government is chiefly caused by the increase under the head of Railway receipts. When the estimates were submitted to the Government of India by the Financial Department in March last, the figures of the Public Works Department, which were available at the time, showed Rs. 1,22,89,000 and Rs. 1,24,11,000 as the estimated gross receipts for 1889-90 and 1890-91 respectively. A more favourable forecast, based on later information, was submitted to the Government of India direct by that Department, and the estimates, as now finally adopted, amount to Rs. 1,25,04,000 and Rs. 1,27,01,000. The net increase in the two years amounts to Rs. 5,05,000.

ORDER.—Ordered that a copy of this Resolution be submitted to the Government of India, Department of Finance and Commerce, for information.

and there is no later information to justify any alteration of the estimate passed by the Government of India. This estimate of net receipts amounting to Rs. 65,21,000, showing an increase of Rs. 1,02,000 over the latest estimate for 1889-90, will be retained.

48. *Irrigation—Major Works.*—The revised estimate under this head for 1889-90 was originally placed at Rs. 14,44,000, and the estimate for the current year at Rs. 14,50,000. The total receipts in 1889-90 amount to Rs. 15,21,000, but the collections in the first three months of the current year were Rs 2,22,000 against Rs. 2,92,000 realized in the same period of 1889-90. In view of the fluctuating character of these receipts, the Lieutenant-Governor does not consider it safe to alter the estimate passed by the Government of India.

49. *Minor Works and Navigation.*—The returns from the Examiner of Public Works Accounts show that the receipts in the first three months of the current year amounted to Rs. 1,37,000 against Rs. 1,33,000 realized in the corresponding period of last year. The total receipts in 1889-90 amounted to Rs. 7,89,000. It will not be safe to place the estimate for the current year at a higher figure than Rs. 8,00,000. The estimate will accordingly be reduced by Rs. 32,000.

EXPENDITURE.

50. *Land Revenue.*—The Government of India have raised the original estimate of total expenditure under this head by Rs. 23,000 to accord with the estimates of the Surveyor-General passed by that Government in the Finance and Commerce Department Resolution No. 736, dated 12th February 1890. The estimate will further be increased by Rs. 2,000 for the purchase of an elephant for the Chittagong Division, for which no provision was made in the budget. The estimate of total expenditure, which would thus have risen from Rs. 36,16,000 to Rs. 36,41,000, will be reduced by Rs. 3,000, the amount transferred to the Public Works Department, Irrigation Branch, for the maintenance of the Kutubdia embankments in the Chittagong Division. The estimate will then stand at Rs. 36,38,000.

51. *Salt.*—The original estimate under this head, amounting to Rs. 30,000, was raised by Rs. 36,000 for the construction of pontoons on the river frontage of the Sulkea Salt Golahs, and of a shunting line directly connecting the golahs with the East Indian Railway. Since then a regrant of Rs. 51,425 for the purchase of Kilby's scales has been sanctioned, and an additional grant of Rs. 2,861 has been made for the completion of the sidings. The charge for pontoons, amounting to Rs. 28,210, has since been transferred to the Public Works Department. The estimate has provisionally been placed at Rs. 93,000.

52. *Stamps.*—The Government of India have raised the Provincial expenditure under this head by Rs. 25,000, chiefly under "Stamp paper supplied from Central Stores," to accord with the figures adopted in the India estimates. It has recently been decided that the rewards for the prevention or detection of offences against the laws of the Excise and Stamp Departments should be debited to "Excise" and "Stamps" respectively, and not to "Law and Justice." The new classification has come into force from the 1st April 1889, and to meet the additional liability thrown on the Imperial revenues by the change, Rs. 28,859 and Rs. 30,000 have been deducted from the Provincial share of Land Revenue for 1889-90 and 1890-91 respectively. The rewards in stamp cases are, however, comparatively few, and a grant of Rs. 1,000 will probably be sufficient for the purpose. On the other hand, it is probable that there will be some reduction under discount of stamps. On the whole, the Lieutenant-Governor considers that a grant of Rs. 3,85,000 on Provincial account against Rs. 3,83,000, the latest estimate for 1889-90, will suffice, and this figure has accordingly been now adopted.

53. *Excise.*—The original estimate under this head, amounting to Rs. 5,79,000, was subsequently raised by Rs. 40,000 to meet the cost of the construction of new distillery buildings required for the introduction of the central distillery system throughout the whole of the Presidency, Burdwan, Dacca, and Orissa

Divisions. A provision of Rs. 39,000 has also been added under the head for rewards in excise cases, a corresponding reduction being made under "Law and Justice." The total estimate will therefore stand at Rs. 6,58,000, and the Provincial share at Rs. 1,64,000.

54. *Provincial rates.*—The estimate for the current year is thus compared with the latest estimate for 1889-90:—

	Latest estimate, 1889-90.	Estimate, 1890-91.
	Rs.	Rs.
Public Works Cess establishment ...	25,000	48,000
Road Cess establishment	3,12,000	2,67,000
Total ...	3,37,000	3,15,000

In view of the approximate actuals for 1889-90, the estimate under the head of Road Cess establishment has been raised to Rs. 3,00,000, and the total placed at Rs. 3,48,000.

55. *Customs.*—The estimate under this head will be raised by Rs. 4,181, to provide for the cost of the establishment and contingencies required by the Collector of Customs, Calcutta, for the purpose of working Kilby's patent scales for the weighment of salt in the Port of Calcutta. It will now stand at Rs. 5,54,000.

56. *Forests.*—The Government of India have raised the estimate of expenditure under this head by Rs. 14,000, to provide for the forest survey charges. Against this increase there has been a reduction of a like amount as explained in paragraph 40 above. The Provincial share of the estimate amounts to Rs. 2,23,000.

57. *Interest on Ordinary Debt.*—As explained in paragraph 41, the estimate of expenditure will be reduced from Rs. 1,22,000 to Rs. 1,08,000, as passed by the Government of India.

58. *General Administration.*—The estimate of the Local Government includes a provision of Rs. 3,000 for the cost of two elephants for the Superintendent of the Tributary Mehals, Orissa. The Secretary of State has recently sanctioned the appointment of an Additional Commissioner for the Patna Division for nine months on Rs. 2,500 per mensem, and a provision of Rs. 16,000 has been made for this purpose. The estimate will therefore stand at Rs. 15,82,000.

59. *Law and Justice—Courts of Law.*—The estimate under this head will be raised by Rs. 18,000 to provide for the salary of six additional Munsifs sanctioned since the estimate was passed. Against this increase the estimate will be reduced by Rs. 40,000, being the amount transferred to "Stamps" and "Excise" on account of rewards for the prevention and detection of offences against the laws of the Stamps and Excise Departments. The total estimate will stand at Rs. 82,41,000.

60. *Jails.*—The difference of Rs. 3,000 between the original estimates of this Government and the Government of India is under the sub-head "Clothing and Bedding" under District Jails. The estimate has further been increased by Rs. 1,80,000, to provide for the purchase of castor-seed. Against this increase a sum of Rs. 2,124 has been deducted and made over to the Public Works Department for the construction of Jailors' quarters at Rungpore. The grant now stands at Rs. 20,70,000.

61. *Police.*—The Government of India have raised the estimate of this Government by Rs. 22,000. The reductions approved in the Resolution of the Home Department, No. 742, dated the 28th October 1889, have not been entirely carried out. The approximate actuals for 1889-90 were Rs. 52,99,000, and the actuals of the first four months of the current year do not show any falling off in expenditure as compared with those of the corresponding period of last year. In view of these figures, the Lieutenant-Governor does not consider it safe to place the estimate for the current year at a lower figure than Rs. 52,80,000.

Ordered also that a copy of the above Resolution be forwarded to the Board of Revenue; to all Commissioners of Divisions; to the Inspectors-General of Civil Hospitals, Police, Jails, and Registration; to the Directors of Public Instruction and Land Records and Agriculture; to the Conservator of Forests; to the Port Officer, Calcutta; to the Superintendents of Botanical Gardens and Government Printing, Bengal, and to all Departments of this Government, for information.

Ordered also that a copy of the above Resolution be forwarded to the Accountant-General, Bengal, for information, with special reference to paragraph 31.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,
Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON PUBLIC INSTRUCTION IN BENGAL FOR THE YEAR 1889-90.

GENERAL DEPARTMENT—EDUCATION.

Darjeeling, the 20th October, 1890.

RESOLUTION.

READ—

The Report on Public Instruction in Bengal for the year 1889-90.

The Education Department was in the charge of Sir A. Croft, K.C.I.E., during the year, except for the period of three months in which Mr. C. H. Tawney, C.I.E, acted for him and submitted the annual report for 1888-89. The greater length of the report now submitted than that of last year is in accordance with the wishes of Government that details should be fully examined only in alternate years. But the account furnished of the year's operations is no less interesting than any of the series which for some years past Sir A. Croft and Mr. Tawney have added to the records of the Education Department and of Government. These reports are always highly creditable to the Department of Public Instruction in Bengal. The Lieutenant-Governor has much pleasure in noticing that the present report has been laid before Government by the prescribed date.

Number under instruction.

2. The total number of pupils under instruction in the educational institutions of all classes only rose by 9,773 in comparison with the previous year. This increase was secured among private as distinguished from public institutions; the latter on the whole showed some decline. The falling off in the number of college students was slight, and, generally speaking, the figures betoken the same eagerness as has been previously noticed on the part of the upper and middle classes of the community to avail themselves of the advantages of education. The chief factor in the decrease of public institutions is to be found in the loss of aided lower primary schools, whereas the gain in the number of private institutions is partly attributable to the discovery of 1,750 elementary Koran schools hitherto unrecorded in the Dacca and Chittagong Divisions, and partly to an increase of elementary indigenous schools. Too much importance must not be attached to the fluctuations in the numbers of the lower primary schools. The indigenous schools of Chittagong, for instance, present endless difficulties in the way of accurate classification, so that primaries disappear only to be counted in another category as Koran schools. The tenure of the lowest fringe, or, to use another metaphor, of the outer circle of these primaries is described as thoroughly precarious and unstable. Hundreds, or even thousands, of these are set up, carry on feebly and intermittently for a period, and then disappear, leaving no trace. The Director has opportunely raised the question whether the country or the cause of education derives any advantage from the expenditure of money on such ephemeral schools, which make no appreciable impression on the ignorance of the rural population. The anxiety of Government to extend elementary education has been constantly declared and is an established principle of the educational policy; but a mere superficial extension, with a view to show larger numbers on the list of pupils, without requiring any depth or conformity with the existing standard, does not commend itself to the Lieutenant-Governor. The money available for primary education is necessarily limited in amount, and it is essential, in the interests of economy and of the really useful schools, that the allotment should be spent with discrimination. Under present circumstances, therefore, while the primary grant remains inexpansive, the consolidation, rather than an unlimited extension, of the primary system appears to be advisable, and the Director's recommendation is therefore accepted that, for the present, admission to the reward examination should be limited to schools that satisfy certain conditions as to number and progress of pupils as determined by inspection *in situ*, and that no school so admitted should be entitled to any reward unless it earns at the examination a certain minimum sum. The progress of education cannot be gauged by the test of numbers alone, on which the changes in the schools of the lowest grade have an effect so disproportionate to their real importance. The increase of 26,909 schools and 672,893 pupils in 10 years undoubtedly represents a real advance in the demand for education.

Financial results.

3. The expenditure as verified by the Accountant-General's figures has again exceeded the sanctioned estimate. The excess of Rs. 51,182 has, however, been balanced to a great extent by a surplus of Rs. 33,506 over the estimated receipts. After allowing for certain charges to be debited to the Public Works Department, the net deficit is only Rs. 6,295. The explanation offered by the Director deserves consideration. His budget, it appears, was reduced by the Accountant-General by the large sum of Rs. 1,64,000 on account of probable savings, after examination of the actuals of the preceding year, and he was then required to retrench Rs. 30,000 more to assist the financial necessities of Government. The result shows that, when the effect of the probable savings has been thus discounted, it is practically almost impossible for the reduced estimates to bear further curtailment. The Lieutenant-Governor recognises the loyalty with which the Director and the Department have endeavoured to meet the views of Government, and he trusts that vigilance and care may be constantly exercised in keeping down expenditure and in realizing the best possible value for the cost incurred. The total sum spent in Bengal on education of all descriptions, from the highest to the lowest, amounted to Rs. 87,43,000, an increase of Rs. 75,000 over the preceding year. The contribution from public sources declined from Rs. 32,44,000 to Rs. 32,37,000, while private expenditure rose from Rs. 54,24,000 to Rs. 55,06,000. Collegiate, secondary, primary, female, and special education were all more costly than in the previous year, whereas comparative economy was exercised in the item of buildings to the sum of a lakh and a half of rupees. The municipal contributions stand at exactly the same sum, Rs. 83,000, as last year; the Lieutenant-Governor would be glad to hear of their being increased. Steps have been taken to make the figures furnished by the municipalities to the Department correspond with those supplied by them to Government. There are difficulties in the way, it is admitted, but the matter should continue to receive attention.

District Boards as controlling agencies.

4. The educational functions delegated to the District Boards constituted under Act III (B.C.) of 1885 include the management of Government primary and middle schools, the distribution of the grant-in-aid allotment for middle schools under private management, the administration of the primary grant, the conduct of the annual examinations of primary schools for rewards, and the award of lower primary scholarships. The Boards are also authorized to establish and maintain, with the sanction of Government, schools of technical instruction, and some have already taken up this question with interest and energy. The Technical Institute, for example, established by the District Board of Rungpore, has attained considerable success. With the object of defining more clearly the functions of the Boards and their relations to the officers of the Department, revised educational rules under the Act were under consideration and public criticism during 1889-90, and finally promulgated by Government on the 18th April last. Experience has already shown the new rules to be greatly superior to the old. They give somewhat larger powers to the District Boards than they had previously enjoyed, while any departure from the existing system, in regard to the administration of funds or the control of schools, is made conditional on the sanction of Government. The power of the Inspector and his position as a controlling officer are more clearly defined. In accordance with the views of Government, Deputy Inspectors of Schools have in nearly every district been appointed ex-officio members, not only of the District Boards, but also of the Education Committees to which these bodies have generally delegated their ordinary executive duties. The advantages of this plan are already apparent, co-operation and efficiency having often taken the place of friction and mismanagement. The Lieutenant-Governor has again the pleasure of observing that the relations between the Boards and the Deputy Inspectors in the majority of districts are eminently satisfactory. Government must look to the good offices of the authorities in the Burdwan and Orissa Divisions, in which differences have arisen, to put things straight as soon as possible. On the other hand, there are indications that in some places the education work of the District Boards has been allowed to lapse too much into the hands of the Chairman or Vice-Chairman in his executive capacity. While the Lieutenant-Governor allows that there is some force in the excuse that it is ordinarily not easy to arouse any enthusiasm for educational work, except

on such occasions as present opportunities for the exercise of patronage, he desires that the District Boards, through their Education Committees, may be fully consulted in all matters of principle and importance, and that their functions may not be over-ridden by the executive officers. The Director has, in a very proper spirit, as a friendly critic, drawn attention to some shortcomings in the work of certain District Boards. It is through no fault on their part that their educational operations have in some cases been hampered for want of funds, the income from ferries and pounds not having kept pace with their educational requirements. But they must be held responsible for such matters as great delay in the despatch of business, especially in disposing of reward bills and in making up examination results, irregularities in the method of accounting for public money, misapplication of the primary grant, or failure to spend fully the allotments for primary education. These are matters which the District Boards are quite capable of correcting for themselves. It is not a matter for surprise that their control and management of middle schools of various classes is less efficient than when the work was performed by high officers of the Education Department. Sir Alfred Croft rightly observes that this decline in efficiency is part of the necessary price paid for Local Self-Government. The policy of entrusting District Boards with certain educational work, in which the Department has given them its steady support, has been deliberately adopted for reasons which have often been stated, and improvement can only be obtained by perseverance. The transfer of large educational powers to Local, as distinguished from District, Boards appears to have been prematurely attempted in some places.

Inspection.

5. The Circle Inspectors have all done a large amount of inspection duty. Among the Deputy Inspectors it is noticeable that the average number of days spent on tour varies from 118 in Orissa and 131 in the Chittagong Division to 198 in the Bhagulpore and 203 in the Patna Division. It is not explained why there should be such marked differences between one division and another, and the Director has taken proper notice of the unsatisfactory explanations offered by the three Deputy Inspectors in Orissa for their deficiencies in touring. A change in the system of reckoning the duration of tours makes any comparison with the previous year difficult. During the year the heading "days on tour" in the tabular statement of inspections has been changed to "days on tour outside head-quarters," and it has been ordered that all work done by an officer who returned the same night to his house without overpassing the five-mile limit should be reckoned as head-quarters work. The object of this change has been to frustrate the designs of some officers whose returns of inspection, showing a numerically high average of work, had been secured by the easy device of visiting schools at and near head-quarters with unnecessary frequency. The Lieutenant-Governor entirely concurs with Sir A. Croft that it is the duty of Deputy Inspectors to spend at least 150 days on actual tours within their districts, and that there is no reason why head-quarters schools should be neglected in consequence of the new rule. He will be requested to bring to the notice of Government any cases of its abuse. The inadequacy of the clerical assistance afforded to the Deputy Inspectors is a serious matter. The increased office work thrown on them since the creation of District and Local Boards, and the correspondence that will be entailed by the working of the transfer rules for primary and middle schools, are calculated to diminish their activity as inspecting officers if proper help is not allowed them. This matter has been represented to Government, but, owing to financial considerations, it has been hitherto impossible to apply a remedy. The Director will be desired to resubmit the case. The Sub-Inspectors have for the most part complied with the prescribed minimum of inspection duty, viz. 200 days and 400 schools. But the opinion of superior officers inclines to the view that there is some falling off in efficiency in their work, and that the control formerly exercised by the Department was firmer than that of the District Boards to which the Sub-Inspectors have been transferred. The anomalous position occupied by these officers may partly account for this: they have become the servants of the Boards for their work and their pay, while they are still eligible for promotion to and in the subordinate graded service; they are not under the direct control of the Deputy Inspector, but must necessarily depend largely upon his good opinion and endeavour to work up to his views.

University education.

6. During the last three years there has been an increase of nine private collegiate institutions, of which four have sprung into existence in 1889-90. There are now 38 in all, namely, Government 11, municipal 1, aided 8, unaided 18. The increasing demand for such education, and the development of private enterprise, are gratifying. Sir A. Croft strikes the right note when he says that the policy of the day clearly tends more and more towards the concentration of higher educational effort in the Presidency College and the gradual retirement of Government from the outlying colleges, where private enterprise may in time be trusted to take up the work. The number of collegiate students has fallen (for the first time since 1886) from 5,184 to 4,882, the result, it is evident, of fewer passed candidates at the Entrance Examination of 1889 being available to supply the places of those who had left the colleges after taking their degrees or otherwise. The number of successful candidates at the University Examinations again increased, and have for the last three years been as follows:—

	1888.	1889.	1890.
First Arts	481	629	996
Bachelors of Arts	323	366	399
Masters of Arts	43	58	62

The increasing number of Mahomedan candidates is noteworthy, viz. 57 in First Arts as against 21 and 19, 21 in the B.A. against 18 and 12, and 3 Masters of Arts against 1 and 1 in the two preceding years. The percentage of success achieved by the Government colleges was well maintained. The total expenditure upon collegiate education has risen during the year from Rs. 6,38,954 to Rs. 6,91,079, of which Government contributes a fraction over 40 per cent. In the Government colleges the total cost has also risen from Rs. 3,83,365 to Rs. 4,09,955, and the cost to provincial revenues from Rs. 2,30,409 to Rs. 2,52,465. The annual cost of each student in a Government college increased from Rs. 233 to Rs. 244, and the cost of his education to Government from Rs. 140 to Rs. 150. The increase in the Government expenditure is attributed partly to the absence of fewer officers than usual on furlough and partly to the loss of students and their fees—a loss from which all colleges suffered alike. This is borne out by the following figures relating to the entire body of collegiate students:—

	1888.	1889.	1890.
Average cost of each student in a college in Bengal	143	124	138
The Government share thereof	63	50	55

The college reports bear testimony to substantial progress, and mention cases of liberality of individual benefactors which merit the acknowledgments of Government.

Secondary education.

7. Though the total number of secondary schools of all classes has risen from 2,319 to 2,366, *i.e.* by 2 per cent., the number of pupils has only risen from 2,00,124 to 2,01,452, *i.e.* by ·6 per cent. This absence of corresponding increase in the number of pupils betokens an unnecessary multiplication of schools and an unhealthy competition among them for pupils. The high English and the middle English schools are both more numerous and have more pupils. The decrease in the number of middle vernacular schools is confined to schools managed by Municipal or District Boards or aided by those bodies or by Government. All middle schools in extra-urban tracts, whether maintained or aided by the Department, have been transferred to the control of District and Local Boards under the Government rules, in accordance with the Local Self-Government Act. The expenditure on secondary instruction has varied in the last two years as follows:—

	No. of schools.	Public funds.	Private funds.	Total.
		Rs.	Rs.	Rs.
1888-89 ...	2,319	6,01,539	19,34,506	25,36,045
1889-90 ...	2,366	6,08,294	20,11,672	26,19,966

The "public funds" include the provincial revenues, district funds, and municipal funds. The Education Commission recommended that a periodically

increasing provision be made in the education budget of each province for the expansion of aided institutions, but financial exigencies and the needs of primary education have prevented compliance with this policy. Not only has it been found impossible to aid the several classes of secondary schools up to the maximum percentage allowed by the grant-in-aid rules, but it becomes necessary to scrutinize every application for a renewal of a grant with a view to possible reduction and perhaps cancellation, so as to have money for new grants and still keep within budget limits. Thus there are still 477 schools, viz. 127 high English, 210 middle English, and 140 middle vernacular, which have not been placed upon the aided list. At the University Entrance Examination 2,156 boys passed in 1890 as compared with 1,153 in 1889, the percentage of success being 50 instead of 24. The schools have profited by experience, greater attention has been paid to their studies by the many unsuccessful candidates of the preceding examination, and school-masters have recognised the necessity of more systematic and careful teaching before a candidate has any chance of passing. The continued success of the Dacca Collegiate School and of the Burrisal and Furreedpore Zillah Schools is praiseworthy. The results of the Middle English and the Middle Vernacular Scholarship Examinations were far worse than in the preceding year. The full enforcement of the rule preventing successful candidates of previous years from again attending the examinations in the hope of winning scholarships affords an insufficient explanation. Sir A. Croft hesitates to ascribe this decline to a failure of efficiency under the management of District Boards, and would rather attribute it to the resumption of the more rigorous standard formerly required.

Discipline and moral training.

8. Measures have been adopted during the year for giving effect to the views of the Government of India in regard to discipline in schools and colleges. The summary of these measures given in the Director's report hardly admits of further condensation, but some of the more important steps taken deserve notice. The establishment of a special training college for teachers has been sanctioned and will be carried out as soon as funds are forthcoming. Principals of Government colleges were addressed on the subject of elevating the moral tone of the students, and the Lieutenant-Governor drew attention to the many opportunities which the study of ethics, and other occasions of college life, afforded to Professors for moral instruction of a character such as to influence their pupils and make a permanent impression. The adoption of suitable moral text-books for schools of all classes has been kept in view: and the example set by the University in preparing a book of selections for the Entrance Examination is to be followed so as to meet the requirements not only of the junior classes of high schools, but also of middle and primary schools through the medium of works in the vernacular. The maintenance in every school of conduct registers, with a record of the head-master's opinion of each boy's character and behaviour, based upon personal knowledge, has been insisted upon, and special attention is to be paid to the entries in the conduct registers of candidates for employment in Government offices. The appointment of monitors under proper safeguards has been authorized, and the system is being tried in institutions to which hostels are attached. More recently these monitors or prefects have been entrusted to a limited extent with punitive powers. A rule has been issued with the object of minimising the evil of having in the same class grown-up lads and little children. The attention of school authorities has been drawn to the necessity of encouraging outdoor games and exercises, on the understanding that no attempt should be made to create a race of acrobats out of our students. Should physical exercise in other forms not be popular, some form of drill is, under the orders of the Government of India, to be compulsory. The Director adds: "It is believed that schools at the sudder stations will find no difficulty in obtaining a person able, if necessary, to give instruction in drill; but such exercises as parallel bars, dumb-bells, cricket, football and indigenous games, including athletic sports, running, jumping, &c., are more to be commended and more likely to be generally acceptable. It has been explained that no reasonable outlay will be refused for the purpose of setting up gymnastic appliances, or of aiding cricket and football clubs." As to discipline, it is admitted that

the more closely a school is connected with the Department, the better is its discipline, and in most cases it is not so much the absence of morality as of good manners in the boys and the junior teachers that requires to be corrected. Defiance of authority, indifference if not positive disrespect, a rude offhand manner, showing no sign of respect to a superior, are sights too common in many schools. Cases of actual misbehaviour towards teachers are said to be happily rare; but they are entirely absent, and the punishment of rustication for a year or more has had a salutary effect. Cases of grave misconduct on the part of teachers themselves are not wanting: and to some extent the unhealthy state of public opinion in regard to discipline gives rise to troubles in school management. The opening of a new school as a money speculation, near an old and established institution, often has the effect of disorganising school discipline in the locality for a time. Sir A. Croft considers that it is very desirable that certificates should be refused to schools that defy the rules of discipline, or to those that are opened in a mere spirit of opposition and rivalry to other non-Government schools, without any prospect of permanence and to the injury of sound education. The Lieutenant-Governor concurs in these views, and will be prepared to receive definite suggestions on the subject. It is very satisfactory to learn that the operation of the transfer rules has been entirely wholesome, and that the revised rules recently issued are likely to check many irregularities that formerly prevailed. Simple rules for the transfer of pupils in middle and primary schools, in the spirit of those approved by Government for high schools, are being framed. Having regard to these measures, the Lieutenant-Governor is of opinion that a very considerable advance has been made in the direction desired by the Government of India. The policy indicated has had his entire concurrence and support; he has not expected anything but gradual improvement, and he looks to the co-operation of all officers of the Department in the endeavour to reform the whole tone of education in Bengal on the lines laid down by the highest authority.

Primary education.

9. The same features which were noticed in the Resolution on the report for 1888-89 have re-appeared this year in the numerical statistics of primary education. There are more upper primary schools and they have more pupils: but the gain is more than met by the loss in the lower primaries. The net result is a diminution in the number of schools by 449 and of pupils by 12,178, confined to the Presidency, Chittagong, and Orissa Divisions. Excluding payments made to primary schools from the grant-in-aid and circle fund allotments, the expenditure on primary education, controlled by the Department and by District Boards, amounted to Rs. 7,29,851, divided into Rs. 1,46,178 from provincial revenues and Rs. 5,83,673 from district funds. The following statement shows by divisions the administration and expenditure of the primary grant upon aided schools in 1889-90:—

Division.	Allotment.	Expenditure.	Number of schools.	Number of pupils.	Cost per school in rupees.	Cost per pupil in annas.
	Rs.	Rs.				
Presidency ...	91,440	89,346	4,340	126,493	20·5	11·3
Calcutta ...	9,000	9,000	201	9,485	44·7	15·1
Burdwan ...	1,20,124	1,21,144	8,704	218,763	13·9	8·8
Rajshahye ...	73,670	70,093	2,571	65,578	27·2	17·1
Dacca ...	1,00,349	88,884	4,575	113,908	19·4	12·4
Chittagong ..	71,050	67,304	4,547	98,200	14·8	10·9
Patna ...	1,02,913	98,947	5,414	118,054	18·2	13·4
Bhagulpore ...	75,234	69,965	2,540	57,995	27·5	19·3
Chota Nagpore ...	54,767	54,937	1,509	45,567	36·3	19·6
Orissa ...	60,203	59,157	4,758	73,340	12·4	12·9
Orissa Tributary Mehals ..	2,800	1,074	67	695	16·03	24·7
Total ...	7,61,550	7,29,851	39,226	928,078	18·6	12·6

The average annual cost was Rs. 18·6 per school and annas 12·6 per pupil, against Rs. 18·3 and annas 12·2 in the preceding year. The lowest cost per pupil was again in Howrah 7·3 annas, and the highest in the Chittagong Hill Tracts, 92 annas, and 55 annas in Darjeeling; but, apart from such abnormal areas, it was about 22 annas in Durbhunga, Shahabad, and Monghyr. The municipal contribution to primary schools for boys and girls was Rs. 20,827 against Rs. 20,303 and Rs. 16,355 of the last two years. It is not satisfactory that the departmental grant, which is administered by the District Committees of non-Board districts, and, as regards Government estates, municipalities and cantonments, by the Magistrate or Deputy Commissioner, shows large savings, while in Board districts a sum of about Rs. 10,000 was unspent. It is important that full use should be made of all grants sanctioned. The lower primary schools have fallen off in two years from 45,505 to 44,146, and the pupils from 991,099 to 960,865. Various causes are assigned for these changes in connection with the vicissitudes of season, which are held largely to account for the loss of 334 schools in Orissa; but the case of Chittagong, where 555 schools of this description have disappeared from the list, is special and is attributed to inaccurate classification. These figures are important enough to affect the total figures of the whole province, and have been referred to in a preceding paragraph. Where the number of schools has fallen off in consequence of the frequent and harassing delay in the payment by District Boards of the sums earned by gurus at the examinations, there should be no difficulty in rectifying this mismanagement. The expenditure on lower primary schools for native boys from all sources amounted to Rs. 20,13,050, of which the public funds contributed Rs. 3,81,377. The people therefore bear more than four-fifths of the total cost of the primary pathsalas. The falling off in the lower primary schools from 7,467 to 6,784 successful schools, and from 20,617 to 17,614 successful pupils, is ascribed to several reasons. The Director appears to be disposed to regard the constant tendency to raise the standard of examination, in Bengal proper at any rate, as the real cause, and makes a suggestion for the preparation of a common set of question papers to be distributed to all the examination centres in a division or circle. The idea is worth considering; but the Lieutenant-Governor apprehends that, having regard to the difficulty of keeping examination questions secret, it would hardly prove feasible. His Honour has recently had occasion to press upon a District Board the advisability of adhering to the Government policy of replacing a system of stipends by one of rewards for the encouragement of primary education. He has recorded his opinion that the system of payment-by-results is the best on account of its cheapness, as setting free money by which the education of the masses may be reached. But at the same time he recognises the value both of stipends as fostering the stability of schools, and of stipendiary schools, both upper and lower primary, as being the best of the class and serving to keep up the standard of primary education. While, therefore, the main policy of Government must be maintained, in favour of replacing stipends by payments-by-results, His Honour is not prepared, while the primary grant remains inexpansive, to insist on the immediate distribution of the available money over a larger surface, merely for the sake of increasing the numbers nominally receiving some kind of instruction. He regards the preservation of the standard which has been attained by the primary schools as a principle of great importance.

Special instruction.

10. There are 242 training schools for teachers, *i.e.*, masters, mistresses, and gurus, with 1,993 persons under instruction. It is satisfactory to find that in general those who pass out of our training schools are sought after as teachers, and seldom find difficulty in obtaining employment. The Director has rightly instructed the Inspector of the Behar Circle to challenge any appointment made by a District Board that he finds open to objection on the ground of a passed pupil of the Patna training school being overlooked for an outsider.

The other class of schools of special instruction includes the institutions for professional, technical, art, and industrial education, and schools of a special character. The statistics relating to their numbers and cost are given in the following form:—

	Number of institutions.	Number of pupils on the rolls on 31st March 1890.	Average monthly roll number.	Expenditure. From public funds. From Provincial revenues.	Expenditure. From public funds. From District and Municipal funds.	Expenditure. From Private funds.	Expenditure. Total.	Average annual cost per pupil. Cost to public funds.	Average annual cost per pupil. Total cost.

Grand Total ...	54	3,986	3,658	3,70,025	1,738	90,922	4,62,685	...	...

There is no object in striking an average of the cost per pupil at a number of schools so varied in character and status.

The variations in the numbers of students following the different professions will appear from these figures :—

Years.	Law.	Medicine.	Engineering.	Arts and industry.	Other special schools.	Total.
1888-89	935	999	518	651	172	3,275
1889-90	912	1,016	652	795	611	3,986

It is a hopeful sign if these figures may be depended upon, as they presumably can be, as indicating that a fair proportion of the youth of Bengal are seeking to devote their talents to professions comparatively new to them. The attendance at the Seebpore Civil Engineering College, 265, was the largest yet recorded. The Lieutenant-Governor observes the remark quoted by the Director that insufficient opportunities are afforded to the students of acquiring familiarity with practical work. He concurs in the necessity of recognising more fully the educational purpose of the workshops, and trusts that their requirements may be met, so that the Seebpore College may become, as it now is to a great extent, the centre of true technical education in Bengal. The Government School of Art continues to attract students, 178 having attended it as compared with 158 and 172 in the last two years. The need of a new building for the accommodation of the school and the attached Art Gallery in place of the dilapidated and altogether unsuitable houses now rented for the purpose has been recognised by Government as a matter of pressing urgency.

Towards the end of the official year the valuable report submitted by Mr. E. W. Collin, c.s., on the existing arts and industries in Bengal, in connec-

tion with technical education, came before Government. A number of his suggestions have been under consideration, and the Lieutenant-Governor trusts that in due course some practical measures may be selected for adoption.

Female education.

11. The attendance and expenditure in schools for native girls are shown in the following statement, in which the total figures for the previous two years are given for comparison:—

Class of schools.	Number of schools.	Number of pupils on the rolls on 31st March 1890.	Average number on the rolls monthly.	Average daily attendance.	Expenditure. From public funds. Provincial Revenues.	From public funds. District Funds.	From public funds. Municipal Funds.	From private funds. Fees.	From private funds. Other sources.	Total.
					Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Managed by Government ...		235	202	181	17,682	.....	.....	5,761	628	24,071
Ditto by District or Municipal Boards	5	223	208	184	143	.....	1,140	.....	55	1,338
Aided by Government or by District or Municipal Boards	1,913	40,614	37,080	28,507	60,974	23,213	8,019	17,166	1,68,518	2,81,887
Unaided	233	4,618	4,407	3,264	...	...	.....	938	18,725	19,663
Total ...	2,153	45,690	41,897	32,086	87,799	23,213	9,159	23,864	1,88,924	3,26,959
For 1889-90	.....	.....	.....	.....	1,20,171			2,06,788		
Figures for 1887-88	2,247	46,038	.....	.....	1,17,214			1,90,659		3,07,873
Do. for 1888-89	2,302	47,888	.....	.....	1,21,106			1,88,915		3,10,021

The number of girls' schools has declined from 2,302 to 2,153, and their pupils from 47,888 to 45,690. These figures are the lowest for the three years under examination. The number of girls reading in boys' schools, which had fallen from 37,785 to 35,079, has again decreased to 32,673. The net result therefore is a loss of 149 schools and 4,604 pupils. Greater stringency has apparently been exercised in the administration of the rules for rewards and in the realization of fees. Two young native ladies were admitted to the degree of Bachelor of Medicine, and another passed the Preliminary Scientific L.M.S. examination. Eleven young ladies of the certificate class of the Medical College also obtained the College license to practice medicine and surgery: eleven more were in the certificate class at the close of the session. There were 22 female students in the Campbell Medical School and five in the Cuttack Medical School. From the Bethune College three native candidates out of four passed the First Arts Examination, and all three candidates at the B.A. Examination passed. The second examination for the award under the new standards of the special girls' scholarships sanctioned for Calcutta and the neighbourhood was held during the year. As the extension of these standards to the mofussil has been sanctioned, they would be very widely adopted, it is said, if it could be found possible to create a certain number of special scholarships for girls in each district: at present they have to compete for scholarships on equal terms with the boys at the primary scholarship examinations.

Education of Europeans.

12. The statistics of European education at the end of the last three official years may be exhibited as follows:—

	1887-88	1888-89.	1889-90.
Schools	72	71	68
Pupils	6,541	6,682	6,710

In the last year the number of boys increased by 40, while there were 12 girls fewer under education. The boarding school at Kurseong is still the only Government school in the province. Out of the 6,710 scholars, 3,383 were in schools under Roman Catholic management and 1,646 under the Church of England. The total cost of European education in Bengal was Rs. 6,50,812, of which Government paid Rs. 1,72,168. Several important changes in the Code came into force during the year. A set of inter-school transfer rules was introduced: they have been very beneficial in preventing capricious transfers, and have improved the financial condition of the schools by compelling parents to pay the schooling fees. Provision was also made for the substitution of fixed grants in place of payment by results in selected schools. The imposition of fines for uncorrected errors in the keeping of attendance registers was also sanctioned. The recognition of the high school examination by the University

has not induced any of the boys' schools to substitute this examination for the Entrance Examination; the reason is said to be that no scholarships are awarded on the result. The establishment of scholarships for the high school examination has been proposed.

Muhammadan Education.

13. The total number of Muhammadan pupils again rose from 423,564 to 436,653, and the percentage on the total number of pupils from 28·5 to 29·06, the proportion of Muhammadans to the whole population being 31·5 per cent. This increase was altogether due to a rise of 22,024 pupils in private institutions teaching the Koran only. In public institutions the number of Muhammadan pupils decreased by 10,624, the loss of Muhammadan pupils in lower primary schools being 14,889. As already explained, the large increase in the number of Koran schools, and the corresponding decrease in lower primary schools, were largely due to a change of classification in parts of Eastern Bengal. The number of Muhammadan college students fell from 240 to 179, and percentages show that candidates of this creed suffered at the Entrance Examination of 1889 more severely than others. At the Entrance Examination of 1890 the successful candidates increased from 54 to 125. The Lieutenant-Governor observes with great satisfaction that, in spite of a temporary decline in the colleges, the appreciation of Muhammadans for English education continues to grow steadily and even rapidly. The first reports furnished by the recently appointed Assistant Inspectors for the supervision of Muhammadan education in Eastern Bengal and in Behar have been received, and show that the special requirements and difficulties of this branch of the community are now receiving and will receive adequate attention. The Director has, by giving a *resumé* of the facts, confined himself within the proper limits of an annual report, and the Lieutenant-Governor will await any definite suggestions for action which he may desire to offer. The annual income of the educational portion of the Mohsin Fund continues to be about Rs. 63,100, and the actual expenditure debited to this account is stated at Rs. 61,067. The question of the redistribution of the grants from this fund may be considered with any other points which the Assistant Inspectors may raise. The comparative success of the Muhammadans in the University examinations in the last two years is shown by the following figures :—

	M.A.	B.A.	F.A.	Entrance.
1888-89	1	18	21	54
1889-90	3	21	57	125

There was also a large increase in the number of middle and upper primary examination certificates gained by Muhammadan students, though somewhat fewer passed at the lower primary examination. The total number of pupils at the madrassas under Government management remained exactly the same as in the preceding year, viz. 1,456, but the total expenditure rose from Rs. 58,865 to Rs. 61,760, the increase being nearly all at the cost of Government. Sir Steuart Bayley notices with pleasure the excellent report of the discipline and tone of the Nawab of Moorshedabad's Madrassa with its 63 pupils.

Education of aborigines and indigenous education.

14. The number of pupils from among the aboriginal races rose from 27,246 to 29,749, *i.e.* by 2,233. This is more than a recovery of the loss recorded in the last year's report. This increase was shared by most of the tracts of country inhabited by these races. The greatest gain of 1,559 pupils was in Chota Nagpore, of whom 1,390 were non-Christians and 169 Christians. The pupils in the Missionary schools in that division increased from 3,127 to 3,582, and the expenditure from Rs. 38,703 to Rs. 39,011, of which Government contributed less than one-fifth. No aboriginal pupil passed any University Examination as in the previous year, but 427 passed the departmental examinations. Of these, 367 succeeded in the lower primary scholarship examination (a falling off from the 378 last year) and 36 (as compared to 15) in the upper primary scholarship examination.

The development of indigenous institutions during a triennial period is apparent from the subjoined figures :—

	1887-88.	1888-89.	1889-90.
Schools	10,048	11,709	13,867
Pupils	96,721	117,284	139,603

This is a remarkable and continuous rise. Analysing the figures, it appears that there was a considerable decrease in advanced Arabic or Persian schools, and a gain in Sanskrit tols. There was a very large increase in the number of elementary pathsalas and of Koran schools, as already noticed. The Assistant Inspector's observations on the latter and the maktabs are noted, but call for no immediate orders.

15. The Lieutenant-Governor has had the pleasure annually of acknowledging the services rendered to Government by the Director in his successful administration of the Department of Public Instruction, and the merits of the reports submitted by him and Mr. Tawney. The record of the year under review fully maintains the Director's high reputation. Sir Steuart Bayley desires to take this opportunity, the last of which he will be able to avail himself, to offer his cordial thanks to Sir A. Croft, Mr. Tawney, Mr. Bellett, Mr. Nash, Rai Radhika Prasanna Mookerjee, Bahadur, Baboo Brahmo Mohun Mullick, Rai Dinanath Sen, and the many other excellent officers of the Department employed in the direct work of instruction as Principals and Professors of Colleges, for the valuable advice and the loyal co-operation which he has always received from them.

By order of the Lieutenant-Governor of Bengal.

C. E. BUCKLAND,

Offg. Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 25th October 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.

* Mean of six days.

† Mean of five days.

Explanations.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The variations are *negatives* when the mean for the week is less than the corresponding normal mean, and *positives* when greater.

The *Nebulosity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers under the head District observations of rainfall the normal means are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past ten years. The means of the district are the numerical average of the rainfall return received in the districts, *i.e.*, from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 24th of October 1890.

Meteorological division.	District.	Station.	Rainfall. Saturday, 18th October.	Sunday, 19th October.	Monday, 20th October.	Tuesday, 21st October.	Wednesday, 22nd October.	Thursday, 23rd October.	Friday, 24th October.	Total. Number rainy days.	Total. Rainfall week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May 1890.	Average rainfall from 15th May to date.

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

Calcutta, *the 28th October* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 24TH OCTOBER 1890.

In last week's report it was noted that conditions at the end of the week were favourable to the formation of a cyclonic storm in the Bay. Subsequent events have proved that a storm was then in the course of formation in the usual birthplace of these whirls in October—to the south-west of the Andamans. The storm was a very small one, and its centre advanced very much closer to the Burmah coast than is usual with storms advancing up the Bay. On Saturday 18th, Sunday and Monday morning, no telegrams were received from Diamond Island, and it illustrates the extreme importance of that station from a storm-warning point of view, that the telegram received on Monday afternoon about 3-0 immediately indicated the passage of a storm of which the ordinary coast stations (Bassein observations being wanting) gave no indications other than might be characterized as "suspicious." The whirl on Monday at 8 A.M. was approaching the Burmah coast, but curved off and advanced in a north-westerly direction and apparently made for the coast of the Circars, as is usual with October storms. There was, however, a trough of low pressure extending from Mymensingh, through Dacca and Burrisal, out into the Bay, and as the barometer was very high behind the Circars coast, the whirl was forced up in the direction of the Sunderbuns, which it crossed on the morning of 22nd at 10 A.M.

Pressure at the beginning of the week was relatively highest in Madras and lowest in North Bengal. A very rapid fall took place on Saturday over the whole eastern and northern area, and a brisk fall at all places in the south-east except Negapatam and Trincomalee. This was followed by a series of very small irregular changes on Sunday and a rapid recovery on Monday, especially in Burmah, behind the depression. This feature was still more pronounced on Tuesday as the depression advanced up the Bay, and became the dominant factor of the weather in Bengal. On Wednesday morning it advanced across the coast, the lowest pressure recorded being 29·900″ at Saugor Island. On Thursday morning it wasbetween Jessore and Dacca, lowest pressure recorded being 29·858″ at Furreedpore and subsequently it began to fill up rapidly, spreading itself out along a low-pressure area extending from Jalpaiguri, through Dhubri, up into Silchar. Whilst the recovery was taking place behind the depression in Bengal, the barometer was falling slowly in Madras, and the distribution approximating more nearly to the ordinary cold weather conditions.

Temperature has been governed to a very great extent by the depression, and, as might be expected, was below the normal of the season. This defect, however, was due almost entirely to low maximums, for minimums were in few cases below the normal, and at the end of the week were decidedly above the average all over the province. All this was due of course to the unusually damp weather.

Rainfall has been reported from few stations except those in the immediate path of the small storm. The stations chiefly affected were Noakholly (4·27″), Mymensingh (3·77″), Furreedpore (3·47″), and Jessore, Dacca, Commilla, and Burrisal, each of which received over two inches. The only very heavy fall in twenty-four hours was 3·07″ at Mymensing on the 23rd.

Humidity and cloud proportion were very high for the season at the beginning of the week, but rapidly decreasing at the end.

Weather during the week was entirely subject to the depression. It has cleared the air, passed away and left conditions very favourable for an early cold season.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 24th of October 1890:—

Meteorological Divisions.	Temperature.						Rainfall.								
			Averages for week.				Of week.			Rainy days.			Since 1st of month.	Since 16th May 1890.	
	Highest observed during week.	Lowest observed during week.	Of highest of each day.	Of lowest of each day.	Of mean for each day.	Average mean of week above or below normal mean of week.	Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Average.	Normal average.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; ⌓, dew; ≡, fog.

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE PRESIDENCY DIVISION FOR THE YEAR 1889-90.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 21st October, 1890.

RESOLUTION.

READ—

The General Administration Report of the Presidency Division for the year 1889-90.

Mr. Smith continued in charge of the Division during the year, and has again submitted a full and excellent report. There is a curious omission of the district of Moorshedabad in the third paragraph, which is not explained.

Tours.

2. The Commissioner's tour was well planned, and the Lieutenant-Governor is pleased to observe that, with a single exception, all district officers completed useful tours of the requisite length. In Jessore district officers, in consequence of the indigo disturbances, were out altogether for 114 days. In Moorshedabad the Collector was out for 104 days, part of his time being devoted to the flood caused by the breach of the Rampal embankment and to the consequent distress. The Collectors of Nuddea and Khulna were out for 106 and 93 days respectively. The Lieutenant-Governor is disposed to agree with the Commissioner that, though the rapid succession of district officers in the 24-Pergunnahs affords some excuse, the period of 60 days especially fixed for that district should have been completed.

Mr. Forbes, however, did his best to make up the deficiency by a useful tour of 41 days. All the sub-divisional officers in the Division were out for the prescribed time, with the exception of the sub-divisional officer of Kandi, whose tour was unavoidably interrupted. In almost every case Assistant Magistrates posted to head-quarters were out for a longer or shorter time.

Weather and crops.

3. There was a paucity of rain at the beginning of the year; later on there were local floods in Moorshedabad and Nuddea, but the chief and most widely-spread characteristic of the season was the unusually late rain in November, which damaged the cold-weather crops and in some places also the amun harvest. In the result the harvests generally were slightly better than those of the preceding year.

Public health and material condition of the people.

4. Judging from the recorded mortality, the past year was more healthy than either of the two preceding years. Jessore and Khulna show worse on paper, but it is not known how far this is due to improved registration. The other districts show improvement. There was an increase of cholera in Nuddea and Moorshedabad, attributed to the want of rain in the early months. Fever, on the other hand, was not so fatal. Owing to the amalgamation during the year of a considerable portion of the Suburbs with the town of Calcutta, no useful comparison can be made in the 24-Pergunnahs. There was an outbreak of small-pox in that district in spite of a considerable extension of vaccination, 335 deaths from this cause having occurred, as against 49 and 23 in the two preceding years. It is satisfactory, however, to note that the practice of inoculation appears to have been stamped out. The scanty harvests of 1888 were followed by high prices in 1889, and there was some pressure in the Diamond Harbour sub-division of the 24-Pergunnahs, and in the Lalbagh and Jungipore sub-divisions of Moorshedabad, which necessitated relief operations until a good aus and jute crop put an end to further anxiety. There was also some scarcity in the Magurah and Bongong sub-divisions of Jessore; but as to the remainder of the Division the Commissioner writes that "the condition of the cultivating classes was one of fair prosperity, as they were able to make up for the deficiency of the crops by the high prices which prevailed." He adds, however: "The labouring and middle classes, dependent on service and fixed income, suffered on account of the high prices of food-grains. Living in a state of transition, the latter class have not only to keep up old customs and appearances, but also have to cope with the wants of the day, and few of them have sufficient strength of character to resist and set themselves free from old trammels."

The wages of labour were not affected by fluctuations in price, and remained almost identically the same as in the two preceding years.

Manufactures and trade.

5. As in the previous year, 46 mills, presses and factories were at work, giving employment to nearly 57,000 persons in the manufacture of cotton-twist and yarn, gunny-bags and cloth, sugar, paper, silk, ice, shell-lac and lac-dye. The bone-crushing factory at Tengra was closed, but this is counterbalanced by a saltpetre refinery at Balliaghatta. Owing to the state of the market the outturn of jute was less than in 1888-89. Cotton and other industries appear to have flourished, and especially indigo. The outturn of indigo in Nuddea was 6,650 maunds, valued at Rs. 11,52,80[illegible]6; in Jessore 2,695 maunds, valued at Rs. 4,54,488; and in Moorshedabad 4,358 maunds, valued at Rs. 8,33,530, the outturn and value being in every case considerably in excess of those of the previous year, though lower prices ruled in the market. The important sugar industries were also generally prosperous, though imported sugar is usurping the place of the local article in Khulna. In Moorshedabad the year was favourable to silk, both as to outturn and value. The total weight of traffic registered between the mofussil and Calcutta shows a decline of about 9¾ lakhs of maunds, while the returns of trade between Calcutta and the mofussil are nearly stationary. The import of rice into Calcutta was less by nearly 4½ lakhs of maunds, and the export greater by over 3 lakhs—facts which afford a useful commentary on the ready adjustment between trade and the varying conditions of different seasons. There was a further decrease this year in the traffic over the Nuddea river, and the Lieutenant-Governor would have been glad of some explanation. The traffic in Khulna is still carried principally

by river, though the railway has appropriated a portion of the jute trade of Eastern Bengal.

Police and crime.

6. There was an increase of cognizable crime, chiefly under the head of house-breaking and other offences against property, attributed to the high prices current during the year. In other respects the returns do not call for any criticism beyond the remarks made by the Commissioner. With regard to the conduct of the police, the Commissioner quotes with approval the following observations by the Magistrate of the 24-Pergunnahs:—

"The police of the district cannot, as a body, be deemed efficient, and are in no way superior to the men found in districts more remote from the metropolis. There are a few smart and conscientious officers, but, on the whole, the standard of intelligence and honesty is low. Better materials cannot be procured while the pay of the lower ranks continues on its present low scale, and reward for thoroughly good service does not go beyond the rank of Inspector. The important work of investigation of criminal cases is as a rule done only fairly, and there is a lack of energy, patience, and detective capacity which causes the failure of many serious cases."

Revenue.

7. The percentage of collections of the land revenue on the gross demand was 95·69, the total collected being Rs. 51,58,542. There was a decrease in the excise revenue, chiefly due to the abolition of the outstill system in the 24-Pergunnahs and Nuddea, and the consequent decreased consumption of country liquor, to which the closing of several shops by order of the Commissioner of Excise also contributed. There was, however, an increase in the consumption of rum in Calcutta, no change having been made in the rate of duty, which stands at Rs. 4 per gallon. There was a decrease in the consumption of salt in both the protected areas in the 24-Pergunnahs and Khulna, attributed partly to illicit manufacture, partly to a smaller number of reapers having come into the district during the harvest time, and partly to a smaller number of feasts having been celebrated owing to the poor outturn of the harvest. The gross revenue from stamps amounted to Rs. 39,46,935, and the net increase, taking receipts and charges, amounted to Rs. 1,27,623. The net demand of income-tax was Rs. 21,33,988, or an increase of 7·5 per cent. on the demand of last year. The collections were 89·6 per cent. as against 90·9, the worst result coming from Jessore, where the Deputy Collector in charge did not pay sufficient attention to his duties.

Education.

8. The following statistics, given by the Commissioner, are interesting:—"The area of the Presidency Division is 12,021 square miles, and it has a population of 7,771,693 souls, of whom 3,895,365 are males and 3,876,328 females. Calculating at 15 per cent. of the total number, the school-going population would consist of 584,304 boys and 581,449 girls. The numbers attending the schools being 180,592 boys and 11,650 girls, we have of all boys of a school-going age 1 in 3·2 and of girls 1 in 49·9 only at school. The total number of schools on returns being 5,913, there is one school for a little over two square miles of area." Making allowance for the transfer from the 24-Pergunnahs of part of the Suburbs of Calcutta, there was still a slight decrease in the number of schools and pupils, extending to the number of girls' schools and of girls under instruction and to the number of Mahomedan pupils. It is difficult to account for such retrogression in the Presidency Division.

District and Local Boards and Municipalities.

9. Mr. Smith writes:—

"From what I have seen, it seems to me that, on the whole, the system of local self-government has continued to work smoothly and with fair success."

With regard to municipalities, the transfer of jurisdiction in the 24-Pergunnahs has been already alluded to, and was noticed in the Resolution last year. The Commissioner observes:—

"The attendance of Commissioners at meetings has been on the whole fair, and they have taken interest in the administration of the municipalities under their charge."

In another passage the Commissioner has a word to say in favour of Rate-payers Associations, which "display considerable activity in criticising the proceedings of Municipal Commissioners, their Chairmen and Vice-Chairmen, and serve as a check upon irregular proceedings and extravagant expenditure of

public money." Criticism is wholesome, but in unintelligent hands is apt to degenerate into obstruction. The Lieutenant-Governor is pleased to observe that there are no complaints in the Presidency Division on this score.

Public feeling and the Public Press.

10. The Commissioner remarks:—

"Public opinion on questions of general interest is chiefly confined to the educated classes living in towns, and it is formed and guided by the Calcutta press, which has a large circulation in the districts of this Division. Municipal discussions, which are not uncommon, excite much feeling and discussion, but they are purely of local interest and attract no attention beyond the towns concerned. The masses of the people only interest themselves in such matters as concern them. To matters of general interest they are perfectly indifferent."

Rumour might carry to mofussil villages the news of the visit of an English Prince and Heir-Apparent, or of a meeting of Congress at Bombay, but to the majority such occurrences would appear remote and indistinct, though they might have a passing effect on the imagination. Of local events the indigo disputes in Jessore have perhaps received a larger share of public attention than any other. In the beginning there were two centres of discontent in the district, but it was some time before the quarrel reached the acute stage and attracted general notice. This happened when the ryots had recourse to those tactics of violence which are always characteristic of agrarian disputes in this country. The public peace was so far threatened that it became necessary to make a special administrative arrangement, and Mr. Luson was placed in charge of the two sub-divisions of Jhenidah and Magurah—an arrangement which was discontinued on the transfer of Mr. Luson on promotion as district officer to Moorshedabad. The excitement culminated in two serious riot cases, which were dealt with in the Courts. The whole subject has been considered in another Department of this Government, and it is only necessary to say here that the local excitement has to a great extent subsided, and that the Lieutenant-Governor hopes that the public peace will be maintained.

Conduct of zemindars.

11. In Nuddea, the Maharaj Kumar of Nuddea came of age and took over his estate from the Court of Wards. He is said to be taking great personal interest in its management. In Jessore, the only landlord who has been highly spoken of by the Collector is the Rajah of Naldanga. In Moorshedabad, the Nawab Bahadur, the Maharani Surnomoyee, and other zemindars received the acknowledgments of Government for their liberality during the distress. One of the Nawab's brothers, Saliman Syed Wahid Ali Mirza Bahadur, was appointed a Municipal Commissioner and Honorary Magistrate during the year.

12. The Lieutenant-Governor desires to acknowledge the care and success with which Mr. Smith has managed his Division during the year. Mr. Ritchie rendered excellent service in Moorshedabad, especially in connection with the inundations in August and September 1889. Mr. Forbes sustained his reputation as an energetic District Officer, and Baboo Durgagati Banerjee, as Deputy Collector of Calcutta throughout the year, is very favourably mentioned. The Commissioner's remarks on the merits of officers will be forwarded to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE BURDWAN DIVISION FOR THE YEAR 1889-90.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 24th October, 1890.

RESOLUTION.

READ—

THE General Administration Report of the Burdwan Division for the year 1889-90.

The Division was in the charge of Mr. Clay for eight months, of Mr. Alexander for three months, and for the remaining month of the year of Messrs. Buckland and Toynbee. Although Mr. Toynbee took charge just before the close of the year, he is well acquainted with the Division and has made his report full and interesting.

Tours.

2. The Commissioner's tour extended to sixty days, in the course of which he inspected all the district offices. Only one sub-divisional office and treasury, however, were inspected, but the Commissioner hopes to be able to inspect them all during the current year. All the Sub-divisional Officers were on tour for the prescribed period of 90 days. Mr. Grant in Beerbhoom and Mr. Tayler in Bankoora, however, were out for only 87 and 85 days respectively; and in Midnapore, owing to the change of officers and other causes, the total touring done amounted to only 66 days. As regards Howrah, the Lieutenant-Governor accepts the Commissioner's view that Mr. Currie's tour of 60 days was sufficient in view of the size of the district.

Weather and crop.

3. In Beerbhoom and Howrah the rainfall was sufficient, but elsewhere it was not only insufficient in quantity but was most unevenly distributed, and consequently the rice crops are reported to have averaged only 13·1 annas. It seems doubtful however, from an examination of the figures, whether the rule that the average crop is to be taken as 16 annas, which has been misunderstood elsewhere, has been properly applied in all the districts, and if so, the crops throughout the Division must probably be taken as nearly average. In addition to this the prices obtained were exceptionally high, and the Commissioner considers that the people were fairly well off. As regards the coolies or labourers, however (who largely consist of temporary immigrants), it is stated that their wages remained almost stationary in spite of the high prices. Although the material condition of the people was good, the public health of the Division during the year was, as elsewhere, bad—fever being especially prevalent and there being also an extraordinary epidemic of influenza, which caused considerable suffering and public inconvenience, although seldom attended with fatal results.

Trade and manufactures.

4. The trade and manufactures of the districts were, on the whole, in a flourishing condition during the year. At the Barakar iron works the value of pig-iron and castings turned out is reported to have been 33 per cent. greater than in the previous year, and the six firms which have iron works in Howrah are all said to have done well. As regards coal, it is stated that some new coal-pits were worked in the district of Burdwan, and that the export from Raniganj was 1,227,990 tons as against 1,101,079 and 944,449 tons in the two preceding years. Indigo also has done well, the crop having been a good one throughout the Division and four new factories having been opened. On the other hand, it appears that the output of the Balli paper mills fell considerably below that of the two preceding years, and that the cotton industry in Burdwan and the silk industry in Bankoora are declining. In Beerbhoom, however, the statistics furnished show that silk is improving. The information regarding the Hooghly jute mills is said to be very incomplete; but, so far as could be ascertained, the operations were restricted owing to excess production Some of the explanations regarding the export of rice are not readily intelligible. In Burdwan it is said that the export in 1889-90 decreased owing to the bad harvests of two successive years; but it is not clear how the harvest of the previous year can have affected the export of the year under review, although possibly the meaning is that a smaller area was sown with rice. In Bankoora it is said that the export fell off owing to the absence of any keen demand from outside; but the keenness

of the demand is measured by the price offered, and the price offered was exceptionally high; and as the crop is stated to have been much better than in the two preceding years, there must have been a considerable surplus available for exportation. The same remarks apply to Beerbhoom, where a similar explanation is given, in spite of an 18-anna crop and high prices elsewhere. In Hooghly it is said that, owing to high prices, the trade in rice and paddy was not brisk. High prices are usually associated with brisk trade, but probably the explanation is that, owing to the poorness of the crop, only a small surplus was left for export. The continued increase in the importation of European piece-goods is satisfactory as an indication of the prosperity of the people and of the increasing variety in their wants. The only other point calling for remark under this head is the statement that in Howrah the trade in hides is decaying.

Administrative changes.

5. Of the administrative changes, the most important was the appointment of an Excise Commissioner, a change, however, which affected other Divisions as much as Burdwan. The others referred to are the abolition of the Assensole Municipality, the establishment of an independent Bench at Rampore Hât, the reduction in the members of the Midnapore District Board from 36 to 24, and the investment of three of the Honorary Magistrates of the First Hooghly General Bench with powers of a second class Magistrate to sit and try cases singly. As regards the share taken by Mahomedans in the administration, the Lieutenant-Governor is glad to observe a slight increase in the percentage employed, but at the same time he is compelled to call attention to the remark of the Commissioner, who says, with reference to the difficulty of getting qualified Mahomedan candidates:—"The moral of the matter is that the Mahomedans must bestir themselves and renew their exertions instead of crying to Government to help them to appointments for which they are not found to be equally fitted with others."

Police.

6. There was a general increase of crime during 1889, both cognizable and non-cognizable, in all the districts of the Division except Beerbhoom, where there was a decrease of one cognizable and 262 non-cognizable cases. Regarding this the Commissioner says that the increase is due chiefly to the high prices which prevailed throughout the year and is most marked in offences against property; and that this class of offence increased even in Beerbhoom, which otherwise shows a nominal decrease. This state of affairs is far from satisfactory, and, moreover, the explanation cannot be held to be sufficient, for a distinction must be drawn between high prices the result of scarcity in the Division and high prices due to increased demand outside the Division. The crops throughout the Division were much better than in the two preceding years, and it is obviously an advantage to an agricultural population to sell their produce at high prices. In this connection it is significant that there was an increase in offences against property even in Beerbhoom, where the rainfall was evenly distributed and the rice crop was an 18-anna one. The remarks of the Commissioner on the rural police and on the success of Mr. Munro, District Superintendent of Police of Midnapore, in dealing with them are interesting and will be communicated to the Judicial (Police) Department for disposal.

Criminal Justice.

7. Under the head of Criminal Justice the Commissioner is able to give, the Lieutenant-Governor is glad to observe, a favourable and encouraging account of the work done by the Benches of Honorary Magistrates and of the extension of the system. Under this head also he makes the following remarks on the subject of criminal fines:—

"The subject of the realization of criminal fines is, I think, one which deserves more attention than it ordinarily receives at the hands of Magistrates. There is a very large outstanding balance of fines unrealized in this Division, and steps have recently been taken to write off all sums found to be irrecoverable after repeated attempts. This balance was Rs. 35,274 on the 31st March 1890. In this connection the quarterly examination of the thana fine registers prescribed by the fine rules is a most important duty, which should not be delegated as a matter of course to Subordinate Magistrates. If, for the purpose of this examination, the Court Sub-Inspector were made to give a detailed list of the fines outstanding in his books (thana by thana), a great impetus would, I think, be given to the police in this important branch of their work. Subordinate Magistrates who are in the habit of giving wholly inadequate sentences of imprisonment often impose fines which are quite beyond the

present or future possible means of the accused. The enquiries periodically made as to the assets of such persons not only needlessly irritate and disgrace them but also impose a useless and hopeless task upon the police."

These remarks will be communicated for disposal to the Judicial Department, to which their consideration properly belongs.

Land Revenue.

8. The result of the land revenue administration was fairly satisfactory, 93·48 of the total demand being collected within the year, and the percentage of total collections on current demand being 105·34. The heaviest arrears occurred in the districts of Hooghly and Midnapore, that in the latter being due to successive bad seasons. As in the previous year, use was made of the Eden Canal for irrigation purposes and about 30,000 beeghas of rice lands were irrigated from it. As regards the Tenancy Act, it is said that no burning questions have arisen under it, that the special provisions for registering transfers of permanent tenures are gradually falling into disuse, and that the number of applications for survey and record of rights is on the increase. The only district in which the charge of wards' estates was heavy was Midnapore, and in that district it was very heavy, there being at the close of the year 15 estates under the Court, with a gross annual income of about Rs. 3,57,500.

In this connection may be noted the enormously increased extent to which the public availed themselves of the post-office for the remittance of land revenue. Against 7,890 orders covering Rs. 45,845 in 1888-89, the Postal Department issued 20,990 for remittances aggregating Rs. 1,34,654. The Commissioner adds that figures to show the working of the similar system for the payment of rent are not available, but the local officers state that it has been a partial success, in spite of the opposition of the zemindars and their local agents.

Stamps, Income-tax and Excise.

9. There was an increase of 2·3 per cent. in the revenue from stamps and of 3·5 per cent. in that from income-tax. Regarding the latter the Commissioner remarks:—"These results are, I consider, highly creditable to the district officers generally, the more so as they were obtained without any complaints being made of harsh and inquisitorial measures with the issue of a smaller number of processes and with a percentage of only 2·1 objections on the part of the 8,466 persons assessed." On the other hand there was a falling off under Excise, due to the outstill being replaced by the sudder distillery system.

Communications.

10. Under the head of Railways and other Public works may be noted the opening of the Bengal-Nagpur Railway as far as Chakhardharpur and the completion of the Damudar bridge. Under the head "Communications" the Commissioner gives figures showing the large amount spent on repairs as compared with the small expenditure on original works and village roads, and remarks as follows:—

"The great difficulty of all the District Boards is the fixed and inelastic nature of their income and the large mileage of roads which they have to maintain. They are like parents with large and increasing families, but with fixed incomes. Each mile of road newly made or metalled involves a fixed charge for maintenance, and thus adds to the financial difficulties of the future. The maintenance of village roads is less expensive than that of the main lines of communication, both metalled and unmetalled; but the want of a proper establishment to supervise the work on the former is, I think, the principal reason why so little money is spent on them. The District and Local Boards hesitate to spend money on work which they cannot properly check or control, and they fear to entrust it to local agents in whose integrity and supervision they have no confidence."

Village roads, however, have this great advantage, that the land required can usually be obtained for nothing, whereas the people hesitate about giving, and usually will not give, the land and roadside lands for a road much broader than they require. In sub-divisions, the Sub-divisional Officer will almost invariably give a good account of money made over to him for village roads which he is given free liberty to spend, and in sudder sub-divisions the members of the Board should, with the assistance of the District Engineer, be able to look after the work themselves and to see that the money is properly spent.

Education.

11. In paragraph 68 *et seq.* of his report the Commissioner deals with the administration by District Boards of the grant for primary education. Although there was a

divisional increase both in the number of pathsalas and of boys attending them, the results cannot, on the whole, be regarded as very satisfactory, for there was a decrease both in Midnapore and in Howrah; and in the case of girls' schools, there was a decrease both of schools and scholars in Burdwan and in Howrah, while in Midnapore it is reported that four girls' schools were closed "owing to the apathy of the managers." In Bankoora, however, the administration has been much more successful and the prospects are brighter. There it is said that, whereas in 1887-88 there were nearly 49 girls' schools with 920 pupils, there were last year 121 such schools with 2,054 pupils. A great part of this increase is attributed to the establishment of separate girls' schools in the place of mixed schools. It is probable that if the Magistrate and Chairman of the District Board takes an interest in primary education and shows that he does so, the apathy of the managers will disappear; and it is to the absence of such an interest that the Lieutenant-Governor feels compelled to attribute, to some extent, the failure in this branch of the administration in the districts referred to.

Local Self-government.

12. As regards local self-government institutions the verdict of the Commissioner is on the whole favourable. He says that the working of the District and Local Boards and of the municipalities in his Division is pronounced by the district officers generally to have been successful; and he adds that the attendance of the members has generally improved, and that they have been of much use as consultative bodies. He also makes the following general remarks on the subject:—

"The successful working of local self-government institutions depends quite as much upon the character and abilities of the Chairman, Vice-Chairman, and permanent officials as a district does on its staff from the Magistrate-Collector downwards. The position of an official Chairman is altogether a stronger and more popular one than that of a non-official. The latter's every public act is regarded with distrust and suspicion: parties are formed to thwart his measures and question his executive action, and his position is by no means a bed of roses. It says much for the future of local self-government that many such difficulties have been bravely faced and overcome. The names of Baboo Lalit Mohan Sing, Vice-Chairman of the Hooghly District Board; of Baboo Siva Narain Mookerjee, Chairman of the Uttarparah Municipality; and of Baboo Nalinaksha Basu, Chairman of the Burdwan Municipality and Vice-Chairman of the District Board, whose services have recently been specially recognised by the title of Roy Bahadoor, deserve special mention in this connection.

"I would also mention Baboo Eshan Chunder Mitter, the Chairman of the Hooghly Municipality. With the exception of the Baidyabati Municipality in the Hooghly district, none of the local institutions have shown any wrong-headedness or impatience of control. On the contrary they have, as a rule, loyally accepted the advice tendered them by the officers of Government both in matters of finance and of general administration. Not the least promising feature of the present system of local self-government, and one which gives much hope for the future, is the fact that its defects are seen and fully admitted by all classes of the people. The strength of purpose and the moral courage to apply the remedy—which is the subordination of all personal and party feeling to the public good—though wanting at present, will, it is hoped, be developed gradually in the future."

Conduct of zemindars.

13. The Commissioner remarks that the conduct of zemindars has been, on the whole, satisfactory and singles out for favourable notice Baboo Raghu Nath Panja in the district of Bankoora and the zemindars of Motiari and Ajudhya in the same district. Only one zemindar, he says, deserves specially unfavourable notice—Mohant Gopal Das of Beerbhoom, whose estates are being settled under the Tenancy Act.

Character of officers.

14. A copy of the remarks regarding the conduct of officers will be forwarded to the Appointment Department for record. But the Lieutenant-Governor will take this opportunity of acknowledging the services rendered by Mr. H. Lee, C.S., both in Burdwan and Midnapore, which have led to his selection for an important charge elsewhere. Mr. Cooke has also done well in the Hooghly district. The Commissioner writes of his Personal Assistant, Babu Pran Kumar Das, as an excellent officer, hard-working and thoroughly reliable.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE TRIENNIAL REPORT OF THE SANITARY COMMISSIONER FOR BENGAL ON THE WORKING OF THE VACCINATION DEPARTMENT DURING THE THREE YEARS 1887—90.

MUNICIPAL DEPARTMENT—SANITATION.

Darjeeling, the 20th October 1890.

RESOLUTION.

READ—

The Triennial Report of the Sanitary Commissioner for Bengal on the working o the Vaccination Department during the three years 1887-88, 1888-89, an 1889-90.

Read also—

The annual statistical returns for 1888-89, with the brief notes accompanying them, and the report of the previous year incorporated with the Sanitary Report, together with the Resolutions recorded thereon.

This is the first occasion on which, under instructions contained in the Resolution of the Government of India, Home Department, No. 28—1579-95, dated 15th July 1887, a triennial report on the working of the Vaccination Department in Bengal has been submitted. Dr. Gregg's report, though commendably moderate in length, gives a sufficiently clear view of the working of the Department during the past three years, and the diagrams and maps which accompany it are both intelligible and instructive.

2. The system of administration of the Department remained unchanged; but during the past year the amalgamation of the Sonthal Pergunnahs Circle with the Darjeeling Circle has reduced the number of circles from eight to seven. The following table shows the number of officers and vaccinators working under the Department during each of the three years under report:—

		Inspecting Staff.				Operators.				
						Vaccinators.		Apprentices.		
		Superintendents.	Deputy Superintendents.	Inspectors.	Head Vaccinators, &c., &c.	Total of Inspecting Officers.	Government or paid.	Licensed.	Government or paid.	Licensed.	Total.
In Vaccination Circles	1887-88 ...	8	12	93	21	126	210	1,331	41	598	2,169
	1888-89 ...	8	12	98	19	124	192	1,349	48	731	2,320
	1889-90 ...	7	14	110	21	145	179	1,489	31	588	2,278
In municipalities and dispensaries.	1887-88 ...	...	...	...	...	...	209	14	...	...	223
	1888-89 ...	...	...	...	...	...	240	4	...	...	244
	1889-90 ...	...	...	...	...	...	245	7	...	...	252
Grand Total	1887-88 ...		12	93	21	126	419	1,335	40	598	2,392
	1888-89 ...		12	98	19	124	432	1,353	48	731	2,564
	1889-90 ...	7	14	110	21	145	424	1,487	31	588	2,530

3. The average annual number of operations performed during the past three years was 1,790,098, or 719 to each vaccinator employed; and the average annual percentage of persons vaccinated to the whole population was 2·9. Of the two agencies, the paid and the licensed, the former were far the more active, performing on an average 1,475 operations each to 671 of the licensed vaccinators—a result which is probably due to the fact that the people obtain their services free and are therefore more willing to employ them.

4. The reported proportion of successful operations was in the case of primary operations 99·38 and 95·30 in vaccination circles and municipalities, dispensaries, &c., respectively, and in the case of secondary operations 34·08 and 64·04. Dr. Gregg reports that the percentage of successful secondary operations in municipalities is much too high to be correct, and that either many cases returned as secondary were in fact primary, or that the rate of success was not truly recorded. The question of the accuracy of the reported rate of success was raised by the Government of India in Mr. Lyall's letter No. 327, dated 17th October 1889, in which comment was made on the small proportion of operations checked by inspecting officers. The following table shows, however, that during each of the three years under report the number of operations checked by supervising officers of one class or another has always

exceeded 70 per cent. The Lieutenant-Governor attaches much importance to these inspections, and hopes that future years will show a larger percentage, especially on the part of Superintendents:—

	Number of operations.	Superintendents.		Deputy Superintendents.		All other Inspecting Officers.	
		Number of cases inspected.	Percentage.	Number of cases inspected.	Percentage.	Number of cases.	Percentage.
1887-88	1,639,694	155,924	9·50	144,917	8·83	930,602	56·61
1888-89	1,758,354	133,851	7·61	166,035	9·44	1,033,553	58·78
1889-90	1,703,288	80,562	4·73	189,936	11·15	973,344	57·14

5. Dr. Gregg dwells at some length on the very important question of the results of vaccination as shown by the number of deaths from small-pox in various areas, compared with the proportion of population in those areas protected by vaccination; and illustrates these results by several useful diagrams. The following table shows the proportion of deaths from small-pox during the last seven years in areas under vaccination compared with those not under vaccination:—

	Number of areas which were under vaccination in—							Death-rate from small-pox per mille of population.						
	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90
Areas under vaccination	430	463	472	488	507	542	548	·12	·15	·06	·02	·04	·09	·14
„ not under vaccination ...	149	116	107	91	72	35	29	·25	·55	·26	·16	·16	·09	·15

It is noticeable that though the death-rate in protected areas is, as a rule, much lower than in those which are not under vaccination, the results of the last two years are far from satisfactory. The table shows, moreover, a marked increase in the mortality from small-pox in each of the last three years. In this connection Dr. Gregg remarks that "the protection of rural areas can never be placed on a proper footing until the Compulsory Vaccination Act in a suitably modified form be extended to them," and promises a full report on the subject, which is awaited by Government.

6. The total cost of vaccination during the three years was Rs. 4,97,833-0-11, giving a yearly average of Rs. 1,65,944-5-7. The average cost of each successful operation was one anna six pie against one anna eight pie in the three years 1884—87. It was highest in Calcutta, where each successful operation cost 15 annas 7 pie, and lowest in the Eastern Bengal Circle, where the cost was only 7 pie.

7. The attitude of the people towards vaccination is, according to Dr. Gregg, one of passive acceptance tempered apparently by a considerable but fortunately diminishing amount of passive obstruction. The issue of lymph in tubes from the Animal Vaccination Depôt in Calcutta to the mofussil has proved a failure owing, in Dr. Gregg's opinion, rather to carelessness in storing at the depôt than to any physical causes. Dr. Gregg speaks most unfavourably of the whole working of the depôt, which is under the supervision of the Superintendent, Metropolitan Circle. It is hoped that, when the projected Darjeeling depôt is in working order, the supply of animal lymph from Darjeeling and Calcutta will be sufficient to enable the Bengal vaccine establishment to dispense with lymph obtained from the human subject.

8. The Lieutenant-Governor is glad to notice the excellent work done by Moulvie Tajamal Hossein, Deputy Superintendent of the Bhagulpore Division. The remarks made by the Sanitary Commissioner on the working of his subordinates in this Department will be communicated to the Appointment Department for record.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Secretary to the Government of Bengal.

DISTRICT ROAD FUND.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Road Cess.

No. 3685R.C.

Calcutta, the 31st October 1890.

READ—

Letter from the Accountant-General, Bengal, No. $\frac{L.F.}{454}$, dated the 11th October 1890, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 30th June 1890.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the first quarter of the year 1890-91 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded to the Commissioners of the Rajshahye, Bhagulpore, Chittagong and Chota Nagpore Divisions, to the Superintending Engineers of the Eastern and Western Circles, and to the Financial Department of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

W. B. BESTIC,

Under-Secretary to the Govt. of Bengal.

C. R KIERNANDER,

Offg. Accountant-General, Bengal.

OUTTURN OF BHADOI CROPS, 1890.

THE following is published for general information.

REVENUE DEPT., AGRICULTURE,
CALCUTTA:
The 4th November 1890.

By order of the Lieut.-Govr. of Bengal,
P. NOLAN,
Secretary to the Govt. of Bengal.

Note on the Outturn of the Bhadoi Crops, 1890.

THE character of the rainfall during the past *bhadoi* season was described in the preliminary forecast of the winter rice crop. In the latter half of June, after the monsoon had set in, the fall was abnormally heavy in all parts of the Province During July and August it was again very heavy and continuous in North Bengal and North Behar, moderately heavy in South Behar, and nearly normal in Chutia Nagpur, but on the whole deficient in Orissa, South-West and Eastern Bengal, and especially in a tract in the south of the Province, including Singbhoom, Balasore, Midnapore, Hooghly, and the 24-Pergunnahs.

The excessive rain which fell in the latter half of June directly after the *bhadoi* crops had been sown, and also in July and August, seriously damaged these crops in South and North Behar, and to a less extent in the northern districts of Bengal. in Chittagong, Noakhally, Tipperah, Hooghly, Manbhoom, Pooree, and parts of Cuttack. The damage from this cause was greatest in South and North Behar. The loss from excessive rain was intensified by floods in some of the riparian tracts in which the winter rice crop also seriously suffered from this cause.

In Hooghly, Midnapore, Balasore, and parts of Cuttack the *bhadoi* crops are reported to have suffered to the extent of 4 annas, owing to deficiency of rain in July and August.

There are very few districts in Bengal in which the *bhadoi* crops have not suffered from one cause or another. and in most districts of Behar, in parts of Birbhoom, Khoolna, Moorshedabad, Jessore, Furreedpore. Hazaribagh, and Manbhoom the reported loss varies from 7 to 14 annas. Taking the Province as a whole, the outturn is not expected to be more than 10 annas

Names of districts and subdivisions.	Outturn of winter rice in annas.	Outturn of *bhadoi* crops in annas.	Remarks as to last year's stocks (*vide* final report of the wheat crops for 1889-90).
Khoolna	11	7	The produce of last year's food-grains was below the average. The district exports rice largely in ordinary years.
NUDDEA—			
Sudder	8	4	
Kushtea	10	8	
Meherpore	7	5	The produce of last year's food-grains was below the average.
Chuadanga	1	1	
Ranaghat	10	6	
JESSORE—			
Bongong	6	6	Dito. ditto.
Jhenidah	8	6	
MOORSHEDABAD—			
Sudder	12	4	Ditto ditto.
Lalbagh	10	6	
PATNA—			
Sudder	12	6	The produce of last year's food-grains was on the whole average. The *bhadoi* crops occupy about $\frac{1}{4}$th of the total cultivated area, and the winter rice less than half. The remainder is under *rabi* crops. The flooded areas will be available for *rabi* sowings. If these do well, as they are expected to do, there need be no apprehension of scarcity.
Dinapore	10	4	
MOZUFFERPORE—			
Sudder	10	6	The produce of last year's food-grains was below the average. The remarks with regard to Patna apply to this district.
Hajipore	10	6	
SARUN—			
Sudder	21	2	The produce of last year's food-grains was about the average. There will be undoubtedly distress among the poorer classes, especially in the Sudder subdivision, in spite of a good *rabi* harvest that may follow.
Sewan	10	4	
Gopalgunge	11	5	Last year's produce was below the average—*vide* remarks against Patna, which apply also here.
MONGHYR—			
Begusarai	8	5	

There is cause for watchfulness on the part of the authorities in the tracts above mentioned. especially in Nuddea, and in the Sudder sub-division of Nuddea and Sarun are of opinion that the Sudder and Chuadanga sub-divisions of scarcity in those districts.

In the flooded tracts of Behar there may be distress in the event of failure of the next *rabi* harvest, of which, however, there is at present no likelihood. Abundant rain having fallen over the whole Province in September, and good first-half of October, the prospects of the winter rice crop are assured.

M. FINUCANE,
Director of the Department of Land Records and Agriculture, Bengal.

The 30th October 1890.

I(a).—First forecast of bhadoi crops in Bengal

1	2	3	4	5	6	7	8	9	10	11	12
District.	Sub-division.	Total area of sub-division in square miles.	Total area estimated to be under cultivation in square miles.	Approximate normal area under bhadoi crops.	Approximate area last year's bhadoi crops.	Estimated area under this year's bhadoi crops.	Names of principal bhadoi crops.	Taking 16 annas to represent the average outturn, how many annas represented last year's outturn.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn.	Remarks by the District Officer.	Remarks by the Agricultural Department, Bengal.
								Annas.	Annas.		
Burdwan	Sudder	1,242	993	139	111	130	Early paddy—Aus, kelash and nehali	10	12	The crops were partially affected by excess of rainfall at the sowing time and by floods before harvesting time.	
	Raneegunge	671	399	30	30	30	Aus paddy ... ... Biri kalai	13	15		
	Cutwa	352	265	33	22	32	Early paddy— Toroa ... ... Nehali ... ... Jhanti ... ... Kalai	8	12		
	Culna	432	350	100	80	101	Aus paddy	10	16		
	District Total	2,697	2,006	302	243	292		10½	14		
Bankoora	Sudder	1,921	670	45	45	45	Early paddy—Aus, kelash, tetko and chali.	14	16	Deficiency of rainfall in the month of Sraban (July-August) affected the crops of last year, where as in the current year the weather has been favourable from the beginning. A bumper crop is expected if the weather continues to be as favourable as it has been up to date.	In August the rainfall was much short of the normal (4·25 against 13·5), but it was quite sufficient for the bhadoi crops. Ditto ditto.
	Bishenpore	700	350	43	43	43	Aus and kelash paddy ...	16	20		
	District Total	2,621	1,020	88	88	88		15	18		
Beerbhoom	Sudder	1,108	777	173	173	157	Bhadoi paddy—Aus, bora ... ... Tora	16	20	The rainfall was sufficient and timely. More than an average crop is expected.	In the latter half of June and throughout July the rainfall was considerably in excess and incessant in the Sudder sub-division. In the Rampore Hat sub-division there was considerable excess in June, but in July the fall was nearly normal. Some damage is likely to have been caused by excess of rainfall in the Sudder sub-division.
	Rampore Hat	648	468	70	64	68	Bhadoi paddy—Aus, kalma ... Mahepal ... Bonous ... N. yali ... Bhoosa ...	15	20		
	District Total	1,756	1,245	243	237	225		More than 15	20		
Midnapore	Sudder	3,252	1,799·5	419	390	399	Aus paddy ... ... Til ... ... Jowar ... ... B.ri	13½	9 9 8 13	Deficiency of rainfall at harvesting time is the cause of short outturn.	In July and August taken together, the rainfall was deficient all over the district, particularly in the Sudder and Contai sub-divisions; the mean actual rainfall of the district during these two months having been 13·37 against 27·01 inches. In May the fall was nearly normal, and in June considerably in excess of the normal in all parts of the district; the deficiency of rainfall at the time of ploughing and sowing noticed against Contai is not borne out by rainfall records.
	Contai	881	713	68	69	58	Aus paddy ... ... Biri ... ... Til ... ... Hemp ... ... Jute	14½	14 12 16 14 14	Owing to the deficency of rainfall at the time of ploughing and sowing the bhadoi crops have suffered to some extent, and if there be no rainfall or excess of rainfall, the estimate will not be realized. The short rainfall in July and August greatly damaged the crops.	
	Tumlook	620	465	38	38	38	Aus paddy	15	10		
	Ghattal	366	228	22	22	22	Aus paddy ... ... Jhanji and guji amla ...	12	16		
	District total	5,119	3,205·5	547	519	517	.....	14	About 12		

1	2	3	4	5	6	7	8	9	10	11	12

								Annas.	Annas.		
HOOGHLY ...	Sudder	442	276·25	55·25	55·25	55·25	Aus paddy	6	8	The crop was affected by deficiency of rainfall.	
	Serampore	343	250	30·25	30·25	30·25	Ditto	12	12	There was some loss in consequence of deficient rainfall after sowing.	
	Jehanabad	438	262	87	87	87	Ditto	16	8	Owing to flood at sowing time the crop sustained a loss of 8 annas.	
	Oulooberiah	303	200	25	22	18	Aus and kalies paddy ...	18	14	Deficient rainfall retarded the cultivation. The plants are not thriving well.	
	Howrah	171	169	18	16	17·50	Aus paddy	14	16		
	District Total ...	1,697	1,097·25	215·50	210·50	208	.....	13	About 12		
24-PERGUNNAHS ...	Sudder	1,070	717	65	56	38	Aus paddy	15	14	There does not appear any noticeable difference in the outturn, but the floods which have lately visited the northern part of the Basirhat sub-division have injured the crops to some extent, full particulars of which will be given in the final forecast. As the rains set in early, more attention was paid to the cultivation of winter rice than bhadoi crops, and hence there has been a deficiency in the area of the cultivation of the latter.	
	Diamond Harbour ...	513	453	5	12	5	Ditto and boro paddy	14	12		
	Barasat	392	342	60	60	60	Ditto	10	12		
	Basirhat	530	492	45	70	45	Ditto and boro paddy	16	14		
	Barrackpore	42	12	2	2	2	Ditto	10	9		
	Dum-Dum	56	56	5	3	4	Ditto	12	12		
	District Total ...	2,603	1,900	182	203	154	.....	14	13		
KHOOLNA ...	Sudder	1,972·40	330	21	21	21	Aus boro, and kurmoni rice.	11	5	Three-fourths of the crop have been destroyed by floods.	
	Satkhira	1,372·32	449	40	40	40		8	8		
	Bagirhat	1,505·63	520	70	70	70		11	8	Half of the crop has been destroyed by floods.	
	District Total ...	4,849·92*	1,339	131	131	131	.....	10	7	Ditto ditto.	
NUDDEA	Sudder	701	464	291	291	291	Aus paddy	8	4	Indigo suffered for want of rain in the beginning, and it was injured by too much rain during manufacture. The winter sowing was largely injured by excessive rain in November last.	
							Jute				
							Indigo				
	Kushtea	588†	441†	330	209	220	Aus paddy	4	8		
							Jute				
							Indigo				
	Meherpore	427	320	440	440	440	Aus paddy	8	5	Ploughing and sowing were delayed to a certain extent in the beginning owing to drought, but the weather was very favourable afterwards, and the aus paddy grew into a fine crop. Before the harvest time it was greatly damaged by the heavy floods.	
							Jute	10	14		
							Indigo	16	14		
							Gama(?)	.....	14		
	Chuadanga	427	272	200	200	200	Aus paddy	6	1		
	Kumarkhali	427	256	192	192	192	Aus paddy	10	6		
							Jute	8	6		
							Indigo	12	8		
	District Total ...	2,720	1,953	1,453	1,332	1 343	.....	.....	.....		
JESSORE	Sudder	899	475	210	210	210	Aus paddy	12	12	Timely rainfall during the ploughing and sowing season gave satisfactory results.	
							Jute	16	16		
	Bongong	649	389	19	194	194	Aus paddy	14	6	The outturn of the year would have been 18 annas but for floods which, coming before the crop was fit for harvesting, submerged the crop, and destroyed more than 10 annas of it.	

Jessore	Jhenidah	475	317	60	60	60	Aus paddy	12	6	The early inundation has destroyed the greater part of the aus paddy, which was about to be harvested. In the 2nd forecast of jute 16 annas were shown to be the estimated outturn. But the early inundation has since destroyed about 3 annas of the crop. Hence the difference.		
							Jute	12	13			
	Narail	487	293	30	30	28	Aus paddy	8	6	The rainfall was normal at the time of ploughing and sowing and the crop in the field was very good. The sudden rise of water submerged both ripe and unripe aus crops and thus damaged them considerably.		
	Magurah	425	268	84	84	84	Aus paddy	6	8	The sowings were satisfactory as the rainfall was favourable, much damage was done by floods just before harvest.		
							Jute	12	14			
							Til	4	8			
							Indigo	13	6			
	District total ...	2,925	1,743	578	578	576	.....	11	9½			
Moorshedabad ...	Sudder	767	576	320	320	320	Aus paddy	8	8	Deficiency of rain at ploughing and sowing time caused late sowings. Floods caused most damage being early, and catching the crop which was late, on account of the sowings being late.		
	Lalbagh	372	223	74	74	74		8	8			
	Jungipore	508	406	120	120	120	Aus paddy					
							Shama	10	9

							Chabiru					
							Jamra					
							Jhauti					
	District Total ...	2,159	1,614	555	555	550		9	7½			
Dinagepore ...	Sudder	4,118	2,600	200	200	200	Aus paddy	8½	18	Last year the estimated area under bhadoi crops was shown in the bhadoi forecast as 440, which I find on enquiry to be too large. There has been some loss by flood: but when the crop has been secured, it has been better than I anticipated, and the estimate of 18 annas, I think, is pretty correct.		
	Thakurgaon							6	18			
	Whole district ...	4,118	2,600	200	200	200		7	18			
Rajshahye ...	Sudder	944	583	273	249	273	Aus paddy	12	10½	Owing to the timely rainfall both at the ploughing and sowing seasons, the outturn this year is expected to be a good one, though early floods had greatly injured the crops.	In the latter half of June and in July the rainfall appears to have been excessive and continuous. The bhadoi crops probably suffered to a certain extent from this cause.	
							Jute	... ..	.....

CHITTAGONG ...	Sudder	1,630	611·25	152·8	152·8	115	Early paddy— Bailam ... ... Chiknai ... ... Khaia ... ... Shaitha	18	12	Heavy rainfall in June and July affected the crop injuriously. My estimate of last year's outturn in my general administration report I have since ascertained was too low.	The cause for the decrease in the area sown this year as compared with the normal area under bhadoi crops is not shown.
	Cox's Bazar	937	654·78	20·15	20·15	20·15	Early paddy ... ... Pana paddy .. ... Khaia	18	16	Last year the bhadoi crops were grown and harvested under very favourable circumstances. The crop this year is expected to come up to the average outturn of 16 annas.	To judge from the rainfall records there was no excess of rain in the Chittagong district in June; the recorded fall in this month was short of the normal at every station, except Cox's Bazar, where the excess amounted to only 1 inch. At Chittagong, the deficiency was nearly 6 inches, and the number of rainy days fewer in the month. In July the fall was excessive, being 49·23 against 28·52 inches.
	District Total ...	2,567	1,266·03	172·95	172·95	135·15	.....	18	14		

CHITTAGONG HILL TRACTS.	Sudder	3,383·5	43·25	36	37·45	35·50	Jum paddy Cotton		10 6	10 8	In many cases jum cutting this year was retarded as the hill-people were engaged in cooly work. Consequently almost all jums cut later were not sufficiently burnt. This has affected the outturn to some extent. Incessant rain too throughout the season has washed away the earth from the roots of the plants and promoted weeds. These causes have reduced the outturn to a great extent.	The Commissioner thinks that the area under the crops is under estimated. He estimates the probable outturn of cotton at more than 8 annas. Last year the Commissioner estimated the outturn of jum paddy at 14 annas, although the Deputy Commissioner's estimate was 10 annas.
	Sungoo	1,835·5	23·86	18	18·76	18·5	Jum paddy Cotton		10 6	10 8

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 1st November 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
	Western Districts.		
BURDWAN DIVN. 1	**Burdwan** Nov. 1, '90	Nil	Weather—cloudy and hot. Prospects of *amun* and sugarcane good. Prices of common rice :—
	Ranigunge ...	0·01	Srs. Burdwan ... ... 16½ ; Culna ... ... 15 ; Cutwa ... ... 16 ; Ranigunge ... ... 17 } per rupee.
2	**Bankoora** ,, 1, '90	Nil	Weather—fine, but occasionally cloudy. Prospects of *amun* crop continue good. Early rice has been an average crop. *Amun* expected to yield 16 annas in Sudder and 14 annas in the Bissenpore subdivision. Sugarcane thriving. Common rice selling at 19 seers per rupee at Sudder and 20 seers at Bissenpore.
3	**Birbhum** ,, 1, '90	0·24	Weather—seasonable. Crops remarkably excellent. Price of rice 16 to 19 seers per rupee.
4	**Midnapur** ,, 1, '90	0·38	Weather—cloudy, wind variable. Prospects of rice crop good everywhere. Some of the low-lying lands in Contai submerged. Jute in Tumlook is an average crop. Prices of common rice :—
			Srs. Sudder ... ... 15 ; Ghatal ... ... 16 ; Tumlook ... ... 16 ; Contai ... ... 19 } per rupee.
5	**Hooghly** ,, 1, '90	Nil	Weather—seasonable. Paddy plants healthy, and prospects good. Prices of common rice :—
			Srs. Sudder ... ... 14 ; Serampore ... ... 14 ; Jehanabad ... ... 16 } per rupee.
	Howrah ,, 1, '90	Nil	Weather—seasonable. *Amun* and other crops doing well. Price of common rice 14 seers per rupee.
	Central Districts.		
PRESIDENCY DIVN. 6	**24-Perghs.** Nov. 1, '90	Nil	Weather—seasonable. Prospects of *amun* paddy continue good, and the yield is estimated at about 13 annas. Yield of jute estimated at 15 annas. Lands being prepared for *rubbi* crops. Common rice sells at from 13 to 15 seers a rupee.
7	**Nuddea** ,, 1, '90	Nil	Weather—seasonable. Prospects of crops fair. Sowing of winter crops going on. Price of rice stationary.
	Meherpore ...	0·06	
8	**Khoolna** ,, 1, '90	Nil	Weather—seasonable. Prospects of the *amun* crop satisfactory in Sudder and Bagirhat and in southern portion of Satkhira. In the north of Satkhira the *amun* was destroyed by the late flood. It was also slightly injured everywhere by the high wind of the 22nd October.
9	**Jessore** ,, 1, '90	Nil	Weather—seasonable. *Rubbi* sowings in progress. Price of rice stationary.
	Magura ...	0·03	
	Narail ...	0·06	
10	**Moorshedabad** ,, 1, '90	0·94	Weather seasonable. *Amun* paddy in ear. *Rubbi* crops being sown. Prospects favourable.
RAJSHAHYE DIVN. 11	**Dinagepur** ,, 1, '90	Nil	Weather—seasonable. Prospects continue to be very good, and, unless some unforeseen calamity occurs, the winter rice should be unusually good. Price of rice remains stationary.
12	**Rajshahye** ,, 1, '90	Figures not given.	Fair weather. A shower last night (31st October). Steeping of jute almost finished. Tobacco transplantation going on. Prospects of paddy and winter crops good. Ganja plants being transplanted.
	Nattore ...	0·08	
13	**Rungpur** ,, 1, '90	Nil	Weather—not fine, with cool nights and heavy morning dews. Prospects of crops generally good. Great damage done by excessive rain to tobacco seedlings, and the potato crop will not be a good one owing to late planting from the same cause.
14	**Bogra** ,, 1, '90	0·11	Weather—fine till 31st October; morning of 1st November cloudy and showery, afternoon fine again. All standing crops promise well, after allowing for partial injury caused by floods to the *amun* rice crop. Common rice selling at 17 seers a rupee.
	Sherpur ..	0·11	
15	**Pubna** ,, 1, '90	Nil	Weather—cool and bright. Prospects of crops continue good. Prices appear to be stationary.
16	**Darjeeling** ,, 1, '90	Nil	Weather—fair. Potatoes and mustard are being sown in the Terai. *Haimanti* paddy, *marua*, and *pafar* in the hills progressing favourably. Prospects good.
17	**Julpigoree** ,, 1, '90	Nil	Cold season has almost set in. Prospects of *haimanti* paddy good. Harvesting of jute going on. Prices stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Divn. 18	Dacca Nov. 1, '90	0·04	Weather—seasonable. Heavy rain in Manickgunge. *Asvini* paddy being harvested. *Amun* paddy thriving. Cultivation going on for mustard and pulses. Fodder is available Common rice sold at from 12 to 15 seers per rupee.
Dacca Divn. 19	Furreedpur „ 1, '90	Nil	Weather—seasonable. State and prospects of all standing crops good. Reaping of early *amun* has commenced. Winter crops are being sown. Price of rice stationary.
Dacca Divn. 20	Backergunge „ 1, '90	Nil	Weather—seasonable. Prospects and condition of crops good. Common rice selling at about 13 seers per rupee.
Dacca Divn. 21	Mymensingh „ 1, '90	0·40	Weather—cool and generally fine; cloudy since yesterday (31st October), and light showers falling to-day (1st November). *Amun* paddy thriving. *Kalai* somewhat damaged by heavy rain last week. Common rice sells at 13 seers per rupee.
Chittagong Divn. 22	Chittagong „ 4, '90	1·32	Weather—unsettled. *Amun* crop in ear. Prospects favourable. Prices steady.
Chittagong Divn. 23	Noakholly „ 1, '90	Nil	Weather—not seasonable: cloudy and sultry. *Amun* maturing. Preparation of lands for *rubbi* crops going on. Price of rice stationary.
Chittagong Divn. 24	Tipperah „ 1, '90	1·02	Weather—clear. Cold weather setting in. Prospects of *amun* excellent. Lands being tilled for winter crops. Prices stationary.
Chittagong Divn. 25	Chittagong Hill Tracts. Oct. 30, '90	0·55	Weather—disturbed up to 27th; since then more settled. Harvesting of *jum* paddy nearly complete. Cotton forming pods here and there. Plough-paddy flowering. Common rice being sold at 11 seers 6¼ chittacks per rupee.
	Hill Tipperah ...	...	Report not received.
BEHAR.			
Patna Divn. 26	Patna Nov. 1, '90	Nil	Weather—hot in the day and cool at night. Sowing of *rubbi* crops going on. Paddy promising well. *Rahar* and cotton look flourishing. Poppy fields are being prepared. Prices of food-grains almost stationary.
Patna Divn. 27	Gya „ 1, '90	Nil	Weather—clear days and cold nights. Prospects of crops good. Sowing of *rubbi* crops going on throughout the district. Prices of food-grains falling. A flight of locusts reported from the Aurangabad subdivision, but the extent of damage to the crops not reported.
Patna Divn. 28	Shahabad „ 1, '90	Nil	Weather—cooler. Prospects of *rubbi* and paddy crops good. *Rubbi* crops are still being sown. Early paddy being harvested. Opium prospects at present excellent, the weather being favourable for sowings.
Patna Divn. 29	Durbhunga „ 1, '90	Nil	Weather—bright and getting cool. Rice crop looking well and coming into ear. *Rubbi* sowings in progress, and those already sown have germinated well. Tobacco doing well. Prices stationary.
Patna Divn. 30	Mozufferpur „ 1, '90	Nil	Weather—dry and fairly cool. Sowing of *rubbi* crops proceeding. Rice crop in excellent condition. Prices moderate.
Patna Divn. 31	Sarun „ 1, '90	Nil	Weather—fine and cold. *Rubbi* and rice prospects both excellent. Prices slightly falling.
Patna Divn. 32	Chumparun „ 1, '90	Nil	Weather—pleasantly cool: sky clear. *Rubbi* sowings have commenced. Paddy in ear and doing very well. Prices stationary.
Bhagulpore Divn. 33	Monghyr „ 1, '90	Nil	Weather—seasonable. *Rubbi* crops are being sown. Winter rice promising.
Bhagulpore Divn. 34	Bhagulpore „ 1, '90	Nil	Weather—clear. Mornings and evenings cool, nights dewy. Winter rice promising. Other crops doing well. Lands being prepared for spring crops. Indigo sowings in progress.
Bhagulpore Divn. 35	Purneah „ 1, '90 Kishengunge ...	Nil 0·06	Weather—cool and fine with north-west wind. Prospects favourable, but the rain in October has retarded *rubbi* sowings, specially sowings of rape seed.
Bhagulpore Divn. 36	Maldah „ 1, '90	Nil	Weather—seasonable. Condition and prospect of *amun* crop excellent. In some parts it is in ear. *Kalai* thriving well. *Rubbi* crops being sown. State of mulberry plants good. Common rice selling at from 13 to 18 seers a rupee.
Bhagulpore Divn. 37	Sonthal Pergha. ...	...	Report not received.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.			
Orissa Divn. 38	Cuttack Nov. 1, '90	0·10	Weather—dry and cool. General prospects of paddy crop good, except in some parts of the Kujang estate where a failure of crops has occurred. Sowing of *rubbi* crops nearly finished. Mustard sown to the extent of 10 annas. Outturn of *beali* rice in Sudder 12 annas, Jajpur 6¾ annas, and Kenerapara 12 annas.
Orissa Divn. 39	Pooree Oct. 30, '90	0·56	Weather—seasonable. Late *sarad* (winter rice) is in ear. *Laghu* °*arad* (early winter rice) ripening. Miscellaneous crops doing well. Price of common rice stationary.
Orissa Divn. 40	Balasore Nov. 1, '90	0 49	Weather—fine up to 30th October; since then stormy. Prospects of winter rice fairly good except in thana Baliapal.
CHOTA NAGPORE			
South-West Frontier Agency.			
Chota Nagpore Divn. 41	Hazaribagh Nov. 1, '90	Nil	Weather—seasonable; cloudy since last two days. State of crops favourable throughout the district.
Chota Nagpore Divn. 42	Lohardugga „ 1, '90	Nil	Weather—cloudy. Harvesting of *gora* rice finished. Prospect of winter rice continues favourable. Prices steady.
Chota Nagpore Divn. 43	Singbhoom „ 1, '90	Nil	Weather—very cloudy and threatening rain. Winter rice being reaped in places; 16 annas outturn expected in Ghatsila and Monarpur thanas, and 10 to 12 annas outturn in the rest of the district. *Rubbi* sowings being continued. Prices stationary.
Chota Nagpore Divn. 44	Manbhoom „ 1, '90	Nil	Weather—seasonable. All crops doing well.

* Mean of six days.

Explanations.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the l
Wind.—The humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numb
Rainfall.—The numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the p
ceding in the district tending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

years. The variations are *negatives* when the mean for the week is less than the corresponding normal mean, and *positives* when greater.
cating cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the *normal* means
ch years. The means of the district are the numerical average of the rainfall return received in the district, *i.e.*, from total rainfall at the subdivisional

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 31st of October 1890.

Meteorological division.	District.	Station.	Rainfall. Saturday, 25th October.	Sunday, 26th October.	Monday, 27th October.	Tuesday, 28th October.	Wednesday, 29th October.	Thursday, 30th October.	Friday, 31st October.	Total: Number of rainy days.	Total: Rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May 1890.	Average rainfall from 15th May to date.

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the r are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 4th November* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 31st OCTOBER 1890.

WEATHER, especially in the early part of the week, has been settled and fine over the whole province except in the south-west corner, where the influence of shallow local depressions in the south of the Bay gave showers and rather strong winds during the last three days. The first of these depressions crossed the extreme south of the peninsula, and the second, forming to the east, gave squally weather as far north as Diamond Island, where wind velocity rose to 17 miles an hour on Tuesday. This depression continued to influence the weather for some days, but as it approached the Madras coast it became very diffused and disappeared, leaving the pressure distribution characteristic of the season. A current of moist air, due to the disturbance, flowed northwards, and gave cloudy weather and scattered showers in Orissa and Lower Bengal, the heaviest rain falling in the Balasore and Midnapore districts on Friday, the last day of the week.

At the commencement of the week pressure was above 30 inches in Bengal and Assam, with lowest pressure in the centre of the province. Westerly or northerly winds were blowing at nearly all stations, and temperature, below the normal except in Orissa and the adjacent part of South-West Bengal, was falling rather rapidly almost everywhere. Pressure during the week underwent the usual small oscillations, but was never below the normal, and wind velocity was invariably low, while directions were irregular from the 28th to the 31st.

Pressure rose moderately on the 25th, fell slowly on the 26th, again rose moderately on the 27th, after which there was a slow fall till the last day of the week, when there was a very slow rise, the distribution being very little different from that at the beginning, but with lowest pressure in Orissa and isobars running east and west instead of north and south. The weekly means are above the normal except over the Darjeeling Hills, where, however, defect is only ·003 inch. Elsewhere excess varies from a hundredth of an inch in the west of Assam and east of North Bengal to more than a twentieth of an inch in the southern districts.

Temperature has been generally below the normal except in Assam and Orissa, in the former of which mean excess is ·4° and in the latter 1·1°. Defect is 2° in South Behar, 1·8° in Chutia Nagpur, 1·2° in North Behar, 1° in East Bengal, ·9° in South-West Bengal, and ·7° in North Bengal. The somewhat rapid fall of temperature at the beginning of the week continued till the 27th, when defect was between 3° and 4° at many stations, and averaged more than 3° in Chutia Nagpur and South Behar, and more than 2° in South-West Bengal. During the last four days changes were more irregular, but generally upwards. On the 31st excess prevailed except in Behar, North Bengal, and Assam, where there was still defect ranging up to 2°.

Rainfall.—Showers fell in East Bengal in the beginning of the week, and in Orissa and South-West Bengal at the end, while in the northern districts practically no rain has been received. Behar and Chutia Nagpur have been entirely rainless, and the average fall for North Bengal is only ·01 inch. In the southern districts the mean falls are deficient, in East Bengal by ·64 inch, in South-West Bengal by ·53 inch, and in Orissa by ·15 inch. Somes heavy showers fell on Friday, Contai in the Midnapore district receiving 4·47 inches and one or two other stations more than one inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 31st of October 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1890.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain, ⌓, dew; ≡, fog.

The 3rd November 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 11th October 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 11th October 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 29·5 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 5·3 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1889—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885–89.	1890.
Ratio of births per 1,000 of the population per annum	29·4	18·1	26·9	16·8	29·8	24·2	29·5

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 20th Sept. 1890.	27th Sept. 1890.	4th Oct. 1890.	11th Oct. 1890.	Towns.	Weeks ending— 20th Sept. 1890.	27th Sept. 1890.	4th Oct. 1890.	11th Oct. 1890.
Burdwan	21·4	16·8	53·4	18·7	Narainganj	37·3	41·4	37·3	49·7
Midnapore	13·9	9·3	17·0	14·8	Chittagong	4·7	11·7	9·4	9·4
Hughli and Chinsurah	39·4	18·1	34·5	41·9	Comillah	19·3	27·0	15·4	27·0
Serampore	45·1	41·2	47·1	49·1	Patna City	14·6	11·4	19·8	12·3
Utterpara	37·7	28·3	9·4	37·7	Gya	42·4	26·0	36·9	30·7
Howrah	21·8	22·9	25·2	29·1	Arrah	57·4	19·1	47·9	45·5
Bali	10·5	17·5	28·1	31·6	Mozufferpore	25·5	24·3	24·3	29·2
Krishnagar	17·0	17·0	26·5	9·5	Durbhanga	37·0	38·5	40·9	43·2
Ranaghat	12·0	24·0	12·0	12·0	Chupra	38·2	13·1	38·2	46·5
Santipore	14·0	5·2	26·3	17·5	Bhagulpore	19·9	29·0	26·3	42·5
Jessore	.....	12·2	.....	6·1	Monghyr	46·1	39·8	57·9	58·8
Rampore Beauleah	57·8	57·8	68·1	39·4	Purneah	11·4	10·4	10·4	20·8
Darjiling	37·0	44·5	22·2	51·9	Poori	12·6	12·6	14·7	18·9
Dacca	15·6	21·4	13·0	18·8	Total ...	26·6	22·2	29·7	29·5

It will be seen that last week the highest birth-rate was returned from Monghyr (58·8) and the lowest from Jessore (6·1).

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 25·3 per 1,000 of the population. The rate of the week is 3·6 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years except 1888—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885–89.	1890.
Ratio of deaths per 1,000 of the population per annum	37·1	25·9	31·0	20·5	30·2	28·9	25·3

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 20th Sept. 1890.	27th Sept. 1890.	4th Oct. 1890.	11th Oct. 1890.	Towns.	Weeks ending— 20th Sept. 1890.	27th Sept. 1890.	4th Oct. 1890.	11th Oct. 1890.
Burdwan	19·8	24·4	30·5	24·4	Narainganj	16·6	4·1	16·6	37·3
Midnapore	17·0	18·6	15·5	27·9	Chittagong	14·1	16·4	9·4	16·4
Hughli and Chinsurah	24·6	21·3	24·6	27·9	Comillah	19·3	15·4	7·7	15·4
Serampore	29·4	49·1	29·4	43·2	Patna City	14·9	19·8	14·9	20·4
Utterpara	28·3	18·9	28·3	28·3	Gya	38·9	39·6	47·1	54·0
Howrah	13·2	14·9	18·9	14·8	Arrah	35·9	55·5	18·2	22·9
Bali	38·6	35·1	24·6	28·1	Mozufferpore	26·8	15·2	31·5	24·3
Krishnagar	11·4	18·9	18·9	5·7	Durbhanga	34·2	33·0	35·4	28·7
Ranaghat	29·9	6·0	6·0	12·0	Chupra	28·2	11·1	34·2	27·2
Santipore	14·0	.....	12·3	3·5	Bhagulpore	17·2	20·8	14·5	14·5
Jessore	18·4	6·1	18·4	30·6	Monghyr	35·3	28·9	30·7	29·8
Rampore Beauleah	31·5	36·8	36·8	44·7	Purneah	17·3	6·9	10·4	17·3
Darjiling	14·8	37·0	22·2	44·5	Poori	21·0	14·7	25·2	42·0
Dacca	21·4	22·1	17·5	16·2	Total ...	23·4	22·4	23·9	25·2

It will be seen that last week the highest mortality occurred in the town of Gya (54·) and the lowest in Santipore (3·5).

Measured by last week's mortality, the highest annual death-rates from cholera, fever and other causes occurred in the following towns:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Gya	9·6	Rampore Beauleah ...	39·4	Poori ...	14·7
Durbhanga	9·4	Gya ...	36·2	Midnapore ...	13·9
Mozufferpore ...	7·3	Burdwan ...	22·9	Serampore ...	13·7
Arrah	7·2	Serampore ...	21·6	Monghyr ...	12·6
Chupra	5·0			Chupra ...	11·1
Patna City ...	4·9				

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 3· from cholera, against 2·3 per 1,000 in the preceding week; ·2 from small-pox, against ·5; 12·7 from fever, against 11·7; 2·6 from bowel-complaints, against the same ratio; ·6 from injury, against ·3; and 6·1 from other causes, against 5·6 in the preceding week. The mortality from bowel-complaints is noticeably severe only in the Poori town, there being nine deaths (18·9 per 1,000 of the population).

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	26·9	Christians ...	14·9	Under 1 year ...	188·5
Females	23·5	Hindus ...	27·8	1 and under 5 years ...	33·0
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	114	Mahomedans ...	19·2	5 „ 10 „ ...	18·4
				10 „ 15 „ ...	12·4
				15 „ 20 „ ...	8·4
				20 „ 30 „ ...	12·3
				30 „ 40 „ ...	17·2
				40 „ 50 „ ...	18·7
				50 „ 60 „ ...	32·2
				60 years and upwards ...	70·4

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 3rd November 1890.

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 11th October 1890.

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of July 1890.

Increases.	Tons.
Coal	5,843
For railway and flotilla consumption.	
Rice	1,446
This increase was contributed by stations on the Northern Section, the Calcutta market being favourable.	
Jute, unscrewed	3,063
Kooshtea, Goalundo, and Serajganj contributed about one-half of this increase and the Northern Section generally the remainder.	
Railway plant, &c.	3,205
For repairs and renewals.	
Salt	743
The increase appears in the bookings from Chitpur.	

Decreases.	
Jute, screwed	1,031
Narayanganj shows the principal falling off under this head.	
Oil-seeds	1,572
Good crops in the district, and an improved market.	
Tobacco	719
Kawnia and Rungpur show the principal decreases, said to be due to heavy rainfall and floods.	

CALCUTTA, *the 24th September* 1890.

F. P. QUINLAN,
Examiner of Accounts.

Bengal Central Railway.

Abstract of principal commodities carried over the Bengal Central Railway during the month of August 1890, *as compared with the same month of the previous year.*

Comparative Statement of the principal commodities carried over the Bengal Central Railway during the month of August 1890.

INCREASES.

	Tons.
Betel-nuts	339

From Bengal Central Flotilla stations only.

DECREASES.

Coal	350

Sufficiency of stock for Railway and Flotilla consumption.

Jute	3,468

The principal decrease was from Khoolna, and is said to have been due to the dulness of the market.

FRED HENSLEY,
Examiner of Accounts and Joint-Auditor.

CALCUTTA, *the* 11*th October* 1890.

EAST INDIAN RAILWAY.

General remarks on the fluctuations of principal staples carried over the East Indian Railway during four weeks ended 27th September 1890.

INCREASES.

Coal and coke.—There was an increase both in the upwards and downwards traffic; that in the former was chiefly due to larger takings by the Bombay, Baroda and Central India Railway *viâ* Agra. The downwards increase was partly due to shipment to coast ports.

Cotton.—The increase was chiefly in despatches from Agra to Howrah and Cawnpore, for shipment and manufacture, respectively.

Turmeric.—Chiefly in despatches from Howrah to stations in the North-West Provinces.

Gunny bags.—The improvement in this staple was chiefly in despatches from Howrah and neighbouring stations, to Cawnpore, Delhi and the Punjab.

Rice (husked and unhusked).—The increase was due to considerable despatches of rice husked from stations on the Loop line to Howrah for shipment and to stations on the Oudh and Rohilkhand Railway

Other rain and spring crops.—Chiefly in despatches from stations on the Sahebgunge district to stations on the Dinapore district, and to the Bengal and North-Western Railway.

Government stores.—The increase was principally in ordnance stores from Howrah and Allahabad Fort to Firozepur, Rawalpindi and other stations on the North-Western Railway.

Railway material, Foreign.—Chiefly in despatches of rails and other material from Howrah to Benares Cantonment, Delhi, and Umballa.

Stone.—Principally in stone ballast from Pakur to Chitpore.

Sugar (refined and unrefined).—There was a decrease in the weight carried attended with an increase in the earnings, and this was chiefly due to long distance despatches from Howrah to stations on the North-Western Railway. There was a falling off in short lead traffic on the "B" and "C" districts.

Bones.—Chiefly in despatches from *vid* Digha Ghât and *vid* Moghalsarai to Bally and Chitpore.

DECREASES.

Piece-goods, European.—The falling off in this staple was chiefly in despatches from Howrah and Bombay *vid* Jubbulpore.

Gram and pulses.—There was an increase in the weight carried attended with a decrease in earnings; the former was chiefly due to short distance traffic from Loop line stations to Howrah for shipment and local consumption; the decrease in earnings was in long distance despatches from stations on the "D" district.

Brass and copper.—Chiefly in despatches from Howrah consequent on the dull state of the import business generally.

Salt.—The falling off under this head was chiefly in despatches from Howrah owing to the dull state of the market and to earlier despatches last year in anticipation of the Durga Poojahs.

Saltpetre.—Limited demand at Howrah.

Seeds.—This is a continuation of the decrease reported last month, and was chiefly in mustard and other oil-seeds.

N. ST. L. CARTER, *Traffic Manager.*

TRAFFIC MANAGER'S OFFICE, CALCUTTA, *the 31st October* 1890.

Weekly Return of Traffic Receipts on Indian Railways.

EAST INDIAN RAILWAY.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE CALCUTTA MUNICIPAL CORPORATION FOR THE YEAR 1889-90.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Darjeeling, the 4th November 1890.

RESOLUTION.

READ—

The Administration Report of the Calcutta Municipal Corporation for the year 1889-90.

This is the first report submitted by the Commissioners of the Town of Calcutta on the working of the Municipality under the Calcutta Municipal Consolidation Act II of 1888. As the area of the Town now comprises the amalgamated area of the Suburbs, the general statistics given are not comparable with those of previous years, and it is probably due to this cause, as well as to the fact that a new Chairman has been appointed after the close of the year, that the present report is in some respects less complete than others which have lately been submitted by the Commissioners. The Lieutenant-Governor observes that on previous occasions it has been usual for the Commissioners to summarise the reports they receive from their Health Officer and Engineer, and to describe in more or less detail in separate chapters the work done during the year in these departments. In the present year these important chapters have been omitted, while the subjects to which they refer have only received very

cursory treatment in an introductory chapter, and it is necessary to examine the departmental reports in order to obtain any adequate appreciation of the work really done by the Municipality. The object of an administration report is, however, to lay before the public and Government a self-contained account of the work done during the year, and the Lieutenant-Governor would therefore be glad if in future reports the Commissioners would revert to their former practice and arrange to furnish fuller information under the heads of Sanitation and Engineering. At the same time it might be possible to curtail some of the other sections of the report, and so not increase the dimensions of a volume which is already sufficiently bulky. The Lieutenant-Governor desires also to express a hope that in future it may be found possible to submit this report with greater punctuality. It is due to Government on the 1st August, but the present report was not received until the 17th of October.

Attendance of Commissioners.

2. As might have been expected during the first year of the amalgamation, the duties which devolved on the Commissioners were exceptionally onerous. There were 34 general meetings against 14 in the previous year; 125 meetings of standing Committees against 56; 66 of special Committees against 28; and 57 of Sub-Committees against 33. Altogether the total number of meetings was 282 against 131. There were no less than 26 members who attended 50 meetings or more during the year, and seven members (of whom three were nominated and four elected) who attended over 100 meetings. The Lieutenant-Governor considers that these results, showing how largely the Commissioners devote their time and trouble without remuneration to municipal duties, afford the most satisfactory evidence of the growth of public spirit in the metropolis. The account given of the principal subjects under discussion at these meetings indicates the importance and variety of municipal interests under consideration. Among other items may be mentioned the new Central Road, the question of burning the town refuse, the extension of water-supply and drainage to the Suburbs, the question of legislation for lepers, the protection of wild birds, the maintenance of a public library, the preparation of bye-laws, and the reorganization of establishments in the amalgamated area.

Loans.

3. The loan liability of the Corporation at the close of the year stood as follows:—

	Rs.
6 per cent. debentures	4,17,500
5 ditto	1,12,92,400
4½ ditto	10,48,300
	1,27,58,200
Consolidated loans from Government ...	60,11,610
	1,87,69,810

Two new 5 per cent. loans were raised during the year; one for 5 lakhs in June 1889 for water-supply, for which tenders amounting to Rs. 39,26,000 were received, and which was placed at an average premium of Rs. 5-14-6; and the other for 14 lakhs, which was incurred for both water-supply and drainage and the repayment of 6 per cent. debentures. The larger loan was raised in September, and the whole of it was taken up at rates varying from Rs. 3 to Rs. 5-12 premium. These results are satisfactory. The total borrowing power of the Commissioners is fixed by section 410 of the Act at such an amount as that the sum payable thereon annually by way of interest and as instalments due to the reserve funds shall not be more than 10 per cent. on the annual valuation of Calcutta. The amount of this valuation during the past year was Rs. 1,73,70,515, and at the present time, therefore, the Commissioners are legally competent to raise a loan liability on 5 per cent. debentures amounting to Rs. 3,46,00,000.

Income and expenditure.

4. The actual income of the Municipality during the year was Rs. 42,17,121, and the actual disbursements amounted to Rs. 41,87,831. The principal items of receipts and charges are as follows:—

Receipts.	Rs.	Expenditure.	Rs.
General rate at 9½ per cent.	17,34,869	Interest on general loans including drainage ...	4,25,237
Sewage rate, &c., at 2 per cent.	3,10,034	Contribution for repayment of general loans ...	1,72,933
Water rate at 6 and 3 per cent. ...	9,11,028	General establishment ...	3,86,080
Lighting rate at 2 per cent.	3,02,259	Road department ...	4,14,289
Taxes	4,95,821	Gowkhana	1,69,221
Municipal Market ...	1,20,477	Conservancy... ...	3,40,621
		Sewage rate charges ...	2,76,799
		Water rate charges, including interest on loans, Rs. 4,29,916, and contribution for repayment of loans, Rs. 1,70,917 ...	9,33,930
		Lighting, &c. ...	3,17,860

The total rates now realized amount to 19½ per cent. on the annual valuation of assessable property, against a maximum of 23 per cent. allowed under the law, and the total incidence of taxation of all sorts is at the rate of Rs. 6-8-1 per head of the population according to the census of 1881.

Collections and balances.

5. The Lieutenant-Governor observes that the receipts from rates fell considerably short of the budget estimate, the total receipts under the four rates being Rs. 31,78,704 as against the estimate of Rs. 33,47,000, a total deficit of Rs. 1,68,296. The only explanation which the Commissioners give of this unusual discrepancy is under the head of the general fund (paragraph 83), where it is ascribed to short bustee collections and disputed assessments. It is evident, on analysing the collections, that it is in fact due to a large increase in the outstanding balances. The usual statement, bringing together all the balances of the different departments, has been omitted from the present report; but if the items are picked out from paragraphs 97 to 109 the result is found to be as follows:—

	Outstanding balances of rate bills.	
	End of 1888-89.	End of 1889-90.
	Rs.	Rs.
In the hands of Assessor	58,173	67,489
Ditto of Collector	26,014	80,645
Ditto of Joint Collector ...	...	42,209
Ditto of Warrant Superintendent ...	93,841	1,51,933
	1,78,028	3,42,276
		1,78,028
Excess of 1889-90 over 1888-89		1,64,248

It will thus be seen that the excess of outstandings corresponds very closely with the deficit in the collections, showing that the estimate was approximately correct.

6. The increase in the arrears is very briefly explained by the Collector in paragraph 100, and somewhat more fully by the Joint-Collector for the Suburbs in paragraph 103. It appears that it is attributable to the inevitable temporary derangement of the collecting machinery due to the addition of a large suburban area, and also to changes in the system of rating introduced by the new Act. The difficulties under which the Collectors laboured may be thus summarised:—

(1) *The collections of five quarters of the house rate within the year* —This rate used to be collected during the succeeding quarter, while the whole of the consolidated rate in which it has been merged under the new Act is collected during the currency of the quarter for which it is due. The result was that the bill department had to get through the work of five quarters in a year, and necessarily fell much into arrears at its commencement, while more persons than usual postponed payment of their dues owing to the double demand for the first quarter.

(2) *The recovery of rates for bustees from the landlords.*—This measure, as might be expected, met with much opposition from the landlords, who have

petitioned the Lieutenant-Governor, and are now petitioning the Governor-General in Council, to revert to the former system of collecting the bulk of the rates direct from the hut-owners. Under any circumstances, the collections of this portion of the rates during the first year of the operation of the new Act must have fallen very short of the demand, but the difficulty was enhanced by the impossibility of making out correct bustee bills in many cases till after the annual valuation required by the Act. Apart from his ordinary work of revaluation, the Assessor was overwhelmed with objections from bustee owners, especially in the added area, where he had no trustworthy materials to refer to until the bustees had been revalued; and looking to the difficulties with which he had to contend, it seems to the Lieutenant-Governor to be highly creditable to this officer that he should have so far surmounted them at the close of the year that the arrears in his hands of all sorts were only Rs. 67,489 against Rs. 58,173 at the beginning of the year.

In the statement showing the working of the Collector's Department the collections on account of bustees are not separated from those of the landlords' share of the consolidated rate, and the report of the Commissioners therefore does not show clearly the extent to which the bustee collections fell short of the demand; but the Lieutenant-Governor gathers from the statistics which are given that the total demand for bustees was Rs 5,03,337, and that the arrears at the close of the year, excluding those for which the Collector is responsible, were—

	Rs.
In the hands of the Assessor	3,464
Ditto of the Joint Collector	14,843
Ditto of the Warrant Superintendent	51,962
	70,269

The total arrears in the hands of the Collector under the joint head of landlords' share of the consolidated rate and bustee bills were Rs. 60,102, while the arrears of the occupiers' share were Rs. 20,543; and if this latter figure can be taken as the measure of the similar arrears due from owners, it leaves Rs. 39,559 as the share of the bustee owners, in the hands of the Collector, thus raising the total arrears from all departments to Rs. 1,09,828. By the same process, viz., actual figures taken from the reports of the Assessor, Joint-Collector and Warrant Superintendent, and probable figures from the Collector's report, it appears that the amount remitted or cancelled was Rs. 20,979. It would seem, therefore, that the collections were approximately Rs. 3,72,590 out of the demand of Rs. 5,03,337, or 74 per cent. Considering the exceptional difficulties which beset the collection of these bills during the first year, this result is fairly satisfactory. The Lieutenant-Governor hopes that next year the Commissioners will furnish the statistics regarding these bills separately, and that they will show that good progress has been made in recovering the arrears. It is presumed that after a proper valuation has been made under the new Act of all the bustees in the old and added areas, the difficulties which are now experienced will disappear.

(3) *The increase in rates in the added area.*—Before the amalgamation the rate-payers in this area paid 7½ per cent. *plus* house service fees which varied with the valuation, but averaged about 4½ per cent. Under the new Act the rates were raised to 19 or 16 per cent., according as the water-rate was 6 or 3 per cent. So large an increase must obviously have augmented the reluctance of the rate-payers to pay with punctuality.

(4) *The unprecedented amount of work thrown upon the Assessor's department during the year of transition.*—This is another difficulty which, with the completed valuation of the bustees, may be expected to entirely disappear.

(5) *The new assessment section which has led to a general increase in the rating of residential houses.*—This has naturally been followed by an unusual number of objections, the decision of which throws much work on the Assessor's department, while the ratepayer refuses payment till his objection and appeal, if he appeals to the Small Cause Court, have been decided. This difficulty will only cease when the entire city has been revalued under the Act, and all objections and appeals have been disposed of.

It is thus evident that the collection of rate bills was rendered exceptionally difficult during the past year, and, under the circumstances, the increase in the outstandings does not appear to be larger than might have been reasonably expected; but of the five causes enumerated, only the 3rd and 5th will continue to operate during the present year, and their effect will be comparatively small. The Lieutenant-Governor trusts, therefore, that the year 1890-91 will close with the outstanding balance of the rate bills considerably reduced.

License Department.

7. The working of the License Department appears to have been satisfactory. The receipts from the trade and profession tax, which had never before exceeded Rs. 2,65,996, rose to Rs. 2,79,313 for the old area and Rs. 34,951 were collected for the added portion of the Suburbs. Here, however, as elsewhere, the report is disappointing in that no attempt has been made to illustrate the working of the new Act. Most important changes were introduced by that Act in the system of assessments, the gradation of trades and professions and the penal sections, and the manner in which they have worked ought to have been set forth in the annual report for the first year of its operation.

Valuation.

8. As already stated, the annual valuation of Calcutta for the past year was Rs. 1,73,70,515. The apparent increase is only Rs. 26,408, but the real increase is Rs. 2,76,408, after allowing for a nominal reduction of 2½ lakhs in the valuation of the Kidderpore dock premises. The Lieutenant-Governor understands that the Port Commissioners accepted a valuation of 7½ lakhs, being 7½ per cent. on the estimated capital outlay of their property, because under the Bengal Municipal Act they would only be called upon to pay one-fourth rates on the excess over one lakh of rupees; but that they demurred to this valuation being maintained under the Calcutta Municipal Consolidation Act, which fixes the lower percentage of 5 per cent. on the capital outlay, but charges full rates on the whole amount, and that they eventually consented to a compromise by which they should pay the full rates, but have the valuation reduced to 5 per cent. on the assumed capital outlay. Hence there is a nominal reduction in the assessed value which will, however, entail a considerable increase in the rates hitherto paid by the Port Commissioners. When the docks are completed a proper valuation will be made under the provisions of Act III (B.C.) of 1890.

Assessments.

9. The Commissioners appear to take an unfavourable view of the question of assessments under the new Act, and observe that "those who have to administer the law must experience considerable difficulty in working it." In the Lieutenant-Governor's opinion, however, the figures which are furnished by the Commissioners seem to show that the assessment provisions of the Act were worked with facility. The whole area of Calcutta must be revalued under the law every six years, and during the past year five wards out of twenty-five, or more than the due proportion, came under revaluation, and the work was completed by the Assessor with punctuality. The wards revalued were those in which under-assessment had been very general, and the valuation was raised by the Assessor from Rs. 25,41,387 to Rs. 31,53,952. Out of 1,414 objections which were preferred, no less than 1,249 were filed on or after the 16th of March, and of these 22 were disposed of before the close of the year. The whole of the objections filed before the 16th March were duly disposed of. It is observed also that out of the 212 objections decided by the Chairman and Vice-Chairman, only 6, of which 2 were pending and 4 have been rejected, were appealed to the Small Cause Court within the year. These results indicate satisfactory promptitude in the disposal of work. They also show that the assessment provisions of the law were administered with leniency. It is no doubt a judicious policy, upon the first introduction of a principle of assessment which, however fair and reasonable, does considerably increase the taxation of those who were formerly much under-assessed, to lean upon the side of moderation. But it must be remembered that under-valuation in one direction is equivalent to the unfair augmentation of the burdens of those whose property is fully valued, and that justice to the rate-payers in general demands that no particular section of the community shall be treated with favour or partiality. Upon the Chairman, the Vice-Chairman, and Assessor of the Corporation rests the responsibility of seeing that assessments are equitably made in accordance with the law.

Vital statistics.

10. Owing to the large fluctuating population of Calcutta it is not possible to estimate the increase or decrease, as is usually done, by the number of births and deaths, and the vital statistics of the town are therefore still calculated on the census of 1881. Upon this basis the number of deaths in the town proper was 26·9 per thousand against 27·7, the mean of the decade; while in the amalgamated area of the Suburbs it amounted to 46·9 per thousand. The number of cholera deaths in the town proper was 1,071, which, with two exceptions, is the lowest mortality since the introduction of a pure water-supply. The Health Officer observes—

"The years 1871 and 1880 had respectively 800 and 805 deaths. There is a marked periodicity about these low rates from cholera, which seems to point to some biological law in the life history of the cholera contagion, in the form perhaps of some periodic struggle for existence which, when recovered from, is followed under favourable conditions for a time with a remarkable vigour. To remove those favourable conditions is practically to stamp out cholera, a consummation which, as far as Calcutta is concerned, will no doubt in time be effected. In the days before the water-supply, *i.e.* before 1869, there was a similar periodicity, only with this difference, that the lowest annual number of deaths was 2,270 and the highest over 6,829, whereas after the introduction of the water-supply the lowest was 800 and the highest 2,272."

Water-supply.

11. Nothing could demonstrate more eloquently than these figures the immense sanitary boon conferred on Calcutta by the introduction of a water-supply. The Commissioners are to be congratulated on the vigour they have displayed in the administration of this department of the Municipality, and on the systematic manner in which they have extended the benefits received to all portions of the town. Shortly before the commencement of the official year under review a third pumping-station was opened at Halliday Street to remedy the scarcity of water in the riparian and other wards, and Dr. Simpson reports that the favourable effect on the cholera rate was at once marked and has been continuous. A fourth station will soon be constructed in Bhowanipore to supply the Suburbs. The work of connecting that portion of the Suburbs which could be directly supplied from the town mains was completed in September 1889, and at the close of the year the length of mains and services on the filtered system amounted to 184 miles. There are now 990 stand-posts on the filtered and 2,505 ground hydrants on the unfiltered system. The population supplied with filtered water at the date of the Engineer's report was 480,019, which includes 75,800 of the suburban amalgamated area. The supply had then reached an average of 35·4 gallons of filtered water and 8·9 gallons of unfiltered water per head of the population. Although these results have been attained at a great cost to the town, amounting in round figures to Rs. 1,42,72,897, there can be no doubt that this outlay has been amply repaid not only by the improved health of the inhabitants, but also by the increase of wealth and material prosperity which the reputation for improved sanitation has attracted to the city.

Ventilation of the city by proper streets and squares the most important sanitary want of Calcutta.

12. But important as the question of water-supply is, and beneficial as the outlay has been, the possession of good drinking-water is after all only one of the necessary conditions for the enjoyment of healthy life in a crowded city. When all has been said, it must be admitted that the conditions of life in the Metropolis of British India are still highly insalubrious. The cholera map of Calcutta is still simply a map in which the whole of the native town appears one mass of red dots indicating cholera deaths during the year, and the inspection of this map, with its record of more than one thousand deaths from preventible disease, cannot fail to awaken in the mind of every one who sees it a sense of how much there still remains to be done to improve sanitation. Sir Steuart Bayley has always cordially acknowledged the value of the work already accomplished by the Commissioners, but at the same time he has taken every opportunity of pointing to the work there still remains to do. The success they have attained must be their strongest incentive to further effort. The Health Officer of the Corporation has, therefore, in the Lieutenant-Governor's opinion, rendered a valuable public service in now calling attention in the most prominent manner to the ventilation of the city by proper streets and squares, and to the enforcement of proper building regulations, as the most important sanitary measures which it remains for the Municipal Commissioners

to undertake. Pure air is as much a necessity for the public health as pure water, and the overcrowding of buildings, as Dr. Simpson points out, not only impedes the circulation of air and disseminates disease along the poisonous alleys, often not more than three feet in width, which divide house from house and harbour the germs of all disease, but it prevents the possibility of laying down proper and efficient drainage and hinders and adds to the cost of scavenging. The diagrams which accompany the Health Officer's report show convincingly the urgent character of the remedies he proposes. They show at a glance how the ground is covered with houses without open space between, and how narrow streets, winding lanes and numerous passages afford complete obstacles to efficient ventilation. The fine new street, known as the Central Road, which the Commissioners have at great expense determined to cut through the most overcrowded and overbuilt portion of the city, is a very praiseworthy enterprise and most creditable to the Municipality. This road will be 70 feet wide with 50 feet for carriage way, and nearly two miles long from the Hooghly Floating Bridge to the Sealdah terminus of the Eastern Bengal State Railway. The first section of this road from the bridge to Clive Street has been completed; the land acquisition for the rest is proceeding, and a considerable portion at the Sealdah end has been cleared of buildings. This road, though it is progressing less rapidly than the Lieutenant-Governor could wish, is a most important and valuable sanitary improvement. But it is justly observed by Dr. Simpson that this one street, however excellent it may be, will exercise but a small influence in doing away with the evil of congested and unregulated buildings, unless streets from north to south and south to north be constructed to meet it. The great structural defect which prevails, especially in Burra Bazar, but also throughout the whole of the heart of Calcutta where the residents of the city dwell, is, and always has been, due to the toleration of too many houses and too many people on too limited a space, instead of forcing them to spread out on a wider area. The plan or construction of the city being radically defective, the supply of every other sanitary improvement is only palliative while that constitutional defect remains. It will never be possible to wipe away the reproach under which Calcutta labours as the home of cholera until the present germ-laden air is as purified from contagion as is the filtered water now drunk by the people.

13. The necessity of ventilation has been emphasised by the process of tank-filling which for years past has been going on in the city. Each one of these tanks was a cup of poison, and their obliteration therefore was a positive boon of the highest quality. In place of the water from these tanks, worse than London sewage as it was described, the purest possible water is now supplied from the Pulta water-works. On the other hand, these tanks were open spaces which allowed the admission of air and placed some restriction on the crowding together of buildings. But now the sites on which the tanks formerly existed are being built over without stint or any regard to structural considerations, and one evil is thus rapidly giving place to another.

14. The demand for residential houses is now so great in Calcutta that there is a marked tendency to construct brick houses on bustee sites. But unwholesome as were the bustees, it were almost better from a sanitary point of view to have bustees through which the wind can permeate than groups of high houses if these are to be separated from each other only by narrow, tortuous and foul alleys which, in Dr. Simpson's expressive words, "signify obstruction of traffic, obstruction of proper circulation of air, overcrowding of houses and inhabitants with all their attendant evils, foul and inefficient drainage and pollution of air by sewage, by sewer gas, by unremoved filth from defective scavenging, and by the organic products given off from animals and men living in a crowded state."

15. Dr. Simpson then points out that the executive is powerless to prevent these defects under the existing law or bye-laws, that there is no regulation as to the minimum width of existing or new streets, and that the only real control the Commissioners can exercise is by planning out the city under section 208 of the Act, with the aid of engineers and medical men, in accordance with certain laid down sanitary principles. There are also the problems of the ventilation of houses and the ventilation of rooms to be considered. For all these difficulties the Health Officer purposes remedies in detail, and suggests

that a Committee formed of engineers, medical men and others should be appointed to thoroughly investigate and report on the whole subject.

16. The Lieutenant-Governor trusts that this suggestion will receive the very early attention of the Chairman and of the Commissioners.

Drainage.

17. The most important work undertaken in the Drainage Department of the Municipality is the survey for drainage of the Suburbs, which is still in progress. There are two parties engaged, one for the south-eastern area and the radical outfall into the Biddiadhary river, and the other for the southern area, which is for surface drainage only.

Bustee cleansing, structural and Suburban improvement.

18. The total expenditure incurred on bustee cleansing and structural improvement during the year was Rs. 2,46,572. Under section 37, clause 7 of the new Act the Municipal Commissioners are required to devote to the improvement of the area added to Calcutta a sum of not less than three lakhs of rupees annually, and the Lieutenant-Governor requests that in future reports the manner in which this provision of the law has been complied with may be specifically stated. The information furnished on this subject in the present year's report is insufficient.

General.

19. Upon the whole there can be no doubt that the administration of the Calcutta Municipality during the past year was marked by very satisfactory progress, great attention to work on the part of the Commissioners, and improvement in all directions. The extension of the water-supply and of suburban drainage, the improvements in the flushing of the sewers, the large sums expended on maintenance of roads, the inception of the new Central Road, the experimental construction of refuse incinerators, the revision of assessments, the acquisition of land for a new *dhobikhana*, and many other important matters, sufficiently attest the activity of the Commissioners and of the officers of the Municipality in the discharge of their duties. The year was also marked by harmonious relations between the Commissioners and the Executive, and the Lieutenant-Governor is glad to observe in the present report the absence of any jarring or discordant note.

Services of Sir Henry Harrison

20. The Lieutenant-Governor cannot conclude this Resolution without expressing his high appreciation of the services which have been rendered to the City of Calcutta by the late Chairman, Sir Henry Harrison. For nine years he was Chairman of the Corporation, and the successful administration of the affairs of the Municipality during this long period, the firm financial credit of the Commissioners, the innumerable sanitary reforms effected, especially the extension of the water-supply and the conservancy of bustees, the increase in material prosperity in the city which in consequence of these reforms has shown itself in so marked a degree that the value of land in Calcutta generally may be said to have doubled, the reorganization and reconstruction of nearly every department of work, the hearty zeal and co-operation with which the Commissioners as a body now unite with the Executive to advance the welfare of the city,—an attitude for which they were not always distinguished, but which is in itself the best testimony to the capacity of a Chairman,—the methodical and systematic development of civic administration in all departments, are a sufficient and lasting tribute to the manner in which Sir Henry Harrison has discharged the duties of his responsible, difficult, and thankless office. His name will always be honourably associated with the growth of municipal institutions in the Metropolis.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Secretary to the Government of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE TRIBUTARY STATES OF ORISSA FOR THE YEAR 1889-90.

POLITICAL.

Dated Darjeeling, the 4th November 1890.

READ—

The Annual Report on the Administration of the Tributary States of Orissa for the year 1889-90.

Read also—

The Reports for the years 1887-88 and 1888-89 and the orders of the Lieutenant-Governor recorded thereon.

The Lieutenant-Governor is glad to observe that the instructions contained in last year's Resolution on this report have been followed in the preparation of the present one, which is concise and furnishes fuller statistics than before, but the Superintendent will be requested to observe greater punctuality in future in its submission. Mr. Hopkins held charge of the office of Superintendent of the Tributary Mehals of Orissa from the beginning of the year to the 31st December 1889, when he was relieved by Mr. Worsley, the present Superintendent.

2. Raja Balabhadra Sing Mandhata of Nayagarh having died heirless on the 2nd March last, Babu Raghunath Sing Hari Chandan, a relative of the late Chief, has been allowed by this Government to take possession of the guddi as a provisional arrangement, subject to the approval of the Government of India. This succession has been contested by the Raja of Khandpara, and the final decision of the matter is now under consideration.

3. The partial failure of crops in consequence of the irregularity and deficiency of the rainfall during the years 1887-88 and 1888-89 brought about a scarcity of food-grains in most of the Tributary States and the Government estates of Angul and the Khondmals during the past year. The States of Mohurbhunj, Nilgiri, Keonjhur, Pal Lehara, Dhenkenal, and Atgarh were little affected by the distress, but it was severe in other places, and was further augmented by the outbreak of cholera and small-pox, which considerably increased the mortality. The people who suffered most were the aboriginal and semi-Hinduised tribes who form the landless class and live partly by labour and partly on jungle produce, and their sufferings were intensified in some cases by delay in the commencement of relief operations. On the appearance of serious symptoms of distress the necessity of vigilant supervision was impressed upon the Superintendent, and in July 1889 Sir John Edgar, K.C.I.E., C.S.I., Chief Secretary to this Government, was specially deputed for the purpose of making personal enquiries into the condition of Angul and some of the affected tracts in the Tributary States, as well as in the Regulation districts. Immediate measures were also adopted for the alleviation of the distress by the opening of relief works, supply of gratuitous relief, grant of money advances and agricultural loans, as well as loans to the Tributary Chiefs who applied for them, relaxation of forest rules, &c., the details of which have already been separately reported to the Government of India. The rainfall of the past year was much above the average of the three preceding years, and there has been, on the whole, a fair outturn of crops. The relief operations have consequently been discontinued and the people are reported to be in a comparatively prosperous condition. The following deductions from the events of the past year, recorded by the Superintendent, are interesting and instructive:—"The experience of the past year seems to enforce two important lessons—first, that in such tracts as the Tributary States, which are without good roads and communications, and in which professional grain-dealers are almost unknown, comparatively slight misfortunes, such as unseasonable drought and a failure of fruits and jungle produce following on two or three short harvests, may convert a temporary pressure into scarcity and sharp distress; and secondly, that no time must be lost in commencing relief operations when actual distress once appears.

The Superintendent finds no reason to suppose that there was an absolute want of grain last year in any of the affected tracts, and thinks that the holders in Angul would have opened their stores more freely if they had felt confidence that any deficiency of food which might occur would be supplied.

4. In a year of scarcity the public health could not be expected to be good. As noticed above, cholera and small-pox caused great havoc during the period of scarcity which lasted from April to November, but the actual statistics of mortality could not be collected, although an attempt was made with that object. In Angul alone the estimated deaths from these diseases were 3,028 and 131 respectively, while 1,974 more are attributed to starvation. After the rains of November malarious fever appeared in an epidemic form, and the people suffered from it severely. Influenza also broke out in several of the States during the past year. The total number of persons vaccinated during the year was 26,906, against 23,427 in the preceding year. It is strange that out of 73 and 490 operations in Baramba and Daspalla respectively not a single case is said to have proved successful, while in Angul 4,650 out of 4,758 were effectual. The Lieutenant-Governor has no great faith in the statistics appended to the report. It appears that there are no local trained vaccinators, and that there is no effective control over those who are brought in from Cuttack. Operations conducted in this way are not likely to commend themselves to the people, already prejudiced as they are against vaccination. The suggestion of the Superintendent to train local men as vaccinators and to let them work under the supervision of the local medical officers is a good one, and he will be requested to report the result of the reference he proposes to make to the Sanitary Commissioner on the subject. No new dispensary was opened during the year, but the existing institutions are reported to be gaining popularity.

5. The mineral wealth of the Tributary Mehals has not been completely explored, but it is probably not inconsiderable. Coal mines exist in Angul and Talchere, and there are mines of mica and stone quarries in Nilgiri, Dhenkenal, and Angul. Iron ore is found in Dhenkenal, Angul, Talchere, Mohurbhunj, and Athmullik. The principal industries are weaving and the manufacture of brass and bell-metal wares, but both are now on the decline. Gold washings carried on in river-beds in Mohurbhunj, Dhenkenal, and Angul have hitherto proved unremunerative. There was no export of food-grains during the past year owing to the scarcity, but oilseeds and forest produce were largely exported. The chief articles of import are salt and English-made cloths.

6. The statistics furnished of the civil and criminal cases instituted in the courts of the Tributary Chiefs do not include the large number of petty cases which are decided by them orally, and the proceedings of which are not recorded. The total number of civil and revenue cases in the courts in the Tributary States established under the authority of the British Government fell from 10,102 to 8,402, the decrease occurring chiefly in Angul, Baramba, Dhenkenal, Mohurbhunj, and Nursingpore. Out of 193 civil and 70 revenue appeals, 214 were decided during the year and 49 remained pending at its close. The total number of offences reported during the year was 2,614 against 2,691 in the preceding year; of these 2,074 were returned as true, against 2,057 in 1888-89. The number of cases brought to trial, including those pending from the previous year, was 1,982 against 1,865 in 1888-89; and of 4,287 persons concerned in these cases, 999 were acquitted or discharged, 3,216 were convicted, 22 died, escaped, or were transferred to other courts, and 51 remained under trial at the end of the year. There were only 75 criminal appeals, of which 15 were rejected, and in 35 the orders of the lower courts were confirmed, in 10 they were modified, and in 15 reversed.

7. In Angul the total realizable land-revenue demand for 1889-90 amounted to Rs. 47,117-14-11, of which Rs. 26,870-1 were collected during the year; of the large balance of Rs. 20,247-13-11 outstanding at the close of the year, which was due to the inability of the ryots to pay in consequence of failure of crops, Rs. 15,125 have since been realized. No land revenue is paid in the Khondmals. The total receipts of the Khondmal Road and School Funds amounted to Rs. 3,578-7 and Rs. 2,337-15-11 respectively, and the two funds showed a balance of Rs. 2,984-2-8 and Rs. 2,944-10-7 respectively at the close of the year. The following statement shows the demands and collections on

account of land revenue in the five States under the direct management of Government:—

Name of State.	Total realisable demand including arrears.	Amount collected during the year.	Balance outstanding at the close of the year.
	Rs. A. P.	Rs. A. P.	Rs. A. P.
Mohurbhunj	2,37,386 10 9½	2,19,467 6 9	17,919 4 0½
Dhenkenal	99,363 8 4	70,507 3 4	28,856 5 0
Baramba	34,388 9 5	19,562 8 4½	14,826 1 0½
Nursingpore	37,414 4 6	22,366 10 1	15,047 10 5
Pal Lehara	30,339 12 8	19,905 2 5½	10,434 10 2½

The high prices of food-grains and the very generally prevailing distress necessarily affected the realization of land revenue. The Mohurbhunj State has already been made over to its Chief, and the responsibility of Government for the collection of arrears no longer exists. In regard to the other States, the Superintendent has already issued instructions for the recovery of the arrears as early as possible. The financial management of these five States during the past year was satisfactory. The resources of the Pal Lehara State, which recently came under the management of Government, and which is involved in heavy debts contracted by the late Chief, require improvement, and the Superintendent has directed his special attention to this subject.

8. The settlement operations in Angul are nearly complete. The assessment work was finished in December last and shows an increase of revenue from Rs. 36,898 to Rs. 1,10,547. This very large increment has resulted, not from raising rates, but from changes in classification and especially from the assessment of lands brought into cultivation but hitherto unassessed. Still it would be impolitic and scarcely just to attempt to enforce the settlement completely at once. The Lieutenant-Governor has postponed the enhancement altogether till 1892; then the newly-assessed lands are to pay half rates for five years, at three-quarter rates for five years, and then for five years at full rates. These concessions will, it is hoped, prevent the settlement from being too great a burden. In the Mohurbhunj State 19 pergunnahs have been resettled since the assumption of its management by Government. Under the terms of the resettlement, the revenue of these pergunnahs has been increased from Rs. 79,133 to Rs. 1,97,428. The settlement of 70 villages in Nilgiri has been completed, and the result shows an increase of assessment from Rs. 6,955 to Rs. 14,747.

9. The total number of schools was 1,128 with 14,407 pupils against 1,182 schools with 15,153 pupils in 1888-89. There were seven girls' schools, the same as in the preceding year, but the number of pupils fell from 448 to 425. There were also 266 girls reading in the boys' schools during the past year. One girl passed the lower primary scholarship examination from Angul and obtained a scholarship. There were 1,592 children of the aboriginal races under instruction against 1,541 in the preceding year. The total expenditure on education in the Gurjats during the year amounted to Rs. 67,155, of which Rs. 7,570 were borne by Government.

10. The area of reserved forests in Angul was not extended during the year. The management of the forests is very expensive, the annual average expenditure of the last four years being nearly thrice as much as the receipts. This abnormal deficit is explained by the Superintendent to be due to the fact that Angul is unable to compete with the cheaper timbers of the neighbouring States. The distressed condition of the people during the past two years necessitated the relaxation of the forest rules with a view to allow them free access to the reserves to collect edible roots, fruits, sago-palm, iron stone, and fuel. With the object of improving the condition of the landless classes of Orissa and protecting them from scarcity in future, Sir John Edgar has made some valuable suggestions for reconstituting the forest reserves in Angul and Khurda and re-organizing their administration. The question is now under consideration. The forests in Mohurbhunj, Dhenkenal, Baramba, and Nursingpore were administered by the respective Managers of those States.

11. The remarks concerning the merits of officers will be noted in the Appointment Department. The Lieutenant-Governor has read with satisfaction

the favourable report which the Superintendent has given of the administration of Keonjhur, Hindole, and Athmullik by their respective Chiefs. Since the close of the year under report the minor Chief of Mohurbhunj has been placed in charge of the State. Both by his disposition and by his acquirements he appears to be well fitted for his high position, and there is much reason to hope that he will prove himself an efficient ruler.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Superintendent of the Tributary Mehals, Orissa, for information and guidance.

Ordered also that a copy of the report, together with a copy of the Resolution, be submitted to the Government of India, in the Foreign Department, for information

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,
Offg. Chief Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON WARDS' AND ATTACHED ESTATES IN THE LOWER PROVINCES FOR THE YEAR 1889-90.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 4th November, 1890.

RESOLUTION.

READ—

The Report of the Board of Revenue on Wards' and Attached Estates in the Lower Provinces for the year 1889-90.

Collections.

The rent-roll of the Wards' and Attached Estates under the management of the Board of Revenue slightly exceeds the large sum of a hundred lakhs, or a crore of rupees a year, and the collections in 1889-90 were nearly 103 lakhs, being better than the current demand by Rs. 2,74,728. This result is the best ever attained, except in the year 1878-79. The explanation given in regard to the estates on which collections have been deficient are generally satisfactory, the exception being in the case of the Chandra Kumar property, Shahabad, where only 75 per cent. of the current demand was realized—a result attributed to the "unsettled condition of certain villages which are over-assessed, the villagers being burdened with debts incurred during the time of the late proprietor." Upon this subject a special report will be made to Government showing what steps have been or should be taken to reduce any over-assessment established to the satisfaction of the Board and generally to assist in the restoration of prosperity. It is most necessary that Managers should observe every indication of the exceptional misfortunes which occasionally afflict particular villages, even on estates where the ryots as a body are doing well, and should be ready to aid in removing or mitigating the causes of distress, particularly when these are connected in any way with the assessment of rent. As to the Dhalbhum Estate, on which collections amounted to only 72 per cent. of the current demand, it is stated that "a large portion of the balance (Rs. 96,291) shown against pergunnah Dhalbhum alone is disputed and irrecoverable, as the resumed ghatwali tenures are said to have been assessed by the late proprietor's amla in a most perfunctory and summary manner without the knowledge of the tenants and without acceptance by headmen and tenure-holders." And the Board add that, "with a view to dispose of the objection raised by the tenants, the remeasurement and re-assessment of 111 villages of the pergunnah have been undertaken." The Lieutenant-Governor will be glad to learn the result of these remeasurements,

which should be observed with care by the Revenue authorities. In Deo the collections from the middlemen who farm the estate were very bad—a result attributed to opposition on their part to the management of Government. This is a matter requiring the careful attention of the Board and the Commissioner. The system of ticcadari management is not in itself commendable; it is maintained merely as an expedient for temporary convenience, to facilitate collections when the Manager is not, for any cause, able to do what is properly his own work; and if in this particular case the ticcadars perversely decline to meet their liabilities, the question arises whether it would not be wise to survey the estate at once and introduce khas management.

Balances.

2. The good collections of the year have slightly decreased the large outstanding balances which constitute so objectionable a feature in the administration of these estates, while more has been done in the same direction by granting remissions (which generally means writing off debts barred by limitation), with the result that the arrears have been reduced from 108 lakhs to 82. This is satisfactory as far as it goes; but the Lieutenant-Governor considers that greater energy should be shown in the work of retrenching from the accounts, at an early period of the management, demands which cannot be recovered, because they were never valid, or because they are barred by limitation. The existence of such demands affords the inferior collecting agency an opportunity for embezzlement. The Srinagar Ward's Estate has been seven years under the management of the Board, and their attention has been repeatedly called to the large balances outstanding; yet a sum of Rs. 83,432 is entered as still due from the period before the Board took charge. The Bhowanipore Estate, with a rent-roll of Rs. 1,62,576, shows, after large reductions, a balance of Rs. 9,63,321, most of which is classified as bad and irrecoverable and must presumably be barred by limitation, if it was ever really due.

Government dues.

3. The Lieutenant-Governor notices with satisfaction that the claims of Government on Wards' and Attached Estates have been satisfied during the year, the moderate balance (since paid) of Rs. 18,174 being more than equalled by advance payments made on other estates. This is an important branch of Wards' administration, which at one time received insufficient attention.

Financial results.

4. The general financial results of the year cannot be regarded as satisfactory, inasmuch as the debts due by estates increased from 45 lakhs to 48, the cash balances diminished from 24 lakhs to 17, while only four lakhs were invested or spent on the purchase of land. The law charges, which amount to nearly 18 lakhs, are heavy, and in this direction the Lieutenant-Governor would desire to see a reduction.

Improvements.

5. The amount spent on improvements, Rs. 66,930, is somewhat in excess of the expenditure under that head in previous years. But on some properties there is obviously a deficiency in this respect: for instance in Cossimbazar, with a rent-roll of over four lakhs, the outlay on improvements was only Rs. 4,668, while Rs. 75,067 were invested; in Narhan, with an income of nearly two lakhs, nothing was spent on improvements, while a lakh was invested. The Lieutenant-Governor is aware of the objection to sanctioning expenditure of this nature where the Manager cannot indicate any scheme for improvement, whether in the way of irrigation, drainage, planting of trees and fuel shrubs, or otherwise; but it is precisely such difficulties as these that a duly qualified Manager is expected to overcome. No Manager can be considered to have fully performed his functions if, on surrendering the estate to the Ward after a lengthened period, and having had surplus funds to use, he has done nothing for the property.

Surveys and records of right.

6. The most important improvements during the year were those made by effecting surveys and records of right under the Bengal Tenancy Act. It is very generally found that when the Court takes possession of an estate, the papers which should show what amount of rent is due from each ryot are unworthy of trust, and when such is the case, no greater benefit can be conferred on all the parties concerned in efficient management than to ascertain and record their permanent rights and liabilities. This should be done under existing orders whenever the Collector is unable, with regard to his responsibilities in proceedings of a

quasi-judicial character, to issue certificates for rents on the papers in the hands of the Manager. The object of these settlements is not to enhance rents or increase the income of the Wards, but to prepare a trustworthy rent roll, without which management cannot be efficient and the collection cannot be regular. On the estate first dealt with, that of Srinagar, the effect has been to yield more than 9 per cent. on the outlay, and similar results are being obtained elsewhere, but it is not to be assumed that settlements are to be made only when direct profit of this kind is to be expected. The Lieutenant-Governor learns without surprise that in one instance what was alleged to be the existing rent was actually reduced by nearly 50 per cent. on the ground that the soil had permanently deteriorated owing to fluvial action. Such changes in the character of the country are, when beneficial, made the ground for enhancement, and under the law (in this matter too frequently overlooked) the tenant is equally entitled to a reduction when the effect of the change is adverse to his interests. The progress made during the year was generally satisfactory. The survey of the Srinagar Estate—695 square miles—was completed under the efficient management of Mr. Collin, and the settlement will probably be finished during the current month. Maldwar has been finally dealt with. In Sunkerpore, Burdwan, Churamon, Koojung and Kanika the proceedings are in an advanced stage, and the Board may now with advantage consider what estates should next be taken in hand. There are indications in the present report to show that on some the rent-roll is not worthy of trust, and more information will be obtained on this subject if Collectors fully realize that it is their duty not to issue certificates on the mere statement of the Manager that a certain sum of rent is due without first ascertaining that he is in possession of accounts which show with certainty and accuracy what is the legal demand. As an indication of the loss which land-holders not unfrequently suffer for want of proper records, the following passage is quoted from the account given of the Burdwan Raj Estate:—

"In the course of the survey it was found that a large number of mouzahs belonging to the Raj, which had never been let in patni or otherwise alienated, had been taken possession of by other persons. In order to ascertain where they were situated and to enable the Court of Wards to adopt measures for resuming khas possession of them, a traverse and boundary survey of all lands appertaining to towjih Nos. 1, 3, and 4 of the Bankura district was ordered under section 3 of the Bengal Survey Act V of 1875. The Manager, Mr. Reily, has resumed khas possession of many of these mouzahs without opposition, and the persons in possession of others have applied to him to come to terms as to the settlement of them."

Education.

7. The Board give an account, which, except in one instance, is satisfactory, of the progress in education of each of the principal Wards. The subject is of the greatest importance, and the Lieutenant-Governor is glad to see that it meets with due attention.

8. The thanks of the Lieutenant-Governor are given to Mr. Halliday for his efficient management of the Wards Department during the year.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE BOARD'S REPORT ON THE LAND REVENUE ADMINISTRATION OF THE LOWER PROVINCES FOR THE OFFICIAL YEAR 1889-90.

REVENUE DEPARTMENT—LAND EVENUE.

Calcutta, the 8th November 1890.

RESOLUTION.

READ—

Board's Report on the Land Revenue Administration of the Lower Provinces for the official year 1889-90.

The Director's Report of the Department of Land Records and Agriculture, Bengal, for the year 1889-90.

Board's letter No. 630A, dated the 13th August 1890, submitting the latter.

Collections.

The moderate decrease of Rs. 10,277 in the revenue demand is more than accounted for by the fact that the owner of Jellamoota, who for many years declined to accept the settlement of his property, has done so at last, thereby becoming entitled to a sum of Rs. 58,344 a year for collection expenses, which is deducted from the income of Government. The current demand for land revenue, thus modified, amounted to Rs. 3,81,02,828, and there were arrears of Rs. 29,20,128; the collections were Rs. 3,86,65,822, and the balance uncollected, after remissions, was Rs. 22,60,785. The collections were comparatively good, being in excess of the regular income, and the best for ten years. Turning to the districts in which less was realized than 90 per cent. of the total demand, including arrears, it may be remarked that Chittagong is mainly managed as a Government estate, and in such instances it is found impossible altogether to prevent the occurrence of arrears; the payments were really satisfactory during the year, inasmuch as they exceeded the rental. In Pooree the apparent result seems to have been brought about by an error of account, which, the Lieutenant-Governor notices with satisfaction, has since been corrected under the orders of the Board. As has been pointed out on a previous occasion, Collectors dealing with rent rolls compiled according to the Bengalee year, which ends in April, are not always sufficiently careful to exclude from the demand of the official year sums not due until after its clo e—a mistake which gives to their returns an unsatisfactory appearance, and by the inclusion of fictitious demands impedes supervision over real arrears. In Chumparunand Midnapore exceptional calamities afford a sufficient explanation, and there remains only the cases of Furreedpore and Patna, as to which a separate report should be made. It is not clear why the owners of permanently-settled estates at Patna are more dilatory in payment than proprietors elsewhere, and the reference to pending settlements in Furreedpore is scarcely borne out by the figures given in Appendix X. Collections have been to some degree facilitated by the general adoption of the system of remittance by money-orders, of which 139,535 were issued during the year for an aggregate sum of over eleven lakhs.

Government estates.

2. The collections of the year on Government estates were good, being 104 per cent. on the current demand, and the Lieutenant-Governor approves of the remissions made on a liberal scale in Majnamoota on account of floods. This estate apparently accounts for the large uncollected balances in the Midnapore district. It is not the property of Government, but managed until the proprietor thinks fit to imitate the owner of Jellamoota by accepting settlement.

Operation of the sale laws.

3. Out of 159,852 estates on the roll 13,656 estates or shares in estates became liable to sale during the year, and 1,273 were actually sold, the others being exempted, in almost every instance on account of the payment of revenue after the latest day fixed for that purpose, but on or before the day of sale. This practice of exemption requires regulation, too much being at present left to the discretion of individual Collectors, who have very little to guide them. The subject has been under the special consideration of Government during the year, and a Bill has been framed and circulated for opinion which has for one of its objects the framing of conditions under which payments made after the latest day

of payment and before the day of sale may be received. The number of cases in which sales were annulled on appeal is 30, and this seems to the Lieutenant-Governor somewhat large. If Collectors observed due diligence in seeing before sale that the simple preliminaries clearly prescribed by law had been complied with, such reversals, which introduce an element of uncertainty into the whole procedure, would be very exceptional. The Board may with advantage take measures to secure that due notice shall be taken of any case in which a Collector may fail to conduct a sale according to law, thereby giving reasonable grounds for setting it aside on appeal.

Certificate procedure.

4. The working of the Public Demands Recovery Act, by which claims of the State other than those for land revenue are realized, was somewhat more satisfactory than in the previous year, inasmuch as fewer certificates were filed, more were executed, and the balance left pending was considerably reduced. The great majority of the certificates, as many as 72,224, were on account of the demand for road and public works cesses under Bengal Act IX of 1880—a demand as fixed and well known as that for the regular land revenue—and in nearly all such cases the default must have been wilful. It is where the procedure is used to recover a rent not fixed by any public authority that the greatest care is requisite in its working. In such instances the Collector or other officer issuing the certificate should always satisfy himself before so doing that there is satisfactory evidence as to the validity of the demand. This precaution is particularly required in the case of claims made by Managers for rent alleged to be due to Court of Wards' estates, where such rents have not been authoritatively fixed and recorded. It should be ascertained in regard to each estate, before the issue of certificates, that the accounts have been so kept as to prove that sums shown by them as due are really demandable under the law.

Settlements and records of rights.

5. The Board and the Director of the Department of Land Records and Agriculture notice the inconvenience of the present system of reporting on settlement work according to the financial year, the natural period being that adopted for road cess purposes, that is, the year commencing with the cold weather on the 1st November. On this head a separate expression of opinion will be solicited. Now that very important settlements are being dealt with, it is desirable to make all subsidiary arrangements as perfect as may be possible. The larger settlements are supervised by the Director, who observes :—

"There were 83 estates,* containing an area of 7,285 square miles, in 20 separate districts, under survey and settlement operations during the year. Of these, 51 are Government estates, with an area of 4,294 square miles, of which a resettlement of land revenue is being made; 9 are wards' estates, with a total area of 2,868 square miles, of which a survey, with a record of rights and settlement of fair rents, has been undertaken; and 23 are private zemindars' estates, with an area of 123 square miles, the owners of which applied for survey, record of rights, and settlement of rents, either on the ground of disputes existing between them and their tenants, or on the ground that they were new auction-purchasers and unable to ascertain the amounts of the rentals payable to them."

"It will be observed that survey and settlement operations under the Bengal Tenancy Act have extended over a vast area, comprising Government, wards' and private estates, in many districts and in every division in which the Act is in force; that these operations have affected a large number of tenants, aggregating at least four hundred thousand; that an increase of rent and revenue amounting to more than a lakh of rupees has been actually obtained, with the consent of the raiyats concerned, in the estates of which settlement has been completed or is approaching completion, yet in no single case has any rioting or disorder been reported, nor has anything like opposition of a formidable character been experienced. The number of appeals to the Special Judges from the decisions of Settlement Officers, compared with the number of such decisions, was exceedingly small. It may therefore, I think, be said that the anticipations of those who thought that these operations would lead to confusion and disorder have been wholly falsified by events. The cost of the professional survey operations has in some cases been in excess, and the cost of the settlement operations has been generally less than was estimated. On the whole, the cost has been about 8 annas per acre. Where highly-paid and efficient officers like Mr. Collin have been in charge of the operations, they ultimately cost less than where, as in some of the wards' estates in Dinagepore, lowly-paid and inefficient officers were employed. The status was recorded and the rents were settled of 171,647 tenants, of whom 5,604 are cultivating tenure and under-tenure-holders, 1,503 were recorded as raiyats at fixed rates, 102,727 as settled raiyats, 3,363

* The word "estates" is here used in the sense of separate properties, not in the technical sense, according to which every area with a separate towjee number, is an estate. Each of these properties includes many "estates" in the latter sense.

as settled but non-occupancy raiyats, 20,894 as non-occupancy raiyats, and 37,556 as under-raiyats. These figures show that the number of—

Tenure and undertenure-holders ...	...	3 per cent. of the whole.
Settled raiyats ...	...	60 " "
Non-occupancy raiyats ...	...	12 " "
Raiyats at fixed rates ...	...	1 " "
Occupancy, but not settled	...	2 " "
Under-raiyats ...	...	22 " "
		100

The Board, in forwarding this report, after commenting on the magnitude of the surveys in progress, observe that they have no means of testing their thoroughness, and indicate that in their opinion time alone can show whether the work has been adequately done. In Sir Stewart Bayley's opinion it is quite within the power of the Board to render their own control and supervision adequate for all purposes, but if the law or rules are found to be practically deficient in this respect, he will be glad to consider any suggestion which the Board may have to make on the subject. That the work and responsibility falling on the Director in the supervision of these numerous settlements is very onerous, admits of no more doubt, than does the ability and industry which he brings to bear on the work, but in the Lieutenant-Governor's opinion it would be well if the Member in charge could find time occasionally to inspect on the spot the work of settlement in some of the larger estates, and by this means keep a close touch with the work of the department.

Embankments.

6. Under this head the Board observe—

"In Bankoora an embankment was constructed during the year in the Government estates Pithaipore and Rajarbari, to protect them from the floods of the river Darkessur, at a cost of Rs. 2,060. The Bhagirathi embankment in Moorshedabad was breached during the year at a place called Rampal, 4 miles above Lalitakuri, and the results were serious. The breach was caused by malicious cutting. Much damage was also caused by a breach at Bairamgunge, also the result of deliberate mischief. In Chittagong a sum of Rs. 5,849 was spent on the Kutubdia embankment in turfing the new banks put up last year."

The subject has heretofore been dealt with in the annual revenue reports somewhat cursorily, and the Lieutenant-Governor would be glad if the Board would pay special attention to the matter next year. The question whether existing embankments should be retained, or new works of the kind constructed, is literally of vital importance in many districts, and more especially in Midnapore. The first effect of an embankment made with any judgment is almost invariably good, as it protects crops from destruction and villages from grave inconvenience; but in the course of years other consequences ensue, the embanked river rises in its bed owing to alluvial deposits, while the surrounding country remains, behind the embankment, at the old level, with the result that the normal height of the rising water is eventually above that of the adjacent fields, and the river becomes annually less and less capable of carrying its flood waters. This is a most dangerous position, as not only are floods under such circumstances very destructive if any breach occurs, but the water they bring will not flow off, and the fields remain submerged until, after a lengthened period, they are dried up by the slow action of evaporation. The subject has engaged the anxious attention of Sir Steuart Bayley, and, indeed, few matters are at present more pressing.

Land acquisition.

7. The Board state that 4,448 acres of land were acquired during the year at a cost of Rs. 17,48,683, and subject to an abatement of Rs. 1,122 a year revenue. The report gives other details, but does not deal with such questions as the supervision necessary to check the irritating and expensive delays which often occur in land acquisition proceedings, the difficulties which have arisen in assessing the value of the land taken up, and how these difficulties have been dealt with. The Lieutenant-Governor will be glad if in future reports the Board will pay special attention to these points.

Working of the Bengal Tenancy Act.

8. The Board observe that, "judging from the year's experience, the Act appears to have worked smoothly, and it may be remarked again that the flood of litigation which was foretold as likely to be one of the first results of the passing of the Act has happily not yet occurred." The sale of printed forms of receipt on the part of

Government continues to be large, amounting to Rs. 12,87,625, although private presses issue the forms at cheaper rates and presumably do a much greater business. These figures indicate that much is being done in the direction of silently establishing a record of existing rents where all was previously in confusion. In illustration of the evils which this part of the Act is intended to remedy, the following account may be quoted of one large estate, on which a record of rights is being made at the request of the owner:—

"The Settlement Officer reports that the Rajah's zemindari papers were in such a state of disorder that it has been extremely difficult to ascertain facts. The *jama-wasil-baki* papers, with some exceptions, show the rent of each holding in the village separately, but the ryots alleged that they made lump payments, though the lands comprised in their respective holdings lay scattered in two or more villages, and stated that the Rajah's *gomastas* or collecting agents granted them rent receipts accordingly. In ascertaining the existing rent with a view to the settlement of fair rents, it came to light that while a ryot cultivated no land in a village, a certain amount of rent was entered against his name in the *jama-wasil-baki* papers of that village; and, on the other hand, while a ryot did cultivate a certain area in a particular village, his name did not appear in the *jama-wasil-baki* of that village. The Settlement Officer has in numerous instances found that ryots cultivating land in one village have got their rents entered in another, and the confusion was made the greater by the absence of any record of mutation of holdings, subdivisions of tenancy, or distribution of rent in the Rajah's *sherista*. The result is that in many villages neither the names of ryots nor the amount of their rents, as entered in the zemindari papers, correspond with the entries in the *khatians*. The road cess papers of 1880, which, it was agreed, should be the basis for ascertaining the existing rents, were prepared from these zemindari papers, and consequently are incorrect It has therefore been a work of time and much labour to ascertain the correct rent payable by each ryot."

As many as 52 applications for settlements on private estates were made during the year, against 40 in 1888-89, and much useful work has been done in the direction of ascertaining and fixing rents. The only part of the Act to which general exception has been taken on the basis of actual experience of its operation is that which enables those transferring tenures to give notice of the transactions to their landlords, paying ceratin fees through the Courts, and the force of the objection made under this head has been much diminished during the year by the reduction in the number of such notices from 63,372 to 29,898. In dealing with agrarian questions in Chota Nagpore, Orissa and the Sonthal Pergunnahs, which are administered under special laws, the Lieutenant-Governor has had occasion to regret the absence of the powers conferred by the Bengal Tenancy Act in the rest of the Lower Provinces.

9. The thanks of the Lieutenant-Governor are given to the Hon'ble Mr. Halliday for his excellent administration as Member of the Board during the year; to Messrs. Smith, Worsley, Lyall and Grimley, Commissioners, for good revenue work; to Mr. Finucane, Director of the Department of Land Records and Agriculture, for the skill and discretion with which he has supervised very difficult settlement operations; to Mr. Edward Collin, who actually carried out the largest of these settlements. The work of the following Collectors and Deputy Commissioners has received the favourable notice of the Board:—

Mr. W. B. Oldham.	Mr. R. Cornish.	Mr. H. A. D. Phillips.
„ A. W. B. Power.	„ R. C. Dutt.	„ H. Lee.
„ A. Forbes.	„ F. R. S. Collier.	„ J. G. Ritchie.
„ A. A. Wace.	„ C. R. Marindin.	„ F. A. Slack.
„ W. Fiddian.	„ G. A. Grierson.	„ W. C. Macpherson.
„ H. G. Cooke.	„ L. Hare.	„ R. T. Greer.
„ C. A. Samuells.	„ D. B. Allen.	„ E. N. Baker.
„ J. A. Bourdillon.	„ H. Savage.	Colonel W. L. Samuells.

The names of the other revenue officers commended by the Board will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE PATNA DIVISION FOR THE YEAR 1889-90.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 8th November, 1890.

RESOLUTION.

READ—

The General Administration Report of the Patna Division for the year 1889-90.

This report has been prepared under disadvantageous circumstances, as Mr. Kemble, by whom it is submitted, was not in charge of the division during any part of the period to which it relates; while of the reporting Collectors, Mr. Bourdillon, of Chupra, is the only one who held that office for the greater portion of the year.

Tours.

2. The Lieutenant-Governor entirely approves of the plan on which the tours were conducted. As stated by the Commissioner, the Collectors were constantly moving about, and went out from head-quarters, even in the hot and rainy seasons, when their presence was required in the interior. They all seem to have found more or less that long, continuous rounds of inspection were not possible, as appeals, municipal and excise matters, land revenue and treasury questions, and other duties constantly demanded their attention at the sudder station. Indeed, under existing circumstances it is by no means desirable that Collectors' tours should generally be continuous, or should take the old form of a slow progress in camp. The objections to a system of government by orders from head-quarters without local enquiries or inspection are as strong as ever; but the means by which the necessary communication between a district officer and the inhabitants of the various towns and villages in his jurisdiction should be kept up must vary with the altered conditions of the present day. Among subdivisional officers, Mr. Mackertich, of Sasseram, was only 80 days on tour, Baboo Radha Madhub Bose, of Bhabuah, only 70 days, the explanation given in the former case being heavy current work, in the latter sickness. The Lieutenant-Governor will ascertain whether the consent of the District Collector had been obtained to the curtailment of the tours on these grounds. The prescribed period in the case of subdivisional officers having been reduced by recent orders, it is unsatisfactory to find that it is not in every instance observed.

Material condition of the people.

3. The question whether the normal condition of the working classes in Behar can be considered satisfactory has recently been examined by this Government in a special report, and need not be discussed here. The special circumstances of the year 1889-90 were unfavourable, as prices were high, the harvest of the previous season was bad, and, except in Chumparun, fever was prevalent. Wages are returned as having risen in the district of Durbhunga, and the Commissioner considers that there was an upward tendency elsewhere, though this does not appear in the tabular statements. Indeed, the Commissioner might with advantage test these returns generally, as they do not seem altogether worthy of trust, and the system of entering a daily rate for some districts, a monthly rate for others, is objectionable: there is always a doubt whether the daily rate refers to men hired for odd jobs, and therefore receiving somewhat more than those in regular employment.

Scarcity and relief.

4. Mr. Kemble hardly notices the scarcity which affected a part of the division or the measures of relief adopted, though these constituted the characteristic features of the year's administration. Almost the only reference to the subject consists in a quotation of the views of Mr. Bourdillon and Mr. Grierson, that the high prices of the season were artificially caused by combination among the mahajans, and an opinion expressed by the latter Collector that a mistake was made in preventing local officers from endeavouring to lower prices by threatening to import rice on behalf of Government. Some local and temporary effect may probably have been produced by such combinations, presumably with the result of lowering prices in the end, just as much as they were raised at

first; but the Lieutenant-Governor cannot believe that the rise in prices through Behar generally was so caused, for it was the natural result of the failure of a portion of the crops, it was spread over the whole country, and it proved permanent. The first impulse of popular opinion is always to attribute the enhanced price of grain to the wickedness of the dealers, particularly where there has been no very marked local deficiency in the harvest; but such views must always be regarded with much suspicion. And it is highly dangerous to influence the market at the commencement of a scarcity by threatening to import grain on the part of Government. Such a proceeding would doubtless lower prices temporarily, as Mr. Grierson says he proved by experience before the issue of Government orders prohibiting all measures of this kind; but by lowering local prices the Collector stops the importation of the grain necessary to supply the deficiency in his district, and the people are thus left with an inadequate supply of food.

Manufactures and commerce.

5. The outturn of indigo is entered as 55,437 maunds, which is below the average. The opium yield was also deficient. It is not stated how the information given as to the quantity manufactured in the case of sugar, saltpetre, tobacco, paper, blankets, and silk was obtained, and these returns are always of very uncertain value. The statistics of trade, also, must be taken as approximate only, except those relating to Nepal, which were arrived at by actual registration on the frontier. As to these the Commissioner remarks that—

"The increase is most noticeable under the exports, as I find that the quantity of food-grains, pulses, &c., and the number of hides, small skins, and cattle of sorts which left the country this year is nearly double what was reported last year. It is remarkable that, notwithstanding the increase in the export of food-grains, the quantity imported also increased. There is a large decrease in exportation under the table of 'things valued,' due to the absence of an important item of diamonds, valued at Rs. 30,10,000. Silver also fell from Rs. 9,24,866 to Rs. 3,72,000. This of course is a special case. Owing to political changes some of the rich members of society probably found it expedient in the year 1888 to remove their valuables to British India.

"The value of clothing imported into the country fell last year to Rs. 15,47,074 from Rs. 22,43,952. To make up for this there was a large increase under head '*Other things*.' One item of imports, 120,000 bricks, entered last year is not found in the returns this year."

Police and crime.

6. The year was marked by some increase in cognizable offences, the returns showing 28,383 cases in the calendar year 1889, against 25,575 in 1888. The excess is attributed to the high prices current at the beginning of 1889. The Lieutenant-Governor regrets to find that the Commissioner and Magistrates deprecate the prosecution under section 211, Indian Penal Code, of those who wilfully bring false cases against others, on account of the time which such proceedings occupy, the uncertainty of their result, and on the allegation that the only harm done by most of these false cases is that they give unnecessary trouble to the police. False accusations frequently cause, and are almost always intended to cause, great injury to the persons named or indicated as accused, and no pains requisite for the purpose can be too great to suppress a practice which does so much harm and brings so much discredit upon the administration. It is not, however, necessary to rely wholly upon prosecutions for discountenancing such charges: every improvement in the magistracy and the police which renders investigation more prompt and efficient, or brings superior judgment to bear on the evidence tendered, has its effect in deterring the malicious from the attempt to use the forms of justice as a means for indulging their private malice. False charges will always be most numerous where the authorities are least able to discriminate them from true.

Matters connected with land.

7. The collection of the land revenue, including the rent on Government estates, was not satisfactory, amounting to 93·8 per cent. on the total demand, and the deficiency was greatest in Patna, which is not a district classified as suffering from scarcity during the year. The Lieutenant-Governor hopes that the Commissioner will give his particular attention to the subject. His remark that the system adopted in Sarun of refusing to accept land revenue after the latest day fixed, where default has become habitual, entails hardship "if the towji accounts are not very accurately kept" is not understood. There should not be, and it is believed there is not, any inaccuracy whatever in the towji accounts. On this subject a special

report will be requested. The system of transmitting revenue by postal money-order, Mr. Kemble states, "is increasing in popularity, the sum remitted being Rs. 2,63,269 by 25,832 orders: in the preceding year Rs. 1,45,897 were remitted by 25,832 orders." In regard to the relation between landlord and tenant, the Commissioner reports three disputes, two of which are being settled by the special procedure for survey and record of rights provided in the Bengal Tenancy Act, while the third should, in his opinion, be settled in the same way. He also refers to unfavourable mention of the working of the bhaoli system in Gya. "Looking at all these reports," he observes, "I can find nothing which would justify me in reporting that the relations between landlord and tenant were unsatisfactory. I do not think that we ought to look for less selfishness in a Gya zemindar than we find among the rest of mankind." It is evident that the passing of the Bengal Tenancy Act has not been followed, as was anticipated in some quarters, by the disturbance of the outward quiet which has generally characterised the relations of the various agricultural classes in Behar, and it is doubtless gradually preparing the way for a better system by introducing a record of the amount of rent due in each case, and affording protection to both landlord and tenant. But it has been proposed to make this remedy more speedy and complete in its operation by a general survey and record of rights in the division wherever rents are at present uncertain, as they seem to be nearly everywhere. The proposal was postponed last year on account of the failure of crops, and its adoption in the near future is now under the consideration of Government.

8. In the number of schools and of students there has been some increase, and female schools in particular have multiplied from 203 to 236, and their students from 3,569 to 3,995. The Lieutenant-Governor is also glad to observe that more Mahomedan boys are now under instruction. In Sarun Mahomedan students have almost doubled during the last nine years.

Education.

9. Mr. Kemble reports well regarding all the District Boards in his division. He writes:—

District and Local Boards, Municipalities, and Zemindars.

"The members take an intelligent interest in whatever subjects are laid before them at meetings, and in some districts, especially Sarun and Durbhunga, have worked well on sub-committees—auditing accounts, preparing bye-laws, supervising the plans and estimates of the District Engineer, and in looking after the schools. I may apply the words of Mr. Bourdillon to all the districts, and state that the functions of the Boards in their corporate capacity are merely confirmatory, consultative and legislative, and in discharging those duties and serving on sub-committees they render the district officer much help. More than this cannot be expected of them. In no district, however, do they take any very active part in executive matters, which are, as a rule, left to the Chairman and District Engineer. Where Europeans are numerous, however, much assistance is rendered in keeping up the roads.

"Though the District Boards cannot be pronounced a great success, they are not a failure. As time goes on, it is to be hoped that they will not leave executive matters so much to their Chairman, and that they will exercise more and more real control over the expenditure of the funds entrusted to them.

"The example set by some of the indigo-planters is sure to work good.

"The Durbhunga Board seems to have been doing some good work. The remark made about one Board in the division, that it should be happy because it has no history, applies generally to the others."

In Chupra, with Mr. Bourdillon as Chairman, much progress has been made in the direction of efficient municipal management, but the account given of the working of municipalities in the division generally is not favourable indicating, as it does, that party spirit has in some instances been carried to an extent inconsistent with efficient administration, if not with the maintenance of the public peace. The Commissioner's remarks on this head will be further considered in the Municipal Department of this Government.

10. The Lieutenant-Governor notices with satisfaction the Commissioner's reference to the good work done by the Planters Association in settling quarrels between the planters and their ryots. The existence of this Association is a source of safety to the peace of the district, and is of material assistance to the Government.

11. Sir Steuart Bayley has to acknowledge the justice of the complaint made by the Commissioner of Patna in common with most other Commissioners as

to the inadequacy of the staff to cope with the increasing work of the districts. He trusts that when the next provincial contract is settled it will be found possible to remedy to some extent the unquestioned dearth of officers.

12. The thanks of this Government are given to Mr. Boxwell for his administration of the division during the year, and in particular for the energy with which, assisted for a time by Mr. Henry, he discharged the onerous duties imposed on him by the distress in North Behar. In Mr. Beadon the Government has lost a most zealous and devoted officer, whose premature death is deeply regretted by the Lieutenant-Governor. The Collectors generally, including several who officiated for short periods only, did so well that it is almost invidious to select any for special mention, but the names of Mr. Quinn, Mr. Grierson, Mr. Power, and Mr. Bourdillon cannot be altogether passed over. The remarks of the Commissioner under this head will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CALCUTTA FOR THE YEAR 1889-90.

No. 1987—Marine.

GOVERNMENT OF BENGAL, MARINE DEPARTMENT.

RESOLUTION.

Dated Darjeeling, the 31st October 1890.

READ—

The Administration Report of the Commissioners of the Port of Calcutta for the year 1889-90.

THE Administration Report of the Commissioners for the year which ended on the 31st of March last was not received by the Government until the 17th of this month The Lieutenant-Governor hopes that in future years the Commissioners will be able to arrange for the more punctual submission of this report.

2. Excluding the advances made to the Commissioners by the Government in respect of the Kidderpore Dock Works, the gross debt of the Commissioners on the 31st of March 1890 amounted to Rs. 1,20,36,401, distributed as follows:—

	Rs.
Consolidated debt due to the Government	42,71,401
Port debt not repayable	17,65,000
4½ per cent. debenture loan of 1881	10,00,000
4½ ditto ditto of 1883	20,00,000
5½ ditto ditto of 1886	30,00,000
Total	1,20,36,401

The debt to Government was reduced during the year by Rs. 1,29,534, and for the repayment of the debenture loans a sum of Rs. 1,24,000 was set aside, making the total amount at credit of the sinking fund account on the 31st of March 1890 Rs. 6,51,000.

3. The cost of the works constructed or acquired by the Commissioners and the sources from which the expenditure has been met, are shown in the subjoined table:—

Cost of works constructed or acquired by the Commissioners.		Rs.
Expenditure on jetties and appliances for sea-going vessels to the end of March 1890		33,42,943
Expenditure on inland vessels' wharves, landing stages, tramway, &c., on the Calcutta bank of the river		61,89,543
Expenditure on inland vessels' wharves, landing-stages, tramway, &c., on the Howrah bank of the river		16,20,605
Expenditure on dock for docking and repairing vessels, &c.		5,25,484
Expenditure on moorings, anchor vessels, Harbour Master's boats, light ships, survey vessels, &c. ...		38,21,821
Expenditure on reserve funds...	Jetties Reserve Fund ...	99,244
	Jetty Insurance Fund ...	50,000
	Port Reserve Fund ...	3,64,250
	Port Depreciation Fund ...	1,99,995
	Port Approaches Depreciation Fund ...	50,000
	Debenture Loan Sinking Fund...	6,51,000
Total ...		2,19,14,385

Sources from which the expenditure has been met.	Rs.
By loan from Government (repayable)	60,25,100
By loan from Government (not repayable)	17,65,000
By loan on 4½ per cent. debentures of 1881	10,00,000
By loan on 4½ per cent. debentures of 1883	20,00,000
By loan on 5½ per cent. debentures of 1886	30,00,000
Contribution from Government towards purchase of land for new river-side road	74,534
Contribution from Government for landing-stage at Prinsep's Ghát...	10,000
Contribution from Government for Port approaches block ...	7,19,203
From sale of surplus land ...	4,09,367
From revenue derived from works since formation of Trust ...	69,11,131
Total ...	2,19,14,385

4. On the 31st of March 1890 the advances received from the Government on account of the Kidderpore Dock Works amounted to Rs. 1,73,39,038. On the same date the expenditure on these works had reached Rs. 1,70,65,321. Towards the close of the year the Government received from the Commissioners a revised estimate of the cost of constructing the Tidal Basin and Dock No. 1. This estimate amounted to Rs. 2,53,38,737, and it has been raised by the Government of India to Rs. 2,64,01,605 on the assumption that the Docks will not be completed and earning revenue until the commencement of 1892-93. The accidents which have recently happened on the works will necessitate additional expenditure, but the Lieutenant-Governor hopes that the Docks will be completed before the end of next year, and that the total expenditure will not exceed the estimate as revised by the Government of India.

5. In February last the Government appointed a Committee to consider and advise on the arrangements to be adopted for the working of goods traffic into and out of Calcutta after the completion of the Kidderpore Docks. Owing, however, to the inability of the Commissioners to furnish information asked for by the Committee, the enquiry could not be completed. On receipt of the Committee's preliminary report, the Commissioners were called on, in a letter dated the 1st of May last, to furnish the Government with an estimate—

(*a*) of the annual charges which will have to be met by the Port Trust after the completion of the docks; and

(*b*) of the revenue that will be obtained in respect of the several services which the Trust will perform after the completion of the Docks, and from any other sources.

This estimate has not yet been submitted. When it is received, the Committee will be asked to resume its deliberations.

6. The year 1889-90 opened with a balance of Rs. 2,86,308. The receipts during the year amounted to Rs. 26,82,730. The expenditure of the year amounted to Rs. 25,90,391, including Rs. 2,24,689 credited to the sinking funds and Rs. 96,276 spent on new works. The year closed with a credit balance of Rs. 3,78,647.

7. The receipts on capital account during the year amounted to Rs. 1,89,000, including an opening balance of Rs. 14,883 and the sum of Rs. 96,276 contributed from revenue, the balance having been taken from depreciation funds. The expenditure amounted to Rs. 1,83,302, leaving a closing balance of Rs. 5,698.

8. Materials and stores to the value of £27,826-9-6 were procured by the Commissioners from England during the year through their Agent in London, and contracts to the value of Rs. 1,72,743-12-9 were made locally for materials and works. The Lieutenant-Governor observes that flooring stones, estimated to cost about Rs. 2,40,000, are being obtained from the British India Steam Navigation Company, but that no formal contract has been made, as the stores are supplied according to indents received from time to time. His Honour is of opinion that this arrangement should have been embodied in a formal contract and submitted for the sanction of the Government.

9. The receipts at the jetties amounted to Rs. 11,73,907, being Rs. 33,977 over those of the previous year; but the increase of revenue was derived entirely from the petroleum wharf, where the receipts amounted to Rs. 1,58,940. There was a considerable falling off in the receipts from exports, which were less than those realized in any year since 1881-82. The jetties were not worked at their full power. In 1887-88 the number of vessels berthed was 232, and the average length of their stay at the jetties was 9·9 days. Last year only 203 vessels were berthed, and they occupied the jetties on an average for 10 days each.

10. The imports of petroleum have increased. Last year 3,726,670 cases were imported as compared with 2,380,652 cases in the previous year. The Batoum oil, of which 534,880 cases were imported in 1888-89, does not appear to have found favour with consumers. Some of this oil which was imported in January 1889 still remained at the depôt on the 31st of March 1890. There were no imports of Batoum oil in 1889-90.

11. At the close of the year the extension of the Eastern Bengal State Railway to Budge-Budge was completed. The construction of this line was undertaken by the Government on representations made by the Commissioners and the Bengal Chamber of Commerce of the danger to which the shipping in

the port was exposed by the transport of petroleum by water from the depôt at Budge-Budge to the Calcutta and Howrah wharves. After the opening of the railway for traffic, the Commissioners, however, advised that it was unnecessary to place any restrictions on the transport of petroleum by water within the limits of the port. The Lieutenant-Governor is unable to reconcile the views now held by the Commissioners with those put forward by them and the Bengal Chamber of Commerce when they advocated the construction of the line or with the experience of the past, and the question of placing restrictions on the transport of petroleum by water is still under consideration. The Petroleum Act, 1886, and the rules made under it have come into force since the close of the year.

12. The total quantity of tea brought into Calcutta during the year was 101 million pounds, of which 30 million pounds passed through the tea warehouse built by the Commissioners. The receipts from the warehouse amounted to Rs. 76,455, including a sum of Rs. 17,542 which was realized by letting out the ground-floor for storing piece-goods and grain. The improvement in the receipts is satisfactory, but the tea warehouse, which, excluding the value of the site on which it stands, cost Rs. 8,51,010, has not yet become a financial success.

13. In the Harbour Master's Department, although the number of vessels which came to the port was less than in the previous year, the receipts from mooring hire show an increase of Rs. 17,931. This increase is due to the fact that many sailing vessels made long stays in port with the object of getting better freights. The Commissioners' steam-vessels earned Rs. 13,214 by towing vessels within the limits of the port.

14. There were nine accidents to vessels in charge of Assistant Harbour Masters, for seven of which the officers concerned were more or less to blame. None of the accidents caused very serious damage, and the result of the year's working compares favourably with that of the previous year.

15. Since the close of the year, special rules for the port of Calcutta have been made under the Explosives Act, 1884.

16. The total number of surveys made by the Engineer and Shipwright-Surveyor, including surveys of vessels belonging to the Commissioners, was 254, of which 229 were surveys of vessels and 25 of boilers and condensers on emigrant vessels. The fees levied in respect of these surveys did not cover the expenses incurred in making them. Since the close of the year the Commissioners have been relieved of the duties connected with the survey of vessels under the several Acts relating to merchant shipping, and a revised scale of fees has been adopted which is calculated to cover the expenses of making the surveys.

17. During the year 5,886 cargo boats and 1,532 passenger boats were surveyed and licensed, the total amount realized being Rs. 29,731, including Rs. 6,957 from fines for breaches of port rules. The expense of surveying these boats was under Rs. 10,000; but when, in 1879, the duty of licensing them was transferred to the Commissioners, it was arranged, with the approval of the Government, that the fees charged would be fixed so as to bring in a sum sufficient to carry on the work efficiently and to contribute the sum of Rs. 12,000 a year towards the maintenance of the river police force. The receipts now afford a margin over and above this contribution; but, in view of the changes that may result on the opening of the Kidderpore Docks, the margin is not so large as to call for any reduction in the fees at present.

18. The receipts from the tramways amounted to Rs. 3,02,022 against Rs. 3,26,697 in the previous year, showing a falling off of Rs. 24,675. On the other hand there was an increase of Rs. 5,846 in expenditure, which amounted to Rs. 1,99,442 against Rs. 1,93,596 in the previous year. After providing Rs. 50,354 for interest on the capital expenditure incurred on the tramway, the net revenue derived by the Commissioners from this source amounted to Rs. 1,02,580 against Rs. 1,33,101 in the previous year. The falling off in the gross receipts was due to the decline in the export of grain and pulses.

19. Towards the close of the year it was brought to the notice of the Government that the charges levied by the Commissioners for the carriage of goods on their tramways were not, as required by the "Calcutta Port Improvement Act, 1870," in accordance with a scale approved by the Lieutenant-Governor. After some correspondence with the Commissioners, they were, in a letter dated the 30th of June last, furnished with the views of the Government

of India and requested to frame and submit, in accordance with the provisions of the Calcutta Port Act, 1890," for the approval of the Lieutenant-Governor, a scale of all the charges to be made for the conveyance of goods by their tramway, due regard being had, in framing the scale, to the provisions of the Indian Railways Act, 1890. The Government has not yet received this scale from the Commissioners. The Government of India has expressed the opinion that there are grave objections to higher maximum rates being levied on the Port Commissioners' tramway for through traffic than have been fixed for commercial railways generally. The charges now levied, giving as they do a large surplus revenue, are very high, and they will have to be reduced in accordance with the principles laid down by the Government of India.

20. The expenditure of the year on surveying, buoying, and lighting the approaches to the port amounted to Rs. 4,98,424. The average annual expenditure on the port approaches during the past five years has been Rs. 4,93,558. The port approaches department has no income of its own, and the expenditure of the past year was met from the following sources:—

		Rs.
Contribution from	jetties	2,70,000
Ditto	inland vessels' wharves	25,000
Ditto	strand bank lands	65,000
Ditto	Harbour Master's department ...	50,000
Ditto	tramway	75,000
	Total ...	4,85,000

With the opening of the Kidderpore Docks it will be impossible to continue to make some of these contributions, and the question of how the expenditure on the port approaches should be met will receive further consideration when the estimate referred to in paragraph 5 of this Resolution is received from the Commissioners.

21. No changes of any [illegible] importance occurred in the river channels during the year. The establishment maintained for the survey of the river carried out its duties efficiently.

22. All the light-houses and light-vessels on the coast of Bengal were inspected towards the close of the year by the Engineer appointed by the Government of India to inspect and report on all Indian light-houses. The Engineer's report has recently been received and is now under the consideration of the Government. The lights of the approaches to the port of Calcutta require some small alterations, but are generally efficient. Mr. Douglass recommends that a light-house should be erected on the coast below False Point at the mouth of the Davy river. The advisability of having a light in this position had already engaged the attention of the Lieutenant-Governor, and the question will now be again considered.

23. The Calcutta Port Act, 1890, consolidating the several Acts relating to the Port Trust, came into force on the 1st day of June 1890. Under it the Commission is composed of a Chairman, Vice-Chairman, and five Commissioners who are appointed by the Government, five Commissioners elected by the Bengal Chamber of Commerce, one by the Calcutta Trades' Association, one by the Commissioners of the Town of Calcutta, and one by such body as the Government may select as best representing the interests of the native mercantile community. The Bengal National Chamber of Commerce has been recognised as the body best representing those interests.

24. During the year the Commissioners submitted, at the request of the Government, a draft of revised port rules under the Indian Ports Act, 1890. A legal difficulty has arisen affecting some of the most important of the rules, and they are still under consideration.

25. The thanks of the Government are due to the Commissioners for their successful management of the affairs of the Trust during the year. The Commissioners have, as in former years, had at their disposal ample resources, and while the charges made are in some cases high, the facilities which they have provided have met most of the wants of the trade of the port. With the opening of the Kidderpore Docks those facilities will be largely increased, but at the same time the charges which the Trust will have to meet will be

enhanced in a corresponding degree. The construction of the Kidderpore Docks was sanctioned on the recommendations made by a Joint Committee of the Port Commissioners and the Bengal Chamber of Commerce in 1883. At that time the trade of Calcutta had shown signs of rapid expansion, and the majority of the mercantile community urged on the Government the advisability of permitting the Port Commissioners to carry out their proposals for providing increased facilities for the shipping. The subjoined table of the departures of sea-going vessels from Calcutta during the past 11 years shows that the expansion has not been so rapid as had been anticipated, and that during the past two years there has been a slight falling off:—

Statement showing the number of sea-going vessels that left the Port in 1889-90 *compared with similar returns for the previous* 10 *years.*

Year.	Departures.								
	Number.			Gross tonnage.			Net tonnage.		
	Steamers.	Sailing vessels.	Total.	Steamers.	Sailing vessels.	Total.	Steamers.	Sailing vessels.	Total.

1889-90 ...	728	290	1,018	1,762,119	440,700	2,202,819	1,144,692	426,084	1,570,776

The Lieutenant-Governor hopes and believes that the check which the trade of the port of Calcutta has sustained is only temporary, but the present conditions require that rigid economy should be observed in administering the affairs of the port, and that the burdens should be distributed in an equitable manner, so that every branch of trade may have the opportunity of expanding without being subjected to restrictions of an artificial kind.

By order of the Lieutenant-Governor of Bengal,

J. M. McNEILE, *Col.*, R.E.,
Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 8th November 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.

	Hill Tipperah ...	...	Report not received.
BEHAR.			
PATNA DIVN. 26	Patna Nov. 8, '90	Nil	Weather—hot in the day and cool at night. Prospects of paddy continue good. Sowing of *rubbi* crops in progress. Pea, gram and all other *rubbi* crops already sown have germinated well. Prices of food-grains falling to some extent.
PATNA DIVN. 27	Gya ,, 8, '90	Nil	Weather—days clear and nights cold. *Katika* and *karhani* paddy being harvested in places. Sowings of *rubbi* and poppy in progress throughout the district. Prospects favourable. Prices falling.
PATNA DIVN. 28	Shahabad ,, 8, '90	Nil	Weather—cool and clear. Prospects of all crops continue favourable.
PATNA DIVN. 29	Durbhunga ,, 8, '90	Nil	Weather—getting cool. Rice crop in ear and doing well. Sowing of *rubbi* crops progressing. *Rahar* and tobacco look promising. Price of common rice falling.
PATNA DIVN. 30	Mozufferpur ,, 8, '90	Nil	Weather—seasonable. Rice doing very well. Ploughing for and sowing of *rubbi* crops proceeding everywhere. Those crops which have already germinated are looking very healthy. Poppy is also being sown.
PATNA DIVN. 31	Sarun ,, 8, '90	Nil	Weather—fine and clear. West winds. Heavy dews at night. Rice, where there is any, very fine. *Rubbi* prospects very good. Linseed sowings normal.
PATNA DIVN. 32	Chumparun ,, 8, '90	Nil	Weather—seasonable. *Rubbi* sowings have commenced. Paddy in ear and doing well. Poppy sowings being commenced, and about 1¼ annas estimated as having been sown. The crop promises to be somewhat late on account of the excess moisture.
BHAGULPORE DIVN. 33	Monghyr ,, 8, '90	Nil	Weather—seasonable. *Rubbi* sowings in progress. Winter rice doing well.
BHAGULPORE DIVN. 34	Bhagulpore ,, 8, '90	Nil	Weather—clear; mornings and evenings with heavy dew. Winter rice doing well. Cultivation for *rubbi* crops progressing.
BHAGULPORE DIVN. 35	Purneah ,, 8, '90	Nil	Weather—fine with cold nights. Prospects favourable. Preparation for *rubbi* crops going on. *Kurthi* and other crops sown doing well.
BHAGULPORE DIVN. 36	Maldah Shibgunge ,, 8, '90	0·03 0·12	Weather—seasonable. Prospects of winter rice crop favourable. *Kalai* thriving and in some places flowering. Sowing of other *rubbi* crops in progress, and those already sown have germinated well. Locusts have visited the district in great numbers. Price of rice stationary.
BHAGULPORE DIVN. 37	Sonthal Pergns. ,, 8, '90	0·11	Weather—seasonably cool. Prospects of rice crop excellent. *Rubbi* sowings still going on. Harvesting of early rice commenced, and the outturn is more than average.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38	Cuttack Nov. 8, '90	1·79	Weather—seasonable. Rain has somewhat damaged the *rabbi* crop in the Sudder subdivision, especially in Banki. General prospects good.
	39	Pooree „ 6, '90	3·56	Weather—cloudy. *Laghu sarad* (early winter rice) is being harvested. *Bara sarad* (late winter rice) coming into ear. *Kalai* and *arhar* have suffered to some extent from the late rain. Price of common rice from 21 to 27 seers per rupee.
		Khoorda ...	1·48	
		Banpur ...	3·78	
	40	Balasore „ 8, '90	2·25	Weather—seasonable. Early winter rice crop is being harvested.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh Nov. 8, '90	Nil	Weather—seasonable. Sky cloudy throughout the week. Reports from all parts of the district very favourable.
	42	Lohardugga „ 8, '90	Nil	Weather—cloudy. *Rabbi* being sown here and there, but rain wanted. Harvesting of winter rice commenced. Some damage reported to have been caused to this crop by locusts. No material change in prices.
	43	Singbhoom „ 8, '90	Nil	Weather—seasonable; cloudy. Crops everywhere satisfactory.
	44	Manbhoom „ 8, '90	Nil	Weather—cloudy in the morning, warm in the daytime. Reaping of upland paddy has commenced. All other crops doing well.

Published for general information.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF OCTOBER 1890.

Meteorology of the month.—Up to the end of September weather conditions were still being controlled by the depression which had formed in the Bay off the Circars, and after moving into Central India had changed its direction and moved to the north-east over Bengal. The general rainfall practically ceased at the end of that month, and as the pressure distribution had became very uniform and tended to become relatively high at Bengal stations as compared with that at those on the coast, the monsoon current became very weak, and rainfall was almost entirely absent during the first ten days of October. After the sky cleared temperature increased rapidly, and dry westerly winds blew over the whole province as far as the borders of Assam on the 1st and 2nd. As easterly winds continued down the Assam valley the interaction seems to have been the cause of unsettled conditions, which first became apparent on the 3rd in the east of North Bengal and on the following day spread over almost the whole of Bengal. Thunderstorms with local falls of rain and a general fall of temperature occurred in North Bengal on the 2nd and 3rd, and in all districts except Chutia Nagpur and Behar on the 4th, while with the advance of the unsettled conditions winds changed from westerly to south-east and temperature underwent considerable variations. On the 5th the difference of pressure in the northern districts of Bengal from that in the south of the Bay was only a tenth of an inch, and as it began to increase in the east of Assam, the rise gradually extending in a south-westerly direction, the distribution underwent a change which by the 8th gave highest pressure in Bengal and lowest in the south of the Bay. These altered conditions were accompanied by fine weather with falling temperature and light northerly winds, but for a few days only, as a low-pressure area formed in the south of the Bay and advanced in a northerly direction so as to pass over the western districts of Bengal.

Cyclonic storm from the 8th to the 16th.—The low-pressure area was faintly noticeable on the 8th, in the relatively low pressure at Madras and Nellore and the indraught across the coast at the southern stations. The depression probably covered the greater part of the southern half of the Bay as the wind velocity at Diamond Island had increased from 4 to 12 miles an hour, and the direction being south-easterly, evidently belonged to a cyclonic circulation. There was very little change till the 11th, the depression deepening slowly, but apparently remaining diffused, while rainfall was very light along the west coast. On the 11th moderately heavy rain fell at all stations in the Circars and Orissa, pressure changed much more rapidly, specially at Cocanada and Vizagapatam, and squally weather became general along the west coast. The centre of the depression was to the east of Cocanada, moving in a north or north-westerly direction. On the 12th rainfall had increased varying from 2 to 4 inches in the Circars and Orissa, and it had extended to some of the inland stations of Western Bengal. The centre was then close to the coast between Vizagapatam and Gopalpur, but as it was moving almost due north, it did not cross the coast till the following morning. Gopalpur alone reported lower pressure (by ·037 inch), and as changes were elsewhere small, there was every appearance of the depression beginning to fill up. Wind velocity also favoured this conclusion, as the highest recorded during the storm was 31 miles an hour at Pooree on the 11th. It fell to 23 on the 12th and 14 on the 13th, after which there was a slight increase. The area of heavy rainfall kept steadily ahead of the centre of the disturbance, and on the 13th when it was near Gopalpur the heaviest fall in the Circars was ·85 inch, but in Orissa, False Point, and Pooree received between 4 and 5 inches, and moderate amounts were falling in South-West and East Bengal. On the 14th the area of lowest pressure covered the northern half of Orissa and the adjacent parts of South-West Bengal and Chutia Nagpur, the lowest reading being 29 657 inches at Burdwan. Squally weather with very heavy rain prevailed in Lower Bengal, and also on the following day, though the depression was filling up As the centre moved northwards, pressure continued rising with great rapidity, and unusually heavy rain fell in North Bengal on the 15th and 16th. After this pressure was above 30 inches except in Lower Bengal, and readings about a twentieth of an inch above the normal. Showers continued to fall, but weather was rapidly clearing.

It may be noted that the rainfall accompanying this storm, especially during the earlier part of its existence, was almost entirely in front of the area of lowest pressure.

Fine weather prevailed till the 20th, when the second depression of the month began to appear to the east of the centre of the Bay. A south-easterly wind was blowing at Diamond Island, and velocity for the previous day was 14 miles an hour, while at 8 a.m. it was 24 miles. These strong winds continued on the 21st, when the depression had moved to the north and was covering the northern half of the Bay. Meanwhile fine clear weather with a few local showers was general in Bengal, and northerly winds were blowing in Arakan, Bengal, and Orissa.

The storm proved to be of very local influence, and as it moved over the Sunderbuns and East Bengal, gave squally weather and moderate rain only in the near neighbourhood of its centre. On the 23rd the centre was near Furreedpore which received three inches, while the falls at Jessore and Dacca were about 2 inches. On the 24th it was diffused and shallow, but the wind circulation was cyclonic round a centre between Dacca and Serajgunge. On the 25th normal weather prevailed with northerly or north-westerly winds

at all stations, and rapidly falling temperature. Till the end of the month similar weather continued with high pressure in the north and lowest in the extreme south of the Bay where conditions were unsettled.

Pressure.—At the beginning of the month the distribution was very uniform and above the normal by amounts varying from ·08 inch in the west of the province to rather less than ·05 inch at eastern stations. Up till the 5th there was a steady fall, then a moderate rise for two days, after which readings were very nearly normal. Considerable changes occurred during the existence of the storm, that is, from the 10th to the 16th; the rise being very rapid on the 15th and 16th, more especially in the western half of the province. On the 16th readings were over 30 inches at Sibsagar and Motihary, and on the 17th over almost the whole province, the exceptions being in South-West and East Bengal. During the latter half of the month changes were generally small. While the small depression was moving over East Bengal, the largest fall was about a tenth of an inch, and this was followed by a brisk rise. The means for the month rarely differ from the normal by more than a few thousandths of an inch.

Temperature—Has frequently been below the normal, and means are largely in defect—for Chutia Nagpur by 1·6°, North Bengal 1·4°, South-West Bengal and South Behar 1°, Assam ·9°, Orissa and East Bengal ·5°, and North Behar ·3°. There was excess of between 1° and 3° at the beginning of the month, and the general tendency up to the 10th was to keep slightly above the normal. While the heavy rain was falling, day temperatures were very low, and means for the period between the 10th and 17th were below the normal by amounts ranging up to 3·8° in North Bengal. From the 17th till the end of the month comparatively cool weather prevailed, defect averaging more than 1° in all districts except Orissa, where there was excess of about 1° during the last few days.

Rainfall.—Showers fell on the 4th and 5th, and again on the 23rd and 24th, but almost the whole rainfall of the month was received between the 9th and 17th. During these days, however, the falls were unusually heavy, first in Orissa and afterwards in South-West, East and North Bengal, so that the mean falls for the large divisions are all above the normal except that for Chutia Nagpur, which is deficient by nearly one inch. The mean fall for North Bengal is 12·3 inches, or 8 inches in excess; for Orissa 9 inches, or 2·84 inches in excess; and for South-West Bengal 8·07 inches, or 3·74 inches in excess. The falls for the other divisions are East Bengal 6·92, South Behar 3·78, North Behar 3·59, and Chutia Nagpur 2·07 inches.

The following table gives a comparison between the actual monthly and total rainfall and the normal rainfall of the province up to the end of October in the same form as has been employed in the previous monthly abstracts of the present year. The figures represent the ratio of the rainfall of each month of the present year to the normal rainfall expressed as a percentage. The table thus gives a condensed summary of the rainfall data of the year for each meteorological division. The first ten columns give the percentage amount of rainfall received in each month, and the last column the percentage rainfall of the whole period from the 1st of January to the end of October. It will be seen that there is excess of 34 per cent. in North Bengal, 28 in North Behar, and 23 in South Behar, while Chutia Nagpur and East Bengal have received less than the normal:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	Actual rainfall of first ten months of 1890 expressed as a percentage of the normal fall for the period.
Orissa ...	24	5	216	20	99	124	97	80	168	146	115
South-West Bengal	98	Nil	39	75	87	141	102	69	104	186	102
East Bengal ...	184	4	70	122	102	89	120	88	60	128	95
North Bengal ...	98	Nil	26	155	81	132	129	132	143	281	134
North Behar ...	38	2	25	40	95	140	174	134	97	101	128
South Behar ...	Nil	5	63	80	95	183	186	125	82	115	123
Chutia Nagpur ...	Nil	Nil	120	1	65	132	116	75	81	70	92

The area of deficient rainfall lies almost entirely in the west of the province, including the whole of Chutia Nagpur and of Behar with the exception of Purneah and the Sonthal Pergunnahs. The difference from the normal in the former is about half an inch in all districts except Hazaribagh and Lohardagga, where, as in Behar, defect amounts are generally over 2 inches. The largest defect is in Chittagong, being 4·5 at Cox's Bazar, 3·25 at Rangamati, and 2·4 inches at Ruma. Parts of Burdwan, Hooghly, and Dacca received deficient rainfall by about 1 inch. Very heavy falls were registered in the south of the Sonthal Pergunnahs, excess at Jamtara being 15·22, at Nya Doomka 8·47, and at Pakour 7·74 inches; but in Purneah and Chumparun excess was only 2 or 3 inches except at Kissengunge, where it was over 10 inches. In South-West and East Bengal excess was very irregular and ranged up to 12·7 inches at Saugor Island, but as a rule it was between 2 and 3 inches. In the north of East Bengal and in North Bengal it ranged from 5 to 15 inches, and in the latter was at many places between 8 and 10 inches. Actual falls were

under 2 inches in Chutia Nagpur except Manbhoom, and in the western half of South Behar: between 2 and 5 inches in the western half of the province except Orissa and parts of South-West Bengal: and between 5 and 10 inches in Orissa, the greater part of South-West Bengal and East Bengal, except the Sunderbuns and a narrow strip along the Bengal and Orissa coasts, where they were over 10 inches, and at Contai and Saugor Island over 20 inches. At many stations in the Sonthal Pergunnahs falls were over 10 inches, and in North Bengal between 10 and 20 inches.

The following table gives full data for the comparison of the actual and normal rainfall of the month of October in all districts of the province. The figures are obtained in the manner explained in previous monthly summaries. The first column gives the average district rainfall as determined from the rainfall observations of the past 15 years. The second column gives the actual district rainfall as determined from the actual weighted rainfall of the month at the reporting stations in the district. The third column expresses the ratio of the actual district rainfall to the normal as a percentage, and the fourth the same information in a slightly different form:—

Percentage Table for October 1890.

Division.	District.	Normal district rainfall for October.	Actual district rainfall for October 1890.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (−).

* Means of five days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The variations are *negatives* when the mean for the week is less than the corresponding normal mean, and *positives* when greater. The humidity of the atmosphere is expressed as percentages, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The amounts of cloud are means of observations taken at 8 A.M. and 3 P.M. Rainfall in these districts is determined from the returns received by the sub-divisional stations for the period in question during the same ten years. The normal means of the rainfall in these districts are the arithmetical average of the rainfall returns received in the districts, i.e., from those stations of the sub-divisional stations which have been working for the whole of the ten years. The variations are the differences between the mean rainfall of the week and the normal means. Under the head District observation of rainfall the normal means are the arithmetical means of the returns of the stations which have been working for the whole of the ten years. The means of the districts are the arithmetical average of the rainfall returns received in the districts, i.e., from those stations of the sub-divisional stations which have been working for the whole of the ten years. A rainy day is one on which at least hundredth of an inch fell.

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 7th of November 1890.

Meteorological division.	District.	Station.	Rainfall. Saturday, 1st November.	Sunday, 2nd November.	Monday, 3rd November.	Tuesday, 4th November.	Wednesday, 5th November.	Thursday, 6th November.	Friday, 7th November.	Total number of rainy days.	Total Rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May 1890.	Average rainfall from 15th May to date.

Explanation —.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 11th November* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 7TH OF NOVEMBER 1890.

WEATHER conditions in the south of the Bay have been unsettled during almost the whole week in consequence of the low pressure which has obtained there from day to day. The effect of this slight disturbance has been felt in the north of the Bay and in parts of Bengal and Orissa, especially the latter, where skies have been overcast and moderately heavy general rain has fallen. At the end of the previous week the depression, which appeared to be approaching the Madras coast, became more diffused, owing to the fall of pressure in the north of the Bay, and the squally weather subsided; but about the middle of the present week there was a further slight intensification, and this kept up the moist and cloudy weather over the whole Bay and Lower Bengal. Squalls again increased in force in the south of the Bay, especially in the Circars, where heavy rain was falling; but, as before, the disturbance failed to concentrate, and disappeared without a definite depression having crossed the coast. Cool clear weather prevailed in the northern districts of Bengal with occasional very light showers, and though considerable amounts of cloud were reported from the stations in the southern districts, fine though moist weather was generally experienced, except on Saturday, the 1st of November, when light showers fell in South-West Bengal and heavier ones in Orissa and Chittagong. The rainfall continued in the south of Orissa till the end of the week, and in Chittagong for two or three days. As pressure has been highest in the northern districts and diminished towards the low-pressure area in the south of the Bay, steady light northerly winds continued till the 7th, when directions were more irregular.

Pressure—Has undergone the usual small oscillations, but has been always above the normal. Mean excess varies from ·03 inch in Orissa, South-West Bengal, and Chutia Nagpur, to ·07 inch at a few of the more northern stations.

Temperature—Has been very nearly normal in Orissa, slightly above in parts of South-West Bengal, North Bengal, and Chutia Nagpur, and considerably below elsewhere. The lowest minimum temperatures were registered in Behar in the early part of the week, in South-West Bengal on the 5th, and elsewhere on the 6th and 7th. In the table below giving the weekly means at representative stations it will be seen that the day temperatures have been considerably below the normal at Darjeeling and Dacca, but that elsewhere the defect has occurred chiefly at night. The mean for North Behar is below the normal by 1·6°, for East Bengal by 1·4°, and for South Behar by ·7°, while for the other districts it is either normal or slightly below.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 7th November 1890.

	Normal mean maximum temperature for the week ending 7th November.	Actual mean maximum temperature for the week ending 7th November 1890.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 7th November.	Actual mean minimum temperature for the week ending 7th November 1890.	Variation of actual mean from the normal.	Normal mean [illegible] ture for the week ending 7th November.	Actual [illegible] ture for the week ending 7th November 1890.	Variation of actual mean from the normal.

Darjeeling	56·8	53·6	—3·2	43·4	40·9	—2·5	50·1	47·2	—2·9

Rainfall has been chiefly confined to Orissa, but light showers fell in all districts, except North Behar, in the early part of the week. The average fall for Orissa is 1·42 inches, almost double the normal; for South-West, East and North Bengal about ·2 inch; for South Behar ·09 inch, and Chutia Nagpur ·02 inch. Defect in East Bengal is ·52 inch and in Chutia Nagpur ·12 inch. The continued showery weather in the south of Orissa is shown by the number of rainy days at Pooree being 6 with a total fall of 2·28 inches, and at False Point 4 with a total fall of 3·69 inches. The heaviest fall reported is 3·01 inches at Banki on the 1st.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 7th of November 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1890.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The mean difference of sun and air temperatures	52·5		
The greatest sun temperature	153·0	10th.	
The greatest excess of sun over air temperature	64·2	10th.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	70·3		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	3·2		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	6·4	25th and 27th.	
	Miles.		
The mean movement of the wind per day	45·7		
The greatest movement of the wind in one day	161·0	14th.	
The greatest movement of the wind in one hour	12·0	22nd noon to 1 P.M.	

The number of hours with winds from each of the 8 points—

N. 62, N.E. 30, E. 81, S.E. 72, S. 26, S.W. 58, W. 28, N.W. 47, Calm 340.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently equal; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer which is the standard of reference at the present Observatory.

J. H. GALLEHAN,

Officiating Meteorological Reporter to the Govt. of India.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew.

N.B.—In the weekly report form 5th to 11th October 1890, read "76·8" for "86·8" as dew point of the 5th October 1890.

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
The 10th November 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 18th October 1890.

Births.

The births registered during the week ending with Saturday, the 18th October 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 25· per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is ·9 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1886 and 1889—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	24·4	26·5	22·8	18·2	28·3	24·1	25·0

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 27th Sept. 1890.	4th Oct. 1890.	11th Oct. 1890.	18th Oct. 1890.	Towns.	Weeks ending— 27th Sept. 1890.	4th Oct. 1890.	11th Oct. 1890.	18th Oct. 1890.
Burdwan	16·8	53·4	13·7	33·6	Narainganj	41·4	37·3	49·7	4·8
Midnapore	9·3	17·0	18·6	7·7	Chittagong	11·7	9·4	9·4	9·4
Hughli and Chinsurah	18·1	34·5	41·0	49·3	Comillah	27·0	15·4	27·0	27·0
Serampore	41·3	47·1	49·1	23·6	Patna City	11·4	19·8	13·3	14·3
Utterpara	23·3	9·4	37·7	47·2	Gya	26·0	36·9	30·7	39·6
Howrah	22·9	25·2	29·3	24·6	Arrah	19·1	47·9	45·5	20·2
Bali	17·5	28·1	31·6	28·1	Mozufferpore	24·3	24·3	29·2	21·9
Krishnagar	17·0	26·5	9·5	18·9	Durbhanga	38·5	40·9	43·3	37·0
Ranaghat	24·0	12·0	12·0	18·0	Chupra	13·1	38·2	48·3	40·3
Santipore	5·2	26·3	17·5	8·8	Bhagulpore	29·0	26·2	42·5	16·3
Jessore	12·2	.....	6·1	6·1	Monghyr	39·8	57·9	58·8	37·1
Rampore Beauleah	57·8	63·1	39·4	31·5	Purneah	10·4	10·4	20·8	6·9
Darjiling	44·5	22·2	51·9	51·9	Poori	12·6	14·7	19·9	16·8
Dacca	21·4	15·0	18·8	24·0	Total ...	23·2	29·7	29·5	25·0

It will be seen that last week the highest birth-rate was returned from Darjiling (51·9) and the lowest from Jessore (6·1).

Deaths.

The deaths registered during the week under review correspond to an annual rate of 22·8 per 1,000 of the population. The rate of the week is 5·9 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years except 1888—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	32·8	37·0	24·3	21·9	27·2	28·7	22·8

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 27th Sept. 1890.	4th Oct. 1890.	11th Oct. 1890.	18th Oct. 1890.	Towns.	Weeks ending— 27th Sept. 1890.	4th Oct. 1890.	11th Oct. 1890.	18th Oct. 1890.
Burdwan	26·4	20·3	26·4	22·9	Narainganj	6·1	10·6	27·7	24·3
Midnapore	13·9	14·5	27·9	13·4	Chittagong	16·9	9·4	16·4	14·1
Hughli and Chinsurah	27·4	29·6	27·0	29·5	Comillah	15·4	7·7	15·4	11·5
Serampore	13·1	23·6	23·6	47·1	Patna City	19·3	14·9	30·6	15·9
Utterpara	18·9	28·4	28·3	37·7	Gya	30·3	47·1	34·6	30·1
Howrah	23·0	19·7	21·3	17·2	Arrah	25·5	25·3	22·3	19·9
Bali	24·1	24·3	24·3	24·3	Mozufferpore	12·2	21·6	24·3	22·0
Krishnagar	19·0	19·0	9·5	7·6	Durbhanga	32·0	32·4	32·4	29·2
Ranaghat	6·0	6·0	12·0	24·0	Chupra	11·1	24·3	29·1	25·2
Santipore	.....	13·2	8·8	8·8	Bhagulpore	20·8	16·3	14·5	17·4
Jessore	6·1	18·4	30·6	.....	Monghyr	33·3	39·8	39·8	31·7
Rampore Beauleah	26·6	36·8	44·7	42·0	Purneah	6·9	10·4	17·3	6·9
Darjiling	37·0	22·2	44·5	51·9	Poori	14·7	35·3	42·0	25·2
Dacca	23·1	17·5	16·2	16·2	Total ...	23·4	23·0	25·3	23·0

It will be seen that last week the highest mortality occurred in the town of Gya (60·1) and the lowest in Santipore (3·5). No deaths were registered during the week in Jessore town.

Measured by last week's mortality, the highest annual death-rates from cholera, fever and other causes occurred in the following towns:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Mozufferpore	13·4	Darjiling	51·9	Monghyr	12·7
Gya	8·9	Gya	34·8	Gya	12·3
Patna City	4·5	Rampore Beauleah ...	23·3		
		Serampore	23·6		
		Bali	21·1		

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 2·2 from cholera, against 3· per 1,000 in the preceding week; ·04 from small-pox, against ·2; 11· from fever, against 12·7; 3·7 from bowel-complaints, against 2·6; ·1 from injury, against ·6; and 5·7 from other causes, against 6·1 in the preceding week. The mortality from bowel-complaints is noticeably severe only in the Serampore town, there being eight deaths (15·7 per 1,000 of the population).

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mi*
Males	24·3	Hindus ...	23·8	Under 1 year ...	176·2
Females	21·1	Mahomedans ...	20·8	1 and under 5 years ...	23·5
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	115			5 „ 10 „ ...	16·5
				10 „ 15 „ ...	9·2
				15 „ 20 „ ...	13·5
				20 „ 30 „ ...	12·8
				30 „ 40 „ ...	14·6
				40 „ 50 „ ...	16·2
				50 „ 60 „ ...	25·5
				60 years and upwards ...	68·0

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE DACCA DIVISION FOR THE YEAR 1889-90.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 11th November, 1890.

RESOLUTION.

READ—

The General Administration Report of the Dacca Division for the year 1889-90.

The report is submitted by Mr. Power, who held charge of the Division for only the two last days of the year, and is therefore chiefly based on the remarks made by the District Officers, one of whom, however, took charge in the last month of the year, while another took charge after its close. The Commissionership was held for nearly the first nine months of the year by Mr. Worsley, and thereafter for three months by Mr. Clay.

2. The record of touring and inspection done by all officers, except the District Officer of Furreedpore, was exceptionally good. The Commissioner's tour extended to 104 days, the Collectors of Backergunge and Mymensingh were each out for 100 days, while the Collector of Dacca was out for 96 days. In Furreedpore changes of officers and sickness combined to reduce the touring done to 60 days. Of the 12 Subdivisional Officers, four performed tours of over 100 days, and those of the others were of sufficient duration. All the district offices and treasuries, and nine out of the twelve subdivisional offices and treasuries, were inspected by the Commissioner either during the year or immediately after its close. By the Collectors their own offices were inspected twice, seven of the subdivisional offices once, and five of the subdivisional offices twice.

3. The rainfall was plentiful, but in two districts, Dacca and Furreedpore, was so unevenly distributed as to reduce the outturn on the whole to less than eight annas or half an average crop. Backergunge throve on the misfortunes of its neighbours, and secured abnormally high prices for a full average crop. In Mymensingh also the crop, though not so good, is reported to have been quite an average one. In the two latter districts the condition of the people was naturally a very prosperous one, and it is said that the only classes which suffered were those with small fixed incomes. In Dacca and Furreedpore, however, some pressure is said to have been felt on account of the partial failure of the food crops. The health of the people was not good; fever and cholera were exceptionally prevalent, and on the whole it is said that the year was less healthy than any of the preceding quinquennial period.

4. Beyond the ordinary articles for domestic use made in every district, there is not much of importance manufactured in this Division. Such manufactures as there are, however, all showed an improvement over the previous year. The outturn of indigo in Goalundo increased from 83 to 101 maunds, of sugar in Furreedpore from 9,080 to 12,049 maunds, and the steam oil-mill established five years ago at Jhalokati in Backergunge produced 16,900 maunds of oil—an increase of 10 per cent. over the production of the previous year. The export trade in all articles except hides showed considerable expansion. The value of that from Naraingunge amounted to Rs. 1,14,89,150, against Rs. 1,01,61,683 in 1888-89. The trade of this place, it is said, has more than trebled since 1879-80, when Naraingunge was first declared to be a port, and has expanded by nearly 60 per cent. within the last five years. In Backergunge and Mymensingh, where the rice crops were good, the export was of course large; and in Dacca and Furreedpore jute has to a large extent supplanted rice, so that the latter is hardly exported at all from those districts. In Backergunge very little jute is grown, as the saline soil deteriorates the fibre: but in the three northern districts it is a peculiarly suitable crop, and is largely grown. This is due to the fact that the crop is an early one, and can therefore be exported by water before the khals have become impassable. There was a heavy crop of betel-nuts, and large quantities were exported to Calcutta and Burmah, while cocoanuts were as usual largely exported to Calcutta and to other districts.

5. The Commissioner remarks that trade is carried on chiefly by water in country boats and steamers, that there are hardly any carts, and that the amount of traffic carried on by the railway, though considerable in itself, is, comparatively speaking, small. Again, under the head of "Communications," he says—

"The improvement of water communication does not appear to have attracted much attention during the year. In low-lying districts like those of this division, road-making, involving as it does the construction of high embankments, is very expensive, and, as one Magistrate remarks, it would probably be very beneficial to the people if some portion of the money at the disposal of the Boards was expended in deepening or clearing the silt of the more important of the numerous khals and nullahs which intersect the division."

The question of roads *versus* khals is an extremely important one, and was discussed by Mr. Larminie (chiefly with reference to Backergunge) in his Annual Road Cess Report, published in page 1095 of the *Calcutta Gazette* for 9th June, 1886. Mr. Larminie was of opinion that at that time in the districts of Dacca, Mymensingh and Furreedpore roads were likely to prove of the greatest use to the public, but that in Backergunge money could more usefully be expended in improving the natural water communications.

6 The police are said to have worked fairly well during the year. The number of cognizable and non-cognizable cases is not given; but from the Inspector-General's report it appears that there was an increase in both classes of crime. The number of cases in which police enquiry was refused was 453 against 685 in the previous year. The largest number of refusals occurred in Mymensingh, where the police are numerically weakest in view of the area and population, and the smallest number (28), as in the previous year, in Furreedpore. False cases again showed an increase (695 against 660), but the results of the prosecutions were somewhat better, convictions being obtained in 27·7 per cent. of the cases as against 22·9, the percentage of the previous year.

7. The Land Revenue collections were on the whole satisfactory. The outstanding balance decreased from Rs. 3,39,124 to Rs. 2,95,014, and the per-

centage of total collections on total demand increased from 90·8 to 92·06, Furreedpore being the only district in which the percentage was below 90. There was a decrease in the outstanding balance on account of cesses in all districts except Furreedpore, but this was accompanied by an increase in the number of certificates filed from 9,819 to 10,821. There was a falling off in the Excise revenue, due mainly to the closing of outstills where the upset price was not paid, and to the abolition of the outstill system, which told heavily on the sales and reduced the advance collections paid in March. Under Stamps there was an increase of Rs. 58,031, the total revenue amounting to Rs. 6,20,538. The increase was general throughout the division. The Commissioner remarks :—

"This general increase is not traceable to any marked temporary cause, and may therefore be attributed to the growing artificiality of existence, *i.e.*, to what is usually called progress."

The income-tax worked much more smoothly. The demand increased from Rs. 2,55,800 to Rs. 2,72,008, while the outstanding balance at the close of the year decreased from Rs. 5,300 to Rs. 2,110, and the percentage of objections was reduced from 7·8 to 5·8. Although the tax may continue to be unpopular, the expressions of discontent have apparently somewhat diminished. The system of paying land revenue by postal and revenue money-orders continued to work well, and the amount remitted increased from Rs. 1,45,539 to Rs. 1,78,808.

8. As in previous years, full statistics are given regarding the progress of education in the division, but no explanation is offered of their more striking features. Thus under secondary education an increase of only 2·4 per cent. in the number of pupils is accompanied by an increase of 7 per cent. in the expenditure; while under lower primary a decrease of 2·1 per cent. in the number of scholars is accompanied by an increase of 3·8 per cent. in the expenditure, and under female schools, although there has been a decrease of 5·5 per cent. in the expenditure, the decrease in the number of scholars amounts to no less than 23·1 per cent. As there was also a reduction in the expenditure from municipal and local funds, these facts point, until explained, to the supposition that the results must to some extent be due to a want of efficient administration on the part of the municipalities and District Boards concerned. On the other hand, it is satisfactory to note the large increase of 10,321 scholars under "Private institutions for indigenous instruction," and His Honour observes with much pleasure that there is an increase in the number of Mahomedan boys attending every class of school, an improvement which is, however, accompanied by a decrease of over 53 per cent. in the number of Mahomedan pupils attending girls' schools and female schools. Two new colleges have been established at Barisal, viz., the Brojo Mohon Institution and the Raj Chandra College. In the Commissioner's report they are stated to have had respectively 21 and 12 students on the 31st March 1890. In the Director of Public Instruction's report, the numbers given are 61 and 27, and the average daily attendance is returned as 44 and 21. The discrepancy is remarkable and should be explained.

9. In paragraph 244 the Commissioner says that the management of the pounds by the District Boards has not as yet resulted in any marked improvement, and that the Magistrate is of opinion that systematic inspection by some responsible officer of the Boards is much to be desired. This source of revenue is believed to be capable of considerable expansion, and such an inspection as that suggested, which ought to be easily arranged without additional expense, would probably effect something in this direction for by an examination of the counterfoils the inspecting officer could readily ascertain from what distance cattle are usually brought to the pounds, and consequently what room there is for the establishment of new pounds, and he could probably also form a shrewd guess whether the rent realized for the pound was a fair one or not.

10. Regarding the zemindars, the Commissioner makes the following remarks:—

Dacca.

"Nawab Sir Abdul Ghani, K.C.S.I., Nawab Ahsanullah, Khan Bahadoor, and Rajah Rajendra Narayan Roy Bahadoor, have maintained their reputation as loyal subjects, peaceful landlords, and public benefactors. Of the other zemindars of this district,

Babu Srinath Roy of Bhagyakul deserves prominent mention for his public spirit in contributing a munificent donation of Rs. 30,000 in memory of his mother for the building and foundation of an eye-ward to be attached to the Mitford Hospital at Dacca.

Furreedpore. "The principal zemindars of this district are absentees. There was nothing in their conduct during the year deserving of special mention.

Backergunge. "The zemindars of this district, with the exception of Nawab Ahsanullah, have done nothing during the year to merit praise." On the contrary, it is stated that many of them, by their conduct in stirring up disturbances for their own ends, deserve severe censure.

Mymensingh. The Commissioner while noticing the absence this year of any special act of beneficence on the part of the Mymensingh zemindars reports that the Maharajah of Susung, Rajah Surja Kantha Acharjya Bahadoor of Mooktagacha, Babu Jogendra Kishore Roy Choudhuri of Ramgopalpore, Babu Brojendra Kishore Roy Choudhuri of Gouripore, Srimati Jahnobi Choudhurani and Srimati Bindu Bashini Choudhurani of Kagmare, Hafez Mahomed Aly Khan of Karotia, Babu Radha Bollabh Choudhuri of Sherepore, and Mir Abdul Huq of Sabinnagar, have maintained their reputation as liberal, peaceful, and law-abiding landlords.

11. The Lieutenant-Governor has much pleasure in acknowledging the good services rendered by Mr. Savage at Backergunge, Mr. Hare at Dacca, and Mr. R. C. Dutt at Mymensingh, which have been brought to his notice by the Commissioner. The Personal Assistant, Babu Okhoy Coomar Sen, is also favourably mentioned. Mr. Worsley was in charge of the Division during the greater part of the year under report, and deserves His Honour's thanks for his careful and judicious administration. The present Officiating Commissioner, Mr. Power, has done well during his tenure of office.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,
Secretary to the Govt. of Bengal.

LEPER ASYLUM COMMITTEE.

RESOLUTION.

MEDICAL.

Dated the 12th November 1890.

READ again the undermentioned papers—

(1). Government Resolution, Medical, dated 29th July 1890.
(2). Government Resolution, Medical, dated 16th September 1890.

MR. W. BANKS GWYTHER is appointed a member of the Committee formed to consider the question of providing Calcutta with a new, enlarged and improved Leper Asylum.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Secretary to the Leper Asylum Committee for information, and to the Public Works Department of this Government for information and communication to Mr. W. Banks Gwyther.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,
Offg. Chief Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE COMMITTEE FOR THE MANAGEMENT OF THE CALCUTTA ZOOLOGICAL GARDENS FOR THE YEAR 1889-90.

REVENUE DEPARTMENT—MISCELLANEOUS (F).

Dated Darjeeling, the 13th November 1890.

RESOLUTION.

READ—

The Report of the Committee for the Management of the Calcutta Zoological Gardens for the year 1889-90.

The accounts appended to this report show that the financial position of the Gardens requires the serious attention of the Committee. The receipts from private sources amounted to Rs. 18,126, the Government contribution was Rs. 19,504, making a total income of Rs. 37,630, while the expenditure was Rs. 46,285, leaving a deficit of Rs. 8,655. Of this Rs. 6,523 were spent on original works of construction; but, even excluding that sum, the cost of ordinary administration exceeded the income. The balance was reduced from Rs. 11,279 to Rs. 2,624.

The Lieutenant-Governor notices with satisfaction that a very useful tropical aviary was constructed during the year, which bears the name of the Nawab Bahadur of Moorshedabad in recognition of his large subscription to the Gardens of Rs. 10,000.

The number of visitors who paid entrance fees was 109,569 against 111,573 in the previous year; but this number was exclusive of a large number of students and children under eight years of age who were admitted free of charge. The most important additions made in the course of the year were a pair of adult African lions, two African leopards, one African caracal, and one hunting leopard presented by His Excellency the Viceroy; a pair of young Indian lions presented by the Nawab of Junagarh, Kattcywar, and two tigress cubs presented by Sir Steuart Bayley. One zebra was obtained by exchange from the Zoological Society's Gardens, London, and a pair of jaguars from Mr. Carl Hagenbeck of Hamburg. The birth of a pair of tiger cubs is mentioned as an unusual event during the year. Of the presentations made, there were 60 mammals, 34 birds, and 4 reptiles. The total number of presentations during the year was 98 as against 42 in the previous year, and is indicative of the interest taken by the public in the institution.

It is stated that the institution continued to maintain its popularity with the students and teachers of the various schools and colleges of Calcutta and its suburbs.

The thanks of the Lieutenant-Governor are due to the members of the Committee for their efficient management of the Gardens during the year.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

No. 297Mne., dated Calcutta, the 15th November 1890.

THE following Report of the 14th quarterly inspection of the Dock Works at Kidderpore, which are being carried out by the Commissioners of the Port of Calcutta, is published for general information.

W. B. BESTIC,
Under-Secretary to the Govt. of Bengal.

QUARTERLY INSPECTION OF THE KIDDERPORE DOCK WORKS.

From—MAJOR A. D. MCARTHUR, R.E., and W. CONNAN, ESQ.,
To—The Secretary to the Government of Bengal, Public Works Department.

IN accordance with the orders of the Government of Bengal, communicated with letter No. 178T.—M. of the 21st ultimo (received on the 4th instant), we have the honour to report that the 14th quarterly inspection of the Kidderpore Dock Works was made on the 8th instant.

The usual tabular statement and the index plan showing the work done during the quarter ending 30th September 1890, and the total amount of work executed from the commencement, which has been prepared by the Superintending Engineer of the Dock Works, are already with Government. The present state of the various works under construction is reported in the following paragraphs.

Sixty feet Lock.—As reported in the last quarter, the work was almost completed, with the exception of the riverside revetment. Of the estimated quantity of masonry, viz. 2,229,490 c. feet, 98·1 per cent. was executed up to the end of the quarter, thus leaving only 1·9 per cent. remaining to be done.

Eighty feet Entrance.—With the exception of the riverside revetments, this work is completed; about 21·0 per cent. of excavation remains to be done.

Double Entrance to Dock No. 1—Is finished, including the swing-bridge which is open to traffic.

Tidal Basin.—Quay walls completed, with the exception of coping, of which 35·4 per cent. still remains: 5·3 per cent. of the masonry also remains to be done.

Graving Dock.—About 5 per cent. of the masonry remains to be done. The erection of the caissons has been commenced.

Government Graving Dock—Is almost finished, with the exception of 6·7 per cent. of the estimated quantity of masonry. The foundations of the engine and boiler houses, which serve both graving docks, have been got in, and the centrifugal pumps are being erected as the work proceeds.

Dock No. 1.—The quay wall was completed with the exception of the coping which was in progress. We regret to record that in the beginning of October, or shortly after the expiry of the quarter ending September, to which period the progress herein stated bears reference, a considerable length of the walls of this Dock suddenly showed signs of failure. We understand that the matter has already been reported to Government, and that a more detailed report is in course of preparation, which will be submitted in due course. As far as we could note during our inspection, the following is the present condition of the damaged work, the same being roughly indicated on the diagram accompanying the progress report and submitted herewith.

Movement of the long straight length of the east wall of the Dock has taken place over 2,050 feet, commencing about 50 feet from the angle of the short berth at the north end and extending to the angle of the wall at the south end. The displacement at the extremities of this length is shown by slight cracks in the face of the masonry extending through the wall and by longitudinal cracks along the course of the tunnel arch; but it is not considered that the latter extend through the solid masonry. The wall has been thrust forward by the earth backing, and tilted so as to bring the face to a vertical position along the whole damaged length. The movement is very slight at the two extremities and attains a maximum at a distance of 1,650 to 1,700 feet from the south angle, where the displacement at the coping level is 7′ 5½″. From this point of maximum displacement to the south angle, an almost perfect

straight line has been preserved, the remaining 400 feet at the north end being more or less bulged. The original batter of the wall was $\frac{1}{2}''$ to the foot or about 2′ in the total height from the foundation, and this amount would represent the forward movement at the top edge of the coping due to tilting, the remainder of the movement, or a maximum of 5′ $5\frac{1}{2}''$, being the bodily transfer of the whole wall to the front sliding over its bed. The earth backing has sunk an average of perhaps 6′ for a distance of 75 to 120 feet from the front of the wall, filling completely the gap caused by the displacement of the wall. The average height through which the wall has sunk is 15″.

Shortly after the occurrence above mentioned, a serious movement and fracture of the wall at the south-west angle of the Dock took place. About 450 feet of the inclined portion of the wall was affected, and about 50 feet adjoining this at the end of the Dock. The greatest forward movement was at a point 120 feet from the angle of the side walls, being 12′ $11\frac{1}{2}''$, or, allowing 2 feet for the tilting of the wall, a forward movement of the whole wall of nearly 11 feet. The masonry of this portion is much shaken, showing cracks both on the face extending through the wall and longitudinal cracks. No less than seven cracks appear on the face of the wall and extending through it, while one appears at the extremity of the detached length at the end of the Dock. The mass of masonry here appears to have received a severe wrench from the force exerted by the backing at the point of maximum displacement, but the movement of the wall itself is small.

It was reported to us that since the first movement of the walls no further displacement or settlement has taken place. The masonry of both the damaged walls appears to us to be of thorough good quality.

Boat Canal.—Lift lock is finished, the main pumping-station is being roofed and the pump being erected; 19·5 per cent. of excavation and 17·0 per cent. of masonry still remain.

The Chetla lock walls are raised to within a few feet of coping level.

Subsidiary Works.—The hydraulic engine-house is completed. The four jetty heads to the entrance are about half done and the foundations of the cargo sheds were in progress. The latter along the length of the damaged portion of the Dock walls have sunk with the earth backing.

Expenditure.—The total expenditure up to the end of the quarter under review is reported to be Rs. 1,95,81,854, of which Rs. 1,70,48,464 represent outlay on works and Rs. 25,33,389 on account of land.

Sanitary.—During the quarter under review the health of the workpeople was generally good. The daily average number of coolies employed was 6,144, among whom there were four deaths, thus showing a death-rate of 7·82 per mille per annum.

General remarks.—We are of opinion that fair progress was made with the work up to the end of the quarter, which would have been maintained up to the date of our inspection but for the partial failure of the Dock walls. The quality of the work, as far as we have been able to judge, is satisfactory.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 15th November 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
	Western Districts.		
BURDWAN DIVN. 1	Burdwan Nov. 15, '90	Nil	Weather—calm, bright and cold. State and prospects of all crops good. The full outturn may be expected, and all agricultural operations are being carried on to the fullest extent. Common rice selling at 16 seers per rupee on an average.
2	Bankoora ,, 15, '90	Nil	Cold weather has set in. Prospects of crops continue good. Sowing of mustard finished. Ploughing for wheat going on. Sugarcane prospering. Common rice selling at 20 seers per rupee at Sudder and 19½ seers at Bissenpore.
3	Birbhum ,, 15, '90	Nil	Weather—seasonable. Prospects of crops continue excellent. A bumper crop of rice is now almost assured.
4	Midnapur ,, 15, '90	Nil	Cold weather has set in. Winter rice doing well. *Rubbi* crops are being sown. Rice somewhat cheaper except in Ghatal. Prices of common rice :— Srs. Sudder ... ... 16; Tumlook ... ... 17¾; Ghatal ... ... 16; Contai ... ... 19 } per rupee.
5	Hooghly ,, 15, '90	Nil	Weather—cold, specially at night. Prospects of all crops good. Prices of common rice :— Srs. Sudder ... ... 13 or 14; Serampore ... ... 13; Jehanabad ... ... 16½ } per rupee.
	Howrah ,, 15, '90	Nil	Weather—seasonable. Winter paddy doing well. Price of common rice 14 to 14½ seers per rupee.
	Central Districts.		
PRESIDENCY DIVN. 6	24-Perghs. Nov. 18, '90	Nil	Weather—seasonable. Prospects of *amun* crop favourable. Ploughing for winter crops still continues. Prices stationary.
7	Nuddea ,, 15, '90	Nil	Weather—seasonable. Prospects of crops fair. Sowing of winter crops going on. Price of rice stationary.
8	Khoolna ,, 15, '90	Nil	Weather—seasonable. Prospects of *amun* crop favourable except in the flooded area.
9	Jessore ,, 15, '90	Nil	Weather—seasonable. Prospects of crops good. *Rubbi* sowings in progress. Agricultural loans still being issued.
10	Moorshedabad ,, 15, '90	Nil	Weather—seasonable. *Haimanti* rice in ear. Prospects favourable. *Rubbi* crops still being sown. *Kalai* doing well.
RAJSHAHYE DIVN. 11	Dinagepur ,, 15, '90	Nil	Weather—seasonable. Prospects of crops good. Price of rice unchanged. Locusts are reported to have done some damage in Patnitola police-station.
12	Rajshahye ,, 15, '90	Nil	Weather—mornings and evenings cool; skies almost clear. Jute gathered. Preparation of lands for *rubbi* crops not yet finished. Tobacco being planted. Condition of winter paddy good.
13	Rungpur ,, 15, '90	Nil	Fine bright cold weather with morning fogs and heavy dews. Mustard, pulses and wheat are being sown. Tobacco germinated and potatoes planted. *Amun* rice coming into ear. Prospects generally favourable.
14	Bogra ,, 15, '90	Nil	Weather—seasonable. State and prospects of all crops good. Locusts passed from the west across the north-west part of the district (thana Panchbibi) on the 7th instant, and did some damage to the crops and trees. Common rice is selling at 17½ seers per rupee.
15	Pubna ,, 15, '90	Nil	Weather—seasonable. Prospects of crops good. Prices slightly reduced.
16	Darjeeling ,, 15, '90	0·04	Weather—seasonable. In the Terai tobacco and potatoes are being planted. Mustard and sugarcane are doing well. Winter rice is in ear.
17	Julpigoree ,, 15, '90	Nil	Weather—days somewhat hot, but nights cool. Prospects of standing crops favourable. Steeping and gathering of jute almost finished. No change in the price of rice.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.—*concluded.*			
	Eastern Districts.		
Dacca Divn. 18	Dacca Nov. 15, '90	Nil	Weather—seasonable. Prospects of *amun* rice good. Harvesting of *kartiki* (November) rice going on. *Mung* and *maskalai* being sown. Cultivation for mustard and pulses going on. Common rice sold at from 12 to 16 seers per rupee.
19	Furreedpur ,, 15, '90	Nil	Weather—seasonable. State of standing crops fair. Sowing of winter crops in progress. Common rice selling at from 13 to 17 seers per rupee.
20	Backergunge ,, 15, '90	Nil	Weather—seasonable. State and prospects of crops good. Common rice selling at about 13 seers a rupee.
21	Mymensingh ,, 15, '90	Nil	Weather—fine, but occasionally cloudy. Mornings and nights cool. Prospects and state of *amun* crop good. Harvesting of jute nearly finished. *Rubbi* sowings going on. Common rice sells at 12¾ seers per rupee.
Chittagong Divn. 22	Chittagong ,, 18, '90	Nil	Weather—seasonable. *Amun* crop maturing. Prospects favourable. Cultivation of vegetable crops going on. Prices steady.
23	Noakholly ,, 15, '90	Nil	Weather—seasonable. Sowing of *rubbi* crops going on. *Rajashail* rice is being reaped. Prospects of *amun* good. Outturn of betelnuts reported to be 14 annas.
24	Tipperah ,, 15, '90	Nil	Weather—seasonable. *Amun* prospering. Mustard and other winter crops being sown. Prices stationary.
25	Chittagong Hill Tracts. ,, 13, '90	Nil	Weather—seasonable, with foggy mornings. Cotton being gathered. Harvesting of early plough-paddy commenced. Lands are being ploughed for mustard. Common rice is being sold at 11 seers 6¾ chittacks per rupee.
	Hill Tipperah ...	...	Report not received.
BEHAR.			
Patna Divn. 26	Patna Nov. 15, '90	Nil	Weather—cool. Paddy is fast approaching to maturity. Prospects good. *Rubbi* crops previously sown are growing well. *Rubbi* crops still being sown in lower lands as the water recedes. Prices of food-grains almost stationary.
27	Gya ,, 15, '90	Nil	Weather—cold and fair. Paddy harvest commenced. Sowings of *rubbi* almost finished. Prospects favourable. Prices falling.
28	Shahabad ,, 15, '90	Nil	Weather—cool and clear. Prospects of all crops continue favourable. Poppy germinating well.
29	Durbhunga ,, 15, '90	Nil	Weather—bright, and cool at night. Rice crop in ear and approaching to maturity. *Rubbi* sowings rapidly progressing: those already sown are doing well. Tobacco and *alua* promising. Poppy sowings going on. Price of common rice varies from 14 to 17 seers per rupee.
30	Mozufferpur ,, 15, '90	Nil	Weather—seasonable. All crops doing very well. *Rubbi* still being sown. Poppy sowings making good progress.
31	Sarun ,, 15, '90	Nil	Weather—seasonable. Prospects of *rubbi* and rice continue excellent. Poppy sowings in progress. Prices slightly falling.
32	Chumparun ,, 15, '90	Nil	Weather—seasonable. Paddy beginning to ripen. *Rubbi* and poppy sowings progressing; seeds already sown have germinated well.
Bhagulpore Divn. 33	Monghyr ,, 15, '90	Nil	Weather—rather warm than usual at this season. *Rubbi* sowings nearly completed, and prospects good.
34	Bhagulpore ,, 15, '90	Nil	Weather—seasonable. Cutting of *rangi* rice has begun. Sowings of linseed and wheat continue. Prospects of all crops good.
35	Purneah ,, 15, '90	Nil	Weather—fine and cool. *Aghani* rice promises well. *Rubbi* prospects also good. Price of common rice 20 seers a rupee.
36	Maldah ,, 15, '90	Nil	Weather—seasonable. Prospects of all standing crops continue favourable, except in thanas Kaliachak, Bamongola, Old Maldah, and Ratua, where winter rice, *kalai*, and mustard have been destroyed to some extent by locusts. Price of rice stationary.
37	Sonthal Pergha. ,, 15, 90	Nil	Weather—seasonable. All crops doing well. Harvesting of early rice in progress; outturn more than average. *Rubbi* promises well.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38	Cuttack Nov. 15, '90	0·15	Weather—dry and cool. *Laghu sarad* is being reaped in Banki and Jajpur and ripening in other places. *Guru sarad* is in ear. Prices of common rice :— Sudder ... ... Srs. Ch. 18 6 / Jajpur ... ... 17 1 / Kendrapara ... ... 21 0 } per rupee. Banki ... ... { 21 old rice / 28 new rice } "
	39	Pooree „ 13, '90	Nil	Weather—fair and cold. State of standing crops good. Late *sarad* flourishing.
		Khoorda ...	0·17	Early *sarad* being harvested; expected outturn 14 annas. Price of rice 21 to 26 seers per rupee.
	40	Balasore „ 15, '90	Nil	Weather—seasonable. Harvesting of early winter rice continues. Average extent of sowing of *biri*, *mung*, and mustard up to date is about 12 annas.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh Nov. 15, '90	Nil	Weather—clear and cold. Harvesting of winter rice commenced. Prospects of *rubbi* crops continue good. Prices about stationary.
	42	Lohardugga „ 15, '90	Nil	Weather—seasonable. Harvesting of winter rice continues. Rain wanted for *rubbi*. Prices steady.
	43	Singbhoom „ 15, '90	Nil	Weather—seasonable: bright and cool. Paddy crop being harvested with an outturn of 10 to 16 annas. *Rubbi* crops doing well everywhere. Prices stationary.
	44	Manbhoom „ 15, '90	Nil	Weather—seasonable. Reaping of upland paddy going on. Expected outturn full. Rice selling at from 17 to 22 seers per rupee.

The total fall from 1st January to 15th November 1890	61·25
The average fall of the corresponding period for 24 years, S.-G.'s Office ...	65·13

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

▲, dew.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 17th November 1890.

* Means of six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last [illegible]. The humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers [illegible] numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past [illegible] in the district resulting in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fall.

for the week ending Friday, the 14th of November 1890.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	District observations. Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 15th May 1890. Mean for district.	Since 15th May 1890. Normal mean.	Since 15th May 1890. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.

ten years. The variations are *negatives* when the mean for the week is less than the corresponding normal mean, and *positives* when greater.

denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal is the mean of the district are the numerical average of the rainfall returns received in the district, i.e., from total rainfall at the subdivisional

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the* 18*th November* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 14TH OF NOVEMBER 1890.

FINE weather has prevailed almost without interruption over the whole province throughout the week, and the general conditions have undergone very little change from day to day. Pressure has been above the normal, and temperature after the first day or two has been steadily falling. Wind circulation, except towards the end of the week, was westerly in the western districts, and gradually became more northerly towards the east. In the Bay steady northerly winds of light or moderate force have blown almost continuously.

At the beginning of the week pressure was very high, readings being over 30 inches at all stations, and diminishing from 30·1 in the north of Bengal to a little over 30 inches in the extreme south of the Bay. Southerly winds were blowing in Chutia Nagpur and the west of South Behar, owing to a local high-pressure area over the country surrounding Gya, Hazaribagh, and Ranigunge, which caused faintly defined anti-cyclonic winds in its neighbourhood. Temperature was falling in the northern districts and rising in South-West and North Bengal and Assam, while nearly all stations reported light cloud. Pressure began to fall very slowly on the 9th, and the cloudy weather continued, a light shower of rain being reported from Cuttack. The fall of pressure was moderate on the 10th, but conditions underwent no change, except that light showers were more frequent in Orissa and a few drops fell at Buxa and Darjeeling Till about the end of the week there was no further change, pressure tended to become more uniform, and low in the northern districts, especially on the 13th, when westerly or south-westerly winds blew at nearly all stations, and on the 14th notwithstanding the general rise.

Pressure—Was considerably above the normal at the beginning of the week, and afterwards very nearly normal. Means are therefore in excess at all stations by amounts varying from ·02 inch over the greater part of the province to ·05 inch in East Bengal.

Temperature—Has been steadily falling and almost always below the normal. From the table below, giving mean temperature at representative stations, it may be seen that defect has been almost the same in maximum and minimum readings; the only notable differences occurring at Darjeeling, where the mean night temperature is above the normal by 1·6° and the day temperature below by about 1°; and at Purneah, where defect was considerably greater during the day than at night. The mean for Orissa is normal, and for the other districts below—North Bengal by ·4°, South-West-Bengal and Chutia Nagpur by ·7°, East Bengal and South Behar by 1·6°, and North Behar by 1·9°.

The warmest days were the 9th and 10th in Lower Bengal, and the 13th and 14th in North Bengal and Behar, maximum temperature being generally between 82° and 84°. The coldest nights were the 11th and 12th in all districts except North Bengal and the adjacent part of North Behar, where temperature was lowest on the 9th and 10th:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending the 14th of November 1890.

	Normal mean maximum temperature for the week ending 14th November.	Actual mean maximum temperature for the week ending 14th November 1890.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 14th November.	Actual mean minimum temperature for the week ending 14th November 1890.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 14th November.	Actual mean daily temperature for the week ending 14th November 1890.	Variation of actual mean from the normal.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 25th October 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 25th October 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 19·4 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 7·2 below the average rate of the corresponding week of the past five years, and is also below the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	25·6	27·1	23·6	31·3	25·6	26·6	19·4

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 4th Oct. 1890.	11th Oct. 1890.	18th Oct. 1890.	25th Oct. 1890.	Towns.	Weeks ending— 4th Oct. 1890.	11th Oct. 1890.	18th Oct. 1890.	25th Oct. 1890.
Burdwan	53·4	13·7	31·6	13·7	Naraingunj	37·3	49·7	24·8	70·4
Midnapore	17·0	18·6	7·7	7·7	Chittagong	9·4	9·4	9·4	...
Hughli and Chinsurah	34·5	41·0	49·2	27·8	Comillah	11·6	27·0	27·0	46·2
Serampore	47·1	49·1	23·6	43·2	Patna City	19·8	13·3	14·3	12·3
Utterpara	9·4	37·7	47·2	...	Gya	36·9	30·7	39·6	12·3
Howrah	25·2	29·1	24·6	25·2	Arrah	47·9	45·5	20·3	21·6
Bali	28·1	31·6	28·1	24·6	Muzufferpore	24·3	29·2	21·9	24·3
Krishnagar	26·5	9·5	18·9	14·1	Durbhanga	40·9	13·3	37·0	36·2
Ranaghat	12·0	12·0	18·0	18·0	Chupra	38·2	48·3	19·3	11·1
Santipore	26·3	17·5	8·8	...	Bhagulpore	26·2	9·9	16·3	
Jessore		6·1	6·1	12·2	Monghyr	57·9	58·8	37·1	46·1
Rampore Beauleah	63·1	39·4	31·5	36·8	Purneah	10·4	20·8	6·9	13·9
Darjiling	22·2	51·9	51·9	14·8	Poori	14·7	18·9	16·8	16·8
Dacca	13·0	18·8	24·0	13·0	Total ...	29·7	29·5	25·0	19·4

It will be seen that last week the highest birth-rate was returned from Naraingunj (70·4) and the lowest from Midnapore (7·7). No births were registered during the week in Utterpara, Santipore, Chittagong and Bhagulpore towns.

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 20·4 per 1,000 of the population. The rate of the week is 10·5 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	32·6	36·9	24·2	34·3	20·3	30·9	20·4

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 4th Oct. 1890.	11th Oct. 1890.	18th Oct. 1890.	25th Oct. 1890.	Towns.	Weeks ending— 4th Oct. 1890.	11th Oct. 1890.	18th Oct. 1890.	25th Oct. 1890.
Burdwan	30·5	24·4	22·9	22·9	Naraingunj	16·6	37·3	24·8	41·4
Midnapore	15·5	27·9	13·4	9·3	Chittagong	9·4	16·4	14·1	...
Hughli and Chinsurah	34·6	27·9	29·5	14·6	Comillah	7·7	15·4	11·6	23·1
Serampore	29·4	43·2	47·1	39·3	Patna City	14·9	20·4	15·9	15·9
Utterpara	28·3	28·3	37·7	...	Gya	47·1	54·0	60·1	34·8
Howrah	18·9	18·3	17·3	19·5	Arrah	13·2	23·9	12·0	6·4
Bali	24·6	26·1	24·6	25·1	Muzufferpore	25·5	24·3	38·9	14·6
Krishnagar	19·9	5·7	7·6	3·8	Durbhanga	35·4	26·7	20·5	29·9
Ranaghat	6·0	12·0	24·0	24·0	Chupra	34·2	27·2	20·1	
Santipore	12·3	3·5	8·8	...	Bhagulpore	14·5	14·5	17·3	...
Jessore	18·4	30·6	...	30·6	Monghyr	30·7	29·8	21·7	24·4
Rampore Beauleah	36·6	49·7	42·0	49·9	Purneah	10·4	17·3	6·9	20·8
Darjiling	22·2	44·5	51·9	44·5	Poori	25·2	42·0	25·2	16·9
Dacca	17·5	18·2	18·2	25·9	Total ...	23·0	25·3	22·3	20·4

It will be seen that last week the highest mortality occurred in the town of Serampore (60·8) and the lowest in Krishnagar (3·8). No deaths were registered during the week in Utterpara, Santipore, Chittagong and Bhagulpore towns.

Measured by last week's mortality, the highest annual death-rates from cholera, fever and other causes occurred in the followin g towns :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Chupra	7·0	Darjiling	44·5	Serampore	13·7
Mozufferpore	6·1	Rampore Beauleah ...	36·8	Gya	12·9
Arrah	6·0	Serampore	31·4	Poori	12·6
Patna City	3·6	Jessore	30·6		
Monghyr	3·6	Narainganj	24·8		
Durbhanga	3·1	Gya	21·2		

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 1·9 from cholera, against 2·2 per 1,000 in the preceding week; 10·4 from fever, against 11· ; 2·8 from bowel-complaints, against 3·7 ; ·4 from injury, against ·1 ; and 4·8 from other causes, against 5·7 in the preceding week. The mortality from bowel-complaints is noticeably severe only in the Serampore town, there being six deaths (11·8 per 1,000 of the population). No deaths were registered from small-pox during the week.

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	19·6	Christians ...	7·5	Under 1 year ...	143·4
Females	21·3	Hindus ...	20·9	1 and under 5 years ...	30·8
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	92	Mahomedans ...	19·8	5 „ 10 „ ...	16·0
				10 „ 15 „ ...	16·2
				15 „ 20 „ ...	11·6
				20 „ 30 „ ...	9·6
				30 „ 40 „ ...	16·0
				40 „ 50 „ ...	12·9
				50 „ 60 „ ...	14·1
				60 years and upwards ...	51·4

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,

The 15th November 1890. *Sanitary Commissioner for Bengal.*

REPORT ON THE STATE OF THE SALT MARKET FOR THE SECOND QUARTER OF 1890-91.

No. 830B, dated Calcutta, the 14th November 1890.

From—K. G. GUPTA, Esq., Secretary to the Board of Revenue, L.P.,

To—The Secretary to the Government of Bengal, Financial Department.

I AM directed by the Board of Revenue to submit the following report on the state of the salt market for the second quarter of 1890-91, comprising the months of July, August, and September 1890.

SALT.

The HON'BLE F. M. HALLIDAY.

2. The quantity of salt of every description cleared during the quarter under report amounted to 25,14,57[illegible] maunds 20 seers 8 chittacks, against 26,51,986 maunds 8 seers 5 chittacks in the previous quarter, and 23,98,512 maunds 30 seers 14 chittacks in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 58,64,525-11, against Rs. 62,34,543-12 in the previous quarter, and Rs. 55,10,452-14 in the corresponding quarter of the previous year.

3. The quantity of excise salt sold in Orissa during the quarter under review and the quantity which remained in store at the close of the quarter are shown in table I :—

TABLE I.

No transactions in sea-imported salt have been reported for the quarter from the Ports of Cuttack, Pooree, and Balasore.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF MUNICIPALITIES IN BENGAL DURING 1889-90.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 21st November, 1890.

RESOLUTION.

READ—

The reports from the several Commissioners of Divisions on the working of the Municipalities in Bengal (except Calcutta) during the year 1889-90.

Read again—

The Resolution reviewing the divisional reports on the working of Municipalities during the year 1888-89.

The following Resolution reviews the reports submitted by Commissioners of Divisions on the working of municipalities during the year 1889-90.

2. *Number of Municipalities.*—The total number of municipalities in existence at the close of the year was 147 as in the preceding year. The municipalities of Assensole and of the Suburbs of Calcutta were abolished for reasons explained in paragraph 4 of last year's Resolution; and two new municipalities, namely Cossipore-Chitpore and Munickollah, comprising portions of the Suburban Municipality, were established during the year. Since the close of the year the Khagoul and Garwa manicipalities have been abolished.

The statement in Appendix A shows the date of establishment of each municipality in the province, the population within municipal limits, and the actual number of rate-payers in each. The average proportion of rate-payers to the whole population in the municipalities for which complete figures are given was 17·9 per cent., against 17·85 of the previous year.

3. *Elective System.*—The system under which two-thirds of the total number of Commissioners fixed for each municipality are elected by the rate-payers was in force in all the municipalities except those named below:—

Bettiah.	Gurwa.	Lohardugga.
Chanduria.	Jajpore.	Nalchitty.
Chogda.	Jamui.	Netrokona.
Chyebassa.	Jehanabad.	Perozepore.
Colgong.	Jhalda.	Raghunathpore.
Cox's Bazar.	Jhalokati.	Roserah.
Daltongunge.	Julpigoree.	Sitamarhi.
Darjeeling.	Kendrapara.	Sonamuki.
Daudnugger.	Khoolna.	Tikari.
Debhatta.	Lalgunge.	

4. *Results of elections held during the year.*—The two newly-formed municipalities of Cossipore-Chitpore and Manicktollah having been allowed the franchise, the first general elections were held in them. Out of 3,026 and 1,507 registered voters in those towns, 944 and 822 persons respectively attended the poll and voted. The elections were warmly contested in several wards, and it is said that the people generally took a lively interest in the matter. Of 103 bye-elections held under section 27 to fill up vacancies in the ranks of Commissioners, 91 were conducted successfully; the remaining 12 failed owing to nominations of candidates not having been submitted by the electors, within the time prescribed by the rules. The largest attendance of voters at the poll was 70·7 of the total number of qualified voters. These minor elections, the details of which are furnished in the table in Appendix B, appear to have excited no particular interest in most cases.

5. *Constitution of Committees.*—The following statement shows, division by division, the constitution of the Committees of the various municipalities during the year:—

Division.	Nominated.	Elected.	Total.	Officials.	Non-officials.	Europeans.	Natives of India.	Remarks.
Burdwan	136	228	364	48	316	21	343	The professional occupation of Municipal Commissioners is not stated in all the Reports. This point is, however, one of much importance and full information will be given in future years.
Presidency	230	327	557	53	504	24	533	
Rajshahye	88	97	185	44	141	35	150	
Dacca	110	107	217	33	184	12	205

Total ...	968	1,144	2,112	343	1,769	190	1,922	

The following table shows the percentage of officials and Europeans to the total number of Commissioners during 1889-90 and the previous eight years:—

	Officials.	Europeans.		Officials.	Europeans.
1881-82 ...	26·3	22·9	1886-87 ...	15·6	9·1
1882-83 ...	25·3	21·7	1887-88	16·2	9·4
1883-84 .	24·5	21·2	1888-89 ...	16·0	8·9
1884-85 ...	18·0	12·1	1889-90 ...	16·1	9·0
1885-86 ...	16·1	10·1			

It is clear that, so far as the *personnel* of the Municipal Committees is concerned, full scope has been given to the principle of allowing the townspeople to manage their own affairs.

6. *Meetings of Committees.*—The largest number of meetings held by any municipality was 41 at Serampore with an average attendance of 56·8 per cent. of the members. The highest average percentage of attendance was attained in the municipalities noted in the margin. The following table shows the municipalities which held more than twenty meetings with the average percentage of attendance at each meeting:—

Name of Municipality.	No. of meetings.	Percentage of attendance.
Kandi ...	23	91·8
Debhatta ...	25	87·5
Cossipore-Chitpore ...	11	87·5
Colgong ...	15	86·3
Satkhira ...	25	84·1

District.	Name of Municipality.	Number of meetings.	Average percentage of attendance.
Hooghly ...	Serampore ...	41	56·8
Howrah ...	Bali ...	32	63·7
Pooree ...	Pooree ...	31	49
Nuddea ...	Santipore ...	28	40·8

Burdwan ...	Cutwa ...	21	46·6
Nuddea ...	Ranaghat ...	21	44·6
Tipperah ...	Comilla ...	21	43·3

The smallest number of meetings was held in the municipalities of Balasore and Jugdishpore, where the Commissioners met only once a quarter with an average percentage of attendance of 62·5 and 50· respectively.

Detailed information on the subject of the meetings held by the various municipalities is given in Appendix C. The attendance was on the whole satisfactory, and the statistics show that a large amount of time and trouble was gratuitously and unsparingly devoted by the Municipal Commissioners to the discharge of their duties.

7. *Municipal Benches.*—The Municipal Benches in the province tried 16,604 cases of nuisance and breach of conservancy rules, in which 14,730 persons were convicted and 2,209 acquitted. The average amount of fines imposed on each offender varied from Rs. 4-2-8 in Jamalpore, in the Monghyr district, to Re. 0-2-1 in the Nuddea Municipality. The statement below shows the work done in detail:—

Division.	Name of the Municipal Bench.	Number of cases tried.	Number of persons convicted.	Number of persons acquitted.	Number of persons remaining under trial at the close of the year.	Amount of fines inflicted.	Amount of fines realised.
